UNITED STATES BANKRUPTCY COURT
CENTRAL DISTRICT OF CALIFORNIA
LOS ANGELES DIVISION

In re:)	Case No. 2:17-bk-13634 WB
)	
)	Chapter 11
BALDWIN PARK CONGREGATE HOME, INC.)	
)	SECOND REPORT OF THE
)	PATIENT CARE OMBUDSMAN
)	
)	
Debtor.)	(No Hearing Required)

Pursuant to the order directing the appointment of a Patient Care Ombudsman entered by this court on June 12, 2017, Peter C. Anderson, the United States Trustee duly appointed Joseph Rodrigues, the California State Long-Term Care Ombudsman, as the Patient Care Ombudsman in this case.

In compliance with the notice of appointment, the Patient Care Ombudsman is submitting his second 60-day report.

October 17, 2017

Respectfully submitted,

/s/Joseph Rodrigues

Joseph Rodrigues
State Long-Term Care Ombudsman

SECOND REPORT OF THE PATIENT CARE OMBUDSMAN

WISE & Healthy Aging is the designated Long-Term Care (LTC) Ombudsman Program for Los Angeles County and is the local representative of the Office of the State LTC Ombudsman. As mandated by the federal Older Americans Act (42 U.S.C. 3058g), LTC Ombudsman representatives identify, investigate and resolve complaints that are made by, or on behalf of residents of LTC facilities that relate to action, inaction or decisions that may adversely affect the health, safety, welfare or rights of residents. Lizette Arzola, MSW, MSG is the local Ombudsman representative assigned to this facility.

Baldwin Park Congregate Home is located at 3462 Vineland Avenue, Baldwin Park, California. The California Department of Public Health, Licensing and Certification, licenses this facility as a Congregate Living Health Facility (CLHF). CLHFs provide the following basic services: inpatient care including medical supervision, 24-hour skilled nursing and supportive care, pharmacy, dietary, social and recreational. The primary need of the CLHF resident shall be for availability of skilled nursing care on a recurring, intermittent, extended, or continuous basis. This care is less intense than that provided in general acute care hospitals but more intense than that provided in skilled nursing facilities.

1 The following information describes the number of visits made
2 to the facility (complaint and non-complaint related), observations
3 about staffing, food, supplies, the environment, the general status
4 of the residents, any complaints made by or on behalf of residents
5 to the LTC Ombudsman Program, and any changes in the census of the
6 facility.
7

8
9 The licensed capacity of the facility is 12, with a current
10 occupancy of 11 as of October 11, 2017. Staffing schedules for
11 September and October 2017 were analyzed and from review and during
12 unannounced visits, the staffing appeared sufficient to meet the
13 needs of the residents.
14

15
16 The local Ombudsman Program has not received any concerns
17 involving vendors, utilities, or external support factors that may
18 impact resident care.
19

20 The Ombudsman representative has made efforts to communicate
21 with the Department of Public Health - Los Angeles County Home
22 Health Agency Unit regarding the facility. Follow-up information
23 has not been received at this time. Any information received will
24 be submitted in the next report to the court.
25
26

27 The local Ombudsman Program has conducted three visits during
28

1 this reporting period, covering August, September, and October 2017.
2 All visits during this reporting period were during the 7:00 a.m. to
3 7:00 p.m. shift and occurred on August 25, September 14, and October
4 5, 2017.
5

6
7 During the three visits, the facility appeared to have
8 sufficient staff and there appeared to be sufficient fresh food.
9 The environment was clean and there were no safety hazards noted.
10 All residents appeared comfortable and clean and did not express any
11 concern regarding their care or supervision. During each Ombudsman
12 visit, there were outside visitors present, the majority of which
13 did not express any concerns regarding care or supervision.
14

15
16 On August 24, 2017, the facility reported via a verbal phone
17 report to the local Ombudsman office regarding a concern of resident
18 abandonment by the family. The facility also reported possible
19 concern that the resident was being financially abused as the family
20 member who was refusing to pick up the resident was also the
21 recipient of the resident's Social Security payments. The local LTC
22 Ombudsman office recommended that the facility report any concerns
23 regarding suspected abuse via a formal written Report of Suspected
24 Dependent Adult/Elder Abuse form and provided the Administrator,
25 Joseph Cambe, with information regarding mandated reporting
26 guidelines.
27
28

1 On August 25, 2017, the Ombudsman representative made efforts
2 to meet with the resident regarding the situation. He was asleep
3 and not easily roused. On September 14, 2017, the Ombudsman
4 representative made efforts again to follow-up with the resident,
5 but the resident was no longer at the facility. The resident was
6 discharged home to a family member on September 8, 2017. As of
7 September 18, 2017 a formal written report of suspected abuse had
8 not been received by the local LTC Ombudsman Program. On that same
9 date, the Ombudsman representative contacted the Administrator to
10 determine if a report had been created. The Administrator stated
11 that the resident's family member came to pick up the resident and
12 that he did not report financial abuse because after further
13 interaction with the resident's family member, he determined that
14 the family member was not financially abusing the resident.
15 According to the Administrator, the resident was happy to leave with
16 his family member.
17
18
19

20 During the August 25, 2017 visit, the local Ombudsman Program
21 received a complaint regarding the facility staff and/or physician
22 not providing the necessary assistive medical devices for a non-
23 verbal, paralyzed resident. There was limited action taken by the
24 Ombudsman representative as she did not receive consent from the
25 resident's conservator prior to the resident being transferred from
26 the facility to an acute hospital on August 25, 2017. As of October
27
28

1 5, 2017 the resident had not returned to the facility.
2

3 During the Ombudsman visit on September 14, 2017, there were no
4 complaints received from residents or visitors. The Ombudsman
5 representative noted that there appeared to be a limited supply of
6 gastrostomy tube (g-tube) formula. During this visit, the facility
7 had 10 residents, seven of whom required g-tube formula. The
8 Ombudsman representative observed there to be approximately one to
9 one and a half boxes of each formula. The Ombudsman representative
10 was informed by facility staff that that the current supply should
11 last approximately two days for the current needs of the residents.
12 The Ombudsman representative was further notified that an order was
13 made on September 14, 2017 to Beachwood Medical for the g-tube
14 formula and that it was expected to arrive by September 15, 2017.
15 Per the Ombudsman representative's request, the facility provided a
16 copy of the invoice dated September 15, 2017 indicating that the
17 facility made the order.
18
19
20
21

22 On October 5, 2017, the Ombudsman representative noted that
23 there again appeared to a limited supply of g-tube formula. On this
24 same date, the facility had 10 residents, approximately six of whom
25 required g-tube formula. The Ombudsman representative again
26 observed there to be limited supply of g-tube formula. The
27 Ombudsman representative was again informed that the current supply
28

1 would last approximately two days and that an order would be made
2 the following day, October 6, 2017. Per the Ombudsman
3 representative's request, the facility provided a copy of the
4 invoice dated October 5, 2017, indicating that the order was made.
5 On October 11, 2017, the Ombudsman representative discussed this
6 concern with the Administrator as this was the second time she had
7 observed the concern. The Administrator stated that supply orders
8 are generated on Thursdays with deliveries on Fridays. The
9 Ombudsman representative did acknowledge that the September 14 and
10 the October 5, 2017 visits were made on Thursdays, however the
11 Ombudsman representative recommended that the facility increase the
12 amount of g-tube formula that is readily available, especially in
13 light of emergency preparedness considerations.
14
15
16

17 On October 5, 2017, the Ombudsman representative noted that the
18 temperature throughout the facility was much warmer than usual.
19 Upon reviewing the two thermostats, the Ombudsman representative
20 noted that the temperatures were 82 degrees Fahrenheit and 79
21 degrees Fahrenheit at approximately 6:30 p.m. The Ombudsman
22 representative documented this by taking photographs of the
23 thermostats. The Ombudsman representative brought the temperature
24 concern to Licensed Vocational Nurse (LVN) Stephanie Manalo, who
25 reported that staff has been instructed not to change the locked
26 thermostats. The Ombudsman representative immediately contacted the
27
28

1 Administrator who stated that he would go to the facility the next
2 day to ensure that the air conditioning unit was working properly.
3 On October 6, 2017, the Ombudsman representative spoke with the
4 Administrator who reported that the air conditioning units were
5 working appropriately. On October 11, 2017, after further review of
6 the thermostat photographs taken by the Ombudsman representative on
7 October 5, 2017, the Ombudsman representative noted that the air
8 conditioning units were turned off. On this same date, the
9 Ombudsman representative contacted the Administrator, who denied
10 turning off the air conditioning and denied knowledge of staff
11 turning off the units. He stated that he would investigate further.
12 According to the Administrator there are two keys to the
13 thermostats, one of which he has in his possession, and one is in
14 the nurse's station. The Ombudsman representative reminded the
15 Administrator of the importance of ensuring that the facility is set
16 to a comfortable and safe temperature at all times.
17
18
19

20 On October 5, 2017, the Ombudsman representative noted a
21 concern regarding nail care for a resident. The Ombudsman
22 representative noted the toe nails of a confused resident appeared
23 to be long and unkempt. The Ombudsman representative notified the
24 LVN of the concern. The Ombudsman representative also contacted the
25 resident's spouse who stated that she would follow-up with the
26 facility regarding podiatry care.
27
28

1 It is the recommendation of the Patient Care Ombudsman that the
2 facility follow mandated elder and dependent abuse reporting laws,
3 stock adequate g-tube food supplies for daily use and enough to get
4 them through an emergency, and ensure proper temperatures within the
5 building at all times.
