The fair value of the options at December 31, 2014, calculated using the Black-Scholes model, was €750 thousand, while the fair value was €0 thousand at December 31, 2015. The decrease in fair value has been recorded as a finance expense amounting to €750 thousand recorded in 'Other net finance income/expense' in the Consolidated Income Statement (an expense of €1,572 thousand in 2014). As of December 31, 2015 the listed price of these bonds was 7.75% (99.38% in 2014).

The key data for the valuation model included the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

| | 12.31.15 | 12.31.14 |
|---|---|---|
| 'Spot Abengoa ' Price (euros) | 0.20 | 1.83 |
| 'Strike ' Price (euros) | 6,05 | 6.05 |
| Maturity | 02/03/2017 | 02/03/2017 |
| Volatility | 73% | 43% |
| Number of shares | 26,750,000 | 35,500,000 |

## Exchangeable notes Atlantica Yield 2017

On March 5, 2015, Abengoa S.A. issued a senior unsecured exchangeable notes into existing ordinary shares of Atlantica Yield, a subsidiary of Abengoa S.A. whose shares are listed on the NASDAQ Global Select Market, for USD 279 million.

The principal terms and conditions that have been determined are the following:

a) The size of the Offering is USD 279 million. The Notes will mature on March 5, 2017.

b) The Notes will accrue a fixed annual coupon of 5.125% payable semi-annually in arrear, beginning on September 5, 2015.

c) The Notes will be initially exchangeable into 7,202,602.23 shares of Atlantica Yield (exchange property) at an exchange price of USD 38.736 per share. The Notes will be voluntarily exchangeable into shares of Atlantica Yield since September 1, 2015 as set out in the Terms and Conditions, subject to cash payment in certain circumstances. On December 31, 2015 the exchanged price was adjusted to 36.417 dollars per share of Atlantica Yield after the last dividend distribution of December 15, 2015.

d) As of December 31, 2015 certain noteholders have exchanged a total amount of 265,000 thousand dollars. The rest of noteholders amounted to 14,000 thousand dollars remain unexchanged.

e) Notes will be jointly guaranteed by certain affiliates.

In connection with the dividend per Atlantica Yield received until September 30, 2015 the exchange property has been adjusted as follows:

- Dividend of USD 0.2592 per Atlantica Yield received on 16 March 2015, the exchange price has been adjusted to USD 38.439 and the exchange property comprises 7,258,169.53 Atlantica Yield Shares, with effect from March 25, 2015.
- Dividend of USD 0.34 per Atlantica Yield received on June 15, 2015, the exchange price has been adjusted to USD 38.083 and the exchange property comprises 7,326,189.56 Atlantica Yield shares, with effect from June 24, 2015.
- Dividend of USD 0.40 per Atlantica Yield received on September 15, 2015; the exchange price has been adjusted to USD 37.286, with effect from September 24, 2015.
- Dividend of USD 0.43 per Atlantica Yield received on December 15, 2015; the exchange price has been adjusted to USD 36.417, with effect from December 24, 2015

The value of the liability component of the exchangeable bonds on December 31, 2015 amounts to €12,169 thousand.

Since the commencement of the exchange period for the Exchangeable Notes Atlantica Yield 2017 on September 1, 2015 (as set out the Terms and Conditions) through December 31, 2015, exchange notices for a total nominal amount of USD 265 million, equivalent to 7,202,738 shares of Atlantica Yield, have been received and exchanged (see Note 6.2). The income recognized due to the exchange in the Consolidated Income Statement for the ended December 31, 2015 amounts to €90,274 thousand according to IAS 32 and IFRIC 19 (see Note 30.3).

In addition, at the end of the year 2015, the valuation of the embedded derivative liability component generated at the issuance of the convertible note calculated by the Black Scholes method was €4,676 thousand with an impact on the income statement of €25,680 thousand (€26,136 thousand in 2014) as a consequence of the conversion and a financial expense of €455 thousands due to valuation differences). The value of the derivative at the end of the year 2015 was €30,356 thousand.

The key data for the valuation model included the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

| | 12.31.2015 | 12.31.2014 |
|---|---|---|
| 'Spot Abengoa ' Price (euros) | 19.29 | 33.41 |
| 'Strike ' Price (euros) | 36.42 | 38.74 |
| Maturity | 03/05/2017 | 03/05/2017 |
| Volatility | 76% | 31% |
| Number of shares | 384,404 | 7,202,602 |

## Convertible notes 2019

On January 17, 2013, Abengoa, S.A. issued €400 million aggregate principal amount among qualified and institutional investors of convertible notes due 2019 (the '2019 Convertible Notes'). The notes are convertible into class B shares. In summary, the final terms and conditions of the issuance are as follows:

a) The Notes were issued for four hundred million euros (€400 million) with maturity set at 6 years.

b) The Notes accrue a fixed annual interest of 6.25% payable semiannually.

c) Notes are convertible, at the option of noteholders into fully paid class B shares.

d) In the event that investors decide to exercise their right of conversion, the Company may decide to repay the notes in shares, cash or a combination of cash and shares.

e) The 2019 Convertible Notes are convertible into class B shares of the Parent Guarantor credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The initial conversion price is €3.27 for each class B share of the Company. The conversion price has been adjusted to €3.04 per share of Abengoa as a result of the Capital Increase completed on October 29, 2013 and in April, 2014, the conversion price was again adjusted to €2.98 per share of Abengoa following a dividend payment in excess of the dividend threshold permitted without adjustment in the conversion price. Finally, on April, 2015 the conversion price was adjusted to 2.94€/share after the dividends distribution in the excess over the maximum distribution allowed by law without adjustments for price conversion.

f) The notes are jointly guaranteed by certain group subsidiaries.

During April 2015, Company launched an offer with the aim of converting up to €200 million Bonds into fully paid class B shares of Abengoa and a cash amount in accordance with the terms and conditions of the notes, inviting the bond holders to exercise their conversion right in their corresponding class B shares and a cash amount based on the terms and conditions of the bond.

Subsequently, the Company, in accordance with the terms and conditions of the Auction contained in the Invitation Memorandum dated April 7, 2015, decided to accept applications for conversion from Noteholders corresponding to a total principal amount of €238.3 million (representing 59.6% of the total principal amount of Notes outstanding), above the initial amount addressed. On April 9, 2015, once the accelerated bookbuilding process of class B was completed, the cash amount that the company has to pay to the accepting noteholders has been set at €25,366.81 per €100,000 principal amount of Notes, amounting to €60,449 thousand the total cash amount to be paid to noteholders. The expense recognized at ended year 31, 2015 amounts to €15,141 thousand due to the conversion.

At the beginning of 2014, the Board of Directors expressly and irrevocably stated, with binding effect, that in relation to the right conferred by Clause 6 (j) (Settlement in cash) of the Terms and Conditions of this convertible bond, which grants Abengoa the right to choose the type of payment, the Company shall not exercise the cash settlement option in the event that bondholders decide to exercise their conversion right early during the period granted for that effect and Abengoa, S.A. shall therefore only settle this conversion right in shares. Accordingly, the fair value at the beginning of the year 2014 of the derivative liability embedded in the convertible bond, which totaled €62,894 thousand, was reclassified as equity since after that date the conversion option meets the definition of an equity instrument. As a consequence of the conversion, on April 2015 the amount of the instrument has been reduced to €25,425 thousand.

The carrying value of the liability component of the notes at December 31, 2015 amounts to €137,900 thousand (€323,209 thousand in 2014).

## Ordinary notes Abengoa 2015

At December 1, 2009, Abengoa, S.A. closed its process of issuance of Ordinary notes for €300 million. In summary, the terms and conditions of the issuance are as follows:

(a) The Notes were issued for three hundred million euros (€300 million) maturing on five (5) years

(b) The Notes accrue a fixed annual interest of 9.625% payable semiannually.

(c) The Notes are jointly guaranteed by Abengoa, S.A. and certain subsidiaries of the Group.

On februrary 25, 2015 the Note has been matured, proceeding its settlement under the terms and conditions of the note, all by cash.

## Ordinary notes Abengoa 2016

On March 31, 2010, Abengoa S.A. issued ordinary Notes to qualified investors and institutions in Europe for the amount of €500 million. In summary, the final terms and conditions of the issuance are as follows:

a) The Notes were issued for five hundred million euros (€500 million) with maturity set at 6 years.

b) . The fixed annual payable twice-yearly interest on the Notes is 8.50% annually.

c) The Notes are guaranteed jointly by certain subsidiaries of the group.

As of December 31, 2015 the listed price of these bonds was 14.97%.

On March 28, a Noteholders General assembly was called but finally couldn´t take place on first call. The Company has not considered appropriate to make a second call given that, since the standstill agreement was signed, the right associated to the ordinary notes maturing on 2016 have been suspended for a period of 7 months from the date of signing of the standstill agreement.

## Ordinary notes Abengoa 2017

On October 19, 2010, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued an ordinary bonds for USD 650 million among qualified and institutional investors in accordance with Rule 144A of the Securities Act of 1933 and subsequent amendments thereto. In summary, the terms and conditions of the issue that were established definitively are:

a) The Notes issue is for an amount of six hundred and fifty million United States dollars (USD 650 million) and matures at seven (7) years.

b) The Notes will accrue fixed annual interest of 8.875%, payable every six months.

c) The Notes are jointly and severally guaranteed by Abengoa, S.A. and certain Group subsidiaries.

As of December 31, 2015 the listed price of these bonds was 15.00%.

## Ordinary notes Abengoa 2018

On February 5, 2013, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued Ordinary Notes to qualified and institutional investors for €250 million. On October 3, 2013, Abengoa Finance, S.A.U. issued €250 million of additional and fungible notes, at a price of 100.25%, which is equivalent to a yield of 8.799%. Furthermore, on November 5, 2013, Abengoa Finance, S.A.U. issued €50 million of additional and fungible notes, at a price of 105.25%, which is equivalent to a yield of 7.408%. The terms and conditions of the issuance are as follows:

a) The aggregate nominal amount of the Notes is five hundred and fifty million euros (€550 million) with maturity set at five (5) years.

b) The Notes accrue a fixed annual interest of 8.875% payable semiannually.

c) The Notes are jointly guaranteed by Abengoa, S.A. and certain subsidiaries of the group.

As of December 31, 2015 the listed price of these bonds was 16.00%.

## Ordinary notes Abengoa 2020

On December 13, 2013, Abengoa Finance, S.A. Unipersonal, a subsidiary of Abengoa, S.A., issued an ordinary bond for USD 450 million among qualified and institutional investors. In summary, the terms and conditions of the issuance are:

a) The Notes was issued for an amount of USD 450 million and matures in six (6) years.

b) The Notes accrue fixed annual interest of 7.75%, payable every six months.

c) The Notes are jointly guaranteed by Abengoa, S.A. and certain group subsidiaries.

As of December 31, 2015 the listed price of these bonds was 14.99%.

On April 16, 2015, Abengoa Finance, S.A.U., a subsidiary of Abengoa S.A., issue an ordinary bond for €375 million among institutional and qualified investors. In summary, the terms and conditions of the issuance are as follows:

a) The Notes were issued for €375 million and Notes will mature on April 2020.

b) The Notes accrue a fixed annual interest of 7.00% payable semiannually.

c) The Notes are jointly guaranteed by Abengoa, S.A. and certain subsidiaries of the Group.

As of December 31, 2015 the listed price of these bonds was 13.000%

### Ordinary notes Abengoa 2021

On March 27, 2014, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued an ordinary bond for €500 million among qualified and institutional investors. In summary, the terms and conditions of the issue that were established definitively are:

a) The Notes was issued for an amount of €500 million and matures in seven (7) years.

b) The Notes will accrue fixed annual interest of 6.00%, payable every six months, on March 15 and September 15.

c) The Notes are jointly and severally guaranteed by Abengoa, S.A. and certain group subsidiaries.

As of December 31, 2015 the listed price of these bonds was 12.00%.

### Euro-Commercial Paper Programme

On January 29, 2013, Abengoa, S.A. carried out a euroCommercial Paper (ECP) program for a maximum of €500 million with one-year maturity. Through this program, the company was able to issue notes between one and twelve months maturity, diversifying its financing options in the capital markets.

On June 10, 2014, the maximum amount of the program was increased to €750 million.

On December 22, 2014, the program was renewed for one more year and for the same amount. As of December 21, 2015 the program has finished.

At the end of the year 2015 the balance of the program amounts to €56,727 thousand (€464,141 thousand in 2014) in which € 20,454 thousand are due and not attended.

### Commercial Paper Abengoa México

On June 30, 2014 Abengoa Mexico S.A.de C.V. signed the short-term revolving exchange traded certificate program for an amount up to 3,000 million Mexican pesos as of December 31, 2014. As of December 31, 2015 these amount reach 2,080 million Mexican pesos equivalent to €111,428 million. (€43,502 million as of December 31, 2014).

The certificates will accrue a variable interest rate calculated based in the `Tasa de interés interbancaria de equilibrio` ('TIIE') plus a margin to be determined in the moment of each use.

20.4. The balance of interest payable related to notes and bonds is €72,809 thousand as of December 31, 2015 (€77,628 thousand as of December 31, 2014) and is included under current 'Bonds and Notes'.

## 20.5. Finance lease liabilities

Finance lease creditors as of the end of 2015 and 2014 were:

| Finance lease | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Present values of future payments for finance lease | 36,542 | 34,991 |
| Liabilities: minimum payments for finance lease: | | |
| Less than 1 year | 18,001 | 11,879 |
| From 1 to 5 years | 15,219 | 19,439 |
| More than 5 years | 6,252 | 7,108 |
| Net book value: | | |
| Technical installations and machinery | 30,342 | 27,865 |
| Information processing equipment | 3,093 | 3,045 |
| Other tangible assets | 23,618 | 17,705 |

## 20.6. Other loans and borrowings

The following table sets out the movement of other loans and borrowings at the 2015 and 2014 year end:

| | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Sale and lease back | 35,410 | 12,211 |
| Derivative premiums payable | 35,051 | 65,010 |
| Low interest loans | 9,362 | 6,775 |
| Preferred shares of ACBH (Note 20.1) | 48,426 | - |
| Non-recourse confirming due and unpaid | 304,204 | - |
| Non-recourse confirming non due group suppliers | 202,316 | - |
| Holding LAT Brasil's preferential shares (Note 7.1) | 243,070 | - |
| Loans with public institutions and others | 24,645 | 37,406 |
| **Total** | **902,484** | **121,402** |

# Note 21.- Grants and other liabilities

Grants and Other Liabilities as of December 31, 2015 and 2014 are shown in the following table:

| | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Grants | 145,799 | 146,684 |
| Suppliers of non-current assets | 1,975 | 2,488 |
| Long-term trade payables | 86,419 | 63,434 |
| **Grants and other non-current liabilities** | **234,193** | **212,606** |

The increase in grants and other non-current liabilities are mainly due to the increase in other non-current liabilities for the dividend payable to Atlantica Yield because of the preferred shares of Abengoa Concessoes Brasil Holding (ACBH) for the loss of control of Atlantica Yield and its subsequent consolidation by the equity method.

# Note 22.- Provisions and contingences

## 22.1. Provisions for other liabilities and charge

The following table shows the movement of the non-current heading of 'Provisions for other liabilities and charges' for the years 2015 and 2014:

| Item | Taxes | Liabilities | Dismantling | Total |
|---|---|---|---|---|
| **Balance as of 12.31.13** | **15,215** | **29,651** | **33,178** | **78,044** |
| Net increase/ (decrease) with impact in profit and loss | 389 | 2,611 | 1,469 | 4,469 |
| Translation differences | 17 | 763 | 1,173 | 1,953 |
| Reclassifications and other movements | - | - | - | - |
| Transfer to liabilities held for sale | - | (19) | (9,330) | (9,349) |
| **Balance as of 12.31.14** | **15,621** | **33,006** | **26,490** | **75,117** |
| Net increase/ (decrease) with impact in profit and loss | 623 | 11,749 | 2,914 | 15,286 |
| Translation differences | 11 | 1,080 | (669) | 422 |
| Reclassifications and other movements | - | - | - | - |
| Transfer to liabilities held for sale | - | (104) | (27,956) | (28,060) |
| **Balance as of 12.31.15** | **16,255** | **45,731** | **779** | **62,765** |

The decrease of total provisions in 2015 is mainly due to the decrease of dismantling provisions recognized in companies sold to Atlantica Yield and therefore, have begun to be consolidated by the equity method.

The decrease of total provisions in 2014 was mainly due to the classification of dismantling provisions of Atlantica Yield as liabilities held for sale.

### Provision for tax and legal contingencies

This provision represents the Group's best estimates in connection with risks relating to tax contingencies arising during the normal course of the Group's business, fundamentally in Latin America, when it is considered probable that there will be an outflow of resources in the medium or long term, which has been estimated being comprised in a period between 2 to 5 years, although the development of the contingencies and the new facts and circumstances that may arise overtime could change such estimated settlement period.

There are also provisions recorded by Group companies in relation with court rulings and unfavorable tax inspections that are under appeal but have not been resolved yet. For these tax disputes the Group considers that it is probable that there will be an outflow of resources in the medium term (between 2 and 5 years).

### Provision for liabilities

This provision includes the Group's best estimates of probable cash outflows in connection with litigation, arbitration and claims in progress in which the various group companies are defendants as a result of the activities they carry out. Management considers that these liabilities will likely be settled in the medium or long term, which has been estimated being comprised in a period between 2 to 5 years.

### Dismantling provision

This provision is intended to cover future expenditures related to the dismantlement of the solar plants and it will be likely to be settled with an outflow of resources in the long term (over 5 years).

## 22.2. Contingent liabilities

As of December 31, 2015 Abengoa and its Group of companies are involved in certain claims and litigations both against and in their favor. Such matters arise during the Group's normal course of business and represent the technical and economic claims that the contractual parties typically invoke.

We have briefly summarized below the most significant proceedings, which in the Management's opinion are not expected to have a material adverse effect in the Consolidated Financial Statements, individually or as a whole, or for which the future outcome cannot be reliably estimated.

- In May 2000, Abengoa Puerto Rico S.E., a subsidiary of Abengoa S.A, brought a lawsuit against the Electricity Power Authority (Autoridad de Energía Eléctrica, 'AEE') of Puerto Rico and terminated the agreement that both parties had entered into in relation to an EPC project for the construction of an electricity power station in Puerto Rico, in which the AEE was the Principal Contractor. The referred lawsuit contained different claims such as, inter alia, withholding payments, defaulted invoices, loss of future profits damages and several other costs, which tentatively amounted to USD 40 million.

  In response to the lawsuit brought by Abengoa Puerto Rico, S.E., the AEE brought a counterclaim premised upon unlawful termination and consequential damages relating to the agreement with Abengoa Puerto Rico, S.E. and, at the same time, brought an additional lawsuit for the same amount against Abengoa and its insurer, American International Insurance Co. of Puerto Rico. The amount claimed by the AEE is approximately USD 450 million. Currently the lawsuit is under hearing phase.

- In relation to the contingent liabilities described in Note 22.2 to the 2014 Consolidated Financial Statements concerning the initiation in 2013 of an inspection by the European Commission of Abengoa and the companies that are directly or indirectly under its control, including Abengoa Bioenergy Trading Europe B.V., with regard to their possible participation in anti-competitive agreements or actions allegedly aimed at manipulating the results of the valuation of the Platts daily closing price (CDD), and to deny access to one or more companies wishing to participate in the valuation process of the CDD price, we point out that on December 7, 2015, the European Commission notified and made public the initiation of a formal investigation procedure in relation to the said inspection (case "AT-40054 Oil and Biofuel Markets" concerning the alleged manipulation of the Platts index in relation to, among other companies, Abengoa, S.A. and its subsidiaries Abengoa Bioenergía, S.A. and Abengoa Bioenergy Trading Europe B.V). We point out that until that date what had taken place were preliminary investigations, and we had not be notified of the statement of charges.

- On February 11, 2010, the temporary joint venture (Unión Temporal de Empresas) formed by Befesa Construcción y Tecnología Ambiental, S.L. and Construcciones Alpi, S.A. (the 'UTE') took legal action against the Comunidad de Regantes de las Marismas del Guadalquivir (CRMG) regarding the project for the modernization of the Guadalquivir Marshes irrigation área (Proyecto de Modernización de la Zona Regable de las Marismas del Guadalquivir). The UTE asked for the following main claims: a) the declaration of the unlawful (i) termination of contract performed by the CRMG, (ii) application of penalties for delay; and (iii) other damages requested; and b) the termination of the agreement due to CRMG's breaches of contract, requesting a liquidation balance amounting to €32,454 thousand and additional €1,096 thousand based on different grounds. The CRMG answered the claim on November 4, 2010, requesting generically the dismissal of the UTE's claim.

  On December 12, 2014, Abeinsa Infraestructuras Medio Ambiente, S.A. (Abeima, formerly Befesa Construcción y Tecnología Ambiental, S.L.) has been served with the claim brought by the CRMG against the UTE and its members (Abeima and Construcciones Alpi, S.A.), on the basis of the same dispute, project and factual issues of the aforementioned proceedings. The CRMG claims €120,353 thousand (approximately broken down as follows: €14,896 thousand for damages –works poorly executed, extra costs, alleged damages, etc. €-20,718 thousand for loss of profit and €84,682 thousand for penalties for delay). As at the date o these Consolidated Financial Statements the claim has been answered by the members of UTE.

  Both civil proceedings are now suspended by the existence of criminal implications, particularly because they were pending of the preliminary investigation number 487/2013, by "Juzgado de Instrucción nº16 Sevilla". In this last proceeding is has not been asked the guarantee of any amount to Abeinsa nor any person who works or has worked for her nor for Befesa or any other entity related to Abengoa.

## 22.3. Claims

Regarding the legal claims or legal action initiated by creditors in connection with any past due and unpaid debts, we point out that the Company is not aware that any legal claim whatsoever has been initiated, nor any other significant legal measure by any other creditor in connection with past due and unpaid debts at year-end 2015, except for the following:

- Within the Bioenergy business, there are legal claims which are mostly due to commercial disputes filed in the United States for a total amount of approximately €11,235 thousand. These claims are generally in the response phase. On the other hand, there are applications to establish "liens" (preventive embargoes) in the United States for a total amount of approximately € 1,008 thousand. These applications require no response from the company subject to the claim.

- As regards the Industrial Engineering and Construction business, there are legal claims totaling approximately €75.5 thousand. These claims are in negotiation with the counterparties. Furthermore, there are claims in tort for a total aggregate amount of € 40 thousand, also in negotiation.

- In Mexico, there are claims in tort totaling around € 0.3 thousand that are in negotiation.

- In Brazil there are legal claims totaling approximately €20,115 thousand, all of which are ongoing.

- In Chile, claims in tort have been received for a total of approximately €389.8 thousand and an additional €30.5 thousand that are currently in negotiation with the counterparties.

After the end of the reporting period litigation claims regarding unattended accrued debts of different nature and amounts have been booked in these Consolidated Financial Statements amounting up to USD 550,823 thousand, €152,178 thousand, 31,443 thousand Mexican Pesos and 5,463,811 Chilean Pesos.

Also liens requirement have been registered in Bioenergy in the US for an amount of 42,580 thousand dollars.

## 22.4. Contingent assets

As of December 31, 2015 Abengoa and its Group of companies do not have significant contingent assets.

# Note 23.- Third-party guarantees and commitments

## 23.1. Third-party guarantees

At the end of 2015, the Group deposited to third parties (clients, financial entities, Public Entities and other third parties), directly by the group or by the parent company to other Group companies, various Bank Bond and Surety Insurances as guarantee to certain commitments (Bid bonds, performance and others) amounted to €1,629,787 thousand (€1,672,837 thousand at December 31, 2014).

In addition, the Group deposited to third parties (clients, financial entities, Public Entities and other third parties), directly by the group or by the parent company to other Group companies, various guarantees through the declarations of intention and documented commitments undertaken as guarantee of certain commitments (Bid Bonds, performance, financing and others) amounted to €7,053,099 thousand (€5,789,243 thousand at December 31, 2014).

The following table details the guarantees undertaken by de Company classified by commitment type at December 31, 2015:

| Typology | Guarantees/Surety Insurance | Guarantees | Total 31.12.2015 |
|---|---|---|---|
| Bid Bond | 118,467 | 1,043,025 | 1,161,492 |
| Performance: | | | |
| Materials supply | 2,136 | 1,141,954 | 1,144,090 |
| Advance payments | 86,718 | 199,278 | 285,996 |
| Execution (construction/collection/payments) | 1,284,264 | 4,368,819 | 5,653,083 |
| Quality | 35,488 | 36,773 | 72,261 |
| Operation and maintance | 72,121 | 263,250 | 335,371 |
| Dismantilling | 3,726 | - | 3,726 |
| Other | 26,867 | - | 26,867 |
| **Subtotal** | **1,629,787** | **7,053,099** | **8,682,886** |
| Group Company financing guarantees | - | 1,561,591 | 1,561,591 |
| **Total** | **1,629,787** | **8,614,690** | **10,244,477** |

The most significant variations of the undertaken guarantees with third parties, regarding the information presented in the 2014 Consolidated Financial Statements, mainly relate to various guarantees (declarations of intention and documented commitments) deposited by the Parent Company to other Group Company for the submission of bids amounted to €917,171 thousand (mainly related to the execution of certain concessional projects of water desalination in Oman), as well as, the performance guarantees amounting to €823,382 thousand (mainly related to the material supplies and the construction of concessional projects of thermo-solar power generation in Chile and Israel and water desalination in San Antonio (united States) which is partially offset by the guarantees cancelation related to confirmings and the invoices paid for the execution of projects.

- In addition, regarding to the collateral granted to third parties (guarantees, etc.), there have been no significant breaches since the date of the communication provided by the Article 5 bis of the Ley Concursal, at year end 2015, which could lead to an outflow of resources and, therefore, to the recognition of a liability, with the following exceptions:

- In this sense, the most important issue relates to the recent execution of the performance bond by the client Portland General Electric Company after rescinding the EPC of Project Carty for electricity generation in the United States, currently in the testing phase, due to breach of contract by the EPC contractor, for a maximum guaranteed amount of USD 145.6 million, in which the company has proceeded to begin negotiations with all the parties involved to reach an agreement, as announced recently by the client. At year-end 2015, the company proceeded to recognize a related liability for this project amounting to €94 million

- The Board of Directors believe that no significant additional liabilities, other than those described and recorded in the Consolidated Statement of Financial Positions as of December 31, 2015, may arise from the facts described herein.

## 23.2. Contractual obligations

The following table shows the breakdown of the third-party commitments and contractual obligations as of December 31, 2015 and 2014 (in thousands of euros):

| 2015 | Total | Up to one year | Between one and three years | Between three and five years | Subsequent |
|---|---|---|---|---|---|
| Loans with credit institutions | 5,398,326 | 4,888,251 | 84,193 | 81,352 | 344,530 |
| Notes and bonds | 3,300,825 | 3,300,825 | - | - | - |
| Liabilities due to financial leases | 36,542 | 17,020 | 6,874 | 1,629 | 11,019 |
| Other loans and borrowings | 659,414 | 557,047 | 42,393 | 54,181 | 5,793 |
| Obligations under operating Leases | 10,450 | 2,487 | 2,814 | 2,457 | 2,692 |
| Purchase commitments | 2,836,092 | 2,498,391 | 318,156 | 2,815 | 16,730 |
| Accrued interest estimate during the useful life of loans | 1,644,957 | 491,474 | 646,296 | 271,111 | 236,076 |

| 2014 | Total | Up to one year | Between one and three years | Between three and five years | Subsequent |
|---|---|---|---|---|---|
| Loans with credit institutions | 6,274,113 | 1,243,596 | 1,208,884 | 2,000,368 | 1,821,265 |
| Notes and bonds | 3,852,958 | 1,096,965 | 1,029,873 | 867,288 | 858,832 |
| Liabilities due to financial leases | 34,991 | 10,927 | 12,796 | 3,668 | 7,600 |
| Other loans and borrowings | 121,402 | 24,373 | 71,327 | 21,206 | 4,496 |
| Obligations under operating Leases | 13,826 | 3,867 | 5,537 | 3,035 | 1,387 |
| Purchase commitments | 1,072,848 | 933,071 | 123,123 | 5,517 | 11,137 |
| Accrued interest estimate during the useful life of loans | 2,599,142 | 589,443 | 908,675 | 500,009 | 601,015 |

Amounts disclosed as Loans with credit institutions correspond to the notional amounts and not to the amortized costs as they has been recorded in the consolidated statement of financial position following the accounting policy and the basis of presentation (see Note 2.18).

## 23.3. Pledged Assets

- Related to pledged assets book value at December 31, 2015, as guarantee of the total debt, the following table shows the breakdown:

| Book value | Balance of 12.31.15 (*) |
|---|---|
| Property, plants and equipment | 103,539 |
| Fixed assets in projects | 4,004,016 |
| Investments accounted for using the equity method | 838,314 |
| Clients and other receivable accounts, financial investments and cash and cash equivalents | 1,119,797 |
| **Total** | **6,065,666** |

(*) Includes the pledged assets related to assets held for sale and discontinued operations disclosed in Note 7 to these Consolidated Financial Statements as of December 31, 2015 and amounting to a sum of 1,336,430 thousand euros.

It should be noted, for the avoidance of doubt, that when determining the book value of the pledged assets, it has been taken into account the concept of "garantía real" provided by the Spanish law (applying by analogy to those assets that are pledged under other legislation).

- On the other hand, regarding the pledged assets deposited by the Group since the date of application by Abengoa S.A. of Article 5 bis of Ley Concursal, at year ended 2015, the Group has not been forced to give any asset as guarantee of debt, with the following exceptions:

  - An amount of €9,726.6 thousand deposited in a pledged bank account of Abengoa Bioenergy Netherlands, B.V. which was executed by the beneficiary as a consequence of the maturity of the secured obligation.

  - An amount of €3,542.3 thousand deposited in a bank account pledged on behalf of Abener Energía, S.A., whose pledge collateral was executed by the beneficiary thereof as a result of the maturity of the secured obligation.

# Note 24.- Tax situation

## 24.1. Application of rules and tax groups in 2015

Abengoa, S.A. and other 214 and 220 consolidated subsidiaries (see Appendixes XI and XVI to these Consolidated Financial Statements) in 2015 and 2014, respectively, have filed its 2015 income taxes following the rules for tax consolidation in Spain under the 'Special Regime for Tax Consolidation' Number 2/97.

All the other Spanish and foreign companies included in the Consolidation group file income taxes according to the tax regulations in force in each country on an individual basis or under consolidation tax regulations. The fiscal policy of the company is based on compliance with the regulations in force in the countries where it operates.

In order to calculate the taxable income of the consolidated tax Group and the consolidated entities individually, the accounting profit is adjusted for temporary and permanent differences, recording the corresponding deferred tax assets and liabilities. At each Consolidated Income Statement date, a current tax asset or liability is recorded, representing income taxes currently refundable or payable. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates.

Income tax payable is the result of applying the applicable tax rate in force to each tax-paying entity, in accordance with the tax laws in force in the territory and/or country in which the entity is registered. Additionally, tax deductions and credits are available to certain entities, primarily relating to inter-company trades and tax treaties between various countries to prevent double taxation.

Abengoa, S.A., as the dominant company of the tax group regarding Corporate income tax with registered number 02/97, and Value Added Tax number 284/08 has been inspected by the Spanish Tax authorities regarding the following concepts and periods

| | |
|---|---|
| Corporate income tax | 2009 - 2011 |
| Value added tax | 03/2010 – 12/2011 |
| Withholdings and on-account payments for personal income tax for residents and non-residents | 03/2010 – 12/2011 |

After the end of the reporting period 2015 the Company has signed the inspection reports in conformity which brought to an end the abovementioned inspection proceedings. Besides, Abengoa´s Management has regularized Corporate Income Tax statements for fiscal years 2012 to 2014 by applying the same criteria determined by the inspection body for the years under inspection (2009 to 2011). The Company has registered in the Consolidated Financial Statements as of December 31, 2015 all accounting impacts arising from the regularizations described above (FY 2009 to 2014), and the regularization of the tax rate of Deferred Tax Assets affected by them, registering an expense amounting approximately €123 million due to interests on arrears regarding VAT and Corporate Income Tax. No sanction whatsoever has been imposed to Abengoa by the inspecting authorities. Amounts corresponding to VAT have been already transferred to the Spanish Tax Authorities (Agencia Tributaria). Amounts corresponding to Corporate Income Tax have been compensated in its entirety against Deferred Tax Assets of the tax group and, thus, have not affected the Company´s cash and cash equivalents.

## 24.2. Deferred tax assets and liabilities

At the end of 2015 and 2014 the analysis of deferred tax assets and deferred tax liabilities is as follows:

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Tax credits for tax loss carryforwards | 476,166 | 487,278 |
| **Tax credits for deductions pending application** | | |
| Tax credits for export activities | 210,216 | 242,872 |
| Tax credits for R+D+i | 66,888 | 72,981 |
| Other deductions | 87,913 | 165,201 |
| **Temporary differences** | | |
| Provisions | 148,446 | 128,951 |
| Impairment | 58,240 | 29,313 |
| Remuneration plans | 908 | 19,386 |
| Derivatives financial instruments | 70,493 | 104,936 |
| Non-deductible expenses (Art. 20 y 22 LIS, Art. 14 TRLIS, Art. 7 Ley 16/2012) | 295,158 | 191,295 |
| Consolidation adjustments, homogenization adjustments and other | 170,323 | 61,396 |
| **Total deferred tax assets** | **1,584,751** | **1,503,609** |

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Accelerated tax amortization | 46,049 | 69,701 |
| Business combination | 21,372 | 44,971 |
| Unrealized exchange differences | 47,369 | 18,600 |
| Derivatives financial instruments | 17,851 | 2,988 |
| Consolidation adjustments, homogenization adjustments and other | 185,048 | 145,537 |
| **Total deferred tax liabilities** | **317,689** | **281,797** |

Article 29 and the Thirty-Fourth Transitional Provision of Law 27/2014 published in the official state gazette (BOE), on November 28, 2014, introduces changes of the Spanish tax system which include changing the general tax rate to 28% in 2015 and to 25% in 2016 (from 30% in 2014), The Impact derived to the reclassification of certain deferred tax assets and liabilities at the new tax rates has resulted in an income of €7 million in the income statement and €1.1 million under equity for the company.

Most of the tax credits for Tax loss carryforwards correspond the United States (€205 million), Brazil (€150 million), the Netherlands (€58 million) and Spain (€21 million).

Tax loss carryforwards in Brazil have been generated in years with poor meteorological conditions which have negatively affected sugarcane production. From 2011 a series of plans are carrying out to improve the quality of biological assets, to increase milling capacity and cogeneration plant capacity, with the ultimate purpose of increasing assets profitability. Tax loss carryforwards are expected to be offset with future profits in Brazil given the absence of temporary limits under the Brazilian tax regulations. Additionally, at the end of 2012 an internal restructuring was made to allow the obtaining of additional profits of certain intangible assets related to the Bioenergy business. During 2014, a program of tax reform was offered by the local government which has allowed the tax loss carryforward compensation with other tax obligations. Tax loss carryforwards in the United States correspond mainly to projects in an initial stage of development or operation, the application of tax incentives and to other non-recurring losses. Tax loss carryforwards in Spain correspond mainly to the application of tax incentives.

Tax credits for deductions have been generated mainly in Spain. Among these tax credits the larger amount corresponds to deduction on export activities (DAEX), which is calculated as a percentage over investments effectively, made for the acquisition of foreign companies or capital increases in foreign companies. This percentage, which was initially 25% was been gradually reduced since 2007 to reach 3% in 2010. The deduction disappeared in 2011. To benefit from this deduction, among other requirements, the acquisition or incorporation of companies should be directly related to the export of goods and services from Spain. From the year 2012, the Company has not recorded any income in relation to this deduction, as it had been recorded entirely as of December 31, 2011.

In addition, efforts in research, development and innovation activities (R&D&i) that Abengoa has been carrying out during the last years have resulted in the generation of important tax deductions, some of which are recorded as deferred tax assets for an amount of €67 million as of December 31, 2015.

'Other deductions', which have been generated mainly in Spain, correspond primarily to deductions for double taxation (€31 million), environmental deductions (€2 million), deduction for reinvestment of extraordinary benefits (€31 million) and deductions for donations to non-profit organizations (€10 million).

In relation to tax loss carryforwards and deductions pending of application recorded as deferred tax assets, the Company evaluates its recoverability projecting forecasted taxable income for the upcoming years and taking into account the Company tax planning strategy. Deferred tax liabilities reversals are also considered in these projections, as well as any limitation established by tax regulations in force in each tax jurisdiction.

As a consequence of the situation of the Company which has derived the submission of the communication provided by the article 5 bis of Ley Concursal, the Company has derecognized €42 millions of tax credit recognized on previous year. Additionally, it has not been recognized any further deferred tax assets due to the current situation of the Company pending to have greater visibility about the realization of the Industrial Viability Plan (see Note 2.1.1).

On the other hand, the Company has certain tax credits as of December 31, 2015 which it has not capitalized, as it determined that recoverability of such assets is not probable. These tax credits consist mainly of tax loss carryforwards related to our US subsidiaries amounting to €274 million (€35 million in 2014), with expiration dates in 2035; to our South African subsidiaries amounting to €124 million with expiration date in 2016, (€37 million in 2014), to our Mexican subsidiaries amounting to €145 million maturing in 2025,to our Spanish subsidiaries amounting to €524 million ((€89 million in 2014) and to our Brazilian subsidiaries amounting to €61 million (€8 million in 2014), without expiration date in the last two jurisdictions; and R&D&i and environmental tax credits in Spain amounting to €97 million (€89 million in 2014) with expiration dates between 2021 and 2033.

The movements in deferred tax assets and liabilities during 2015 and 2014 were as follows:

| Deferred tax assets | Amount |
|---|---|
| As of December 31, 2013 | 1,281,092 |
| Increase / Decrease through the consolidated income statement | 217,693 |
| Increase / Decrease through the consolidated income statement for change in tax rate | (83,683) |
| Increase / Decrease through other comprehensive income (equity) | 52,651 |
| Increase / Decrease through other comprehensive income (equity) for change in tax rate | (17,925) |
| Transfer to assets held for sale | (58,465) |
| Change in consolidation, various reclassifications and translation diff. | 112,246 |
| **As of December 31, 2014** | **1,503,609** |
| Increase / Decrease through the consolidated income statement | 68,519 |
| Increase / Decrease through the consolidated income statement for change in tax rate | 2,547 |
| Increase / Decrease through other comprehensive income (equity) | (44,023) |
| Increase / Decrease through other comprehensive income (equity) for change in tax rate | (1,384) |
| Transfer to assets held for sale | (3,465) |
| Change in consolidation, various reclassifications and translation diff. | 58,948 |
| **As of December 31, 2015** | **1,584,751** |

| Deferred tax liabilities | Amount |
|---|---|
| As of December 31, 2013 | 327,304 |
| Increase / Decrease through the consolidated income statement | 46,286 |
| Increase / Decrease through the consolidated income statement for change in tax rate | (34,244) |
| Increase / Decrease through other comprehensive income (equity) | (12,563) |
| Increase / Decrease through other comprehensive income (equity) for change in tax rate | (46) |
| Transfers to liabilities held for sale | (7,634) |
| Change in consolidation, various reclassifications and translation diff. | (37,306) |
| **As of December 31, 2014** | **281,797** |
| Increase / Decrease through the consolidated income statement | 91,893 |
| Increase / Decrease through the consolidated income statement for change in tax rate | (4,429) |
| Increase / Decrease through other comprehensive income (equity) | 47,684 |
| Increase / Decrease through other comprehensive income (equity) for change in tax rate | (284) |
| Transfers to liabilities held for sale | (6,704) |
| Change in consolidation, various reclassifications and translation diff. | (92,268) |
| **As of December 31, 2015** | **317,689** |

The detail of tax deferred expenses and incomes recognized at the end of the year 2015 and 2014 for each kind of temporary difference and each kind of tax loss carriforward not used is the following:

| Item | 2015 | 2014 |
|---|---|---|
| Tax credits for tax loss carryforwards | (7,919) | 87,126 |
| **Tax credits for deductions pending application** | | |
| Tax credits for export activities | (32,656) | - |
| Tax credits for R+D+i | (6,093) | 456 |
| Other deductions | (66,976) | (4,109) |
| **Temporary differences** | | |
| Provisions | 30,321 | 64,874 |
| Impairment | 31,660 | (8,185) |
| Remuneration plans | (16,088) | (6,240) |
| Derivatives financial instruments | 7,091 | (14,043) |
| Non-deductible expenses (Art. 20 y 22 LIS, Art. 14 TRLIS, Art. 7 Ley 16/2012) | 135,645 | 50,940 |
| Consolidation adjustments, homogenization adjustments and other | (3,919) | (36,809) |
| **Total deferred tax assets** | **71,066** | **134,010** |

| Item | 2015 | 2014 |
|---|---|---|
| Accelerated tax amortization | (19,859) | 43,970 |
| Business combination | - | (14,268) |
| Unrealized exchange differences | 38,012 | - |
| Consolidation adjustments, homogenization adjustments and other | 69,311 | (17,660) |
| **Total deferred tax liabilities** | **87,464** | **12,042** |

# Note 25.- Trade payables and other current liabilities

25.1. Trade payable and other current liabilities as of December 31, of 2015 and 2014 are shown in the following table:

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Trade payables for purchases of goods | 2,983,046 | 4,034,367 |
| Trade payables for services | 764,627 | 1,061,871 |
| Billings in excess and advance payments from clients | 304,830 | 245,970 |
| Remunerations payable to employees | 40,204 | 52,211 |
| Suppliers of intangible assets current | 10,566 | 12,522 |
| Other accounts payables | 275,979 | 148,227 |
| **Total** | **4,379,252** | **5,555,168** |

At the end of 2015 the total amount of trade payables and other current abilities due and unpaid (principal and interest) amounted to €604 million. Default interests for the above mentioned Liabilities were recognized.

Balances with related parties at the end of 2015 (there is not significant amounts in 2014) are described in Note 33.2

25.2. Nominal values of Trade payables and other current liabilities are considered to approximate fair values and the effect of discounting them is not significant.

25.3. The table below shows the details of the non-recourse confirming carried out with external and group suppliers as at December 31, 2015 at the end 2015 and 2014.

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Non-group amounts payable through Confirming | 1,019,155 | 1,453,360 |
| Group amounts payable through Confirming | 236,687 | 796,849 |
| **Total** | **1,255,842** | **2,250,209** |

Related to these amounts, there are deposits and cash recorded under assets in the Consolidated Statement of Financial Position associated with payment of "non-recourse confirming" for an amount of €464 million (€1,226 million in 2014).

Additionally and based on the new interpretation adopted by the relevant regulatory agencies about the accountancy of non-recourse confirming instruments originated from a group supplier (see Note 2.22), at year ended 2015, it is recognized as "Corporate Financing" in the current liabilities in the Consolidated Statement of Financial Position an amount of €202 million corresponding to supplier balances associated to non-recourse confirming which has been originated from a group supplier (see Note 20.1).

Finally, It has been reclassified to corporate financing an amount of €304 million relating to due and not paid confirming transactions (principal and interests)

25.4. Details on supplier maturities are provided in the following table:

| Maturity | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| Up to 3 months | 1,871,857 | 3,753,497 |
| Between 3 and 6 months | 658,922 | 177,927 |
| Over 6 months | 452,267 | 102,943 |
| **Total** | **2,983,046** | **4,034,367** |

In compliance with the duty to report the average period of payment to suppliers stated in Law 15/2010 and the eighth additional provision of Ley de Sociedades de Capital` according to the new composition given by the second final provision of `Ley 31/2014 de reforma de la ley de Sociedades de Capital` the company informs that the average period of payment to suppliers related to all the companies in the Group in Spain has been 95 days.

The following detail required by the article 6 of the January 29, 2016 resolution of the Instituto de Contabilidad y Auditoría de Cuentas, related to the information to be provided about the average period of payment during the year

| | Days |
|---|---|
| **Average period of payment** | **95** |
| Paid transactions ratio | 60 |
| Unpaidtransactions ratio | 133 |

| | Amount |
|---|---|
| Total payments | 1,256,739 |
| Total outstanding payments | 1,163,119 |

There is not comparable information in compliance with the only additional provision of the mentioned resolution.

# Note 26.- Construction contracts

Further to the information set out in Note 2.24.b) relating to the accounting treatment of construction contracts, the table below includes aggregated information on outstanding construction contracts to which IAS 11 was applied at the end of the years 2015 and 2014:

| 2015 | Construction contracts |
|---|---|
| Operating revenues | 2,848,322 |
| Billings in excess and advance payments received | 1,547,573 |
| Payment withholdings | 15,704 |
| Account receivables | 3,719,520 |
| Account payables | 2,965,134 |

| 2014 | Construction contracts |
|---|---|
| Operating revenues | 4,696,358 |
| Billings in excess and advance payments received | 1,364,078 |
| Payment withholdings | 13,577 |
| Account receivables | 3,926,009 |
| Account payables | 3,851,257 |

The amount of unbilled revenue by the end of the years 2015 and 2014 is €787,535 and €913,122 thousand, respectively.

The aggregated total amount of the costs incurred and the aggregated total profits (less the related losses) recognized since origin for all the ongoing contracts at December 31, 2015 amount to €12,095,510 thousand and €1,320,385 thousand respectively (€10,908,371 thousand and €1,462,619 thousand in 2014).

# Note 27.- Revenues

The breakdown of Revenues for the years 2015 and 2014 is as follows:

| Item | 2015 | 2014 |
|---|---|---|
| Product sales | 2,416,650 | 2,424,084 |
| Rendering of services and construction contracts | 3,338,832 | 4,726,483 |
| **Total revenue** | **5,755,482** | **7,150,567** |

# Note 28.- Other operating income and expenses

The table below shows the detail of Other Operating Income and Expenses for the years 2015 and 2014:

| Other operating income | 2015 | 2014 |
|---|---|---|
| Work performed by the entity and capitalized and other | 56,970 | 76,035 |
| Grants | 20,582 | 16,732 |
| Income from various services | 118,856 | 95,510 |
| **Total** | **196,408** | **188,277** |

| Other operating expenses | 2015 | 2014 |
|---|---|---|
| Research and development cost | (7,890) | (8,714) |
| Leases and fees | (128,818) | (122,497) |
| Repairs and maintenance | (94,251) | (71,181) |
| Independent professional services | (323,008) | (265,829) |
| Transportation | (98,235) | (78,746) |
| Supplies | (104,807) | (115,543) |
| Other external services | (138,528) | (167,442) |
| Taxes | (96,083) | (85,514) |
| Other minor management expenses | (41,066) | (61,491) |
| **Total** | **(1,032,686)** | **(976,957)** |

In 2015 there is an increase in Other operating income mainly due to higher revenues from various services by the favorable resolution of the Spanish Court of Arbitration, in relation to a losses from project Arizona Solar One LLC, which were covered by an insurance policy, by an amount of €37,1 thousands.

Other operating expenses increased during 2015 over 2014, the increase is mainly due to increased expenses for reparations and maintenance related to technical stoppage planned in our Bioenergy plant in the Netherlands and those related to the pre-operating phase of the ethanol plant in Hugoton in the United States, by higher independent professional services expenses mainly due to works on the financial restructuring process initiated at the beginning of August (see Note 2.1.1) as well as higher transportation costs related to activities of Industrial Production and Engineering and Construction due to increased logistics services managed by Abengoa.

# Note 29.- Employee benefit expenses

The breakdown of employee benefit expense for 2015 and 2014 is as follows:

| Item | 2015 | 2014 |
|---|---|---|
| Wages | (745,940) | (700,818) |
| Social security costs | (137,160) | (141,650) |
| Stock plans and other employee benefits | (13,871) | (29,415) |
| Stock plans and other employee benefits reversal | 57,456 | - |
| **Total** | **(839,515)** | **(871,883)** |

## Variable remuneration plans for managers

There are currently two extraordinary long-term variable remuneration plans for managers.

### 1) Extraordinary Variable Remuneration Plan for Managers – January 2014

This plan, which replaces and cancels the extraordinary plan previously approved in February 2011, was agreed by the Company's board of directors in January 2014 following a proposal by the Appointments and Remuneration Committee.

The plan expires on December 31, 2017 and is designed to help the achievement of the objectives set in the Strategic Plan at an individual level. The plan also requires beneficiaries to remain with the company for the corresponding period and for Abengoa's average share price during the last three months of 2017 to be higher than a specific value. At the end of 2015, there were 302 participants and the plan was worth a total of €66,415 thousand.

### 2) Extraordinary Variable Remuneration Plan for Managers – July 2014

On July 21, 2014, the Board of Directors, at the proposal of the Appointments and Remuneration Committee, unanimously approved a five-year variable remuneration plan (2014-2018).

The plan expires on December 31, 2018 and accrues 20% annually. Its purpose is to incentivize certain managers to stay with the company or to achieve specific personal objectives. The plan requires the beneficiary to be employed by the company for the corresponding period and for the average price of Abengoa's Class B shares during the last three months of 2018 to be higher than a specific value. At the end of 2015, there were 330 participants and the plan was worth a total of € 51,715 thousand.

As of December 31, 2015 the Company has derecognized the existing provision of €57,456 thousand (€43,092 thousand, after tax) regarding the two existing variable remuneration plans for managers, because Abengoa´s Directors considers that the accomplishment of all established requisites in order to consolidate the benefits has a low Probability provided as a consequence of the company situation resulting form the presentation of the communication provided by article 5 bis of the Ley Concursal.

# Note 30.- Finance income and expenses

## 30.1. Finance income and expenses

The following table sets forth our Finance income and expenses for the years 2015 and 2014:

| Finance income | 2015 | 2014 |
|---|---|---|
| Interest income from loans and credits | 40,102 | 45,294 |
| Interest rates benefits derivatives: cash flow hedges | 21,696 | 15,668 |
| Interest rates benefits derivatives: non-hedging | 5,155 | 1,156 |
| **Total** | **66,953** | **62,118** |

| Finance expenses | 2015 | 2014 |
|---|---|---|
| Expenses due to interest: | | |
| - Loans from credit entities | (319,283) | (256,995) |
| - Other debts | (373,377) | (376,580) |
| Interest rates losses derivatives: cash flow hedges | (66,255) | (92,260) |
| Interest rates losses derivatives: non-hedging | (13,249) | (19,557) |
| **Total** | **(772,164)** | **(745,392)** |
| | | |
| **Net financial loss** | **(705,211)** | **(683,274)** |

At the end of the year 2015 finance income has increased when compared to the previous year, mainly due to the change in the time value of our interest rate derivative hedges.

Finance expenses have increased in 2015 when compared to the same period of the previous year, mainly due to increased interest expense from loans and borrowings as a result of the completion of various projects under construction (interest expense is capitalized when a project is under construction), an increase in notes and bonds finance expenses mainly due to our new bonds issued in second half of 2014 and the first half of 2015, as well as to the 2017 convertible bond early repayment by an amount of € 17 million (see Note 20.3), partially offset by a decrease of expenses recognized related to change in time value of interest rate derivatives and a decrease in cash flow hedges due to the reclassification as discontinued operations of results from plants sold to Atlantica Yield under ROFO certain agreement signed during exercise 2015.

The amount of net financial income and expenses relating to project companies amount to €263,564 thousand (€199,323 thousand in 2014)

## 30.2. Net exchange differences

The following table sets out the exchange rate differences for the years 2015 and 2014:

| Net exchange differences | 2015 | 2014 |
|---|---|---|
| Gains and losses from foreign exchange transactions | 22,868 | (6,475) |
| Gains and losses from foreign exchange contracts: cash flow hedges | (27,044) | 11,244 |
| Gains and losses from foreign exchange contracts: non-hedging | - | 266 |
| **Total** | **(4,176)** | **5,035** |

The most significant amounts in net exchange differences during 2015 and 2014 corresponded to the different hedges in several subsidiaries that have not been offset perfectly with the differences generated by the hedged item.

Net exchange rate difference in 2015 for companies which are financed through project debt amounts to €-19,304 thousand (€-29,712 thousand in 2014).

## 30.3. Other net finance income and expenses

The following table sets out 'Other net finance income and expenses' for the years 2015 and 2014:

| Other finance income | 2015 | 2014 |
|---|---|---|
| Profits from the sale of financial assets | 793 | 394 |
| Income on financial assets | 573 | 1,676 |
| Other finance income | 3,392 | 13,085 |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | 90,274 | - |
| Commodity derivatives gains: non hedge | - | 45 |
| **Total** | **95,032** | **15,200** |

| Other finance expenses | 2015 | 2014 |
|---|---|---|
| Loss from sale of financial assets | (745) | (11,337) |
| Losses from partial repayment of the convertible notes due 2014 | (15,141) | - |
| Outsourcing of payables | (73,909) | (84,770) |
| Other financial losses | (118,613) | (81,112) |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | (34,030) | (9,631) |
| Loss derived from commodity price derivatives: cash flow hedge | (6,413) | - |
| Commodity derivatives losses: non hedge | (5,383) | (4,853) |
| **Total** | **(254,234)** | **(191,703)** |
| **Other net finance income/expenses** | **(159,202)** | **(176,503)** |

At the end of 2015 other finance income has increased in comparison to the same period of the previous year, mainly due to a gain of €90.3 million recorded as a consequence of the conversion right exercised by the holders to convert the exchangeable notes due 2017 into Atlantica Yield shares (see Note 20.3).

Other finance expenses have increased mainly due to the 2019 convertible bonds early conversion that resulted in a loss of approximately €15.1 million, as well as due to the increase in other finance expenses, due to banking fees and commissions related to guarantees, letters of credit, banking transfers and other banking services, as well as due to the recognition of default interest on overdue and not paid debts derived from the current situation of the company related to the process of 5 bis (see Note 2.1.1). Additionally, other finance expenses increased due to losses related to the 2017 convertible bond early repayment, the valuation of the convertible bond embedded derivative of Befesa and the ineffective recognized in commodity derivatives and the valuation of commodity price derivatives whichh has begun to be considered as non-hedged derivatives after transaction was no longer considered highly probable.

The net amount of "Other incomes and financial expenses for companies" which are financed through project debt amounts to €-44,674 thousand (€-45,112 thousand in 2014).

## 30.4. Non-monetary items of derivative financial instruments

The table below provides a breakdown of the line item 'Fair value gains on derivative financial instruments' included in the Consolidated Cash Flow Statement for the years 2015 and 2014:

| Fair value gains on derivative financial instruments | 2015 | 2014 |
|---|---|---|
| Change in fair value of the embedded derivative of convertible debt and shares options | (34,030) | (9,631) |
| Non-cash profit/(losses) from cash flow hedges | 3,966 | (3,087) |
| Non-cash profit/(losses) from derivatives - non-hedge accounting | (12,988) | (22,988) |
| Other non-cash gains/losses on derivative instruments | (11) | 561 |
| **Fair value gains (losses) on derivative financial instruments (non cash items)** | **(43,063)** | **(35,145)** |
| **Cash gains (losses) on derivative financial instruments (monetary effect)** | **(55,416)** | **(74,287)** |
| **Total fair value gains / (loss) on derivative financial instruments (Notes 30.1 & 30.3)** | **(98,479)** | **(109,432)** |

# Note 31.- Income tax

The detail of tax rate for the period 2015 and 2014 is as follows:

| Item | 2015 | 2014 |
|---|---|---|
| Current tax | (6,490) | (63,322) |
| Deferred tax | (16,398) | 121,968 |
| **Total income tax benefit/(expense)** | **(22,888)** | **58,646** |

The reconciliation between the theoretical income tax resulting from applying statutory tax rate in Spain to income before income tax and the actual income tax expense recognized in the Consolidated Income Statement for the years 2015 and 2014 is as follows:

| Item | 2015 | 2014 |
|---|---|---|
| Consolidated profit before taxes | (1,175,548) | 85,434 |
| Regulatory tax rate | 28% | 30% |
| **Corporate income tax at regulatory tax rate** | **329,153** | **(25,630)** |
| Income tax of associates, net | (2,266) | 2,105 |
| Differences in foreign tax rates | 53,196 | 12,507 |
| Incentives, deductions and tax losses carryforwards | (380,564) | 124,460 |
| Effect in consolidated income statement for change in Spanish companies tax rate | 6,976 | (49,439) |
| Other non-taxable income/(expense) | (29,383) | (5,357) |
| **Corporate income tax** | **(22,888)** | **58,646** |

Differences between theoretical tax and actual tax expense arise mainly from:

- Companies based in jurisdictions with statutory tax rates different from Spanish statutory tax rate
- Application in Spain of tax incentive for the transfer of use of intangible assets under Article 23 of the Revised Text of the Spanish Income Tax Act and application also in Spain of the tax incentive which exempts any profits generated abroad for international projects involving the export of goods and services from Spain. Generation of tax deductions, mainly in Spain, among which we can outline R&D&I deductions, double taxation deductions and deductions on donation expenses. Regularization realized as a consequence of the tax inspection (see Note 24.1).No tax credits activation of negative impacts derived from the current situation of the Company pending to have greater visibility about the realization of the Industrial Viability Plan, Abengoa´s Directors have decided not to recognize the deferred tax assets (see Note 2.1.1)
- Application in Spain of changing the general tax rate to 28% in 2015 and to 25% in 2016 (from 30% in 2014)
- The heading 'Other non-taxable income/ (expense)' includes, among others, the regularization of the tax expense of the previous year as well as certain permanents differences arisen.

# Note 32.- Earnings per share

## 32.1. Basic earnings per share

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares outstanding during these periods:

| Item | 2015 | 2014 |
|---|---|---|
| Profit from continuing operations attributable to equity holders of the company | (1,195,415) | 147,708 |
| Profit from discontinuing operations attributable to equity holders of the company | (18,063) | (22,416) |
| **Average number of ordinary shares outstanding (thousands)** | **898,612** | **835,371** |
| Earnings per share from continuing operations (€ per share) | (1.33) | 0.18 |
| Earnings per share from discontinuing operations (€ per share) | (0.02) | (0.03) |
| **Earnings per share from profit for the year (€ per share)** | **(1.35)** | **0.15** |

## 32.2. Diluted earnings per share

To calculate the diluted earnings per share, the average weighted number of ordinary shares issued and outstanding is adjusted to reflect the conversion of all the potential diluting ordinary shares.

The potential diluting ordinary shares corresponded to the warrants on Class B shares issued in November 2011. On October 1, 2015 the share capital has been subscribed for the total amount of the outstanding warrants. The assumption is that all warrants would be exercised and a calculation is made to determine the number of shares that may have been acquired at fair value based on the monetary value of the subscription rights of the warrants still to be exercised. The difference between the number of shares issued assuming the exercise of the warrants, and the number of shares calculated based on the above, is included in the calculation of the diluted earnings per share.

In the fiscal year 2015 there are not diluting factors affecting the diluted (losses) earnings for share.

| Item | 2015 | 2014 |
|---|---|---|
| Profit for the year | | |
| - Profit from continuing operations attributable to equity holders of the company | (1,195,415) | 147,708 |
| - Profit from discontinuing operations attributable to equity holders of the company | (18,063) | (22,416) |
| - Adjustments to attributable profit | - | - |
| **Profit used to determine the diluted earnings per share** | **(1,213,478)** | **125,292** |
| | | |
| Average weighted number of ordinary shares outstanding (thousands) | 898,612 | 835,371 |
| - Warrants adjustments (average weighted number of shares in outstanding since issue) | - | 20,039 |
| **Average weighted number of ordinary shares affecting the diluted earnings per share (thousands)** | **898,612** | **855,410** |
| | | |
| Diluted earnings per share from continuing operations (€ per share) | (1.33) | 0.17 |
| Diluted earnings per share from discontinuing operations (€ per share) | (0.02) | (0.02) |
| **Diluted earnings per share to the profit for the year (€ per share)** | **-1.35** | **0.15** |

(1) On October 1, 2015, a capital increase has taken place through the exercise of the warrants (see Note 18).

# Note 33.- Other information

## 33.1. Personal

The average number of employees classified by category during 2015 and 2014 was:

| | Average number of employees in 2015 | | | Average number of employees in 2014 | | |
|---|---|---|---|---|---|---|
| Categories | Female | Male | % Total | Female | Male | % Total |
| Directors | 60 | 488 | 1.9 | 65 | 503 | 2.1 |
| Management | 433 | 1,592 | 7.2 | 435 | 1,517 | 7.2 |
| Engineers | 1,446 | 3,291 | 16.9 | 1,362 | 3,375 | 17.4 |
| Assistants and professionals | 1,199 | 1,758 | 10.5 | 1,108 | 1,480 | 9.5 |
| Operators | 981 | 16,252 | 61.3 | 865 | 15,893 | 61.6 |
| Interns | 247 | 373 | 2.2 | 242 | 336 | 2.2 |
| **Total** | **4,366** | **23,754** | **100** | **4,077** | **23,104** | **100** |

The average number of employees is 25% in Spain (25% in 2014) and 75% abroad (75% in 2014).

The average number of employees during the year with disabilities above or equal to 33% is 110 (126 in 2014).

The total number of people employees classified by category as of December 31, 2015 and 2014 was:

| | 2015 | | | 2014 | | |
|---|---|---|---|---|---|---|
| Categories | Female | Male | % Total | Female | Male | % Total |
| Board of Directors | 2 | 10 | 0.1 | 3 | 13 | 0.1 |
| Directors | 56 | 464 | 2.4 | 62 | 507 | 2.3 |
| Management | 393 | 1,379 | 8.1 | 466 | 1,668 | 8.8 |
| Engineers | 1,188 | 2,649 | 17.5 | 1,392 | 3,120 | 18.6 |
| Assistants and professionals | 960 | 1,742 | 12.3 | 1,111 | 1,531 | 10.9 |
| Operators | 748 | 12,032 | 58.2 | 791 | 13,045 | 56.8 |
| Interns | 124 | 185 | 1.4 | 247 | 366 | 2.5 |
| **Total** | **3,471** | **18,461** | **100** | **4,072** | **20,250** | **100** |

## 33.2. Related parties

Dividends distributed to related parties during the year 2015 amounted to €29,329 thousand (€31,601 thousand in 2014).

- During 2015 the only transactions associated with related parties were the following:
  - Service provision agreement signed between Simosa and Mrs. Blanca de Porres Guardiola. The amount invoiced in 2015 was €95 thousand.
  - Service agreement signed between Equipo Económico, S.L. (company related to D. Ricardo Martínez Rico, member of Board of Directors) and Abengoa, S.A., Abengoa Concessions, S.L., Abeinsa Ingeniería and Construcción Industrial, S.A. The amount invoiced in 2015 was €319 thousand.
  - As of May 8, 2015, Inversión Corporativa IC, S.A. (Abengoa's main shareholder) has granted a securities lending agreement for 95,259,977 class B shares of Abengoa S.A. During last June, this securities lending agreement has been canceled. This transaction has born a market interest rate and has accrued compensation in favor of Inversión Corporativa IC, S.A. amounting to €123 thousand.

- Advisory agreement signed on September 23, 2015 between Mr. Felipe Benjumea LLorente and Abengoa S.A., by an annual gross amount of 1,086 thousand and with duration until December 31, 2016. During 2015, no amount has been invoiced regarding this agreement. On March 1, 2016 the Board of Directors unanimously approved the conclusion of the advisory contract signed with Mr.Felipe Benjumea Llorente without compensation. During the period of time that the contract was in force, it has not been paid any remuneration and, at the contract settlement, it has not been paid any amount for the period it was in force.

These operations were subject to review by the Abengoa Audit Committee.

- At year-ended 2015, the most significant transactions related to companies accounted by the equity method correspond to those made by APW-1 and Atlantica Yield companies (see Note 7.1.a)

  In relation with the transactions made with APW-1, It has been signed contracts with the Project company CSP Atacama I and PV Atacama I for the construction ("Engineering, Procurement and Construcción (EPC) Agreements") of the solar plants located in Atacama dessert.

Relating to the transactions with Atlantica Yield It has been signed with the majority of the Project companies owned by Atlantica Yield for the operation and maintenance "Operation and Maintenance Agreement") of every asset they own. Additionally, Abengoa signed the following contracts with Atlantica Yield

- Right of First Offer Agreement: contract which give right to Atlantica Yield of the first offer in the case of any asset disposal of Abengoa.
- Trademark License Agreement: contract of use by Atlantica Yield of the commercial trademark owned by Abengoa.
- Financial Support agreement: contract of financial support through the use of a revolving credit for the treasury needs as well as the maintenance of certain technical and financial guarantees (see Note 23.1) or credit letter in force.
- Support Services Agreement: contract of supply of certain administrative and management services by Abengoa.
- Currency Swap agreement: fixing the Exchange rate USD/€ on cash flow available for distribution of certain thermo-solar assets located in Spain and owned by Atlantica Yield

All these contracts signed with companies consolidated under the equity method have been valued at fair value

The detail of pending balances arisen from transactions with companies accounted by the equity method included in the consolidated statement of financial position at the end of 2015 (at the end of 2014 there were not significant balances)

| Item | Balance as of 12.31.15 |
|---|---|
| Non-current financial investments | 285,635 |
| Inventories | 2,811 |
| Clients and other receivables | 697,969 |
| Current financial investments | 8,582 |
| Grants and other non-current liabilities | 39,172 |
| Trade payables and other current liabilities | 166,832 |

The detail of transactions made with companies accounted by the equity method included in the consolidated statement of financial position at the end of 2015 (at the end of 2014 there were not significant balances)

| Item | 2015 |
|---|---|
| Revenues | 426,059 |
| Other operating income | 1,499 |
| Raw materials and consumables used | (621) |
| Other operating expenses | (195) |
| Financial income | 9,203 |
| Other financial income/(expense), net | 434 |

## 33.3. Employee remuneration and other benefits

Directors are remunerated as established in article 39 of the Bylaws. Directors' remuneration shall consist of all or some of the following concepts, for a total combined amount that shall be agreed by the General Shareholders' Meeting, pursuant to the directors' remuneration policy and conditional, when required by law, on the prior approval of the General Shareholders' Meeting: (a) a fixed fee; (b) expenses for attendance; (c) a share of the profits, under the terms established in Article 48, Paragraph 2, of the company's Bylaws; (d) variable remuneration based on general benchmark indicators or parameters; (e) remuneration through the provision of shares or share options or amounts that are linked to the Company's share price; (f) severance payments, provided that the director is not relieved of office on grounds if failing to fulfill the responsibilities attributable to him/her; and (g) savings or pension systems considered to be appropriate.

As of May 18, 2015, the Company's Board of Directors accepted the resignation from all his executive offices of Mr. Manuel Sánchez Ortega, continuing in office as director, with the category of another external director, and first Vice-Chairman of the Board of Directors and has been appointed member of the International Advisory Board. To cover the vacancy created, the Board of Directors has appointed as CEO Mr. Santiago Seage Medela, with the category of executive director. Furthermore, the Board of Directors has also resolved to accept the resignation of Mrs. María Teresa Benjumea Llorente.

Based on the above, the Company recognized and paid the consideration related to the post-contractual non-competition obligation regarding the resignation of former CEO, Mr. Manuel Sánchez Ortega, for an amount equivalent to the 100% remuneration or all the concepts received in the immediate preceding period, amounting to €4,484 thousand. In relation to the variable annual remuneration (bonus) for 2015 financial year, the Company's Board of Directors, after a favorable report from the Appointments and Remuneration Committee, and due to the expected fulfilling of the objectives for 2015 on which the CEO variable remuneration was based, Mr. Sanchez Ortega, the variable remuneration that was established for current year, which amounted to €3,304 thousand, will only be accrued when the year 2015 annual accounts are approved and audited and, accordingly, will only be paid if the fulfillment of the annual objectives to which the accrual of said remuneration was subject to is verified.

As of July 27, 2015, the Company's Board of Directors accepted the resignation of Mr. Manuel Sánchez Ortega from both the Board of Directors and the International Advisory Board. Furthermore, the Board of Directors has appointed through election by its members (cooptación), as propietary director, Ms. María Teresa Benjumea Llorente.

As of September 23, 2015, the Board of Directors has appointed through election by its members (cooptación), as proprietary director and non-executive Charmain, Mr. José Domínguez Abascal, replacing Mr. Felipe Benjumea Llorente, who has presented his resignation as director and executive Charmain, being appointed as Abengoa's Honorary Chairman.

Consequently, the company has recorded in the Consolidated Financial Statements as of December 31, 2015 the severance payment for early termination of the former executive Charmain, Mr. Felipe Benjumea Llorente, for an amount equivalent to €11,484 thousand which includes: (i) a severance payment for early termination and post-contractual non-competition obligation for an amount equivalent to the 100% remuneration or all the concepts received in the immediate preceding period, amounting to €4,484 thousand, and (ii) a retention bonus amounting to €7,000 thousand.

The Extraordinary General Shareholders' meeting held on October 10, 2015 has approved the resignation tendered on that date of the following proprietary members Mrs. María Teresa Benjumea Llorente, Mr. Fernando Solís Martínez-Campos and Mr. Carlos Sundheim Losada, and has determined the number of directors in the Board of Directors to be 13.

As of November 27, 2015, Abengoa´s Board of Directors accepted the resignation of Mr. Santiago Seage Medela as director. This resignation included his resignation as first Vice Chairman and CEO. In order to fill the vacancy, the Board of Directors appointed Mr. Joaquín Fernández de Piérola Marín as executive director and new General Manager of the Company, who will have the powers expressly delegated in his favour by the Board of Directors but without having for such reason the condition of CEO. As of the same date, the Board delegated in favor of the Chairman of the Board of Directors, Mr. José Domínguez Abascal all the powers except for those that cannot be legally delegated. As a consequence of these new executive functions, such director became an executive director. Finally, the Board of Directors has, as of the date hereof, one sole vice chairman, Mr. Antonio Fornieles Melero without affectly his functions as coordinator.

As of December 31, 2015 the Company has derecognized the existing provision regarding the two existing variable remuneration plans for managers, because it considers that the accomplishment of all established requisites in order to consolidate the benefits provided as a consequence of the company situation resulting form the presentation of the communication provided by article 5 bis of the Ley Concursal.

Salary (both fixed and variable) and allowances paid to the members of Abengoa S.A. in 2015 were €32,193 thousand (€15,833 thousand in 2014).

Detail on individual salaries and benefits in 2015 paid to the Board of Directors are as follows (in thousands of euros):

| Name | Salary | Fixed remuneration | Daily allowance | Short term variable remuneration | Compensation as member of Board Committee | Compensation as officer of other Group companies | Other concepts | Total 2015 |
|---|---|---|---|---|---|---|---|---|
| Felipe Benjumea Llorente | 814 | - | 68 | 3,304 | - | - | 11,484 | 15,671 |
| Aplidig, S.L. (1) | - | - | - | 2,804 | - | - | - | 2,804 |
| Manuel Sánchez Ortega | 543 | - | 57 | 3,304 | - | - | 4,484 | 8,388 |
| Javier Benjumea Llorente | 1,200 | - | 93 | 1,307 | - | 52 | - | 2,652 |

Note (1): Represented by Mr. José B. Terceiro Lomba

Note (2): From 04.06.2014

Additionally, in 2015 overall remuneration for key management of the Company (Senior Management which are not executive directors), including both fixed and variable components, amounted to €7,163 thousand (€11,351 thousand in 2014).

No advanced payments or credits are granted to members of the Board, nor are any guarantees or obligations granted in their favor.

As of December 31, 2015 there existed €3,631 thousand in non-current personnel compensation obligations (€56,659 thousand in 2014).

33.4. In compliance with Royal Decree 1/2010 of July 2, that approves the Capital Corporations Law, the Company reports that no member of the Board of Directors of Abengoa, S.A. and, to its knowledge, none of the individuals related parties as referred to by article 231 in the Capital Corporations Law Act maintains any direct to indirect share in the capital of companies with the same, analogous or complementary kind of activity that the parent company's corporate purpose, nor has any position in any company with the same, analogous or complementary kind of activity that the parent company's corporate purpose. In addition, no member of the Board of Directors has accomplished any activity with the same, analogous or complementary kind of activity that the parent company's corporate purpose.

As of December 31, 2015, members of the Board of Directors who are in turn Directors or Management in other subsidiaries included in the consolidation group are:

| Name | Company | Charge |
|---|---|---|
| D. José Domínguez Abascal | Abengoa Solar, S.A. | Representative, natural person, of Abengoa S.A. |
| | Sociedad Inversora en Energía y Medio Ambiente, S.A. | Representative, natural person, of Abengoa S.A. |
| | Europea de Construcciones Metálicas, S.A. | Representative, natural person, of Abengoa S.A. |
| | Abengoa Research, S.L. | Member of Board of Directors |
| | Abengoa Biotechnology Research, S.A. | Member of Board of Directors |
| | Abengoa Solar Research, S.A. | Member of Board of Directors |
| | Abengoa Energy Crops, S.A. | Member of Board of Directors |
| | Fotovoltaica Solar Sevilla, S.A. | Member of Board of Directors |
| D. Joaquín Fernández de Piérola Marín | Gestión Integral de Recursos Humanos, S.A | Chairman |
| | Abengoa Concessions, S.L. | Chairman |
| | Abengoa Concessions Investments, Ltd. | Member of Board of Directors |
| | Servicios Auxiliares de Administración, S.A. de C.V. | Chairman |
| | Concesionaria Acueducto El Zapotillo, S.A, de C.V | Chairman |
| | Abengoa Servicios Industriales S.A. de C.V. | Chairman |
| | Abengoa Servicios, S.A. de C.V. | Chairman |
| | Consultora de Servicios y Proyectos Centronorte, S.A. de C.V. | Chairman |
| | Servicios Auxiliares Administrativos Tabasco, S.A. de C.V. | Chairman |
| | Abeinsa Monterrey VI, S.A. de C.V. | Chairman |
| | Abengoa México O&M, S.A. de C.V. | Deputy Chairman |
| D. Javier Benjumea Llorente | Abengoa Bioenergía, S.A | Chairman |

In accordance with the record of significant holding in the Company, and as required by the 'Internal Rules and Regulations for Conduct involving Stock Exchange Matters', the shares and the holding percentages of the Company Directors as of December 31, 2015 are:

| | No. of direct class A shares | No. of indirect class A shares | No. of direct class B shares | No. of indirect class B shares | %of total voting rights |
|---|---|---|---|---|---|
| José Domínguez Abascal | 6.000 | - | 36,000 | - | 0.0070 |
| Antonio Fornieles Melero | - | - | 16,400 | - | - |
| Joaquín Fernández de Piérola Marín | - | - | - | - | - |
| José Joaquín Abaurre Llorente | 9.870 | - | - | - | - |
| José Luis Aya Abaurre | 1.210 | - | 344,301 | - | 0.0050 |
| Javier Benjumea Llorente | 3.888 | - | 15,552 | - | 0.0040 |
| José Borrell Fontelles | - | - | 71,695 | - | 0.0010 |
| Mercedes Gracia Díez | - | - | 2,500 | - | - |
| Ricardo Hausmann | - | - | - | - | - |
| Ricardo Martínez Rico | - | - | 2,565 | - | - |
| Claudi Santiago Ponsa | 200 | - | 800 | - | - |
| Ignacio Solís Guardiola | 1,700 | - | 68,000 | - | 0.0200 |
| Alicia Velarde Valiente | 400 | - | 1,600 | - | - |

Throughout out 2015 and 2014 there was no evidence of any direct or indirect conflict of interest situation, in accordance with what is envisaged in Article 229 of the Capital Corporation Law.

## 33.5. Audit fees

The fees and costs obtained by Deloitte, S.L. and other auditors are the following:

| | 2015 | | | 2014 | | |
|---|---|---|---|---|---|---|
| Item | Deloitte | Other auditors | Total | Deloitte | Other auditors | Total |
| Audit fees | 3,691 | 1,247 | 4,938 | 5,221 | 315 | 5,536 |
| Other verification services | 195 | - | 195 | 297 | 12 | 309 |
| Tax fees | 765 | 2,888 | 3,653 | 183 | 4,388 | 4,571 |
| Other audit complementary services | 1,398 | 197 | 1,595 | 1,803 | 131 | 1,934 |
| Other services | 275 | 8,074 | 8,349 | 410 | 3,436 | 3,846 |
| **Total** | **6,324** | **12,406** | **18,730** | **7,914** | **8,282** | **16,196** |

## 33.6. Environmental information

The principles of the environmental policies of Abengoa are based on compliance with the current legal regulations applicable, preventing or minimizing damaging or negative environmental consequences, reducing the consumption of energy and natural resources, and achieving ongoing improvement in environmental conduct.

In response to this commitment to the sustainable use of energy and natural resources, Abengoa, in its Management Rules and Guidelines for the entire Group, explicitly establishes the obligation to implement and certify environmental management systems in accordance with the ISO 14001 International Standard.

Consequently, by year-end 2015, the percentage of Companies with Environment Management Systems certified according to the ISO 14001 Standard per sales volume is 91.58% (89.56% in 2014).

The table below lists the percentage of distribution of the Companies with Certified Environmental Management Systems, broken down by business unit:

| Business unit | ISO 14001-certified companies (% of revenue) |
|---|---|
| Engineering and Construction | 95.24 |
| Industrial Production | 92.25 |
| Concession-type Infraestructure | 63.97 |

## 33.7.- Subsequent events

During the month of February 2016, the investment that Abengoa owned in Shams, which is the owner of a thermo-solar plant of 100 MW developed by the Company in Abu Dhabi (United Arab Emirates) has been sold for a total amount of USD €30 million. No impact in the results for the year is expected from this transaction.

As of March 1, 2016, the Company ceased Mr. José Dominguez Abascal, formerly appointed by Inversión Corporativa IC, S.A. as Chairman and revoked the powers he may have delegated. Since that date, he will continue as Director (external Director). Replacing him, the Board of Directors of Abengoa previously agreed by the Appointment and Remuneration Committee, appointed as Executive Chairman to Mr. Antonio Fornieles Melero, former Vice-chairman and Coordinator Director, delegating him all powers except those that cannot be legally delegated. As a consequence of this appointment this mentioned Director begun to have the executive Director consideration and left the Audit Committee and the Appointments and Remuneration Committee.

Also, and with prior approval of the Appointment and Remuneration Committee, the Board of Directors of Abengoa delegated on Mr. Joaquín Fernández de Piérola Marín all powers except those that cannot be legally delegated. As a consequence of this appointment, Mr. Joaquín Fernández de Piérola Marín was appointed CEO and maintained the executive Director consideration.

Additionally, in the framework of the negotiations, it is maintaining, with a group of its creditors comprised of banks and holders of bonds issued by the Abengoa group, for the restructuring of its indebtedness and its recapitalization in line with the grounds of an agreement that was announced on March 10, 2016 (relevant fact number 236094), on March 21, 2016, Abengoa Concessions Investments Limited ("ACI"), a subsidiary of the Company, entered into a Secured Term Facility Agreement (the "Facility Agreement") among, inter alia, the lenders as describe below (the "Lenders") and the agent appointed thereunder (the "Agent"), pursuant to which it is entitled to borrow up to €137,094,751.30 (the "Loan Amount") and is required to enter into related security documents (collectively, the "Loan Documents").The Facility Agreement will be used for the general corporate and working capital purposes of the Company and its subsidiaries (the "Group").

Upon the occurrence of certain events that are customary for this type of loan, the Lenders may exercise their right to require ACI to repay all or part of the Loan Amount, post additional collateral or foreclose on, and dispose of, the Pledged Shares (as described below under "Security") in accordance with the Loan Documents.

The loan will mature on 23 September 2016 or (if maturity for the September Facility and the December Facility is extended to at least the same date) 12 months after the utilization date. Loans will initially bear interest at a rate per annum equal to the aggregate of EURIBOR plus 14.5% (on a payment in kind basis). Default interest will be payable at a rate of 5% above the interest rate.

In certain circumstances, a make-whole amount, a restructuring fee and/or a rollover fee may become payable under the Facility Agreement.

Abengoa and the following subsidiaries will each provide a guarantee of all amounts payable to the finance parties under the Facility Agreement. Under the terms of the Loan Documents, ACI will pledge and grant a security interest in 14,327,124 ordinary shares of Atlantica Yield (formerly Abengoa Yield Plc.) held by it (the "Pledged Shares"), in favour of the Lenders as security for the Loan Amount and its obligations under the Loan Documents.

The Facility Agreement will require compliance with certain financial covenants consisting of (i) an initial loan to value ratio of 60% and (ii) maintaining a loan to value ratio of not more than 80%.

In relation to the Pledged Shares that were previously the subject of security interests in favour of the lenders under either (i) the loan agreement granted to the Company in 23 September 2015 or (ii) the loan agreement entered into in 24 December 2015 (see Note 20):

- the lenders under (i) the September Facility will release all of the Pledged Shares that are pledged as security for such financing and (ii) the December Facility will release a certain number of the Pledged Shares that are pledged as security for such financing. ACI will pledge and grant a second ranking pledge in respect of the Pledged Shares and the remaining shares securing the December Facility in favour of the lenders under the September Facility; and
- in connection with the granting of such releases, the September Facility and the December Facility will be amended to align certain provisions relating to the interest, the restructuring and rollover fees, the loan to value financial covenants, the maturity and the disposal covenants with those in the Loan Documents.

The Facility Agreement is governed by English law and the courts of England have exclusive jurisdiction to settle any dispute arising out of or in connection therewith.

Since December 31, 2015, no other events have occurred that might significantly influence the information reflected in the Consolidated Financial Statements, nor has there been any event of significance to the Group as a whole.

(*) Electricity operations as described in Note (2.29) in accordance with the provisions of Law 54/19997.

(1) Production under Special Regime: Cogeneration. Primary energy type: Fuel
(2) Production under Special Regime: Wind. Primary energy type: Wind
(3) Includes production under Special Regime: Cogeneration. Primary energy type: Natural gas
(4) Production under Special Regime: Cogeneration. Primary energy type: Natural gas
(5) Production under Special Regime: Solar Photovoltaic. Primary energy type: Solar light
(6) Production under Special Regime: Solar. Primary energy type: Solar light
(7) Production under Special Regime: Hydraulic. Primary energy type: Water
(8) Production under Special Regime: Other. Primary energy type: Industrial waste (used oils)
(9) Transport
(10) Electricity production: Based on hydrogen. Primary type of energy: Hydrogen

# Annex XI – Companies taxed under the Special Regime for Company Groups at 12.31.15

| Abengoa Tax Group Number 02/97 | | |
|---|---|---|
| Company Name | Tax Address | Shareholding |
| Abengoa S.A. | Seville (SP) | Sociedad Dominante |
| A3T Holdco España, S.A | Seville (SP) | Abener Energía, S.A./ Negocios Industriales y Comerciales, S.A. (Nicsa) |
| Abeima Agua Internacional, S.L. | Seville (SP) | Abeinsa Infraestructuras Medio Ambiente/Construcciones y Depuraciones, S.A.(Codesa) |
| Abeinsa Asset Management, S.L. | Seville (SP) | Abener Energía, S.A./Negocios Industriales y Comerciales, S.A. |
| Abeinsa Business Development, S.A. | Seville (SP) | Abeinsa Ingeniería y Construcción Industrial, S.A./ Negocios Industriales y Comerciales, S.A. |
| Abeinsa Engineering S.L. | Seville (SP) | Abener Energía |
| Abeinsa EPC, S.A. | Seville (SP) | Abeinsa Ingeniería y Construcción Industrial S.A./Teyma Gest. Ctos. de Const. e Ing., S.A. |
| Abeinsa Infraestructuras Medio Ambiente, S.A | Seville (SP) | Abeinsa Business Development, S.A. / Negocios Industriales y Comerciales, S.A. |

(*) Electricity operations as described in Note 2.29 in accordance with the provisions of Law 54/1997

(1) Production under Special Regime: Cogeneration. Primary energy type: Fuel
(2) Production under Special Regime: Wind. Primary energy type: Wind
(3) Includes production under Special Regime: Cogeneration. Primary energy type: Natural gas
(4) Production under Special Regime: Cogeneration. Primary energy type: Natural gas
(5) Production under Special Regime: Solar Photovoltaic. Primary energy type: Solar light
(6) Production under Special Regime: Solar Termosolar. Primary energy type: Solar light
(7 )Production under Special Regime: Hydraulic. Primary energy type: Water
(8) Production under Special Regime: Other. Primary energy type: Industrial waste (used oils)
(9) Transport.
(10) Electricity production: Based on hydrogen. Primary type of energy: Hydrogen

# Annex XVI – Companies taxed under the Special Regime for Company Groups at 12.31.14

| Abengoa Tax Group Number 02/97 | | |
|---|---|---|
| Company Name | Tax Address | Shareholding |
| Abengoa S.A. | Seville (SP) | Sociedad Dominante |
| A3T Holdco España, S.A | Seville (SP) | Abener Energía, S.A./ Negocios Industriales y Comerciales, S.A. (Nicsa) |
| Abeima Agua Internacional, S.L. | Seville (SP) | Abeinsa Infraestructuras Medio Ambiente/Construcciones y Depuraciones, S.A.(Codesa) |
| Abeinsa Asset Management, S.L. | Seville (SP) | Abener Energía, S.A./Negocios Industriales y Comerciales, S.A. |
| Abeinsa Business Development, S.A. | Seville (SP) | Abeinsa Ingeniería y Construcción Industrial, S.A./ Negocios Industriales y Comerciales, S.A. |
| Abeinsa Engineering, S.L. | Seville (SP) | Abener Energía, S.A. |
| Abeinsa EPC, S.A. | Seville (SP) | Abeinsa Ingeniería y Construcción Industrial S.A./Teyma Gest. Ctos. de Const. e Ing., S.A. |
| Abeinsa Infraestructuras Medio Ambiente, S.A. | Seville (SP) | Abeinsa, Ingeniería y Construcción Industrial, S.L./Negocios Industriales y Comerciales, S.A |
| Abeinsa Inversiones Latam, S.L. | Seville (SP) | Asa Iberoamérica, S.L./Abeinsa Ingeniería y Construcción Industrial, S.A. |
| Abeinsa Operation and Maintenance, S.A. | Seville (SP) | Abeinsa Ing. y Const. Industrial, S.A./Negocios Industriales y de Construcción, S.A. |
| Abeinsa, Ingeniería y Construcción Industrial, S.A. | Seville (SP) | Abengoa, S.A./Siema |
| Abencor Suministros S.A. | Seville (SP) | Negocios Industriales y Comerciales, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A. |
| Abener Argelia, S.L. | Seville (SP) | Abener Energía, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A. |
| Abener Energía, S.A. | Seville (SP) | Abeinsa, Ing. y Const., S.A./Abeinsa Business Development, S.A./Negocios Ind. y Com., S.A. |
| Abengoa Bioenergía Biodiesel, S.A. | Seville (SP) | Abengoa Bioenergía Inversiones, S.A./Ecoagrícola, S.A. |

# 03 Consolidated management report

# Consolidated Management Report as of December 31, 2015

# 1.- Entity's position

## 1.1. Organizational structure

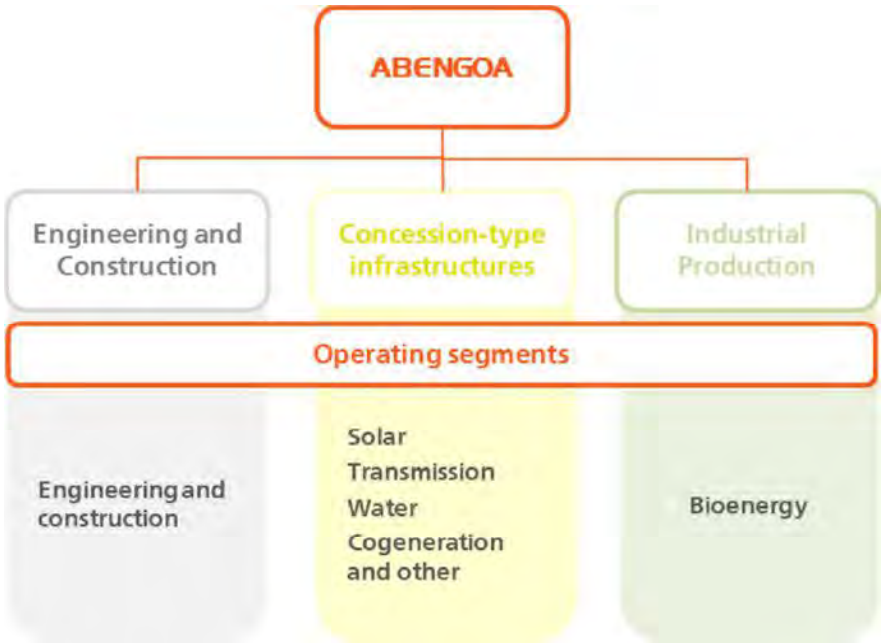
Abengoa, S.A. is a technological parent company of a group of companies, which at the end of the year, 2015, included the following:

- The holding parent company itself.
- 577 subsidiaries.
- 78 associates and 31 joint ventures; as well as certain companies of the Group being involved in 211 temporary joint ventures. Furthermore, the Group's companies have shareholdings of less than 20% in other entities.

Independent to the legal structure, Abengoa is managed as outlined below.

Abengoa is an international company that applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. Abengoa supplies engineering projects under the 'turnkey' contract modality and operates assets that generate renewable energy, produce biofuel, manage water resources, desalinate sea water and treat sewage.

Abengoa's activities are focused on the energy and environmental sectors, and integrate operations throughout the value chain including R&D+i, project development, engineering and construction, and operations and maintenance of its own assets and for third parties.



Abengoa's business is organized into the following three activities:

- Engineering and construction: includes our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market. Abengoa is specialized in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.
- Concession-type infrastructures: groups together the company's extensive portfolio of proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes the operation of electric (solar, cogeneration or wind) energy generation plants and transmission lines. These assets generate low demand risk and we focus on operating them as efficiently as possible.
- Industrial production: covers Abengoa's businesses with a high technological component, such as development of biofuels technology. The Company holds an important leadership position in these activities in the geographical markets in which it operates.

Abengoa's Chief Operating Decision Maker ('CODM') assesses the performance and assignment of resources according to the above identified segments. The CODM in Abengoa considers the revenues as a measure of the activity and the EBITDA (Earnings before interest, tax, depreciation and amortization) as measure of the performance of each segment. In order to assess performance of the business, the CODM receives reports of each reportable segment using revenues and EBITDA. Net interest expense evolution is assessed on a consolidated basis given that the majority of the corporate financing is incurred at the holding level and that most investments in assets are held at project companies which are financed through project debt. The depreciation, amortization and impairment charges are assessed on a consolidated basis in order to analyze the evolution of net income and to determine the dividend pay-out ratio. These charges are not taken into consideration by CODM for the allocation of resources because they are non-cash charges.

The process to allocate resources by the CODM takes place prior to the award of a new project. Prior to presenting a bid, the company must ensure that the project debt for the new project has been obtained. These efforts are taken on a project by project basis. Once the project has been awarded, its evolution is monitored at a lower level and the CODM receives periodic information (revenues and EBITDA) on each operating segment's performance.

Abengoa structure

## 1.2. Operation

### a) Activities information

Abengoa's activity is grouped under the following three activities which are in turn composed of six operating segments:

› Engineering and construction; includes our traditional engineering business in the energy and water sectors, with more than 70 years of experience in the market. Since the beginning of 2014, this activity comprises one operating segment Engineering and Construction.

Abengoa specializes in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others. In addition, this segment includes activities related to the development of thermo-solar technology, water management technology and innovative technology businesses such as hydrogen energy or the management of energy crops.

› Concession-type infrastructures; groups together the company's proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts or power purchase agreements. This activity includes the operating segment of Atlantica Yield (ABY), the operation of electric (solar, cogeneration or wind) energy generation plants, desalination plants and transmission lines. These assets generate low demand risk and we focus on operating them as efficiently as possible.

The Concession-type infrastructures activity again comprises four operating segment:

› Solar – Operation and maintenance of solar energy plants, mainly using thermo-solar technology.

› Water – Operation and maintenance of facilities aimed at generating, transporting, treating and managing water, including desalination and water treatment and purification plants.

› Transmission – Operation and maintenance of high-voltage transmission power line infrastructures.

› Cogeneration and other – Operation and maintenance of conventional cogeneration electricity plants.

› Industrial production; covers Abengoa's businesses with a high technological component, such as development of biofuels technology. The company holds an important leadership position in these activities in the geographical markets in which it operates.

This activity is comprised of one operating segment:

› Biofuels – Production and development of biofuels, mainly bioethanol for transport, which uses cellulosic plant fiber cereals, sugar cane and oil seeds (soya, rape and palm) as raw materials.

### b) Competitive position

Over the course of our 70-year history, we have developed a unique and integrated business model that applies our accumulated engineering expertise to promoting sustainable development solutions, including delivering new methods for generating power from the sun, developing biofuels, producing potable water from seawater, efficiently transporting electricity. A cornerstone of our business model has been investment in proprietary technologies, particularly in areas with relatively high barriers to entry. Thanks to it, we have a developed portfolio of businesses focused on EPC and concession project opportunities, many of which are based on customer contracts or long-term concession projects attractive and growing energy and environmental markets.

We have developed a leadership position in the energy sector in recent years, as highlighted by the following:

- In 2015 the Company has been recognized for the ninth consecutive year by the prestigious magazine Engineering News-Record (ENR) as the leading 'International contractor in transmission and distribution' Moreover, the Company has been also recognized for the fifth consecutive year as international contractor leader in solar energy and reached the first position in the category of cogeneration and the third in wind energy.
- In the field of solar power, Abengoa is an international leader for solar-thermal plants, with innovative projects such as Atacama-1, self-managed solar plant will supply clean, renewable energy 24 hours a day, seven days a week and the first solar-thermal plant in Latin America; or Khi Solar One in South Africa, which will be the first plant to use tower technology in Africa.
- Additionally, Abengoa consolidates its position as leader in the operation and maintenance of solar plants with an installed capacity of 1,603 MW in commercial operation, both thermo-solar and photovoltaic plants, which place it as the company with the highest installed thermo-solar capacity.
- Abengoa is a global leader in the biofuels industry, with 16 plants located in five countries of three continents. In Europe It is the leader In production with a capacity of 1,300 ML and is also one of the leading producers In the US (1,440 ML) and Brazil (255 ML).Additionally, the Company enjoy a global leadership position in the development of technology for the production of second-generation bioethanol on a commercial scale, applied to the plant located in Hugoton (US) in operation since 2014. Finally, Abengoa has a biodiesel production plant in Algeciras, with an installed capacity of 255 ML per year.

In the field of water, Abengoa has also been recognized internationally as "Water Company of the Year 2015 at the Global Water Awards presented by Global Water Intelligence (GWI), besides being recognized on other occasions with awards such as "Company of the Year 2013" in the desalination sector, "Honorable mention of Water Company of the Year 2012" and "Company of the Year 2009" in the desalination sector thanks to the desalination plant in Accra (Ghana), in operation since February 2015, the water desalination project in Qingdao (China); and the desalination plant projects in Tenes, Honaine and Skikda in Algeria. These desalination plants have been developed using the latest advances in desalination technology based on reverse osmosis and the BOT model.

The Company also continued during 2015 to enlarge the business in the construction and management of water facilities and sanitation infrastructures for municipal and industrial clients highlighting the new project in India which will allow the drinking water supply in Uttarakand, and It is building a desalination plant in Agadir (Morocco) and a desalination plant in Chile for the generation of energy in Angamos for the industrial sector.

Abengoa continues to expand its presence in the environment sector through these activities, producing, treating and regenerating water for a more sustainable world.

# 2.- Evolution and business results

## 2.1. Financial position

### a) Going concern

According to International Accounting Standard 1, which states that an entity shall prepare its financial statements on a going concern basis unless management either intends to liquidate the entity or to cease the activity, or has no realistic alternative but to do so, these Consolidated Financial Statements have been prepared in accordance with this basis. However, during the second half of 2015 a series of events have occurred which have negatively impacted the liquidity and financial structure of the Company. The aforementioned events have been duly communicated to the market and are summarized below.

On July 31, 2015, during the first half earnings call with investors, Abengoa announced a downward adjustment to their FY2015 forecast regarding Free Corporate Cash Flow from operations from the €1,300 million target to €600 – 800 million. This adjustment to our forecast was mainly attributable to higher capital expenditures than expected in highly profitable but cash intensive projects in Brazil, Chile and Mexico.

Even though in accordance with the abovementioned forecasts the Company´s liquidity position was not going to be affected, the Board publicly announced on August 3, 2015 their intention to propose an Extraordinary General Shareholders´ Meeting to approve a capital increase of €650 million with preferential subscription rights for shareholders, an additional package of asset disposals and the implementation of a business model with lower investment requirements (capex), aimed at improving the liquidity position of Abengoa and reducing its dependence on leverage.

From August 3, 2015 onward, increasing market uncertainty caused a descent in the market value of Abengoa's listed equity and debt instruments, which both limited our access to debt and capital markets and, at the same time, contributed to a slowdown of the pace of approval or renewal, by financial institutions, of non-recourse factoring and confirming without recourse used by the Group for managing its working capital. All of this contributed to a descent in Abengoa's liquidity position. On that date, Abengoa started a negotiation period with a group of financial entities aimed at reaching an agreement in order to secure the abovementioned capital increase.

On September 24, 2015, Abengoa announced both the agreement reached with the financial institutions and the approval of its Board of Directors of a set of strategic measures, which would be adapted during its execution, aimed at reducing corporate leverage, improving the liquidity position of Abengoa and strengthening its corporate governance, as well as the underwriting by financial entities of the capital increase.

Regarding this agreement, a group of banks and two of the main shareholders committed to underwrite and/or subscribe the capital increase for an aggregate of €650 million, consisting of:

- These banks entered into an agreement with the Company pursuant to which they undertook to underwrite €465 million in Class B shares to be issued in the capital increase, subject to certain conditions being met, including, among others, obtainment of regulatory and shareholder approvals, completion of ongoing financial and other due diligence, entry into a definitive underwriting agreement and satisfaction of the shareholders' subscription commitments;
- Inversión Corporativa IC, S.A. (Controlling shareholder of Abengoa, S.A.), irrevocably committed itself to invest a minimum of €120 million of new money in new Class A and Class B shares to be issued under the rights issue;
- "Waddell & Reed Investment Management" committed themselves, on behalf of certain of its affiliated funds, to subscribe for €65 million of new Class B shares in the rights issue.

The rest of the measures approved by the Board of Directors included the following:

1. Debt reduction as a key objective of Abengoa focusing on maturities aimed to rebalance the maturity profile of its indebtedness;
2. The reinforcement of the current asset disposal program in order to be able to raise, at least, approximately €1.2 billion by the end of 2016;
3. Adoption of capex limitations ;
4. Amendment of the Company's dividend policy;
5. Reinforcement of corporate governance:
   - Inversión Corporativa IC, S.A. committed itself to limit its direct and indirect aggregate voting rights to 40% once the capital increase was completed, regardless of the voting rights it would otherwise be entitled to based on its shareholding.
   - The Board of Directors would reflect this new voting rights structure by way of reducing the number of directors to 13 and the number of directors appointed by Inversión Corporativa IC, S.A. to 5, while there will continue to be 6 independent directors.
   - Creation of an Investment Committee formed by a majority of independent Directors.
6. Several capital transactions were approved.

Additionally, the Extraordinary General Shareholders' meeting held on October 10, 2015, approved a set of measures including the aforementioned capital increase of €650 million aimed at improving the liquidity position of Abengoa and reducing corporate leverage.

On November 8, 2015, Abengoa publicly announced it entered into a framework agreement for the investment in Abengoa with Gonvarri Corporación Financiera, a company of the Gonvarri Steel Industries group. This agreement had the support of Inversión Corporativa IC, S.A., currently the main shareholder of Abengoa. The Investment Agreement set out the terms and conditions for the investment by Gonvarri Corporación Financiera within the framework of the share capital increase approved on October 10, 2015 by the Extraordinary General Shareholders' Meeting of the Company. The Investment Agreement provided that a portion of Gonvarri's investment, in an amount of €250 million, was going to be carried out through a share capital increase without preemptive subscription rights. The Company's capital increase with preemptive subscription rights approved at the abovementioned October 10, 2015 Extraordinary General Shareholders' Meeting was planned to be executed after the first capital increase mentioned above and for an effective amount currently expected to be €400 million, of which Gonvarri Corporación Financiera was expected to subscribe for its relevant portion of the shares.

On November 25, 2015, after the formulation of the Company´s Interim Consolidated Financial Statements as of September 30, 2015, the Company announced by filing a Material Fact that the framework agreement entered into with the potential investor was terminated. The Company also communicated that they will continue negotiations with its creditors with the objective of reaching an agreement that ensured the Company's financial viability in the short and medium term. After assessing the options provided by the situation described above and in order to ensure the most stable status as possible to negotiate with creditors, the Board of Directors considered the most appropriate option was to seek protection under article 5 bis of the Ley Concursal (Ley 22/2003, Ley Concursal). Thus, on December 15, 2015 the Mercantile Court of Seville nº 2 published the Decree by virtue of which it agreed to admit the filing of the communication set forth under the abovementioned article 5 bis of the Ley Concursal.

Included below there is a detailed description of all Spanish Group Companies which had sought judicial protection by means of filing the communication set forth under article 5 bis of the Ley Concursal, which included the Parent Company Abengoa, S.A. and another 48 Group Companies:

| | | |
|---|---|---|
| Abengoa, S.A. | Abengoa Greenfield, S.A.U. | Centro Tecnológico Palmas Altas, S.A. |

| Abengoa Finance, S.A. | Covisa, Cogeneración Villaricos, S.A. | Zeroemissions Technologies, S.A. |
| Abengoa Greenbridge, S.A.U. | | |

Additionally, both Inversión Corporativa IC, S.A. and Finarpisa, S.A., currently the main shareholders of Abengoa (see Note 18 to the Consolidated Financial Statements) also filed the communication set forth under article 5 bis of the Ley Concursal.

Further, on January 29, 2016, Abengoa´s subsidiaries´ Abengoa Concessões Brasil Holding S.A, Abengoa Construção Brasil Ltda and Abengoa Greenfield Brasil Holding S.A filed requests for creditors protection (recuperação judicial), which were admitted on February 22, 2016. This protective measure was undertaken provided that the Company incurred in a "Crise econômico scenario", which is contemplated in Brazillian Law 11.101/05. "Recuperação judicial" consists in a proceeding envisaged in the Brazillian Law which allows corporations to restructure their debt in an orderly manner and continue as a going concern once the financial difficulties are overcome.

Further, on February 1, 2016 and February 10, 2016, certain creditors initiated involuntary bankruptcy petitions against both the Group affiliates Abengoa Bioenergy Nebraska, LLC and Abengoa Bioenergy Company, LLC. After responding to the petitions, on February 24, 2016, both companies mentioned above along with Abengoa Bioenergy Outsourcing, LLC, Abengoa Bioenergy Engineering and Construction, LLC, Abengoa Bioenergy Trading US, LLC, and Abengoa Bioenergy Holding US, LLC opted to file for voluntary creditors´ protection under Chapter 11 envisaged in the USA Law. These petitions have been filed in order to allow the Company to continue as a going concern and, consequently, they included an authorization request for the payment of taxes, salaries and insurance premiums and other first day motions. Additionally, a request for the approval of a debtor-in-possession financing arrangement amounting to USD 41 million was also filed. The hearing for these initial motions took place on March 2, 2016 and, during them, such companies were authorized to borrow an initial amount of USD 8 million (which were additionally complemented with USD 1.5 million authorized on March 29, 2016). The final hearing for the approval of the remaining amount is scheduled by April 6, 2016.

Moreover, on March 23, 2016, certain creditors filed an involuntary insolvency proceeding against Abengoa Bioenergy Biomass of Kansas, LLC at the Kansas court.

Also on March 29, the following American companies Abeinsa Holding Inc.; Abencor USA, LLC; Teyma Construction USA, LLC; Abeinsa EPC, LLC; Inabensa USA, LLC; Nicsa Industrial Supplies, LLC; Abener Construction Services, LLC; Abener North America Construction, LP; Abengoa Solar, LLC; Teyma USA & Abener Engineering and Construction Services General Partnership; Abeinsa Abener Teyma General Partnership; Abener Teyma Mojave General Partnership; and Abener Teyma Inabensa JV filed, under the "United States Bankruptcy Code" and the Delaware court, the named Chapter 11 in order to allow the companies to comply with their obligations and minimize the loss of value of their businesses. Such companies have requested authorization for the payment of taxes, salaries and insurances as well as other first day motions. The hearing to resolve these requests is scheduled by March 31, 2016.

On January 25, 2016, the Company announced that the independent consulting firm Alvarez&Marsal presented to the Board of Directors of Abengoa the Industrial Viability Plan that defined the structure of the future activity of Abengoa on an operating basis focusing on the Activity of Engineering and Construction either developing its own technology or using technology developed by others.

In accordance with this plan, which confirms the viability of Abengoa, the Company will negotiate with its creditors a debt restructuring as well as the necessary resources, and then, provided to Abengoa the optimal capital structure and the liquidity enough to continue its activity and operate in a competitive and sustainable manner in the future.

In this sense, and in relation to the negotiations between the Company and a group of its creditors comprised of banks and holders of bonds issued by the Group, as of March 10, 2016, the Company informed that it has agreed with the advisers of such creditors the grounds for an agreement to restructure the financial indebtedness and recapitalize the Group. The Company believes that such agreement contains the essential elements to achieve a future restructuring agreement that, in any event, will be subject to reaching the percentage of accessions required by law.

The fundamental principles of such agreement are the following:

(i) The new money that would be lent to the Company would range between 1,500 and €1,800 million for a maximum term of 5 years. Creditors would be entitled to 55% of the share capital. This financing would rank senior with respect to the old debt and would be guaranteed by certain assets, including free shares of Atlantica Yield.

(ii) The amount of the old debt that would be capitalized would correspond to 30% of its nominal value. Such capitalization grants the right to subscribe 35% of the new share capital

(iii) The financial indebtedness corresponding to the liquidity lines granted to the group on September 23 and December 24, 2015 (material fact number 233503) for a total amount of €231 million (plus accrued financial expenses) will be subject to refinancing by extending the term by two (2) years. This indebtedness would be secured by the shares of Atlantica Yield and would be prepaid in case of sale of the shares of Atlantica Yield or issuance of an exchangeable bond on such shares.

(iv) The amount of the share capital increase that would be reserved to those creditors, who provide €800 million of the bank guarantees requested, would be 5% of the new capital.

(v) At the end of the restructuring process, the current shareholders of the Company would hold around 5 % of the share capital. Eventually, they could increase such stake in a percentage to be agreed that will not exceed an additional 5%, if, within five (5) years, the group has paid in full all outstanding amounts under the new financing to be provided in the framework of the restructuring and under the existing indebtedness (as this indebtedness may have been restructured), including its financial costs. It is expected that the two types of shares now existing will be merged into one sole class of shares.

At the date of formulating the present Consolidated Financial Statements, Abengoa and a group of creditors comprised of banks and holders of bonds issued by Abengoa had reached a standstill agreement with the objective of providing the time necessary to keep working and reaching as soon as possible a full and complete agreement on the terms and conditions to restructure the financial indebtedness and recapitalize the Group.

With respect to the foregoing, as of March 28, 2016, it had filed with the Mercantile Court of Seville nº 2 an application for the judicial approval of the standstill agreement (the "Standstill Agreement") which has obtained the support of 75.04% of the financial creditors to which it was addressed, being therefore over the legally required majority (60%). However, according to the terms of the Standstill Agreement, new creditors can adhere to the Standstill Agreement until the date in which the Judge resolves, therefore, the percentage could be increased.

In addition, on March 28 was initiated, according to what is stated on clause 5.2 of the standstill agreement, the Chapter 15 of the United States Bankruptcy Code and at the Delaware court, which consist on the proceeding provided for the recognition in United States of the judicial approval of the standstill agreement initiated in Spain on March 28. In a hearing scheduled on March 31, 2016 it will be asked about a compliance to provisional approval awaiting for enforcement actions to be initiated by any creditor.

As stated at the beginning of this Note to the Consolidated Financial Statements, Abengoa´s Directors have deemed it appropriate to prepare these Consolidated Financial Statements as of December 31, 2015 on a going concern. Such determination was made based on management's assumption that an agreement with financial creditors of the Company will be attained so the Company´s financial stability can be secured, allowing Abengoa to be able to generate cash from operations in accordance with the Industrial Viability Plan developed by Alvarez&Marsal according to paragraphs 25 and 26 of IAS 1 "Presentation of Financial Statements".

Based on the application of the going concern basis, Abengoa´s Directors have prepared these Consolidated Financial Statements applying the International Accounting Standards consistently with Consolidated Interim Financial Statements and Consolidated Financial Statements filed in prior periods. For that purpose, and according to the aforementioned accounting framework, Abengoa´s Directors have made their best estimates and assumptions (see Note 3 to the Consolidated Financial Statements) in order to record the assets, liabilities, revenues and expenses as of December 31, 2015 in accordance with the existing information by the time of furnishing these Consolidated Financial Statements.

Abengoa´s consolidated net equity as of December 31, 2015 is mainly driven by the current situation in which the Group is involved, which has caused the recording of either provisions or impairment charges in some of the assets. These have been recorded as a result of the best estimates and assumptions made by Abengoa´s Directors according to the measures agreed upon in the abovementioned Industrial Viability Plan which, according to the applicable accounting and reporting framework, must be recorded as of that date.

Thus, the main impacts on the Company´s Profit and loss as of December 31, 2015, which amounts to approximately €878 million refers mainly to the estimation of costs in the last quarter related to the stoppage in the last quarter of the concessional projects under construction and subsequent restart, impairment of some assets pertaining to some projects affected by the company situation, default interests and other additional concepts. Additionally, given the current situation of the Company, determined by article 5 bis of the Ley Concursal and pending to have greater visibility about the realization of the Industrial Viability Plan, Abengoa´s Directors have decided not to recognize the deferred tax assets arising from capitalizing the fiscal effect from those adjustments that might be recovered in the future, according to the aforementioned Viability Plan.

The following table shows the breakdown of such impacts (in million of euros)

| Item | Total |
|---|---|
| Project Construction costs (see Note 5.1 a) to the Consolidated Financial Statements) | (383) |
| Impairment of assets pertaining to projects (see Note 5.1 d) to the Consolidated Financial Statements ) | (301) |
| Tax credits (see Note 31 to the Consolidated Financial Statements) | (234) |
| Remuneration plan payment Reversal (see Note 29 to the Consolidated Financial Statements) | 43 |
| Default interests and other | (3) |
| | **(878)** |

In addition to the above mentioned impacts, Abengoa´s Consolidated Equity reflects the effects of the general slowdown, and stoppages in certain cases, of operations in the activities Abengoa is engaged in from the beginning of last August and, especially, in the last quarter of 2015. All this has been generated as a consequence of both its deteriorating liquidity position, from Abengoa´s difficulties in accessing the capital markets, and the cancelling or non - renewal, by financial institutions, of working capital credit lines (amounting to approximately €1,000 million since such date), and which eventually led to the Company´s filing of creditors protection under article 5 bis of the Ley Concursal.

Abengoa´s Directors are confident on reaching a final agreement with creditors and, once signed, the achievement of the Viability Plan associated with the Groups ability to generate cash from operations will allow the Company to restore the confidence of stakeholders, the steadiness of its liquidity position and its ability to keep improving in the future.

## b) Application of new accounting standards

- Standards, interpretations and amendments effective from January 1, 2015 under IFRS-EU, applied by the Group:
  - Annual Improvements to IFRSs 2010-2012 and 2011-2013 cycles. These improvements are mandatory for periods beginning on or after July 1, 2014 and January 1, 2015 under IFRS-EU and IFRS-IASB.

Abengoa's Directors believe that the applications of these amendments have not had any material impact.

- Standards, interpretations and amendments published that will be effective for periods after December 31, 2015:
  - Annual Improvements to IFRSs 2012-2014 cycles. These improvements are mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and IFRS-EU.
  - IAS 1 (Amendment) 'Presentation of Financial Statements'. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and IRFS-EU.
  - IFRS 10 (Amendment)' Consolidated Financial Statements' and IAS 28 'Investments in Associates', regarding to sale or contribution of assets between an investor and its associate or joint venture. This amendment do not have a definite date of application.
  - IFRS 9 'Financial Instruments'. This Standard will be effective from January 1, 2018 under IFRS-IASB and has not yet been adopted by the EU.
  - IFRS 15 'Revenues from contracts with Customers'. IFRS 15 is applicable for periods beginning on or after January 1, 2018 under IFRS-IASB, earlier application is permitted, IFRS 15 has not yet been adopted by the EU.
  - IAS 16 (Amendment) 'Property, Plant and Equipment' and IAS 38 'Intangible Assets', regarding to acceptable methods of amortization and depreciation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB, and IFRS-EU.

- IAS 27 (Amendment) 'Separate financial statements' regarding the reinstatement of the equity method as an accounting option in separate financial statements. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and IFRS-EU.
- IFRS 10 (Amendment) 'Consolidated financial statements' and IAS 28 'Investments in associates and joint ventures' regarding the exemption from consolidation for investment entities. These amendments are mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and have not yet been adopted by the EU.
- IFRS 11 (Amendment) 'Joint Arrangements' regarding acquisition of an interest in a joint operation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and IFRS-EU.
- Introduction of IFRS 16 "Leases" which supersedes IAS 17. Lessees will recognize most leases in the balance sheet as financed purchases. This standard will apply to periods beginning after January 1, 2019 under IFRS-IASB and has not been adopted yet by the European Union.

The Group is currently in the process of evaluating the impact on the Consolidated Financial Statements derived from the application of the new standards and amendments that will be effective for periods beginning after December 31, 2015.

## c) Changes in the composition of the Group

In 2015 a total of 44 subsidiaries, 4 associates and 5 joint ventures were added to the consolidation perimeter of the group.

In addition, 17 companies were no longer classified as subsidiaries and 2 companies were no longer classified as joint ventures and are not included in the consolidation group.

During the year 2015, Kaxu Solar One, Ltd. and Helioenergy 1 and 2, which were recorded under the equity method in the Consolidated Financial Statements as of December 31, 2014, started to be consolidated after we gained control over them (see Note 6.4 to the Consolidated Financial Statements). Both Kaxu Solar One, Ltd, Helioenergy 1 and 2 has been incorporated to Atlantica Yield´s consolidation perimeter during the year 2015, which is recorded under the equity method (see Note 7.1.a) and Note 10 of this Consolidated Financial Statements).

As a consequence of the sale of Atacama I project companies to APW-1 (see Note 7.1.b) to the Consolidated Financial Statements), which were consolidated in the Consolidated Financial Statements, several project companies started to be recorded by equity method after we lost control over those companies.

At year-end 2015, the company Atlantica Yield and its subsidiaries, which were consolidated (in full) into the Consolidated Financial Statements for the year 2014 (classified as assets and liabilities held for sale and discontinued operations) started to be recorded by the equity method after we lost control over those companies (see Note 7.1.a) to the Consolidated Financial Statements).

At year-end 2015, the companies Rioglass Solar and its subsidiaries, which were consolidated into the Consolidated Financial Statements for the year 2014, started to be recorded by the equity method after we lost control over those companies (see Note 6.3.b) to the Consolidated Financial Statements).

## d) Main figures

Financial data

- Revenues of €5,755 million, a 19% lower to the same period of 2014.
- EBITDA of €515 million, a decrease of 63% compared to the same period the previous year.

| Item | 2015 | 2014 | Var (%) |
|---|---|---|---|
| **Income Statement** | | | |
| Revenue | 5,755 | 7,151 | -19.52% |
| EBITDA | 515 | 1,408 | -63.39% |
| EBITDA Margin | 9.0% | 19.70% | -54.54% |
| Net Income | (1,213) | 125 | -1,070.78% |
| **Balance Sheet (*)** | | | |
| Total Assets | 16,627 | 25,246 | -34.14% |
| Equity | 453 | 2,646 | -82.88% |
| Corporate Net Debt | 4,480 | 2,353 | 90.38% |
| **Share Information** | | | |
| Last price (€ per B share) | 0.19 | 1.83 | -89.62% |
| Capitalization (A+B share) (€ million) | 202 | 1,563 | -87.08% |
| Daily trading volume (€ million) | 35 | 46 | -23.91% |

Operating figures

- The international activity represents 86% of the consolidated revenues.
- The main operating figures of the years 2015 and 2014 are the following.

| Key operational | 2015 | 2014 |
|---|---|---|
| Transmission lines (km) | 3,532 | 5,143 |
| Water Desalination (Cap. ML/day) | 475 | 815 |
| Cogeneration (GWh) | 393 | 743 |
| Solar Power Assets (MW) | 162 | 1,503 |
| Biofuels Production (ML/year) | 3,270 | 3,175 |

## e) Consolidated income statement

| Item | 2015 | 2014 | Var (%) |
|---|---|---|---|
| Revenues | 5,755 | 7,151 | -19.52% |
| Operating income and expenses | (5,240) | (5,743) | -8.76% |
| Depreciation and amortization | (814) | (475) | 71.44% |
| I. Net Operating Profit | (299) | 933 | -132.03% |
| II. Finance Cost, net | (869) | (855) | 1.59% |
| III. Share of (loss)/(profit) of associates | (8) | 7 | -215.61% |
| IV. Profit Before Income Tax | (1,176) | 85 | -1483.00% |
| V. Income tax expense | (23) | 59 | -138.79% |
| VI. Profit for the year from continuing operations | (1,198) | 144 | -932.25% |
| Profit (loss) from discontinued operations, net of tax | (144) | (22) | 555.70% |
| Profit for the year | (1,343) | 122 | -1,200.57% |
| VII. Non-controlling interests and non-controlling interests discontinued operations | 129 | 3 | 4,207.07% |
| **Net income attributable to the parent company** | **(1,213)** | **125** | **-1070.78%** |

### Revenues

Revenue decreased by 19.5% to €5,755 million, a decrease of €1,396 from €7,151 million in the year 2014.

The decrease in consolidated revenues was mainly due to the decreased revenue contribution from our Engineering and Construction activity (a decrease of €1,185 million) due to the Company situation, during the last quarter which have prompted lower sales by €1,396 million in comparison with 2014. In addition lower revenues has been recorded relating to the construction of projects in the United States (Mojave and PGE), wind farm in Uruguay (Cadonal), thermo-solar plant in Israel (Ashalim) and combined cycle plants in Poland (Stalowa Wola) and Mexico (A3T and A4T). The decrease was partially offset by higher revenues related to the construction of solar plants in Chile (Atacama Solar Platform) and transmission lines in Brazil.

Our Concession-Type Infrastructure activity decreased (€92 million) mainly due to a decrease in revenues from the plants sold to Atlantica Yield during 2015 and the last quarter of 2014 under the ROFO agreement. The decrease was partially offset by new assets that were brought into operation during the last quarter of 2014 and the first quarter of 2015 (water desalination plants in Algeria and Ghana, the power transmission line Norte Brazil and the Manaus hospital urgencies unit in Brazil).

Revenue from our Industrial Production activity decreased by €118 million during the 2015 compared to the same period of the previous year. This decrease was mainly due to the decrease in volumes of ethanol sold in Europe and Brazil partially offset by the increase in volumes sold of ethanol sold in the United States (lowered by a decrease in prices of ethanol sold in the United States), and higher prices of biofuels sold in Europe.

### EBITDA

EBITDA as December 31, 2015 reached €515 million, a decrease of 63.4% compared to the same period of the previous year. The decrease was mainly due both to the decreased revenue contribution from our Engineering and Construction activity on the last quarter already commented and the negative adjustments prompted by the situation of the Company which has resulted in the filing of the communication provided by the article 5 bis of the Ley Concursal, which added to a total amount of €-383 million EBITDA. In addition, the decrease in crush spreads in United States and Brazil from our Bioenergy segment, and the decrease in the solar and water segments related to the sale of plants to Atlantica Yield in 2015 and the fourth quarter of 2014 under the ROFO agreement.

### Net Financial Expense

Finance expenses increased by 2.0% to €869 million for the year 2015, from €855 million for the same period of 2014. The increase was mainly due to the lower capitalization of interest on debt related to projects under construction (since interests are capitalized when a project is under construction), the increased interest expense from loans and borrowings due to our new bonds issued in second half of 2014 and the first half of 2015, the interest expenses for the conversion of the 2019 convertible bond to class B shares, the expenses of cancelling the margin loan of BofA, the default interest expenses arisen from the current situation of the company, as well as to the 2017 convertible bond early repayment by an amount of approximately € 17 million, partially offset by the positive impact related to the anticipated conversion of the 2017 Atlantica Yield convertible bond.

Corporate Income Tax

Corporate income tax decreased from a profit of €59 million in 2014 to €-23 million in 2015 due to the expense recognized for the proposed tax regularization notified by the Administración Tributaria based on inspection stated in the previous year as well as the non-recognition of tax revenues resulting from the negative impacts provided by the current situation of the Company provided by the article 5 bis of Ley Concursal awaiting a greater visibility of the Viability Plan submitted by the Company.

Profit for the year from continuing operations

Due to the aforementioned changes, results from continuing operations of Abengoa decreased by €144 million in 2014 to a loss of €1,198 million in the same period of 2015.

Profit/(Loss) from discontinued operations, net of tax

The result from discontinued operations is a loss of €144 million in 2105 from a loss of €22 million in the year 2014.

The decrease was mainly due to the loss recorded of Atlantica Yield as well and due to the impairment recorded on the net assets of this company that were valued at fair value. (see Note 7.1 to the Consolidated Financial Statements).

Profit attributable to non-controlling interests

Profit attributable to non-controlling interests remained relatively stable in 2015 compared to the year ended December 31, 2014.

Losses from discontinued operations attributable to non-controlling interest increased to €126 million in 2015 from a nil gain in the same period of 2014. The decrease in result from discontinued operations attributable to non-controlling interest were mainly due to the portion attributable to minority interest of the results and the impairment recorded in the net assets of Atlantica Yield (see Note 7.1 to the Consolidated Financial Statements).

Profit attributable to the parent company

Profit attributable to the parent company decreased to a loss of €1,213 million for the year 2015, compared to €125 million profit for the same period of 2014 as a consequence of the changes described above.

## f) Results by activities

Abengoa Business sales, EBITDA and margin related to different business activities has been as follows:

| | Revenue | | | Ebitda | | | Margin | |
|---|---|---|---|---|---|---|---|---|
| Item | 2015 | 2014 | Var (%) | 2015 | 2014 | Var (%) | 2015 | 2014 |
| **Engineering and construction** | | | | | | | | |
| E&C | 3,330 | 4,515 | -26.25% | 193 (*) | 807 | -76.08% | 5.80% | 17.87% |
| **Total** | **3,330** | **4,515** | **-26.25%** | **193** | **807** | **-76.08%** | **5.80%** | **17.87%** |
| **Concession-type infrastructure** | | | | | | | | |
| Solar | 167 | 335 | -50.15% | 115 | 236 | -51.27% | 68.86% | 70.45% |
| Water | 53 | 41 | 29.27% | 42 | 26 | 61.54% | 79.25% | 63.41% |
| Transmission lines | 143 | 91 | 57.14% | 107 | 64 | 67.19% | 74.83% | 70.33% |
| Cogeneration and others | 44 | 32 | 37.50% | 18 | 4 | 350.00% | 40.91% | 12.50% |
| **Total** | **407** | **499** | **-18.44%** | **282** | **330** | **-14.55%** | **69.29%** | **66.13%** |
| **Industrial production** | | | | | | | | |
| Bioenergy | 2,018 | 2,137 | -5.57% | 40 | 271 | -85.24% | 1.98% | 12.68% |
| **Total** | **2,018** | **2,137** | **-5.57%** | **40** | **271** | **-85.24%** | **1.98%** | **12.68%** |
| **Total** | **5,755** | **7,151** | **-19.52%** | **515** | **1,408** | **-63.42%** | **8.95%** | **19.69%** |

(*)Includes an expense recognized for the estimation of costs in the last quarter and subsequent restart given the current situation of the Company which has derived to the submission of the communication provided by article 5 bis of the Ley Concursal for an amount of €383 million (see Note 2.1.1 to the Consolidated Financial Statements).

Engineering & Construction

Revenue decreased to €3,330 million in the year 2015 from the same period in 2014. The decrease in revenues is due to the situation provided by the article 5 bis of Ley Concursal in the last quarter of 2015, which has prompted lower sales in €1,185 million in comparison with the same period in 2014. In addition, lower sales have been recorded in the construction of projects in the U.S. (Mojave and PGE), wind farm in Uruguay (Cadonal), thermo-solar plant in Israel (Ashalim) and combined cycle plants in Poland (Stalowa Wola) and Mexico (A3T and A4T). The decrease was partially offset by higher revenues related to the construction of solar plants Chile (Atacama Solar Platform) and transmission lines in Brazil.

Consolidated EBITDA reached in 2015 €193 million for the year 2015 from €807 million in year 2014 which is a decrease of 76.1% from the same period in 2014. This amount is affected by both the already mentioned lower activity of Engineering and Construction in the last quarter and the negative adjustments prompted by the situation provided by the article 5 bis of the Ley concursal, (and have totaled a total of €-383 million of Ebitda).

Concession-type Infrastructures

Revenue decreased by 18.4% to €407 million for the year 2015, from €499 million for the same period in 2014. Our concession business has decreased mainly due to a decrease in revenues from the plants sold to Atlantica Yield during 2015 and the last quarter of 2014 under the ROFO agreement. The decrease was partially offset by new assets that were brought into operation during the last quarter of 2014 and the first quarter of 2015 (water desalination plants in Algeria and Ghana, the power transmission line Norte Brazil and the Manaus hospital urgencies unit in Brazil).

EBITDA decreased by 14.6% to €282 million for the year 2015, from €330 million for the same period in 2014. Consolidated EBITDA margin in these activities increased to 69.3% for the year 2015, compared to 66.1% in the same period of 2014. EBITDA increased because the reasons described above.

Industrial Production

Revenue decreased (€119 million) due to the decrease in volumes of ethanol sold in Europe and Brazil partially offset by the increase in volumes of ethanol sold in the United States (lowered by a decrease in prices of ethanol sold in the United States), and higher prices of biofuels sold in Europe.

EBITDA decreased by 85.2% to €40 million for the year 2015, from €271 million for the same period in 2014. Consolidated EBITDA margin decreased to 2.0% in 2015, compared to 12.7% in 2014, mainly driven by lower margins in the USA and Brazil. The decrease in margins in the U.S was mainly due to the decrease in ethanol prices. The decrease in margins in Brazil was mainly due to lower yields from raw materials used in ethanol production during the year 2015 compared to the 2014. The decrease in margins in the U.S. and Brazil were partially offset by an increase in the crush spread in Europe (including Spain) due to an increase in biofuels prices in the year 2015 compared to 2014.

## g) Consolidated statement of financial position

### Consolidated balance sheet

A summary of Abengoa's consolidated balance sheet for 2015 and 2014 is given below, with main variations:

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 | Var (%) |
|---|---|---|---|
| Intangible assets & Tangible fixed assets | 2,600 | 2,856 | -8.96% |
| Fixed assets in projects | 3,360 | 6,188 | -45.70% |
| Investments accounted for using the equity method | 1,198 | 311 | 285.21% |
| Financial investments | 1,114 | 686 | 62.39% |
| Deferred tax assets | 1,585 | 1,504 | 5.39% |
| **Non-current assets** | **9,857** | **11,545** | **-14.62%** |
| Inventories | 311 | 295 | 5.42% |
| Clients and other receivables | 2,004 | 2,157 | -7.09% |
| Financial investments | 519 | 1,049 | -50.52% |
| Cash and cash equivalents | 681 | 1,811 | -62.40% |
| Assets held for sale | 3,256 | 8,390 | -61.19% |
| **Current assets** | **6,771** | **13,701** | **-50.58%** |
| | | | |
| **Total Assets** | **16,628** | **25,247** | **-34.14%** |

Decrease in non-current assets of 14.6% to €9,857 million compared to previous year, primarily attributable to the reclassification to the 'Assets held for sale' of the companies include in the new plan of asset rotation, as approved by Abengoa's Board of Directors on September 23, 2015, (which includes the sale of a diverse list of assets including combined-cycle plants, cogeneration, solar plants and other concessional assets) for the assets sold to Atlantica Yield during 2015 and recorded them by the equity method and by the depreciation of the Brazilian Real against the Euro. This decrease was partially offset by the increase of fixed assets in construction related to transmission lines in Brazil, the increase in certain assets as a consequence of the appreciation or the US Dollar against the Euro, by the increase of investments accounted for using the equity method in APW-1 and Atlantica Yield.

› Current Assets decreased by 50.6% compared to the end of the year 2014 to €6,771 million, primarily due to the net decrease in 'Assets held for sale' resulting from recording Atlantica Yield using equity method once control over the company was lost and the decrease in financial investments and cash and cash equivalents as the consequence of the facts occurred since August, 2015 which prompted the current situation provided by the article 5 bis of Ley Concursal.

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 | Var (%) |
|---|---|---|---|
| Capital and reserves | 62 | 1,445 | -95.71% |
| Non-controlling Interest | 391 | 1,201 | -67.44% |
| **Total Equity** | **453** | **2,646** | **-82.88%** |

| **Total current liabilities** | **14,643** | **13,841** | **5.79%** |
| **Total liabilities** | **16,628** | **25,247** | **-34.14%** |

› Decrease in equity of 82.88% primarily caused by the negative result of the year as a consequence of the negative impacts prompted by the current situation of the Company described above. This decrease is also due to the integration by the equity method of Atlantica Yield once control over the Company was lost and the increase in negative conversion differences due to the depreciation of the Brazilian Real. These decreases have been partially offset by the positive impact of the anticipated conversion of the 2019 convertible bond.

› Decrease of 82.51% in non-current liabilities compared to previous year, mainly due to the reclassification of discontinued liabilities to 'Liabilities held for sale' (related to projects included in the asset rotation plan), the reclassification to short term of Corporate-financing and project financing became that due as a consequence of defaults caused by the article 5 bis of Ley Concursal situation and the conversion to shares of the 2019 convertible bond.

› Net increase of current liabilities of 5.8% compared to previous year, primarily due to the reclassification from long term of discontinued liabilities (affected by the new divestment plan) that the issuance of new bonds maturity in 2020 of Abengoa Finance as a consequence of the disposal of the Tranch A of syndicated loan to the new bridge loan obtained by Abengoa Concessions Investment and the new liquidity lines from G7. In addition an increase due to the reclassification from long-term corporate financing and project finance that became due as a consequence of due contractual breaches resulting from the 5 bis situation. All this has been partially offset by a decrease of suppliers (due to payment at maturity and a decrease in confirming lines) and by a decrease in corporate debt due to the repayment of the convertible bond 2017, 2015 bond and the ECP program.

Net Debt Composition

| Item | Balance as of 12.31.15 | Balance as of 12.31.14 |
|---|---|---|
| **Total Corporate Net Debt** | **4,480** | **2,353** |
| **LTM Corporate EBITDA (*)** | **183** | **964** |
| Corporate Net Debt / LTM Corporate EBITDA | **24.5** | **2.4** |

## h) Consolidated cash flow statements

A summary of the Consolidated Cash Flow Statements of Abengoa for the periods ended December 31, 2015 and 2014 with the main variations per item are given below:

| Item | 2015 | 2014 | Var (%) |
|---|---|---|---|
| **Profit for the year from continuing operations** | (1,198) | 144 | -932% |
| Non-monetary adjustments | 1,173 | 1,040 | 13% |
| Variations in working capital and discontinued operations | (640) | (524) | 22% |
| Income tax paid & Interest received/paid | (812) | (764) | 6% |
| Discontinued operations | 280 | 123 | 128% |
| **A. Net Cash Flows from operating activities** | **(1,197)** | **19** | **-6400%** |
| Intangible assets and property, plant & equipment | (2,181) | (2,580) | -15% |
| Disposals related to the sale of assets to Atlantica Yield (ROFO 2 & 4) | 368 | - | n/a |
| Other investments/disposals | 109 | (204) | -153% |
| Discontinued operations | 102 | 284 | -64% |
| **B. Net Cash Flows from investing activities** | **(1,602)** | **(2,500)** | **-36%** |
| Underwritten Public Offering of subsidiaries | 332 | 611 | -46% |
| Share capital increase with non-controlling interest by Atlantica Yield to fund the sale of assets (ROFO 3) | 302 | - | n/a |
| Other disposals and repayments | 1,510 | 1,230 | 23% |
| Discontinued operations | (158) | (251) | -37% |
| **C. Net Cash Flows from financing activities** | **1,986** | **1,590** | **25%** |
| | | | |
| **Net increase/(decrease) of cash and equivalent** | **(813)** | **(891)** | **-9%** |
| Cash at beginning of year | 1,811 | 2,952 | -39% |
| Translation differences cash or equivalent | (58) | 31 | -287% |
| Assets held for sale and discontinued operations | (259) | (281) | -8% |
| **Cash and cash equivalent at end of period** | **681** | **1,811** | **-62%** |

› As of December 31, 2015, we used €1,197 million of net cash flows from operating activities compared to €19 million in 2014, due to cash outflows from lower profit for the year after non-monetary adjustments; (€25 million in 2015 compared to a cash generation of € 1,184 million in 2014) as well as higher net cash consumption due to working capital (consumption of €640 million in 2015 compared with consumption of €524 million in 2014). The decrease in cash generated by the lower profit for the year was mainly due to the lower activity of the company during the last months of 2015 resulting from the facts and circumstances occurred in August 2015 which led to the current situation of the Company provided by article 5 bis of the Ley concursal. The working capital consumption of €640 million, mainly as a result of the aforementioned the company situation which has induced the cancelation by some financial institutions of the working capital lines which resulted insignificant cash outflows.

› In terms of net cash flows from investment activities, there is a net cash outflow of €1,602 million in the year ended December 31, 2015, compared with net cash outflow of €2,500 million in 2014. The main investments were mainly because of the progress in the construction of thermo and photovoltaic solar projects in Chile, transmission lines in Brazil and power generation in Mexico, partially offset by the cash flow received from EIG as a result of the first asset purchase package (€195 million) and due to the sale of various assets to Atlantica Yield, which formed part of the Right of First Offer agreement (ROFO 2 and 4) signed between Atlantica Yield and Abengoa (€368 million). In relation to such divestments, selling assets to Atlantica Yield, constitute a divestment flow for Abengoa as a result of Atlantica Yield classification as a discontinued operation during year 2015 (at the end of 2015 and, after the loss of control over the company, it was recorded using the equity method).

› Net cash flow from financing activities was €1,986 million in the year 2015 compared to €1,590 million in 2014. The net cash generated from financing activities during 2015 related to the proceeds from loans and borrowings of €4,010 million and from the public sale offer of Atlantica Yield, has been offset by the repayment of loans and debt amounting to €2,456 million, dividends paid to shareholders amounting to €90 million and because the effect of discontinued operations amounting to €158 million. The proceeds from loans and borrowing from new corporate funding (provision of the syndicated loan tranche A in 2014, issue of bonds exchangeable into shares of Atlantica Yield 2017, issue of ordinary bonds maturing in 2020, the loan granted by the European Investment Bank (EIB), loans with various institutions with the support of Export Credit agencies, and new revolving credit agreements and project financing increase in funding bridge construction projects and non-recourse financing, including financing is obtained in capital markets by Solaben 1 and 6). Repayments made mainly refers to €300 million of bonds maturing in 2015, to the convertible bond maturing in 2017 whose 'put' was exercised in 2015, to the reduction in the balance in the "euro Commercial Paper (ECP) " program, as well as to the repayments to non-recourse financing and bridge loans. Regarding the public sale offer of Atlantica Yield, on January 22, 2015, the divestment of a 13% stake in Atlantica Yield was closed by the secondary public offering, generating a cash flow of €291 million before fees and expenses related to the public offer sale (€278 million after fees and expenses) and dated July 14, 2015, Abengoa has sold 2,000,000 shares of Atlantica Yield at a price of USD 31 per share, generating a cash inflow of €56 million before fees and expenses related to the public offering sales (€54 million after fees and expenses). On the other hand, the cash generated by financing activities comes primarily from the contribution of the minority shareholders of Atlantica Yield in the capital increase to finance a third package of assets (ROFO 3) during the month of May 2015 (€302 million), and the placement among qualified investors of all class B shares treasury of Abengoa, SA.

## 2.2. Financial and non-financial key indicators

The main operational and financial indicators for the years ended December 31, 2015 and 2014 are as follows:

| Item | 2015 | 2014 | Var (%) |
|---|---|---|---|
| Consolidate EBITDA (millions)) | 515 | 1.408 | -63% |
| EBITDA margin (EBITDA/revenues) | 8,96% | 19,69% | -55% |
| Operating margin (Operating profit/revenue) | -5,19% | 13,05% | -140% |
| Profit margin | -21,08% | 1,75% | -1305% |
| Basic earnings per share | -1,35 | 0,15 | -1000% |
| Diluted earnings per share | -1,35 | 0,15 | -1000% |
| Market capitalization (million) | 202 | 1.563 | -87% |

The key performance indicators for each activity is detailed below for the years 2015 and 2014:

| | 2015 | 2014 |
|---|---|---|
| **Engineering and Construction** | | |
| Backlog (€ in millions) | 7,700 | 7,953 |
| **<Concession-Type Infrastructure** | | |
| Solar | | |
| MW under development | 300 | - |
| MW under construction | 750 | 780 |
| MW in operation | 162 | 1,503 |
| Total MW | 1,212 | 2,283 |
| Transmisión | | |
| Km of transmission under development | 188 | - |
| Km of transmission under construction | 6,253 | 6,253 |
| Km of transmission in operation | 3,532 | 5,143 |
| Total Km | 9,973 | 11,396 |
| Water | | |
| Capacity of desalination in operation (m3/day) | 475 | 815 |
| **Industrial Production** | | |
| Capacity Biofuels production (ML/Yr) | 3,270 | 3,175 |

## 2.3. Matters relating to the environment and human resources

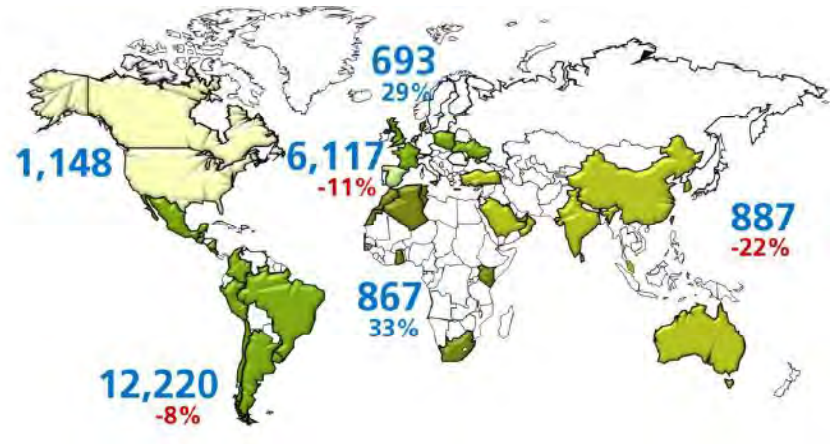
### a) Environment

The principles of the environmental policies of Abengoa are based on compliance with the current legal regulations applicable, preventing or minimizing damaging or negative environmental consequences, reducing the consumption of energy and natural resources, and achieving ongoing improvement in environmental conduct.

In response to this commitment to the sustainable use of energy and natural resources, Abengoa, in its Management Rules and Guidelines for the entire Group, explicitly establishes the obligation to implement and certify environmental management systems in accordance with the ISO 14001 International Standard.

Consequently, by year-end 2015, the percentage of Companies with Environment Management Systems certified according to the ISO 14001 Standard per sales volume is 91.58% (89.56% in 2014).

The table below lists the percentage of distribution of the Companies with Certified Environmental Management Systems, broken down by business unit:



| Business unit | ISO 14001-certified companies (% of revenue) |
|---|---|
| Engineering and Construction | 95.24 |
| Industrial Production | 92.25 |
| Concession-type Infraestructure | 63.97 |

## b) Human resources

During 2015, Abengoa's workforce decreased by 9.8% to 21,932 people as of December 31, compared to the previous year (24,322 people).

Geographical distribution of the workforce

The distribution of the average number of employees was 25 % in Spain and 75 % abroad.

Distribution by professional groups

The average number of employees by categories during 2015 and 2014 was:

| | Average number of employees in 2015 | | | Average number of employees in 2014 | | |
|---|---|---|---|---|---|---|
| Categories | Female | Male | % Total | Female | Male | % Total |
| Directors | 60 | 488 | 1.9 | 65 | 503 | 2.1 |
| Management | 433 | 1,592 | 7.2 | 435 | 1,517 | 7.2 |
| Engineers | 1,446 | 3,291 | 16.9 | 1,362 | 3,375 | 17.4 |
| Assistants and professionals | 1,199 | 1,758 | 10.5 | 1,108 | 1,480 | 9.5 |
| Operators | 981 | 16,252 | 61.3 | 865 | 15,893 | 61.6 |
| Interns | 247 | 373 | 2.2 | 242 | 336 | 2.2 |
| **Total** | **4,366** | **23,754** | **100** | **4,077** | **23,104** | **100** |

# 3.- Liquidity and capital resources

## a) Liquidity risk

During the last year Abengoa's liquidity and financing policy during the last years has had intended to ensure that the company could have sufficient funds available to meet its financial obligations as they fall due. Abengoa has been using two main sources of financing:

- Project debt (Non-recourse project financing), which is typically used to aimed to finance any investment on project asset (see Notes 2.5 and 19 to the Consolidated Financial Statements.).
- Corporate Financing, used to finance the activities of the remaining companies which are not financed under the aforementioned financing model. This means of financing is managed through Abengoa S.A., which pools cash held by the rest of the companies so as to be able to re-distribute funds in accordance with the needs of the Group (see Notes 2.18 and 20 to the Consolidated Financial Statements) and has carried out the obtention of the resources needed from the bank and capital markets.

To ensure an adequate capacity to repay its debt in relation with the cash flow generation capacity, the Group Financial Management has been elaborating an annual Financial Plan, which is approved by the Board of Directors and includes all financial needs and the manner they will be covered.

To manage the working capital, Abengoa usually uses non-recourse confirming with various financial entities to outsource the trade payables payments, and non-recourse factoring. In addition, Abengoa has short term financing lines including commercial paper.

Due to the facts and circumstances occurred after the formulation of the interim Consolidated Financial Statements of June 30, 2015, mentioned in Note 2.1.1 to the Consolidated Financial Statements, Abengoa had at the end of November 2015 substantial liquidity needs mainly to attend capital expenditure in assets, short and medium term debt maturities related to operations and managing negative working capital. The Company, on November 25, 2015, due to the circumstances explained above, decided to initiate a refinancing process to try to reach an agreement with its main financial creditors that would ensure a suitable framework in which to undertake the mentioned negotiations and the financial stability of the Group in the short and medium term.

In relation to the process, after carefully evaluating the situation described above and in order to ensure the stability necessary to conduct these negotiations with the creditors, the Board of Directors of the Company deemed that the most appropriate approach was to submit the communication provided by the Article 5 bis of Act 22/2003 of July 9, on insolvencies (Ley Concursal). In this regard, on December 15, 2015, Mercantile Court No. 2 of Seville issued a Decree agreeing that the communication provided by the Article 5 bis of the Ley Concursal had been filed.

Additionally, mentioned, on January 25, 2016 the Company reported that on that day, Alvarez&Marsal had submitted to the Board of Directors of Abengoa an industrial Viability Plan which defined the structure of the future activity of Abengoa at operational level, focusing on the engineering and construction business with own or third-party technology. Where additional measures have been determined (among others, the rotation of non-strategic assets, the adjustment of overhead costs to new activity levels, completion of most of projects in the pipeline focusing on those that maximize the liquidity of the Company and the balance in investments to be developed in the future in concessional assets depending on the availability of financial resources and the previous identification of partners).

Based on this Viability Plan, that confirms the industrial viability of Abengoa, the Company has begun negotiations with its creditors to restructure the debt and the necessary resources and thus provide Abengoa sufficient liquidity to continue operating competitively and sustainably in the future (see Note 2.1.1 to the Consolidated Financial Statements). The approval of the above-mentioned restructuring plan will set the guidelines for the new liquidity and financing policy of Abengoa in the future, giving priority to treasury optimization and cost of capital.

An analysis of the Group's financial liabilities classified into relevant maturity groupings based on the remaining period is included in the following Notes to the Consolidated Financial Statements:

| Current and non-current | Notes to the Consolidated Financial Statements |
|---|---|
| Financial debt | Note 19 Project debt and Note 20 Corporate financing |
| Lease-back | Note 20 Corporate financing |
| Finance lease | Note 20 Corporate financing |
| Borrowings and other loans | Note 20 Corporate financing |
| Trade and other accounts payable | Note 25 Trade payables and other current liabilities |
| Derivatives and hedging instruments | Note 14 Derivative financial instruments |
| Other liabilities | Note 21 Grants and other liabilites |

## b) Capital risk

During the last year the Group has managed capital risk aimed to be able to ensure the continuity of the activities of its subsidiaries from an equity standpoint by maximizing the return for the shareholders and optimizing the structure of equity and debt in the respective companies or projects.

Since the admission of its shares to trade on the stock market, the company has grown in the following ways:

- cash flows generated by conventional businesses;
- financing of new investments through project debt (project finance and bridge loan), which also generates business for conventional businesses;
- corporate financing, either through banks or capital markets;
- issuance of new shares of subsidiaries through organized markets;
- asset rotation;

The leverage objective of the activities of the company has not generally measured based on the level of debt on its own resources, but on the nature of the activities:

- for activities financed through project debt, each project is assigned a leverage objective based on the cash and cash flow generating capacity, generally, of contracts that provide these projects with highly recurrent and predictable levels of cash flow generation;

- for activities financed with Corporate Financing, the objective is to maintain reasonable leverage, depending on their optimal capital structure.

- As mentioned in Note 4 c) to the Consolidated Financial Statements), liquidity needs due to the facts and circumstances occurred following the formulation of the Interim Consolidated Financial Statements of June 30, 2015, mentioned in Note 2.1.1 to the Consolidated Financial Statements, led the Company to start, within the legal frame provided by the article 5 bis of Ley Concursal, a refinancing process with the objective of reaching an agreement with the main creditors to ensure the proper frame to develop the negotiations and the financial stability of the Group in the short and medium term. Additionally, on January 25, 2016 the Company reported that on that day, Alvarez&Marsal had submitted to the Board of Directors of Abengoa an industrial Viability Plan which defined the structure of the future activity of Abengoa at operational level, focusing on the engineering and construction business with own or third-party´s technology.

- Based on this Viability Plan, the Company has begun negotiations with its creditors to restructure the debt and the necessary resources and thus provide Abengoa with the optimal capital structure to continue operating competitively and sustainably in the future (see Note 2.1.1 to the Consolidated Financial Statements).

## c) Contractual obligations and off-balance sheet

The following table shows the breakdown of the third-party commitments and contractual obligations as of December 31, 2015 and 2014 (in thousands of euros):

| 2015 | Total | Up to one year | Between one and three years | Between three and five years | Subsequent |
|---|---|---|---|---|---|
| Loans with credit institutions | 5,398,326 | 4,888,251 | 84,193 | 81,352 | 344,530 |
| Notes and bonds | 3,300,825 | 3,300,825 | - | - | - |
| Liabilities due to financial leases | 36,542 | 17,020 | 6,874 | 1,629 | 11,019 |
| Other loans and borrowings | 659,414 | 557,047 | 42,393 | 54,181 | 5,793 |
| Obligations under operating Leases | 10,450 | 2,487 | 2,814 | 2,457 | 2,692 |
| Purchase commitments | 2,836,092 | 2,498,391 | 318,156 | 2,815 | 16,730 |
| Accrued interest estimate during the useful life of loans | 1,644,957 | 491,474 | 646,296 | 271,111 | 236,076 |

| 2014 | Total | Up to one year | Between one and three years | Between three and five years | Subsequent |
|---|---|---|---|---|---|
| Loans with credit institutions | 6,274,113 | 1,243,596 | 1,208,884 | 2,000,368 | 1,821,265 |
| Notes and bonds | 3,852,958 | 1,096,965 | 1,029,873 | 867,288 | 858,832 |
| Liabilities due to financial leases | 34,991 | 10,927 | 12,796 | 3,668 | 7,600 |
| Other loans and borrowings | 121,402 | 24,373 | 71,327 | 21,206 | 4,496 |
| Obligations under operating Leases | 13,826 | 3,867 | 5,537 | 3,035 | 1,387 |
| Purchase commitments | 1,072,848 | 933,071 | 123,123 | 5,517 | 11,137 |
| Accrued interest estimate during the useful life of loans | 2,599,142 | 589,443 | 908,675 | 500,009 | 601,015 |

## d) Investment plan

The Abengoa´s investment plan during the following years mainly focus on the completion of projects currently under construction which include, among others, the following:

| Project | Business unit | Capacity | Country |
|---|---|---|---|
| South Africa 50 MW | Solar | 50 MW | S. Africa |
| Xina | Solar | 100 MW | S. Africa |
| Ashalim | Solar | 110 MW | Israel |
| Atacama 1 (CSP + PV) | Solar | 210 MW | Chile |
| Atacama 2 (CSP + PV) | Solar | 210 MW | Chile |
| Acueducto Zapotillo | Water | 3,8 m3/seg | Mexico |
| Boot Dgen Torrent Power LTD | Transmission lines | 115 km | India |
| Centro Penitenciario | Cogeneration and other | - | Uruguay |
| A3T4T | Cogeneration and other | 840 MW | Mexico |
| Nicefield | Cogeneration and other | 70 MWH | Uruguay |
| Norte III | Cogeneration and other | 924 MW | Mexico |
| Tenes | Water | 200,000 m3/día | Algeria |
| Ghana | Water | 60,000 m3/día | Ghana |
| Agadir | Water | 100,000 m3/día | Marocco |
| ATN 3 | Transmission lines | 355 km | Peru |

# 4.- Principal risks and uncertainties

## 4.1. Operational risks

### 4.1.1. Regulatory risk

Risks derived from reductions in government budgets, subsidies and adverse changes in the law that could affect the company's business and development of its current and future projects

The reduction in public spending on infrastructure has an impact on Abengoa's results, since a large part of the projects developed by Abengoa are promoted by public bodies, which provide the Company with a volume of income that is difficult to match with private investment, especially in the current economic environment as they are very capital-intensive projects that require a large initial investment and whose economic returns begin to be profitable in the very long term.

It should be mentioned that while Abengoa's business focuses increasingly on Spain and has spread to other countries gradually, a significant part of that activity is still concentrated in Spain. In recent years, Spain has experienced an economic situation that has resulted in a decline in the tax revenues collected by the various government agencies, as well as increased public deficit and a sharp increase in the cost of sovereign debt.

Additionally, in recent years, most income in the water segment from the concession-type infrastructure business was obtained from contracts with public or governmental bodies. Many of these public bodies are local authorities with limited budgets that are subject to annual fluctuations from year to year. The budgets of these local authorities are often dependent on local tax collection or budget items awarded by national governments. As a result, it is possible that the resources available to local authorities for infrastructure projects and services could be limited, without this being notified to Abengoa. In addition, measures aimed at correcting the current economic environment have increased the budget deficit in many national, regional and local governments and the government agencies with which Abengoa enters agreements, and there is no certainty that the investment in infrastructure projects and services will continue to be available at the levels seen in previous years.

Risks of changes in national and international policies supporting renewable energy projects that could affect Abengoa

Recently, some countries have adopted policies of actively supporting renewable energies. Although support for renewable energy sources by governments and authorities in the jurisdictions in which Abengoa operates has historically been strong, some policies currently in force could end, be suspended, terminated or not renewed. Consequently, it is not possible to guarantee that the government support will continue either completely or partially.

If governments and regulatory authorities in the jurisdictions in which Abengoa operates decrease or abandon their support for the development of solar energy, due, for example, to other funding priorities, political considerations or a desire to promote other energy sources, the solar plants that Abengoa plans to develop in the future could be less profitable or no longer economically feasible.

Risks derived from compliance with strict environmental regulations

Abengoa's business is subject to significant environmental regulation which, among others, requires the Company to carry out environmental impact studies in future projects or project changes, obtain regulatory licenses, permits and other authorizations, and meet the requirements of such licenses, permits and authorizations.

Accordingly, (i) it is possible that the government authorities may not approve environmental impact studies; (ii) public opposition could give rise to delays, changes or cancellations to projects or licenses; (iii) laws and regulations may change or be interpreted in such a way that compliance costs will increase or this will have a significant adverse affect on Abengoa's operations and plants or plans regarding the businesses in which the Company invests or to which the Company provides its services.

A breach of these regulations may lead to significant liability, including fines, damages, fees and expenses and the closure of facilities.

In Brazil, environmental liability applies to private individuals and legal entities that directly or indirectly cause environmental damage via their actions or negligence. A single event may give rise to liability of three types (civil, administrative and criminal), independently or cumulatively. Brazilian courts could request the lifting of the corporate veil in circumstances where it is proved that the Company has evaded an obligation to compensate for environmental damage. When the corporate veil is lifted, the shareholders, rather than Abengoa, could be liable to restore the damage.

Environmental regulation has changed very rapidly in recent years, and it is possible that the Company could be subject to more stringent standards in the future. For example, is likely that Abengoa's activities will be subject to compliance with increasingly more stringent national and international standards on climate change and the costs related to it.

Risk derived from a reliance on favorable regulation of the renewable energy business and bioethanol production

a) Solar power generation

Renewable energy is rapidly maturing but its cost of generating electricity is still significantly higher than conventional energy production (nuclear, coal, gas, hydroelectric). Governments have established support mechanisms to make renewable generation projects economically viable, in the form of subsidized tariffs (mainly in Spain), supplemented in specific cases with direct support for investment (mainly in the USA).

The subsidized tariffs vary depending on the technology (wind, photovoltaic, STE, biomass) since they are at different stages of maturity and the regulator wants to promote the development of each type by giving developers sufficient economic incentive in the form of a reasonable return on their investment. Without this support, any renewable energy project would currently be unfeasible, although as the technology matures, the need for this support will diminish or even completely disappear over the long term.

Subsidy schemes for renewable energy generation have been the subject of legal proceedings in the past in various jurisdictions (including claims that such schemes constitute state aid that is forbidden in the European Union).

If all or part of the subsidy schemes and incentives for renewable energy generation in any jurisdiction in which Abengoa operates are determined to be illegal and, therefore, are eliminated or reduced, Abengoa might not be able to compete effectively with other forms of renewable and conventional energy and could even be unable to complete some projects that are currently underway.

b) Bioenergy consumption

The consumption of biofuel for transport –one of the company's activity areas– is also subject to regulation via specific public support policies both nationally and internationally. Biofuels cost more to produce than gasoline or diesel and therefore requires government support to incentivize their use. Biofuels offer a series of environmental and energy advantages compared to oil-based fuels, making them potentially useful tools for implementing European policies to combat climate change and reduce oil dependency.

Nevertheless, despite major support in the biofuels sector from governments and regulatory authorities in the jurisdictions in which Abengoa operates, and the fact that authorities have reiterated their intention to continue this support, it is still possible that certain existing policies may change over time.

Furthermore, biofuels are not the only alternative to oil-based fuels for use in transport, as shown by the recent development of electric vehicle technology. It is possible for different energy alternatives that have the potential to progressively substitute fossil fuels in transport to coexist. Future demand for all forms of transport could be covered with a combination of electricity (fuel cells) and biofuels as the main options; synthetic fuels (increasingly produced from renewable sources) as an intermediate solution; and methane as an additional fuel supplemented by liquid petroleum gas. Many of these alternative sources receive or will receive government support in the form of different types of incentives, which may reduce the amount of support available to biofuels. Furthermore, the level of public support can be influenced by external factors, such as public criticism in some countries of the alleged effect of biofuels on increasing food prices.

Abengoa's activities are subject to multiple jurisdictions with varying degrees of regulation, which require significant effort by the company to ensure compliance

Abengoa's business is subject to strict regulation, especially in Spain, Mexico, USA, Peru and Brazil, and in every other country in which it operates. This regulation requires licenses, permits and other authorizations in relation to the company's operations. This multi-jurisdictional regulatory framework requires extensive efforts to ensure compliance with all legal requirements. Failure to comply with this regulation may result in the revocation of permits, penalties, fines of significant amounts or even criminal liability. Compliance with the regulatory requirements may result in substantial economic costs for the operations which may not be recovered. In addition, it is not possible to predict either the time or the form of any future regulatory initiative. Changes in the current energy, environmental and administrative regulations could adversely affect the business significantly, its margins and the investments of the Company. The business could also be affected by additional taxes on its activities, a reduction in tariffs, a reduction or the elimination of subsidies or tax incentives or other measures or cuts.

Risks associated with concession-type infrastructure projects that operate under regulated tariffs or very long term concession agreements

Revenues obtained from concession-type infrastructure projects are highly dependent on regulated tariffs or, if applicable, long term price agreements over a period of between 25 and 30 years, depending on the asset. Abengoa has very little flexibility with regards to amending these tariffs or prices (being subject to increases indexed to the CPI and to possible requests for the economic re-balancing of the concession) when faced with adverse operating situations, such as fluctuations in commodity prices, exchange rates, and labor and subcontractor costs, during the construction and operating phases of these projects. Higher than expected operating costs, especially after many years in operation, in most cases cannot be passed on to the rate or price and would therefore diminish the operating margin and, consequently, the profitability of the project would be reduced. These projects are normally calculated with tariffs or prices that are higher than the operating and maintenance cost.

Similarly, government agencies (in some jurisdictions) or customers (where applicable) are entitled to sanction poor provision of the services under the operational activity, with a lowering of the rate structure or by postponing its update. In the area of renewable energies in particular, there is a risk that the government could reduce or eliminate the rates currently in force at any time during the life of the concession.

## 4.1.2. Operational risk

Risk relating to the possibility that Abengoa could request insolvency proceedings in the event that the company does not reach a refinancing agreement with its main financial creditors as a result of Abengoa's liquidity needs in the short and medium term.

Energy and the environment are part of the activities in which Abengoa is engaged. This activity is performed in changing surroundings, with regulations, subsidies or tax incentives that can be changed or even legally challenged. Throughout recent financial years and especially that of 2015, various amendments to regulations took place in the jurisdictions where Abengoa operates (mainly in the United States and Brazil), mainly in relation to activity concerning renewable energy generation and biofuel production, which affected the profitability of Abengoa's current and future projects, the conditions to effectively compete with non-conventional renewables and other kinds of energy, and the ability to complete some ongoing projects.

However, investments in fixed assets (capex) which are higher than those anticipated in projects with a high return but which are extremely demanding in terms of capital in Brazil, Chile and Mexico have impacted on Abengoa's liquidity position and have led to a significant drop in the shares and debt instruments pertaining to Abengoa listed on the stock exchange during the 2015 financial year. All of this has limited access to capital markets and, at the same time, led to a deceleration in the rate of approval of working capital renewals (non-recourse factoring and confirming) by some financial entities, which has all led to a reduction in the liquidity position.

All of the aforementioned, along with Abengoa's high levels of debt, led the company to launch an action plan in September 2015, with measures aimed at reducing the leverage and improving the liquidity position, whereby a set of measures were approved in the Abengoa Extraordinary General Shareholders' Meeting on October 10, 2015, including a capital increase proposal with the aim of increasing the company's own funds by a cash amount of (face value plus premium) of €650,000,000, in order to reinforce the company's liquidity situation and reduce its levels of debt.

The fact that it was not possible to carry out the planned capital increase due to no agreement being reached between the company and the placement financial entities and potential investors led the company to begin a negotiation process with its creditors with the aim of reaching an agreement to guarantee its financial sustainability, pursuant to Article 5 bis of the Ley Concursal. For these purposes, the company submitted the communication set out in Article 5 bis of the Ley Concursal to the Commercial Court of Seville on November 25, 2015. The deadline to reach an agreement with the creditors is March 28, 2016.

Risks arising from the difficult conditions in the global economy and in global capital markets and their impact on reducing the demand for goods and services and difficulties in achieving the funding levels necessary for the development of existing and future projects and debt refinancing

The evolution of Abengoa's business has been traditionally affected not only by factors intrinsic to the company but also by external factors such as economic cycles and their impact on the regions and areas where the company operates. Typically, in situations of economic growth, the demand for the services offered by the Company increases and, conversely, in situations of economic instability or recession, demand suffers.

Since early 2008, the impact of the global financial crisis, which has particularly affected the global capital and credit markets, has been very notable. Concerns over geopolitical issues, inflation, energy costs, lack of credit fluidity, the high cost of debt, the sovereign debt crisis and the instability of the euro, among other factors, have led to a significant drop in expectations for the economy in general and, more strongly, in the capital markets. These factors —combined with the volatility of oil prices, the loss of consumer and business confidence and rising unemployment— have contributed to worsening the economic situation of many regions where Abengoa operates.

The crisis has had a global impact, and has affected both the emerging and developed economies in which Abengoa conducts a significant part of its operations (i.e. Brazil, the United States and Spain). Economic growth and recovery, both globally and in the European Union, have returned since that time but they remain fragile and subject to limitations on financing in the private sector, concerns about future increases in interest rates and continued uncertainty surrounding the resolution of the euro zone crisis, and more specifically, the uncertainty hanging over the Greek economy. Consequently, uncertainty and economic instability may have an adverse material impact on operators' decisions to invest in the products sold by Abengoa.

Abengoa is a Spanish company and its capital is denominated in euros. The effects on the global and European economy of the exit of one or more member states from the euro zone, such as Greece's possible exit from the European Union, the secession movement by Catalonia in Spain, the dissolution of the euro, and the possible redenomination of the share capital, financial instruments and other contractual obligations from the euro into another currency or the perception that any of these events may be imminent, are difficult to predict and may result in operational disruptions or other risks of contagion to the Company's business and may have an adverse material effect on the business, financial position and operating results of the Company. Moreover, despite the Company's low volume of business in Europe, to the extent that the uncertainty surrounding the economic recovery in Europe continues to adversely affect the state or regional budgets or the demand for environmental services, the Company's business and operating results may be adversely affected. In this regard, a large number of the Company's customers are implementing measures aimed at cost savings. These and other factors could, therefore, entail that the Company's customers will reduce their spending budgets for Abengoa's products and services.

As noted earlier, global capital and credit markets have experienced periods of extreme volatility and disruption since the latter half of 2008. Continued uncertainty and volatility in these markets could limit access to this route of funding for the capital required to operate and develop the business, including access to project finance which the Company uses to finance many of its projects.

The products and services of the renewable energy sector are part of a market that is subject to strict competition rules

To ensure continuity in the long term, Abengoa must be able to compete with conventional energy sources and other sources of renewable energy without public aid. Current levels of government support for renewable energy are intended to support the industry while it develops the technology needed to reduce costs and improve processes. Consequently, as the costs of generation or production decrease, this level of government support is likely to be gradually reduced for many critical projects in the future. In the medium and long term, a gradual but significant reduction in tariffs, premiums and incentives for renewable energy cannot be ruled out. If this reduction occurs, market participants, including Abengoa, must reduce prices to remain competitive with other alternatives. If cost reductions and product innovation do not take place or take place more slowly than necessary to achieve a reduction in prices, this may have a significant negative effect on Abengoa's business, financial position and the results of its operations.

The Company also faces significant competition from other suppliers of renewable energy. Regarding the solar energy industry, Abengoa estimates that competition will continue to increase as a result of the entry of new market participants and/or the substitution of renewable energy sources due to the increasing growing demand for the latter. Other factors that may contribute to this are the lower barriers to entry in these markets due to the standardization of the technologies, improved financing opportunities and increased government support. Although Abengoa strives to remain competitive, Abengoa cannot guarantee success over the competition. Should Abengoa fail to compete successfully, this could adversely affect the ability to grow the business and income generation, which could have a significant adverse effect on Abengoa's business, financial position and the results of its operations.

The results of the Engineering and Construction activity significantly depend on the growth of the company's Concession-type Infrastructures and Industrial Production activities.

The Engineering and Construction business is Abengoa's most important activity in terms of revenues. A significant part of this business depends on the construction of new assets for the Concession-type Infrastructures activity, especially power plants, transmission lines and water infrastructures.

If Abengoa is unsuccessful in winning new contracts in its Concession-type Infrastructures activity, the revenues and profitability of the Engineering and Construction activity will suffer.

Risks derived from a shift in public opinion about Abengoa's activities

There are certain individuals, associations or groups that may oppose the projects carried out by Abengoa, such as the installation of renewable energy plants, due to reasons such as the misuse of water resources, landscape degradation, land use, food shortages or price increases thereof and damage to the environment.

Although carrying out these infrastructure, engineering and building projects generally requires an environmental impact study and a public consultation process prior to granting the corresponding administrative authorizations, the company cannot guarantee that a specific project will be accepted by the local population. Moreover, in those areas in which facilities are located next to residential areas, opposition from local residents could lead to the adoption of restrictive rules or measures regarding the facilities.

If part of the population or a particular competing company decides to oppose the construction of a project or takes legal action, this could make it difficult to obtain the corresponding administrative authorizations. In addition, legal action may request the adoption of precautionary measures that force construction to stop, which could cause problems for commissioning the project within the planned time frame causing the non-compliance with Abengoa's business objectives.

Furthermore, hostile public opinion about the use of grain and sugar cane should not be readily dismissed either (albeit to a lesser extent in bioethanol production) since these are basic consumer goods that are significantly associated with shortages in the food market. In response to public pressure, governments may adopt measures to ensure that grain and sugar is diverted into food production instead of bioethanol, causing problems for existing production activities and Abengoa's future expansion plans.

Internationalization and country risk

Abengoa has projects on 5 continents, some of them in emerging countries, including locations as diverse as Africa, Australia, China, India, Middle East, North and South America (including Brazil), and it is expected to expand operations to new locations in the future. Abengoa's various operations and investments may be affected by different types of risk related to the economic, political and social conditions of the various countries in which the Company operates, particularly in countries with a higher degree of instability in the various factors cited and often referred to jointly as "country risk", which include:

- the effects of inflation and/or the possible devaluation of local currencies;
- possible restrictions on capital movements;
- regulation and possible unanticipated changes that could have adverse retroactive effects for Abengoa;
- the exchange/interest rate;
- the possibility that governments could expropriate or nationalize assets or increase their involvement in the economy and management of companies, as well as not granting or revoking previously granted licenses;
- the possible imposition of new and higher taxes or tariffs;
- the possibility of economic crises, political instability or civil disturbances.

For example, some of the contracts of Abengoa in Peru and Mexico are payable in local currency at the exchange rate on the payment date. In the event of a rapid devaluation or the establishment of exchange controls, Abengoa might not be able to convert to the local currency the amount agreed in dollars, which could affect the liquidity position of Abengoa.

In addition, in recent years, we have experienced episodes of political and social instability, with regime changes and armed conflicts in certain countries in the Middle East and Africa, including Egypt, Iraq, Syria, Libya and Tunisia. These events have increased the political instability and economic uncertainty in some of the countries in the Middle East and Africa where Abengoa operates.

Although activities in emerging countries are not concentrated in any specific country (except Brazil), the occurrence of one or more of these risks in a country or region in which Abengoa operates could have a significantly adverse effect on Abengoa's business, financial position and the results of its operations.

Abengoa's policy is to hedge the country risk through country risk insurance policies (covering cases such as political violence, expropriation, nationalization, confiscation, regulatory risk, failure to pay amounts related to the investment, dividends, amortization of credits, contractual breaches by the authorities of the host country regarding the insured investment and revolution or war) and the transfer of risk to financial institutions through the corresponding financing agreements or other mechanisms. However, it is not possible to guarantee that these mechanisms will ensure full coverage of possible contingencies or the full recovery of damages in all cases.

Risks derived from the difficulty of winning new projects or extending existing ones

The ability to maintain the competitive position of Abengoa and meet its growth targets (particularly in projects for the production of biofuels and solar thermal power generation plants within the concession-type infrastructure business) depends on the possibilities of expanding current locations or purchasing or leasing new locations in strategically placed areas that meet the requirements required by the type of project. Government restrictions, including environmental, public health and technical restrictions, limit the places where Abengoa facilities can be located.

Thus, it should be noted that, for example, solar power plants can only be built in locations with adequate, sufficient solar radiation levels, access to water, the possibility of connection to the electricity grid and specific topographical conditions. Consequently, the number of viable locations for installing a solar power plant is limited in most countries in which the Company operates (Spain and the United States), particularly as the number of installed solar plants increases and the number of available locations decreases. The increase in the number of solar energy operators in recent years has increased competition for available locations. In addition, although Abengoa conducts extensive studies before investing in the development of any location, the locations that Abengoa chooses may not achieve the expected result.

The development, construction and operation of new projects may be affected by factors commonly associated with those projects

The development, construction and operation of traditional power plants, renewable energy plants, desalination plants, water treatment plants, power transmission lines, as well as other projects that Abengoa carries out, involve a highly complex process that depends on a large number of variables.

For the proper development and financing of each project, Abengoa must obtain permits, authorizations and, in particular, environmental impact studies and adequate funding, as well as sign contracts for the purchase or rental of land, equipment supply and construction, operations and maintenance, transport and supply of fuel and purchase agreements for all or most of its production. These factors can significantly affect the ability to develop and complete new infrastructure projects. In view of these factors, the most common risks to these types of project are delays in obtaining regulatory approvals, including environmental permits and the inability to obtain financing, whether or not in satisfactory conditions.

In the case of solar plants, the land where the plants are located are usually leased for a period of not less than 25 years of tariff right or as ownership property. Previously, during the development period, a lease option is signed with the owner under which Abengoa retains exclusive occupation of the land for a reasonable time, sufficient to determine whether or not a plant will finally be able to be built at that location. In some tenders it is necessary, among other requirements, to have ownership of the land or a lease option and the building permits.

The materialization of any of these risks could cause delays in the commencement or completion of the projects planned, as well as raising their costs. It could also occur that not all the projects in the portfolio will be carried out.

Risks derived from associations with third parties when executing certain projects

Abengoa undertakes large projects (both in terms of the resources allocated and the income derived therefrom), which are becoming increasingly more technically complex and are characterized by the award of the entire project to a single contractor. Given the complexity of the projects (usually designed *ad hoc*) they require the involvement of third parties specializing in the processes necessary to carry out certain activities related to such projects.

In this regard, it should be noted that Abengoa has made investments in certain projects with third parties where such third parties provide technical expertise to the project. In certain cases, such collaborations are developed through UTEs (a type of temporary joint venture under Spanish law) or joint ventures over which Abengoa has only partial control or joint control.

Projects developed through UTE or joint venture agreements are subject to the risk that the company's partner may block decisions that may be crucial to the success of the project or investment in the project, and it runs the risk that these third parties may in some way implement strategies that are contrary to Abengoa's economic interests, resulting in a lower return. Furthermore, the success of these partnerships depends on the satisfactory compliance by partners with their obligations. If third parties cannot satisfactorily meet their obligations due to financial or other difficulties, the said partnership may fail to perform or comply with its obligations towards a customer. In these circumstances, Abengoa could be required to make additional investments or provide additional services to ensure the provision of services, or take responsibility for breaches vis-à-vis the customer, or assume additional financial or operational obligations that could eventually lead to lower profits or losses.

Operations with third parties expose the company to credit risk

Abengoa is exposed to credit risk involving default by a counterparty (customer, supplier, partner or financial institution), which could have an impact on the business, financial position and results of its operations. The Company actively manages the credit risk of the customer through the use of non-recourse factoring agreements, which entail the involvement of banks and others who assume the credit risk of customers, as well as credit insurance. Abengoa manages the credit and market risks linked to the financial derivative instruments by establishing and controlling the limits on the types and degree of risk that can be taken on and signing operations with counterparties that have an "investment grade" credit rating. However, the risk management strategy of the Company may not be effective in limiting exposure to credit risk, which would have a significant adverse impact on the business, financial position and results of the Company.

The delivery of products and the provision of services to clients, and compliance with the obligations assumed with these clients, can all be affected by problems related to third-parties and suppliers

Some Abengoa contracts require services, equipment or software that are outsourced to third parties, as well as material that is obtained from third party suppliers. The delivery of products or services that do not meet the contractual requirements or the late delivery of products and services may involve a breach in the contracts entered into with customers. Insofar as Abengoa is not able to transfer all the risk or obtain compensation from such third parties, Abengoa will be exposed to customer claims as a result of problems caused by such third party.

The unauthorized use of our products by third parties may reduce their value and prevent the company from competing efficiently

Abengoa protects its property rights based on a combination of trade secrets and intellectual property laws, confidentiality agreements and other technical and contractual measures. These measures may not be enough to protect Abengoa technology against its misuse by third parties which, regardless of the actions that might be taken by Abengoa, could entail greater competition for Abengoa and loss of market share. In addition, these measures may not protect Abengoa against claims by employees and other third parties. Abengoa also takes on risks regarding the protection of its proprietary technology because the markets where the Abengoa products are sold include jurisdictions where there is less protection for intellectual property than in jurisdictions such as the United States or the Member States of the European Union.

Likewise, Abengoa is subject to the risk of claims and legal proceedings for alleged breach by Abengoa of the intellectual property rights of third parties. In the future, third parties could sue, alleging infringement by the present or future services or solutions of Abengoa. These claims could lead to costly and lengthy legal proceedings, could give rise to liability for Abengoa if it is concluded that Abengoa has infringed the intellectual property rights of third parties and, regardless of the ultimate outcome of the latter, could distract the management team's attention from the usual business operations.

Risks derived from the company's inability to effectively defend itself against third-party claims

The Company's projects often involve very complex management in the area of engineering (design, construction and systems) and the procurement of materials. The Company may encounter difficulties in the engineering phase, the delivery of equipment, in the quality of the subcontractors, in changes to schedules or other factors (some of which are beyond its control), affecting its ability to complete the project according to the original plans, or to meet contractual obligations.

Therefore, the Company could be subject to lawsuits and claims that would also include those relating to costs passed on due to alleged defects or incomplete work, breach of warranty and/or delayed completion of the project and claims for suspended projects, damages to third parties or breach of contracts with customers. These claims could request consequential damages, as well as those damages contractually agreed regarding amounts to be settled, or both types of damages, depending on what was determined in the contract in question.

If these claims are not resolved through settlement agreements, they could lead to long and costly court or arbitration proceedings. In addition, insurance coverage tends not to assume the liability of the Company on those occasions on which it has been convicted, or when the coverage under the policies is much lower than the amount payable by the Company in a possible unfavorable court ruling.

Revenues from long term agreements: risks derived from the existence of termination and/or renewal clauses of the concession agreements managed by Abengoa; cancellation of pending projects in Engineering and Construction; and the non-renewal of distribution agreements in bioenergy

- Concessions

  Projects involving the operation of concessions are governed by the provisions of public contracts, where the competent government agency has certain prerogatives, such as monitoring the effective enforcement of contracts through the requirement for submission of technical, administrative or financial reporting, or the unilateral modification (subject to certain limits) of the established commitments. In any case, these contracts are subject to revocation or termination clauses which may be applicable in cases of inadequate compliance with the commitments (on investment, compliance with efficiency and safety standards, etc.) established in those contracts.

  Also, some of the projects are subject to renewals by the competent government agency. In no case does the payback of the concessions depend on the renewal of the concession, without prejudice to the fact that if in the case in question the awarding body issues a lease renewal for an additional period and that extension is awarded to Abengoa, this could result in an additional expected return.

- Bioenergy distribution agreements

  Abengoa sells biofuels through medium and long term agreements, mainly in Europe. If these contracts are not renewed or are renewed on less favorable terms, this may have an adverse effect on Abengoa's business, financial position and the results of its operations.

- Backlog in the Engineering and Construction activity

  It is important to note that the term "backlog" usually refers to projects, operations and services for which the company has commitments, but also includes projects, operations and services for which it does not have firm commitments (i.e. revocable commitments without penalty for the undertaking party). A large part of the projects are conditional upon other factors, usually the process of obtaining third party financing. Similarly, all the projects in the backlog are exposed to unexpected adjustments and cancellations, as well as early termination, variations or non-payment, since the projects may remain in the portfolio for an extended period of time. The Engineering and

Construction contracts that Abengoa signs in the framework of the development of its projects are often executed over a period that may exceed 2 years to complete construction. This circumstance increases the chances that any of such contracts could be terminated early, while respecting the corresponding notice periods. These cancellation processes are legally or contractually regulated, with compensation procedures having been established. However, if any breach or default exists on the part of Abengoa, the Company may not be entitled to receive the compensation stemming from the early termination.

Abengoa cannot guarantee that the expected revenues from its "backlog" will materialize or, even if they do materialize, that they will lead to a profit. Due to the possible termination of projects, suspensions and changes in the schedule and scope of the project, it is not possible to predict with certainty when the backlog may be updated or whether it should be updated. Nor can Abengoa guarantee that additional cancellations will not occur and, even if a project progresses as planned, it is possible that the customer may become insolvent and not pay the amounts due to Abengoa. Material delays, cancellations and payment defaults could significantly affect Abengoa's business, financial position and the results of its operations.

The term "backlog" may not reflect the definition used by other companies with similar activities to those of Abengoa. Therefore, the determination of the backlog may not be comparable to other companies using a different definition.

According to Abengoa's transition towards an "asset light" business model, Abengoa is refocusing its engineering and construction business towards "turnkey" and concessionary projects that require limited capital investment or no investment by Abengoa. In this regard, the backlog of "turnkey" and concessionary projects granted to Abengoa over the past two years has grown significantly.

Risks arising from delays or cost overruns in the Engineering and Construction activity due to the technical difficulty of projects and the long term nature of their implementation

In the Engineering and Construction activity, it is important to note that –with few exceptions– all of the agreements that Abengoa has entered into are 'turnkey' construction agreements (also known as "EPC agreements"). Under the terms of these agreements the client receives a completed facility in exchange for a fixed price. These projects are subject to very long construction periods of between one and three years. This type of agreement involves a certain amount of risk that the costs will be higher than those expected and the profitability of the project will be diminished since the price offered prior to beginning the project is based on cost estimates that can change over the course of the construction period, which can make certain projects unprofitable or even cause significant losses. Delays can result in cost overruns, deadlines being missed or penalty payments to the client, depending on what has been negotiated. Furthermore, in most EPC contracts Abengoa is responsible for every aspect of the project, from the engineering through to the construction, including the commissioning of the project. In addition to the general responsibilities for each project, Abengoa must also assume the technical risk and the associated guarantee commitments.

Likewise, Abengoa must ensure that at all times it respects the minimum levels of subcontracting permitted by regulations applicable in the construction sector and registers with the Register of Accredited Companies (a register which aims to prove that companies operating in the construction sector meet the requirements of capacity and quality in the prevention of occupational hazard), as well as monitoring that the subcontractors are duly registered. Otherwise, Abengoa could be jointly and severally liable for wages and social security. These circumstances should be taken into account especially in "turnkey" contracts.

Risks derived from lawsuits and other legal proceedings

Abengoa is subject to the risk of claims and lawsuits and disciplinary sanctions in the regulatory environment during the ordinary course of its business. The results of the legal and regulatory proceedings is not predictable with certainty. Abengoa is a party to several lawsuits, proceedings, actions and investigations, including in relation to possible anti-competitive practices.

In particular, Abengoa has been sued in certain disputes brought before the United States District Court for the Southern District of New York and the Commercial Court in Seville, on behalf of certain investors of Abengoa, alleging infringement of the securities regulations in the US and Spain.

The nature of the Engineering and Construction business exposes the company to potential liability claims

The Engineering and Construction business carries out operations in which flaws in the design, construction or systems can involve substantial damages to third parties. Moreover, the nature of the Engineering and Construction business means that customers, subcontractors and suppliers occasionally file claims against Abengoa to recover the costs they have incurred in excess of their provisions, or for those for which they do not consider themselves to be contractually liable. Abengoa has been and will be in the future a respondent in legal proceedings in which the parties claim damages and compensation in connection with Abengoa projects or other matters. These claims and lawsuits arise in the normal activity of the Company. In those cases in which it is concluded that Abengoa is liable, Abengoa may not be covered by its insurance or, should it be covered, the amount of these liabilities could exceed the limits of Abengoa's policy.

Risks derived from variations in the cost of energy

Some of the activities of Abengoa, particularly ethanol production activities, involve significant energy consumption, particularly gas.

The profitability of activities that are highly reliant on these inputs is therefore sensitive to fluctuations in their prices. Despite the fact that agreements to purchase gas and other sources of energy normally include adjustment or hedging mechanisms against a rise in prices, the company cannot guarantee that these mechanisms will cover all of the additional costs that could be incurred from a rise in the price of gas or its other energy inputs (especially in long term agreements signed with clients and in agreements that do not include these adjustment clauses).

The Company, as a rule, contracts financial instruments on the gas in order to control this price risk.

Risks derived from the exposure of power generation revenues to electricity market prices

In addition to the incentives provided, the income of some of the Abengoa projects partially depends on market prices of electricity sales. Market prices of electricity can be volatile and are affected by several factors, including the cost of raw materials, user demand and, if applicable, the price of greenhouse gas emission allowances.

In some of the jurisdictions in which Abengoa operates, the Company is exposed to compensation schemes involving components based on market prices and regulated incentives. In such jurisdictions, the regulated incentives component may not compensate for fluctuations in the market price component and, consequently, the total compensation could be volatile.

There is no assurance that the market prices shall remain at the levels that allow Abengoa to maintain profit margins and the desired rates of return on investment.

Risks derived from a lack of available power transmission capacity, potential increases in transmission network access costs and restrictions in other systems

In order to provide electricity from photovoltaic and CSP plants to Abengoa customers, the projects need to be connected to the power transmission networks. The lack of available capacity on the power transmission networks could have a substantial impact on projects and lead to reductions in the size of projects, delays in the implementation of projects and increased costs of upgrading the power transmission networks. These issues affecting power transmission, as well as issues concerning the availability of high-capacity systems such as transformers, could significantly affect the capacity to build CSP and photovoltaic plants and to generate sales of solar electric power.

Insurance policies taken out by Abengoa may be insufficient to cover the risks arising from projects and the cost of insurance premiums may rise

Abengoa's projects are exposed to various types of risk that require appropriate coverage in order to mitigate their potential effects. Despite Abengoa's attempts to obtain the correct coverage for the main risks associated with each project, it is impossible to guarantee that it is sufficient for every type of potential loss.

Abengoa's projects are insured with policies that comply with sector standards in relation to various types of risk, such as risks caused by nature; incidents during assembly, construction or transport; and loss of earnings associated with such events. All of the insurance policies taken out by Abengoa comply with the requirements demanded by the institutions that finance the company's projects and the coverage is verified by independent experts for each project.

Furthermore the insurance policies taken out are reviewed by the insurance companies. If insurance premiums increase in the future and cannot be passed on to the client, these additional costs could have a negative impact for Abengoa.

The company's activities may be negatively affected by catastrophes, natural disasters, adverse weather conditions, unexpected geological conditions or other environmental circumstances, as well as by acts of terrorism at any of its sites

In the event that an Abengoa site is affected by a fire, flood, adverse weather conditions or any other type of natural disaster, acts of terrorism, power outages and other catastrophes, or in the event of unexpected geological conditions or other unexpected environmental circumstances, the company may be unable or only partially able to continue operating these facilities. This could result in lower revenues from the affected site while the problem exists and lead to higher repair costs.

Abengoa has taken out insurance against natural risks or acts of terrorism and the loss of earnings that may arise from stoppages.

The analysis of whether the IFRIC 12 ruling applies to certain contracts and activities, and determination of the appropriate accounting treatment in the event that it is applicable, involves various complex factors and is influenced by diverse legal and accounting interpretations

Abengoa records certain assets of the concession-type infrastructure business as service concession contracts in accordance with IFRIC 12. The infrastructure that Abengoa records as service concessions according to IFRIC 12 are primarily related to the power transmission lines business, desalination plants and solar thermal power generation plants outside and inside Spain.

The analysis regarding whether or not IFRIC 12 applies to certain contracts and activities includes several complex factors and is significantly affected by legal interpretations of certain contractual arrangements or other terms and conditions with public sector bodies. In particular, the application of IFRIC 12 requires that the party that awards the concession should determine what services the operator using the infrastructure must provide, to whom and at what price, and that it also control any residual interest in the infrastructure at the end of the concession period. When the operator of the infrastructure is also responsible for engineering, procurement and construction of the asset, IFRIC 12 requires separate accounting for revenues and margins associated with the construction activities, which are not eliminated on consolidation even between companies within the same consolidated group, as well as for the consequent operation and maintenance of the infrastructure. In these cases,

investment in the infrastructure used in the concession agreement may not be classified as property, plant and equipment of the operator, but rather should be classified as an intangible asset or financial assets, depending on the nature of the receivables established in the contract.

Therefore, the application of IFRIC 12 requires significant judgment in relation to, among other factors, (i) the identification of certain infrastructures and contracts within the scope of application of IFRIC 12; (ii) an understanding of the nature of the payments in order to determine the classification of the infrastructure as a financial asset or as an intangible asset; and (iii) the time scale and the recognition of revenues from the construction and concessionary business.

Changes in one or more of the factors described above could significantly affect the conclusions of Abengoa on the application of IFRIC 12 and, therefore, the results of its operations and financial position. Consequently, if it is determined that such assets do not fall within the scope of IFRIC 12, the associated revenues and margins obtained by Abengoa during the construction phase of the affected assets might not be recognized in accordance with IFRIC 12 and eliminated on consolidation, leading to a decrease in revenues and profits in the Consolidated Financial Statements of the period, and a reclassification of intangible assets to property, plant and equipment in the consolidated balance sheet. Therefore, if it is determined that these assets no longer fall within the scope of application of IFRIC 12, this would affect the comparability of the operating results of Abengoa and its financial position in the periods in which such determination was made.

The recovery of tax losses depends on obtaining profits in the future, which in turn depends on uncertain estimates

Abengoa assesses the recovery of deferred tax assets on the basis of future taxable profit estimates. These estimates stem from the projections included in the 5-year and 10-year strategic plan prepared by Abengoa and drafted yearly and reviewed twice a year to ensure the accuracy of the assumptions used in their preparation. Based on current estimates, Abengoa expects to generate sufficient taxable income to recover the tax credits. Nevertheless, income may be affected by adverse circumstances that arise during the ordinary course of its business, as well as due to non-recurring extraordinary circumstances. A modification to estimates and assumptions by Management may result in the non-recognition of the recoverability of deferred tax assets in the balance sheet of the Company, if indeed it is considered unlikely that no taxable profits against which to offset the deductible temporary differences will be recorded, which will result in the recognition of the tax expense in the consolidated income statement, although there would be no impact on cash flows.

In relation to the tax loss carryforwards and deductions pending set-off recorded as deferred tax assets, the Company, based on the assessment made, expects to recover these through the projected taxable profit and the tax planning strategy, taking into account in the said assessment the possible reversions of deferred tax liabilities, as well as any limitation established by the tax regulations in force in each tax jurisdiction.

Risks arising from operations in Brazil

Abengoa has a permanent establishment in Brazil, which contributes significantly to its results. In Brazil Abengoa develops its three business areas, but at present the most notable area is that of construction and operation of electricity transmission lines.

Abengoa currently has certain electricity transmission line projects under construction. The inability to secure funds for some of the projects could have a significant impact on the profitability thereof or cause their delay or possible cancellation, with consequent penalties for Abengoa.

On the other hand, the operations in Brazil present an exchange rate risk, since movements in the trading price of the Brazilian Reais may introduce volatility in Abengoa's results. Abengoa has a broad policy of hedging the exchange rate risk. For example, in concessionary projects such as electricity transmission lines, the funds provided by financial institutions are locally obtainable in Brazilian Reais, the same currency in which the income is received, which constitutes a natural hedge to movements in the currency. Regarding the remaining risk, Abengoa contracts hedging instruments whenever economically feasible, thereby minimizing the impact that a potential devaluation of the Brazilian Reais could possibly have on Abengoa's results.

Risks derived from turnover in the senior management team and among key employees or from an inability to hire highly qualified personnel

Abengoa's future success heavily relies on the participation of the entire senior management team and key employees, who have valuable experience in every business area. Abengoa's capacity to retain and motivate senior executives and key employees and to attract highly skilled employees will significantly affect Abengoa's ability to develop the business successfully and expand operations in the future. If Abengoa loses one or more of its senior executives or valuable local managers with significant experience in the markets in which it operates, Abengoa could find it difficult to appoint replacements.

Construction projects related to the Engineering and Construction activity and the facilities of the Concession-type Infrastructures and Industrial Production activities are hazardous workplaces

Employees and other personnel that work on Abengoa's construction projects for the Engineering and Construction activity and at the facilities of the concession-type infrastructures and Industrial Production activities are usually surrounded by large scale mechanical equipment, moving vehicles, manufacturing processes or hazardous materials, which are subject to wide-ranging regulations when they are used. Projects may involve the use of hazardous or highly regulated materials that, if not handled correctly or spilt, could expose the company to claims that result in all types of civil, criminal and administrative liabilities (fines or Social Security benefits surcharges).

Despite the fact that the company has functional groups that are exclusively responsible for monitoring the implementation of the necessary health and safety measures, as well as working procedures that are compatible with protecting the environment, throughout the organization (including at construction and maintenance sites), any failure to comply with these regulations could result in liability for the company. In the event of non-compliance Abengoa could be found liable.

Historical safety levels are a critical part of Abengoa's reputation. Many of its clients expressly require the company to comply with specific safety criteria in order to be able to submit bids, and many contracts include automatic termination clauses or withdrawal of all or part of the contractual fees or profits in the event that the company fails to comply with certain criteria. Consequently, Abengoa's inability to maintain adequate safety standards could result in lower profitability or the loss of clients or projects.

As at the date of these Consolidated Financial Statements, no agreements have been terminated, no penalties have been imposed and no material decreases in earnings have occurred due to failures to comply with safety-related obligations.

Abengoa operates with high levels of debt and could take on additional borrowing

Abengoa's operations are capital intensive and the company therefore operates with a really high level of indebtedness.

The consolidated gross financial debt at December 31, 2015 was€ 9,396 million. Of the consolidated gross debt at December 31, 2015, €6,325 million correspond to corporate financing and €3,071 million to "project" financing. This is generally understood to be financing that does not have recourse to the parent company or controlling shareholder or another Abengoa company, but whose repayment is instead guaranteed by the flows and assets of the projects financed under this method, as well as by the shares of the project companies.

Of the €3,071 million in "project" financing at December 31, 2015, approximately €2,049 million correspond to bridge loans, in which Abengoa and/or its subsidiaries (distinct from the "project" subsidiaries) guarantee bonds for the purpose of acting as sponsors during the period prior to the period in which the project companies guarantee the financing of the project in the long term (typically periods of under 2-3 years). In the case of failure to comply with these obligations, the creditors would have recourse against Abengoa and any other subsidiary that might have guaranteed these bonds. If it has not been possible to assign the bridge financing to projects under construction, this financing will be classified in the consolidated statement of financial position as corporate financing, depending on the nature of the loan.

Abengoa has significant short term financing lines and non-recourse confirming in order to finance and manage its working capital requirements. If these lines and the non-recourse confirming were withdrawn, reduced, or became unavailable, Abengoa would have to obtain other sources of finance that might be unavailable or might involve incurring substantial additional future debt, including secured debt, if available. Abengoa also has euro-denominated commercial paper issued to manage working capital demands. If short-term financing, non-recourse confirming for paying suppliers or euro-denominated commercial paper are not available and Abengoa cannot replace these sources of financing with other sources appropriately and in good time, this would have a significant adverse effect on Abengoa's liquidity position and would, consequently, affect its working capital demands.

The payment-management policy at Abengoa establishes as a general rule that all companies within the group must make their payments to providers and suppliers by non-recourse bank confirming payments (also known as non-recourse confirming) without differentiating between any providers from the group that for various reasons might be part of the supply chain for each company. In any case, whether it is an external provider or one from within the group, the underlying document of the non-recourse confirming will always be a commercial invoice deriving from the operational activities of a specific company.

The accounting treatment of this type of operations is not expressly covered in the IFRS regulations. Nonetheless, on October 27, 2015 the European Securities and Markets Authority (ESMA) published a document in which it identifies its priorities for issuing financial statements corresponding to the year 2015, with the aim of promoting consistent application of international accounting standards across all issuers. The document in question indicated that confirming operations (also known as "reverse factoring") should be analyzed depending on the economic substance of the agreements between the parties, with the aim of deciding whether the trade debt should be classified as financial debt within the statement of financial position and whether the flows should be classified as financial or operational in the cash flow statement. In any case, ESMA recommends that the issuer clearly sets out the accounting classification policy that it has applied, indicating the assumptions that have been made and the corresponding quantitative impacts.

In this sense, insofar as there are no substantial changes to the conditions of the trade debt (for example, modifications to the due date, value, or interest rates, where appropriate), the fact that after the confirming operation the new legal creditor is a financial institution in place of the original trade creditor does not change the economic character of the debt that originated from the operational activities of the group company. This interpretation is applicable both in cases where the debt was established with an external provider and with one from within the group. In this way, the accounting policy consistently applied by Abengoa in recent years for provider balances linked to confirming without recourse has been to keep them recorded up to their due date under the "Providers and other accounts payable" heading of the statement of financial position independently of whether the creditor has assigned the collection rights to a financial institution and whether they originate from an external provider or from within the group. In the case of group providers there might be particular factors that could give rise to different interpretations.

Nonetheless, if in the future there is a change in the interpretation of the relevant agencies that does not coincide with the interpretation applied to date, the Management will modify the criteria set out above.

Finally, it is worth noting that, in any case, this change would not have any impact on compliance with the debt ratio given that, in accordance with what is set out in the corresponding financing agreements, provider balances connected to non-recourse confirming are explicitly excluded from the figures to include in determining the debt ratio.

Abengoa's debt could increase in the future for various reasons, including fluctuations in operating results, investment in fixed assets (capex), and possible acquisitions or joint ventures.

Abengoa's high level of debt could, amongst others, have the following consequences:

- Impede the successful refinancing of future maturities;
- Impede compliance with obligations relating to pending debt;
- Make future borrowing more expensive;
- Increase vulnerability to general adverse economic and industrial conditions;
- Inability to fulfill short-term payment obligations;
- The need to dedicate a substantial volume of operational cash flows to payments relating to the debt, thus reducing the availability of the cash flows to finance the working capital, investment in fixed assets (capex), R&D&i investment, and other business aims;
- Restrict the ability to make dividend payments and that the subsidiaries make dividend payments to Abengoa in view of the payment limitations and restrictions set out in the financing agreements;
- Limit flexibility in planning or in reaction to changes in the business and markets in which Abengoa operates;
- Put Abengoa at a competitive disadvantage compared to competitors with lower levels of debt;
- Limit the ability to borrow additional funds; and
- Compromise the viability of the company.

If the operational cash flows and other resources are insufficient to repay the obligations when they mature or to finance liquidity requirements, Abengoa might be obliged to carry out one or more of the following actions:

- Delay or reduce investment in fixed assets (capex);
- Forgo business opportunities, including acquisitions; or
- Restructure or refinance all, or part, of the debt when it matures or before then.

If Abengoa breaches any of the debt servicing obligations or breaches any related financial or operational limitation, the creditors could declare the total value of the debt immediately due and payable and could foreclose on any asset pledged as collateral. Furthermore, some of the financing agreements contain cross default clauses, meaning that breach of one specific financing agreement will automatically count as a breach of other financing agreements. Some of the financing agreements also contain cross default clauses relating to financing agreements of other sponsors that are not related with Abengoa. These cross default clauses could accentuate the effect of an individual breach. Consequently, a breach relating to debt could entail a substantial loss for Abengoa and could have a significant adverse effect on the ability of Abengoa and its subsidiaries to meet their respective obligations regarding said debt.

Despite the significant current leverage, the terms of the agreements relating to debt allow Abengoa and its subsidiaries, joint ventures, and associates to incur substantial extra debt in the future, including secured debt. Furthermore, the terms of the debt do not limit the value of the "project" financing that can be incurred, including "project" financing in the form of bridge loans secured by Abengoa and/or its subsidiaries. If Abengoa incurs additional debt, the current risks might intensify.

On the other hand, on the date of presentation of these Consolidated Annual Accounts, Abengoa is complying with all of the financial covenants of the agreements entered into and in force.

Under the terms of certain finance agreements, in which Abengoa normally acts as borrower, lenders have the right to request the early maturity of the debt, with interest, fees, and expenses accrued, if a natural or legal person other than the controlling shareholder (Inversión Corporativa IC, S.A.), acquires control of Abengoa.

Finally, under the terms of the debt issuances, the Company is obliged to offer the repurchase of the bonds if there is a change in control of the Company.

In the case of a change of control, Abengoa might be unable to obtain sufficient funds to be able to repay all of the outstanding debt under the finance agreements or to repurchase the bonds.

Risks derived from the need to make significant levels of investment in fixed assets (CAPEX)

In order to carry out its operations the Company requires a high level of investment in fixed assets (capex), principally in the area of concession-type infrastructure activity, as well as engineering and construction, investment that is expected to increase significantly over the next few years.

The Company has significant fixed asset (capex) investment needs relating to the construction of power transmission lines, solar energy plants and installations, power cogeneration plants, ethanol-production infrastructure, and desalination plants. The capex needs depend on the number and type of projects to be carried out in future.

The Company is in a phase of expansion of its own assets and plants for concession-type infrastructure activity. Return on investment, especially that made in concessions, will occur in the long term (more than 10 years) and there is a risk that some of the Company's projects will not deliver a return on investment because of operational problems attributable to the company or for reasons external to it. In this regard, as has happened in the past (e.g. projects in Brazil, Chile, and Mexico), it is possible that Abengoa's investments in fixed assets (capex) will be greater than initially envisaged.

Furthermore, there is the risk that new financial conditions will be imposed, as the Brazilian government did in the first half of 2015 by reducing the permitted leverage in relation to power transmission line projects in that country and increasing the a value of the capital that must be invested.

In addition, Abengoa's Extraordinary General Meeting held on October 10, 2015 agreed to instruct the Board of Directors of the Company to abide by the following limitations when exercising its powers for approving the policy for commitments to investment in fixed assets (capex):

(i) It must heed the fixed asset (capex) investment commitments in projects assumed through October 10, 2015.

(ii) For fiscal year 2015, it shall not assume new capital investment (capex) commitments in new projects.

(iii) As regards new fixed asset (capex) investment commitments in new projects from January 1, 2016, the maximum investment amount for each fiscal year shall be €50 million (€50,000,000). Notwithstanding the foregoing, the above limit shall cease to apply if: (i) the ratio of corporate gross debt (which includes non-recourse debt in process and bridge financing, as such concepts are defined in the Company's consolidated audited annual financial statements) to corporate EBITDA is less than 3.5x, or (ii) the Company achieves a rating of at least BB-, by Standard and Poors or Ba3 by Moody's.

The high investment needs imply a reliance on access to capital markets and bank financing both to finance new projects and to meet the general corporate finance requirements. The problems accessing financing, motivated amongst other reasons by the existing high level of debt, might increase the cost of obtaining financing, or it might even not be possible to obtain it, with a subsequent reduction in the internal rate of profit of the projects that partially depend on the Company's degree of leverage.

If these difficulties in accessing financing persist, it might not be feasible to close on the financing, something that might require additional investment by Abengoa or might result in not accomplishing the projects.

The cost of this financing, and ultimately its very availability, might mean that the Company cannot invest in these projects and must abandon them, with the subsequent loss of the development costs incurred and the expected future profitability.

The perception of the market in relation to the instability of the euro, a potential return to national currencies in the Eurozone or the complete disappearance of the euro could affect the company's business

As a result of the credit crisis in Europe, in particular in Greece, Italy, Ireland, Portugal, and Spain, the European Commission created the European Financial Stability Fund ("EFSF") and the European Financial Stability Mechanism ("EFSM") to provide finance to Eurozone countries in financial difficulties that requested this help. Throughout 2012 certain Eurozone countries announced austerity programs and other cost reduction initiatives, and the EFSF was permitted to expand its powers to provide direct finance to certain financial bodies in the Eurozone, including certain Spanish bodies. Furthermore, the European Central Bank ("ECB") has indicated its willingness to take additional measures to support the euro if necessary. In January 2015, the ECB revealed quantitative easing measures to be performed until September 2016, aimed at boosting the economy of the Eurozone and at avoiding deflationary situations. These measures and guidelines have helped, or it is hoped that they will help, to stabilize the euro between 2012 and 2015. There is no certainty that recent disruptions in Europe regarding sovereign debt will not reoccur or that the aid packages will be available again or, even if they were, that they would be sufficient to stabilize the countries and markets affected in Europe or in other areas.

This uncertainty persists in relation to the debt of certain Eurozone countries and regional governments and the solvency of particular European financial entities and their ability to face up to their future financial obligations. The prolonged adverse market conditions have created doubts about the overall stability of the euro and about the suitability of the euro as a single currency given the diverse political and economic circumstances of the member states. These and other concerns could lead to the reintroduction of individual currencies in one or more member states or, in more extreme circumstances, the dissolution of the euro. If the euro were to be dissolved, the legal and contractual consequences for the bearers of obligations denominated in euros would be decided by the laws in place at that time. The transformation of these potential events or the market's perceptions of these questions and others related ones could have a significant adverse effect on the Company's business and financial situation, as a significant amount of the Company's debt is denominated in euros.

Risks derived from a cut in the company's credit rating

The credit ratings affect the cost and other terms under which Abengoa can obtain financing (or refinancing). Rating agencies evaluate Abengoa regularly and their credit ratings are based on a number of factors, some of which are outside Abengoa's control.

Any future reduction in Abengoa's rating (or also in the general rating of Spain), could adversely affect Abengoa's ability to obtain financing under commercially acceptable terms or in any other way, with the outcome of the cost of financing increasing significantly and this reduction interfering in Abengoa's ability to implement its strategy of reducing corporate debt and improving the Company's liquidity position. Abengoa cannot guarantee that falls in the rating of Spain or of Abengoa will not occur in future.

The evolution of interest rates and exchange rates and the company's hedging could affect its results

In the normal course of its business, the company is exposed to various types of market risk, including the impact of interest rate movements. Part of its borrowing accrues interest at variable interest rates, normally linked to benchmarks such as EURIBOR and LIBOR. Any increase in interest rates would increase the financial costs associated with the variable interest rate, and would increase the cost of refinancing existing borrowing and issuing new debt.

In project financing, as a general rule, hedges are carried out to the value of 80 % of the amount and term of the respective financing, through hedging arrangements and/or swaps.

In corporate financing, as general rule, 80 % of the debt is covered throughout the term of the debt; in addition, in 2009, 2010, 2013 and 2014 Abengoa issued notes on the capital market at a fixed interest rate.

Abengoa is exposed to exchange rate risk in operations denominated in a currency that is not the functional currency of each of the companies in its group. As the group's international activities grow, a significant part of its operations may be carried out in currencies other than the functional currency of each company.

Abengoa actively manages this exposure by using options and interest rate swaps to cover exposure to interest rates and futures contracts and exchange rate swaps to cover the exposure to foreign exchange rates.

As a general rule foreign exchange hedging instruments over any position in a currency other than the Company's reference currency are carried out by exchange rate insurance principally, analyzing case by case the existing foreign currency exposure.

Risks relating to the impossibility of completing the enhanced plan for disinvestment in assets throughout the 2016 financial year

A key element of the Company's comprehensive action plan launched on September 24, 2015 to reduce the corporate debt, improve the liquidity position, and stabilize operations and relationships with Abengoa commercial partners are the implementation of the Company's enhanced plan for disinvestment in assets. In accordance with this program, it is expected that approximately €1,200 million will be obtained by the end of the 2016 financial year (including €500 million from the disinvestments plan announced on August 3, 2015) through the sale of assets and monetization of all or part of the economic rights (realization of the economic rights by issuing some type of financial instrument, for example, convertible bond or equity preference) of Abengoa's stake in Atlantica Yield or the sale in a private process of all or part of Abengoa's stake in Atlantica Yield.

Abengoa's ability to obtain at least approximately €1,200 million through the implementation of the enhanced plan for disinvestment in assets before the end of the 2016 financial year is subject to a number of risks and uncertainties, including, amongst others, the following:

- Adverse market and macroeconomic conditions that might have a negative effect on investors' interest in purchasing these assets;
- The non-existence of purchasers who wish to acquire the assets at the prices and under the terms that Abengoa considers appropriate to obtain the desired profitability and meet the liquidity requirements;
- Interested buyers might not have financing under terms that are favorable for them or might not have any financing to buy Abengoa's assets;
- The government authorities that granted the concessions or others partner organizations in the relevant contracts might not give their consent to the transfer of the concession or of the long-term power purchase agreement in time or under terms that are acceptable to Abengoa or the buyer of the asset;
- The lenders of the project financing associated with the assets for sale might not give their consent to the sale of the assets in question in time or under terms that are acceptable for Abengoa; and
- Abengoa's equity partners in the project companies associated with the assets for sale might not give their consent to the sale of the assets in question in time or under terms that are acceptable for Abengoa; and

If Abengoa does not manage to implement the enhanced plan for disinvestment in assets at the end of the 2016 financial year, Abengoa might not be able to repay the corporate financing and project financing, that is due during the rest of the 2015 financial year and up to September 30, 2016, and might have to restructure or refinance these obligations. Abengoa could also be unable to stabilize its operations and its relationships with commercial partners and might have to delay or reduce its investments in fixed assets (capex) or reject business opportunities. Furthermore, Abengoa's inability to carry out the enhanced plan for disinvestment in assets could lead to a reduction in Abengoa's credit rating, something that could impede its ability to obtain financing under commercially acceptable terms or in any other form, increase the cost of financing or interfere in its ability to develop the corporate strategy. Furthermore, Abengoa's inability to complete the sales during 2016 of the assets that are identified as assets available for sale, the sale of which it considers to be highly probable. This would prevent Abengoa from continuing to classify any asset and related liability that has not been sold as available for sale and would entail the reclassification of the asset and related liability, including the debt, in the Consolidated Financial Statements, which would have the effect of increasing the levels of corporate financing and project financing.

Risks arising from the need to generate positive cash flows.

As a result of the investments made in Abengoa's different activities in 2015, 2014, 2013 and 2012 in fixed assets (capex), Abengoa has generated a significant volume of negative cash flows in these periods, and liabilities at the end of each of these periods have exceeded tangible assets.

The high level of debt requires the dedication of a substantial part of the operational cash flow to debt payment, thus reducing Abengoa's ability to make payments, refinance the debt and finance investments in fixed assets (capex) and in R&D&i initiatives. Furthermore, a substantial part of the "project" financing of the project companies is fully amortized during the term of this financing and Abengoa is confident in the generation of cash flows by these project companies to meet these payment obligations. Abengoa's cash flows are, to a great degree, subject to economic, financial, competition, legislative, regulatory and other factors that are outside the Company's control. However, Abengoa cannot guarantee that the business will generate sufficient cash flows from operations; that the ongoing cost savings and operational improvements will be made in the anticipated timescale; that Abengoa will be able to maintain the same terms regarding receipts and payments and therefore maintain the negative working capital balance; or that future provisions of financing agreements will be sufficient to cover the debt, finance other liquidity requirements or make it possible to continue with the plan for investment in fixed assets (capex). Abengoa may have to refinance all or part of the debt on the debt it matures or before then. Abengoa cannot guarantee that it will be able to refinance this debt under commercially reasonable terms.

Risks derived from reduced financial and operational flexibility because of the limitations and obligations established in financing agreements

The agreements relating to the indebtedness and other financial obligations of Abengoa and some of its subsidiaries contain affirmative and negative limitations and obligations, including the requirement to maintain certain financial ratios. Depending on the agreement, these obligations and limitations reduce operational flexibility by limiting the capacity of Abengoa and of certain subsidiaries to, amongst other matters: incur additional debt, make distributions, loans and other types of restricted payments; liquidate or dissolve companies; enter into spin-off, transformation, merger or acquisition agreements, subject to certain exceptions provided for in the agreement itself; and change the nature or scope of the business lines. The restrictions on the ability of Abengoa's subsidiaries to transmit assets to Abengoa through loans, advances, or dividends without the consent of third parties is significant. Project financing agreements generally prohibit distributions to Abengoa, unless certain specific conditions are met, including compliance with financial ratios. If Abengoa or one of its subsidiaries does not fulfill some of these obligations and limitations, a breach could be declared that, if it is not remedied or waived, could lead to the early cancellation of the debt and could limit the ability of the subsidiaries to make distributions to Abengoa.

Risks deriving from "project" financing

Abengoa tries to finance certain significant projects and investments, including investments in fixed assets (capex) relating to concessions or to regulated tariff agreements primarily through financing agreements that, with certain exceptions, require the financing to be repaid exclusively with the income from the project that is being financed, so that repayment of the financing (and the interest on it) is exclusively guaranteed by the shares, fixed assets, contracts and cash flows of the project company.

Even when the creditors under the "project" financing do not have a direct claim against Abengoa or its subsidiaries, except against the borrowing project companies, a breach by the borrowing project companies might have significant consequences for Abengoa and its subsidiaries, including, without limitations:

- A reduction in receipts of dividends, charges, interest payments, loans and other sources of cash, as the project company is prohibited from distributing cash to Abengoa and its subsidiaries for as long as this breach remains in place;
- Recording a loss in the event that the lender forecloses on any of the assets of the project company; and
- The loss or reduction of investor and creditor confidence in Abengoa.

Risks arising from Company's dividend policy

Under the framework of the action plan announced by the Company on September 24, 2015, Abengoa's Board of Directors agreed at its meeting on September 23, 2015 to suspend payment of cash dividends for as long as the Company does not have a rating of, at least, BB- from Standard & Poors or Ba3 from Moody's or a leverage ratio of gross corporate debt (including bridge financing or non-recourse debt in process) according to the last balance sheet approved, to corporate EBITDA corresponding to the twelve months immediately previous to the date of this balance, less than 3.5 times.

If the Company does not obtain the rating described above or a gross corporate debt ratio lower than the previously indicated figure, the Company will not distribute cash dividends to its shareholders.

Risks derived from the correlation between the prices of sugar, oil and sugar cane.

In general, the price of ethanol correlates with the price of sugar and, up to a certain point, with the price of oil. A significant part of the ethanol produced in Brazil is produced in sugar-cane mills that produce both ethanol and sugar, so the prices of both products are correlated and the correlation between ethanol and sugar increases over time. Moreover, sugar prices in Brazil are determined by prices in the global market so there is a strong correlation between ethanol prices in Brazil and global sugar prices.

Given that flex-fuel vehicles allow consumers to choose between gasoline and ethanol in gas stations, the prices of ethanol are ever-more correlated positively with the prices of gasoline and, consequently, with the prices of oil. Abengoa believes that this positive correlation between products will increase over time. In the same way, a reduction in sugar prices will have a negative effect on the financial development of the ethanol and sugar businesses, and the current reduction in the price of oil could have a significant adverse effect on Abengoa's business, financial situation and operating results. Nonetheless, biofuels are not the only alternative fuel for the transport sector currently being developed in the market. Future demand for fuel will depend on the relative attractiveness of other technologies, such as electrical vehicles, synthetic fuels, and other fossil fuels such as methane or liquid gas. Some of these technological initiatives receive public support from governments. If biofuels do not continue to be an attractive and competitive alternative fuel for gasoline and other emerging technologies, this could have an adverse effect on the business, financial situation and operational results of Abengoa.

Risks derived from sensitivity in the demand for raw materials for bioenergy production and volatility in the price of the end product

The profitability of the biofuels sector within Abengoa's Industrial Production activity is affected by the prices of the commodities, including Abengoa's capacity to manage the price differentials (spreads) between the raw materials that must be acquired (maize, sugarcane, natural gas, etc.) and the product obtained that is sold (bioethanol, sugar, distilled grain and solubles, etc.). These prices are subject to a high degree of volatility and uncertainty.

The prices and supply of maize, the main raw material for production of ethanol, are decided by various market factors that are outside Abengoa's control that are typical of commodities (balance of supply and demand – national or global – speculative flows) or are external to the market, such as the climate, scarcity, export prices, and certain protectionist government policies in the United States, Europe, Brazil and the rest of the world.

During the years 2011, 2012, and 2013, Abengoa's bioethanol business faced adverse market conditions, principally the large increase in the price of the raw materials (maize and sugar) because of the poor crops in those years and the fall in the price of ethanol as a consequence of low demand for gasoline, especially in the United States market. These market conditions improved significantly during 2014, the recovery of the price of ethanol also being favored by the normalization of the price of the raw material that improved the profitability of the business. In 2015, there is again a difficult market environment, fundamentally in the United States, owing to the reduction in the price of ethanol determined, in part, by the price of gasoline.

As a consequence of the volatility of the prices of these commodities, the operating results of the biofuels sector of the Industrial Production activity might fluctuate considerably. The increase in the prices of the raw materials (maize and gas mainly) or the fall in the prices of the products obtained (ethanol) could mean that Abengoa's operation of the production plants ceases to be profitable.

Abengoa is aware of the impact that prices of raw materials have on the activity of biofuel production, and to mitigate the risk associated with these prices, insofar as it is possible, it has a policy of not committing to the production and sale of biofuels until it has ensured the supply of the necessary raw materials, something that considerably diminishes uncertainty regarding the margins obtained. In the USA and Europe maize is insured on the international markets, while in Brazil, owing to the particular characteristics of sugar cane there are supply agreements with farmers from areas close to the plants.

Likewise, Abengoa uses risk coverage strategies, including futures sales contracts and options that are listed on organized markets, as well as other over the counter contracts to mitigate the risk deriving from an increase in the purchase price of raw materials, as well as of the sale price of the final product. While they do not eliminate them completely, these strategies considerably reduce Abengoa's exposure to the price of commodities and to procurement risks.

Risks relating to changes in technology, prices, industry standards, and other factors

The markets in which Abengoa's activities operate change quickly owing to technological innovations and to changes in the prices, industry standards, client requirements, and the economic environment. New technology or changes in the industry and in clients' requirements might mean that existing products and services become obsolete, excessively expensive, or not easily marketable. Consequently, Abengoa must improve the efficiency and reliability of existing technologies and pursue the development of new technologies to remain at the forefront of industry standards and the requirements of clients. Abengoa must continue to incur significant R&D&i expenses to maintain and improve its competitive position. Some of Abengoa's competitors might have substantially greater financial resources than Abengoa. If the Company is unable to introduce and integrate new technologies into its products and services in a timely and cost effective manner or does not obtain the necessary financing to carry out appropriate R&D&i activities, Abengoa's competitive position and growth prospects will deteriorate, something that might in turn have an adverse material impact on Abengoa's business, financial situation, and operating results.

The company has a controlling shareholder

As at the reference date of the Consolidated Financial Statements, Inversión Corporativa I.C., S.A. is direct and indirect holder of 51.78% of the voting rights in Abengoa.

Consequently, this company controls Abengoa under the terms of Article 42 of the Code of Commerce and can therefore exert a controlling influence over certain issues that require the shareholders' approval, notwithstanding the protective measures and the separate voting rights corresponding to Class B shares in certain cases, pursuant to the company's bylaws.

Conflicts could arise from differences between the interests of Inversión Corporativa I.C., S.A. and the remaining shareholders, which may be resolved by the controlling shareholder in a way that does not suit the interests of the other shareholders.

Nevertheless, Inversión Corporativa IC, S.A. has signed a shareholder agreement with the company, in which it agrees to the following, among other issues, (i) only exercise its voting rights up to a maximum of 55.93% (the percentage of votes that it had at the date of signing the shareholder agreement) in cases in which, as a result of exercising the right to convert Class A shares into Class B shares, as stated in the company's bylaws, the total voting rights that it holds as a percentage of the total voting rights of the company increases; and (ii) that the percentage represented at any given time by the number of shares that it holds with the right to vote (whether these are Class A shares or Class B shares) of the total number of company shares, will not be less than one quarter of the percentage represented by the voting rights that these shares attribute to Inversión Corporativa IC, S.A. at any given time, in relation to the company's total voting rights (in other words, that its voting rights will not be greater than four times its financial rights); and that, should this situation arise, it will sell the necessary amount of Class A shares or will convert them into Class B shares in order to maintain this ratio.

Similarly, through the shareholder agreement with First Reserve Corporation (another shareholder in the company), Inversión Corporativa IC, S.A. has agreed that while FRC or any of its related companies owns Abengoa Class B shares or any other instrument that is convertible or exchangeable for Abengoa Class B shares, they will not propose or request the Board of Directors to recommend to shareholders any modification to the company's bylaws that adversely affects the equal rights between Class B and Class A shares in relation to the distribution of dividends or similar distributions as established in the bylaws and that if this proposal were to be submitted by another shareholder, or by the Board of Directors, they will vote against it.

The existence of two share classes, Class A and Class B, with different voting rights, could deter third parties from carrying out transactions to take control of the company

Abengoa has two types of share with different voting rights. Class A shares have the right to 100 votes per share while the Class B shares have the right to 1 vote per share.

Owing to the different voting rights that derive from the Class A Shares and the Class B Shares, shareholders with Class A Shares will have significant voting rights regarding matters that require the approval of the shareholders, including naming directors and significant company operations, such as the merger or sale of the Company or its assets. Given that this concentrated control is a disincentive for the other shareholders to promote a possible merger, takeover offer, or any other operations involving change of control that shareholders with Class B Shares might regard as beneficial, the market price of the Class B Shares might be adversely affected.

In addition, shareholders with Class B shares might not have the same protections as shareholders with Class A Shares in the event that a takeover offer is made by a third bidder for all of the shares in the Company with voting rights. In accordance with Spanish legislation regarding takeover bids, it is unclear whether in this case the bidder would be obliged to offer shareholders with Class B Shares the same price per share than to the shareholders with Class A Shares. Abengoa's Bylaws establish a right of redemption for shareholders with Class B Shares at a price that is equal to that offered by the bidder to shareholders with Class A Shares in those cases in which a takeover bid is made for all of the shares with a vote in the Company that does not offer the same treatment to shareholders with Class A Shares and to the shareholders with Class B Shares. Given that the inclusion of this right of redemption in the Bylaws might be a disincentive to launching a voluntary takeover bid that shareholders with Class B Shares could see as beneficial, the market price of the Class B Shares could be adversely affected.

Risks of conflicts between the bylaw provisions and the constraints included in the debt

Abengoa's Bylaws establish a right of redemption for shareholders with Class B Shares in those cases in which a takeover bid is made for all of the voting shares with voting rights in the Company through which the bidder attains a percentage of voting rights equal to or greater than 30 % (or a smaller percentage, if the bidder attains a stake that enables it to appoint more than half of the directors) at the price of the takeover bid, unless these shareholders had the right to participate in the offer in the same way and under the same conditions and, in any case, they will be offered the same price as was offered to shareholders with Class A Shares.

The financing agreements and other debt instruments that establish the terms and conditions for Abengoa's existing indebtedness contain restrictions on Abengoa's ability to repurchase or redeem the shares. Abengoa could be obliged by its Bylaws to redeem the Class B Shares (including any Class A Shares converted into Class B Shares in accordance with their terms) including in circumstances in which this payment would entail contravening the constraints and obligations under the financing agreements, something that could lead to early cancellation of the corresponding debt. Under these circumstances, Abengoa might not be able to meet or refinance its payment obligations under satisfactory conditions for Abengoa or in any other way, in which case, the business, the results of operations, the financial situation and there could be a significant negative impact on the market price of the Class B Shares.

Risk of significant sales of shares

Future sales of substantial numbers of Class A Shares, Class B Shares and/or financial instruments linked to them in the market, or the perception that these sales could take place, could negatively affect the prices of the Class A Shares and Class B Shares and could impede Abengoa's ability to obtain capital through future offers of shares or of instruments linked to the shares. No prediction can be made about the effect, where applicable, that future sales of Class A Shares and/or Class B Shares or their availability and/or the availability of financial instruments linked to them for future sales will have on the price of the Class A Shares or Class B Shares.

Possibility of differences in the listed prices of Class A shares and Class B shares despite the fact that both share classes have similar financial rights

While the Class B Shares have different voting rights than Class A Shares, both types of share are identical with regards to their economic rights. In particular, each Class B Share gives its bearer, amongst other matters, the rights to receive the same dividend, the same payment on liquidation, the same reimbursement of contributions in the case of a capital decrease, the same distribution of reserve of any type or of the issuance bonus and any other assignment as the Class A Shares. Furthermore, in the event of a capital increase, the bearers of Class A Shares and Class B Shares have the same preferential subscription rights, that allow them, after exercising them, to maintain their respective entitlement of Abengoa's share capital.

Although they have identical economic rights, the Class A and Class B shares have in the past sold at different prices. Abengoa cannot guarantee that the sale price of the Class B Shares will be correlated with the sale price of Class A Shares in the future.

Shareholders in countries with non-euro currencies may incur additional risk associated with variations in the exchange rate in relation to holding the company's shares

The company's Class B shares have been admitted to trading on the US stock market through ADSs denominated in US dollars. With regards to holding US dollar-denominated ADSs , shareholders in countries with non-euro currencies incur additional risk due to variations in the exchange rate. Therefore, the price of the ADSs and the dividends paid may be unfavorably affected by fluctuations in the Euro-US Dollar exchange rate.

### 4.1.3. Client concentration

During the years 2014 and 2013 there is no client that contributes more than 10% of revenue

## 4.2. Financial risk management

### 4.2.1. Market risk

Market risk arises when group activities are exposed fundamentally to financial risk derived from changes in foreign exchange rates, interest rates and changes in the fair values of certain raw materials.

To hedge such exposure, Abengoa uses currency forward contracts, options and interest rate swaps as well as future contracts for commodities. The Group does not generally use derivatives for speculative purposes.

- Foreign exchange rate risk: the international activity of the Group generates exposure to foreign exchange rate risk. Foreign exchange rate risk arises when future commercial transactions and assets and liabilities recognized are not denominated in the functional currency of the group company that undertakes the transaction or records the asset or liability. The main exchange rate exposure for the Group relates to the US Dollar against the Euro.

  To control foreign exchange risk, the Group purchases forward exchange contracts. Such contracts are designated as fair-value or cash-flow hedges, as appropriate.

In the event that the exchange rate of the US Dollar had risen by 10% against the euroas of December 31, 2015, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been a loss of €27,185 thousand (loss of €1,103 thousand on 2014) mainly due to the US Dollar net asset position of the Group in companies with eurofunctional currency and a decrease of €1,649 thousand (increase of € 36,615 thousand in 2014) in other reserves as a result of the cash flow hedging effects on highly probable future transactions.

Details of the financial hedging instruments and foreign currency payments as of December 31, 2015 and 2014 are included in Note 14 to the Consolidated Financial Statements.

- Interest rate risk: arises mainly from financial liabilities at variable interest rates.

Abengoa actively manages its risks exposure to variations in interest rates associated with its variable interest debt.

In project debt (see Note 19 to the Consolidated Financial Statements), as a general rule, the Company enters into hedging arrangements for at least 80% of the amount and the timeframe of the relevant financing.

In corporate financing (see Note 20 to the Consolidated Financial Statements), as a general rule, 80% of the debt is covered throughout the term of the debt; in addition, in 2009, 2010, 2013, 2014 and 2015, Abengoa issued notes at a fixed interest rate.

The main interest rate exposure for the Group relates to the variable interest rate with reference to the Euribor.

To control the interest rate risk, the Group primarily uses interest rate swaps and interest rate options (caps and collars), which, in exchange for a fee, offer protection against an increase in interest rates.

In the event that Euribor had risen by 25 basic points as of December 31, 2015, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been a profit of €7,316 thousand (€9,182 thousand in 2014) mainly due to the increase in time value of hedge interest rate options (caps and collars) and an increase of €28,379 (€35,591 thousand in 2014) in other reserves mainly due to the increase in value of hedging interest derivatives (swaps, caps and collars).

A breakdown of the interest rate derivatives as of December 31, 2015 and 2014 is provided in Note 14 to the Consolidated Financial Statements.

- Risk of change in commodities prices: arises both through the sale of the Group's products and the purchase of commodities for production processes. The main risk of change in commodities prices for the Group is related to the price of grain, ethanol, sugar, gas, and steel.

In general, the Group uses futures and options listed on organized markets, as well as OTC (over-the-counter) contracts with financial institutions, to mitigate the risk of market price fluctuations.

In the event that the grain price had risen by 10% as of December 31, 2015, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been null (null in 2014 and a decrease of €1,349 thousand (increase of € 49,086 thousand in 2014) in other reserves as a result of the cash flow hedging effects on highly probable future transactions.

In the event that the ethanol price had risen by 10% as of December 31, 2015, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been null in 2015 (null in 2014) and an increase of €8,673 thousand in 2014 in other reserves

A breakdown of the commodity derivative instruments as of December 31, 2015 ad 2014 is included in Note 14 to the Consolidated Financial Statements.

In addition, certain Bioenergy Business Group companies engage in purchase and sale transactions in the grain and ethanol markets, in accordance with a management policy for trading transactions.

Management has approved and supplemented trading strategies to control the purchase and sale of forward and swap contracts, mainly for sugar, grain and ethanol, which are reported on a daily basis, following the internal procedures established in the Transactions Policy. As a risk-mitigation element, the company sets daily limits or 'stop losses' for each strategy, depending on the markets in which it operates, the financial instruments purchased and the risks defined in the transaction.

These transactions are measured monthly at fair value through the Consolidated Income Statement. In 2015 no transactions of this nature have been made, whereas in 2014, Abengoa recorded a profit of €3,992 thousand corresponding to settled transactions in both years.

### 4.2.2. Credit risk

The main financial assets exposed to credit risk derived from the failure of the counterparty to meet its obligations are trade and other receivables, current financial investments and cash.

a) Clients and other receivables (see Note 15 to the Consolidated Financial Statements).

b) Current financial investments and cash (see Notes 13, 14, 15 and 17 to the Consolidated Financial Statements).

- Clients and other receivables: Most receivables relate to clients operating in a range of industries and countries with contracts that require ongoing payments as the project advances; the service is rendered or upon delivery of the product. It is a common practice for the company to reserve the right to cancel the work in the event of a material breach, especially non-payment.

  In general, and to mitigate the credit risk, prior to any commercial contract or business agreement, the company generally holds a firm commitment from a leading financial institution to purchase the receivables through a non-recourse factoring arrangement. Under these agreements, the company pays the bank for assuming the credit risk and also pays interest for the discounted amounts. The company always assumes the responsibility that the receivables are valid.

  Abengoa derecognizes the factored receivables from the Consolidated Statement of Financial Position when all the conditions of IAS 39 for derecognition of assets are met. In other words, an analysis is made to determine whether all risks and rewards of the financial assets have been transferred, comparing the company's exposure, before and after the transfer, to the variability in the amounts and the calendar of net cash flows from the transferred asset. Once the company's exposure to this variability has been eliminated or substantially reduced, the financial asset is transferred.

  In general, Abengoa considers that the most significant risk related to Clients and other receivables is the risk of non-collection, since: a) trade receivables may be quantitatively significant during the progress of work performed for a project or service rendered; b) it is not under the company's control. However, the risk of delays in payment typically relates to technical problems, i.e., associated with the technical risk of the service provided and, therefore, within the company's control.

  If the company concludes that the risk associated to the contract has been transferred to the financial institution, the receivable is derecognized in the Consolidated Statement of Financial Position at the time it is transferred, in accordance with IAS 39.20.

  An aging of trade receivables as of December 31, 2015 and 2014 is included in Note 15 'Clients and other receivable accounts' of the Consolidated Financial Statements. The same note also discloses the credit quality of the clients as well as the movement on provisions for receivables for the years ended December 31, 2015 and 2014.

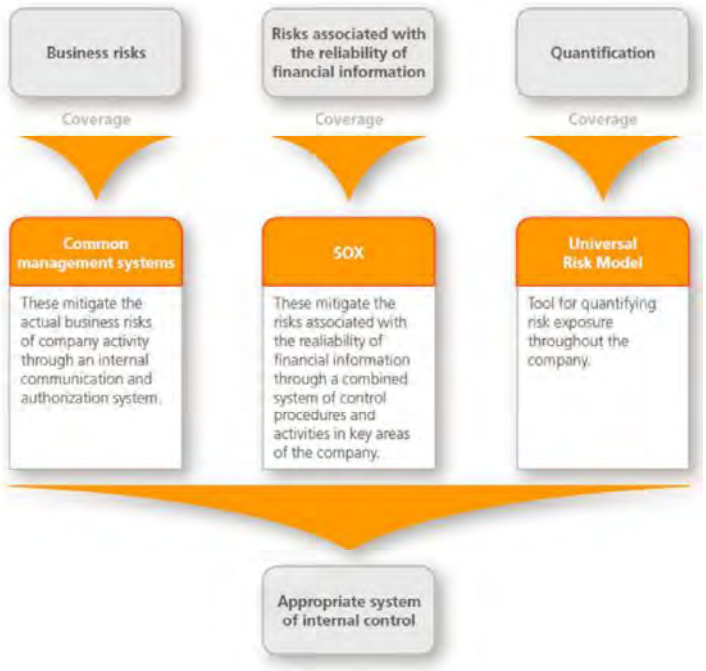
- Financial investments: to control credit risk in financial investments, the Group has established corporate criteria which require that counterparties are always highly rated financial entities and government debt, as well as establishing investing limits with periodic reviews.

Given the above and considering the aging of the main financial assets with exposure to such risk, it is considered that, at the end of the year 2015, no significant amounts in arrears are susceptible to be disclosed in addition to the information required by IFRS 7.

### 4.2.3. Liquidity and central risk

See Section 3. Liquidity and capital resources.

## 4.3. Risk management and internal control



Abengoa is aware of the importance of managing its risks in order to carry out appropriate strategic planning and attain the defined business objectives. To do this, it applies a philosophy formed by a set of shared beliefs and attitudes, which define how risk is considered, starting with the development and implementation of the strategy and ending with the day-to-day activities.

The process of risk management in Abengoa is a continuous cycle based on five key phases:

- Identify
- Evaluate
- Respond
- Monitor
- Report

In each phase, regular and consistent communication is necessary in order to achieve good results. Since it is a continuous cycle, permanent feedback is necessary in order to achieve a constant improvement in the risk management system. These processes are addressed to all the company's risks.

Abengoa's risk management model comprises three core elements:

Those elements are combined to form an integrated system that enables the company to manage risks and controls suitably throughout all levels of the organization.

## a) Common management systems

The common management systems are the internal rules for Abengoa and its business groups and are used to assess and control risk. They represent a common culture for managing Abengoa's businesses, sharing the accumulated knowledge while defining specific criteria and guidelines.

The common management systems include specific procedures for any type of action that could give rise to a risk for the organization, whether financial or non-financial. Furthermore, they are available to all employees in electronic format regardless of their geographical location or role.

The functional heads of each division must verify and certify compliance with these procedures. This annual certification is issued by the Audit Commission in January of the following year.

The systems cover the whole organization at three levels:

- All the business groups and areas of activity.
- All levels of responsibility.
- All kinds of operations.

Common management systems represent a common culture for Abengoa's different businesses and are composed of eleven rules defining how each of the potential risks included in Abengoa's risk model should be managed. Through these systems, the risks and the appropriate way of hedging against them are identified and the control mechanisms defined.

Over recent years, the common management systems have evolved to adapt to the new situations and environments in which Abengoa operates, with the overriding aim of reinforcing risk identification, covering risks and establishing control activities.

## b) Compulsory procedures (SOX)

The compulsory procedures are used to mitigate risks relating to the reliability of the financial information, employing a combined system of procedures and control activities in key areas of the company, which are intended to ensure the reliability of the financial information and prevent fraud.

SOX is a compulsory law for all listed companies operating in the United States and is intended to ensure the reliability of the financial reporting of these companies and protect the interests of their shareholders and investors by establishing an appropriate internal control system. Thus, although none of the business groups is required to meet SOX requirements, Abengoa deems it necessary to comply with these requirements throughout all of its component companies, since these requirements complement the risk control model used by the company.

The company has implemented an appropriate internal control system that relies on three tools:

- A description of the company's relevant processes that could impact the financial information to be prepared. In this regard, 55 management processes have been defined and grouped into corporate cycles and common cycles used throughout all the business groups.
- A series of flow charts that provide a visual description of the processes.
- An inventory of the control activities in each process to ensure attainment of the control objectives.

At Abengoa, we have viewed this legal requirement as an opportunity for improvement and, far from being satisfied with the rules included in the Act, we have tried to develop and improve our own internal control structures, control procedures and the evaluation procedures in place.

This initiative arose in response to the swift expansion experienced by the group in recent years and projected future growth, the aim for us to continue preparing accurate, timely and complete financial reports for our investors.

In order to meet the requirements of section 404 of the SOX, Abengoa's internal control structure has been redefined following a 'Top-Down' approach based on risk analysis.

This risk analysis encompasses a preliminary identification of significant risk areas and an assessment of the company's controls over them, starting with top-level executives - corporate and supervisory controls – then dropping to the operational controls present in each process.

### c) The universal risk model

The universal risk model is the company's chosen methodology for quantifying the risks that compose the risk management system. The objective is to obtain a comprehensive view of them designing an efficient response system aligned with the business objective of the Company.

Abengoa's universal risk model is made up of 20 categories and a total of 56 principal risks for the business. Each category is agrupated in four big areas (financial risks, strategic risks, compliance risks and operations risks).

All model risks are aserred according with two criteria:

- Probability of occurrence: Degree of frequency which is possible to ensure that a particular cause will result an event with negative impact on Abengoa.
- Impact on the Company: Set of negative effects on Abengoa´s strategic objectives.

## 5.- Anticipated future trends of the group

To estimate the outlook for the Group, it is important to take into account the current temporary situation of the Company during the months following the approval of the Interim Consolidated Financial Statements of June 30, 2015, during the presentation of results for the first half of 2015, on July 31, 2015 Abengoa lowered its forecast on corporate cash flows from operations in 2015 from the previous estimate of €1,300 million to €600-800 million. This reduction in forecasts was mainly attributable to capital expenditures (capex) higher than expected in high-return projects but very demanding in terms of capital in Brazil, Chile and Mexico.

Although this change meant a variation in the long-term investments without affecting the liquidity position, nor therefore the formulation of the financial statements for that quarter, the Board of Directors meeting of August 3, 2015 informed the market of its decision to submit to an Extraordinary General Shareholders' Meeting the approval of a capital increase with preferential subscription rights for an amount of €650 million, an additional plan of asset divestment and the adaptation of its current business model towards lower investment requirements (capex) in order to strengthen the financial position of Abengoa and reduce its level of dependence in its indebtedness.

From the said date of August 3, 2015, there was uncertainty in the market prompting a fall in the value of the debt instruments and equity of Abengoa, which limited access to capital markets; while at the same time, there was a slowdown in the pace of approval by some financial institutions of renewals of working capital lines (non-recourse factoring and reverse factoring), all of which led to a reduced liquidity position. On the same date, the Company initiated a period of negotiation with a number of financial institutions to reach an agreement that would make it possible to underwrite the announced capital increase.

On September 24, 2015, the Company announced the agreement reached and the approval by the Board of Directors of a plan of strategic measures that would continue to be adapted during the implementation thereof, in order to reduce the corporate debt, improve the liquidity position of Abengoa and strengthen its corporate governance, as well as the underwriting of the capital increase by certain financial institutions.

Accordingly, the Extraordinary General Shareholders' meeting held on October 10, 2015, approved a package of measures, among which includes a capital increase of €650 million aimed to improving the liquidity position of Abengoa and reducing corporate leverage.

Later, on November 8, Abengoa announced to the market the signing of a basic agreement for investment in Abengoa with the company Gonvarri Corporación Financiera, belonging to the group Gonvarri Steel Industries, which was supported by of Inversión Corporativa IC, S.A., the current reference shareholder of Abengoa. The Investment Agreement governed the investment by Gonvarri Corporación Financiera in the context of the capital increase approved by the General Shareholders' Meeting of the Company last October 10, 2015 (see Note 2.1 to the Consolidated Financial Statements). It was anticipated that a portion of its investment, amounting to €250 million, would be implemented in a capital increase excluding the preferential subscription rights. The capital increase with preferential subscription rights approved by the aforementioned General Meeting of the Company last October 10, 2015 would be implemented after the first aforementioned increase and for an effective amount of €400 million, with the expectation that Gonvarri Corporación Financiera would subscribe it´s corresponding portion.

Subsequent to the date of preparation of the Interim Consolidated Financial Statements at September 30, 2015, the Company, due to the circumstances explained in the Reportable Event of November 25, 2015, decided to initiate a refinancing process to try to reach an agreement with its main financial creditors that would ensure a suitable framework in which to undertake the said negotiations and the financial stability of the Group in the short and medium term. In relation to the process, after carefully evaluating the situation described above and in order to ensure the stability necessary to conduct these negotiations with the creditors, the Board of Directors of the Company deemed that the most appropriate approach was to submit the communication provided under Article 5 bis of Act 22/2003 of July 9, on insolvencies (the "Insolvency Act"). In this regard, on December 15, 2015, Commercial Court No. 2 of Seville issued a Decree agreeing that the communication provided for under Article 5 bis of the Insolvency Act had been filed.

Regarding the refinancing process previously mentioned, on January 25, 2016 the Company reported that on that day, the independent advisory firm specialized in restructuring processes Alvarez&Marsal had submitted to the Board of Directors of Abengoa a Viability Plan which defined the structure of the future activity of Abengoa at operational level, focusing on the engineering and construction business with proprietary or third-party technology.

Based on this Viability Plan, the Company has started negotiations with its creditors to restructure the debt and the necessary resources and thus provide Abengoa with the optimal capital structure and sufficient liquidity to continue operating competitively and sustainably in the future.

# 6.- Information on research and development (R&D) activities

6.1. Abengoa has continued to increase its efforts in R&D+I during 2015 in the belief that these efforts require continuity which should not be compromised by crisis or economic cycles to achieve results.

Furthermore, the Group has strengthened its presence and in some cases its leadership, in various institutions and public and private forums which encourage cooperation between large technology companies, in which the short and long term future of the R&D+i activity is decided.

6.2. The established program for these types of activities has been largely achieved. Abengoa, thanks to those responsible for this strategy in each business area, has strived every day to innovate its technology as demanded by its activities, primarily focusing on the following objectives:

› Continuously and closely following the technologies which could affect each area of the business.

- Selection of a portfolio of technologies that will maximize the competitive advantages of the Group.
- The assimilation and implementation of technology available through transfer agreements.
- Selecting the optimum path for the development of technologies.
- Determining the marketing programs for the technology developed.
- Support for innovation and technology from institutions/governments

During 2015, Abengoa made significant Research, Development and Innovation (R&D&i) investment efforts, and innovation enabling the development of new technologies in different areas of business (solar technology, biotechnology, desalination, water treatment and reuse, hydrogen, energy storage and new renewable energies).

6.3. In 2014 Abengoa continued its strategy of developing proprietary technology to give it a competitive advantage and as a vector for growing its business. Thanks to this commitment to R&D and innovation, the Abengoa Research laboratories at Campus Palmas Altas become fully operational during the year with facilities for the different technology areas of Abengoa's business segments:

- Electrical laboratory
- Materials laboratory
- Thermal fluids laboratory
- Chemistry laboratory
- Biomolecular and biochemistry laboratory

The main development assets are based on technologies that enable Abengoa's strategic R&D areas to continue progressing, such as technologies for solar-thermal plants, energy storage systems, bio-refining, treating municipal solid waste for energy production, and plants for treating and reusing water.

In the field of thermo-solar technology, should be highlighted the development of two considerable projects in South Africa, the start-up operation of the first thermo-solar plant in South Africa which uses a storage system utilizing salts developed by Abengoa and the completion of Khi Solar One at the end of 2015, the first commercial plant with tower technology and superheated steam in South Africa with a capacity of 50MW.

Additionally, in the field of solar-thermal power, in January 2015 it is worth noting the construction of the plant which is part of the largest solar thermal project in South America in the Atacama Desert, Chile, which combines tower technology based on molten salts (110 MW) and photovoltaics (100 MW) with energy storage systems that use molten salts and batteries. This plant will enable renewable power to be continually produced 24 hours a day, supplying demand from the network at any given time.

The R&D and innovation carried out by Abengoa also resulted in the enzymatic cocktail that converts non-food organic material into biofuels, which led to the opening of Abengoa's first 2G bioethanol plant located in Hugoton (US) in October 2014, where up to 95 million liters of bioethanol are produced annually from almost 350,000 tons of biomass, specifically agricultural waste. In Brazil the company is developing second-generation ethanol production from sugar cane straw and bagasse.

Abengoa work also continues on developing the Waste to Biofuels (W2B) project in Salamanca, to produce biofuels from municipal solid waste (MSW), solving the issue of how to manage this waste while generating a high value added product.

In the field of R&D+i for integral water management, nanotechnology is being developed for water treatment processes; and it turns half of 2015 began with the commercial operation of the desalination plant using reverse osmosis technology to desalinate 200,000 m3 of water per day in Tenes (Algeria ).

As a technology company, Abengoa is committed to using R&D to develop new businesses that enable it to grow, during 2015 the main focus has been on developing the company's emerging businesses related to hydrogen and energy.

# 7.- Adquisition and disposal of treasury shares

7.1. Abengoa, S.A. and its subsidiaries have complied with all legal requirements regarding companies and treasury stock (see Note 8 to these Consolidated Management Report).

7.2. The parent company has not pledged its shares in any type of mercantile transaction or legal business, nor are any Abengoa, S.A. shares held by third parties which could act on its behalf or on behalf of group companies.

7.3. Finally, it should be noted that potential reciprocal shareholdings established with Group companies are temporary and comply with the requirements of the consolidated text of the Spanish Capital Companies Act.

7.4. As of December 31, 2015 treasury stock amounted to 5,662,480 shares (41,624,265 shares in 2015), of which 5,662,480 are class A shares and any are class B shares.

Regarding the operations carried out during the year, the number of treasury stock purchased amounted to 9,997,508 class A shares and 76,673,931 class B shares and treasury stock transferred amounted to 9,885,560 class A shares and 112,747,664 class B shares, with a net result of €6,362 thousand recognized in equity (€2,217 thousand in 2014).

# 8.- Corporate governance

## 8.1. Shareholding structure of the company

### Significant shareholdings

The share capital of Abengoa, S.A. is represented by book entries, managed by Iberclear (Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S. A.) and totals €1,840,954.98 represented by 941,533,858 shares fully subscribed and paid up, with two separate classes:

- 83,467,081 class A shares with a nominal value of €0.02 each, all in the same class and series, each of which grants the holder a total of 100 voting rights ('Class A Shares').
- 858,066,777 class B shares with a nominal value of €0.0002 each, all in the same class and series, each of which grants One (1) voting right and which afford its holder economic rights identical to the economic rights of Class A shares set out in article 8 of Abengoa's bylows ('Class B Shares' and, together with class A shares, 'Shares with Voting Rights').

The shares are represented by book entries and governed by the Stock Market Act and other applicable provisions.

Abengoa's Class A and B shares are officially listed for trading on the Madrid and Barcelona Stock Exchanges and on the Spanish Stock Exchange Interconnection System (Continuous Market). Class A shares have been listed since November 29, 1996 and Class B shares since October 25, 2012. The company files mandatory financial information on a quarterly and half-yearly basis.

As of May 4, 2015, in connection with the 6.25% €400 million convertible bonds issued on January 2013 and maturing in 2019 conversion, the share capital has been increased for a total amount of €810,544.08 thousand with the issue of 81,054,408 Class B shares at its respective par values.

Consequently, on October 1, 2015 the share capital has been subscribed for a total amount of €207,097 with the issue of 20,709,730 Class B shares with a nominal value of €0.01 each, duly subscribed and fully paid-up by the holder of the warrants, First Reserve Corporation.

Finally, on October 10, 2015 the company carried out a reduction of its share capital by the amount of €90,336,437.74, by means of a reduction in the par value of each Class A share of the Company of €0.98 per share, and a reduction in the par value of each Class B share of the Company of €0.0098 per share.

In accordance with notifications received by the company and in compliance with reporting requirements to communicate shareholding percentages (voting rights) and the information received from relevant parties, shareholders with a significant holding as of December 31, 2015 are as follows:

| Shareholders | Share % |
|---|---|
| Inversión Corporativa IC, S.A. (*) | 45.602 |
| Finarpisa, S.A. (*) | 6.175 |

(*) Inversión Corporativa Group.

On September 30, 2015 the General Shareholders' Meeting approved a capital increase of 430,450,152 Class B shares with a nominal value of €0.01 each reducing its unrestricted reserves, which would be delivered to all shareholders on a proportion of four Class B shares for each owned Class A or B share. Such General Shareholders' Meeting approved a voluntary conversion right to change Class A shares of one euro nominal value (€0.002 nominal value as of December 31, 2015) to Class B shares of €0.01 nominal value (€0.0002 nominal value as of December 31, 2015) during certain pre-established periods until December 31, 2017. After exercising this right, a capital reduction by means of the nominal value of the converted shares at the value of the present day of €0.0198 per share, with unrestricted reserves credit.

During, 2015 four capital reductions have taken place by reducing 776,559 Class A shares into Class B shares, which led to a capital reduction of €639,149.47 thousand.

After the end of the period ended December 31, 2015, on January 4, 2016 a capital increase has taken place, without preferential subscription right, with the issue of 34,013 Class B shares with a nominal value of €6.80 for the purpose of meeting the conversion requests related to the Convertible Bond €400,000,000 6.25% maturing in 2019, issued on January, 2013.

On the other hand, after closing the 16th liquidity window dated January 15, 2016, the Company carried out on January 22, 2016, a reduction of capital share by the amount of €898.74 by means of the conversion of 45,391 Class A shares into new Class b shares.

Consequently, as of January 22, 2016 the share capital amounts to € 1,840,063.04 corresponding to 941,567,871 shares completely subscribed and disbursed, divided into 83,421,690 Class A shares and 858,146,181 Class B shares.

The General Shareholders' Meeting approved on March 29, 2015 the distribution of 2014 profits sharing out of a dividend of € 0.113 per share, which represents a total dividend of €94,894 thousands (€91,637 thousands in 2014).

The number of registered shareholders according to the latest list provided by Iberclear (Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.) on October 2, 2015 is 10,831 shareholders in class A shares and 50,510 shareholders in class B shares.

With regard to shareholder agreements, Inversión Corporativa IC and Finarpisa, as shareholders of Abengoa, signed an agreement on October 10, 2011, which governs the exercising of their respective rights to vote in Abengoa's general meetings in relation with the proposal, appointment, ratification, reelection or substitution of a director to represent First Reserve Corporation.

Under the terms of this agreement, Inversión Corporativa I.C., S.A. and Finarpisa, S.A. jointly and severally agree to:

(i) vote in favor of the following, through their respective shareholder directors on Abengoa's Board of Directors:

  (a) to appoint as a member of the Board, the candidate proposed to be the investor's nominee pursuant to the co-optation procedure established under the Spanish Capital Companies Act; and

  (b) the proposal to recommend to Abengoa's shareholders the election of any replacement director as the investor's nominee on the Board of Directors, at Abengoa's next general shareholders' meeting;

(ii) vote, at the corresponding general shareholders' meeting of Abengoa, in favor of the appointment of the candidate proposed by the investor to be its nominee on the Board of Directors; and

(iii) while the investor or any of its related companies owns Abengoa Class B shares or any other instrument that is convertible or exchangeable into Abengoa Class B shares issued in accordance with the investment agreement or any other document of the transaction, they may not propose nor request the Board of Directors to recommend to shareholders any modification to the company's bylaws that adversely affects the equality of rights of Class B shares and Class A shares in relation to the distribution of dividends or similar distributions as established in bylaws.

On August 27, 2012, Inversión Corporativa, I.C., S.A. and its subsidiary Finarpisa, S.A. modified the shareholder agreement with the Abengoa shareholder, First Reserve Corporation (which was subject to disclosure to the CNMV by means of the significant event filed on November 9, 2011).

The modification consisted of including a commitment while FRC or any of its related companies own Abengoa Class B shares or any other instrument that is convertible or exchangeable for Abengoa Class B shares issued in accordance with the investment agreement or any other document of the transaction, they may not propose nor request the Board of Directors to recommend to shareholders any modification to the company's bylaws that adversely affects the equal rights of Class B and Class A shares in relation to the distribution of dividends or similar distributions as established in the bylaws'. If this proposal were to be presented by another shareholder, or by the Board of Directors, they will vote against it.

On that date, August 27, 2012, Abengoa, S.A. signed a shareholder agreement with its significant shareholder, Inversión Corporativa, I.C., S.A., through which the latter agreed to the following, directly or indirectly through its subsidiary Finarpisa S.A.:

(i) To vote in favor of the resolutions relating to points 2, 3, 4, 5, 6 and 7 of the agenda of the General Shareholders' Meeting held on September 30, 2012, provided that it had previously verified that these resolutions were approved by the majority of Class A shareholders, excluding Inversión Corporativa;

(ii) Not to exercise its voting rights, except up to a maximum of 55.93% in cases in which, as a result of the exercising of the conversion right of Class A shares into Class B shares that is expected to be included in the company's bylaws, the total percentage of voting rights that it holds of the total voting rights of the company is increased;

(iii) That the percentage represented at any given time by the number of shares with the right to vote that it owns (whether Class A or Class B shares) of the total shares of the company, will not at any time be less than one quarter of the percentage represented by the voting rights that these shares attribute to Inversión Corporativa, in relation to the total voting rights of the company (in other words, that its voting rights cannot exceed four times its financial rights); and that, should this occur, it shall dispose of sufficient Class A shares or shall convert them into Class B shares in order to maintain this ratio.

In accordance with Article 30 and following articles of the company's bylaws, there are no limits on the voting rights of shareholders in relation to the number of shares which they hold. The right to attend the shareholders' meeting is limited however to those shareholders that hold 375 Class A or Class B shares.

Meeting quorum: 25% of the share capital at first call. Any percentage at second call. These are the same percentages as the Capital Companies Act. In those cases stated in Article 194 of the Act (hereinafter the 'LSC'), the quorum is as stated in the Act.

Resolution quorum: by a simple majority vote by those present or represented at the meeting. In those cases stated in Article 194 of the LSC, the quorum is as stated in the Act.

Shareholders' rights: Shareholders have the right to information, in accordance with the applicable legislation; the right to receive the documentation related to the shareholders' meeting, free of charge; the right to vote in proportion to their shareholding, with no maximum limit; the right to attend shareholders' meetings if they hold a minimum of 375 shares; financial rights (to dividends, as and when paid, and their share of company's reserves); the right to representation and delegation, grouping and the right to undertake legal actions attributable to shareholders. The Extraordinary General Shareholders' Meeting approved a series of amendments to the bylaws in order to ensure that the 'rights of minority interests' are not infringed by the existence of two different share classes with different par values in which the lower nominal value of the Class B shares would make it more difficult to achieve the percentages of share capital required to exercise some of the voting and other non-financial rights. The General Meeting therefore agreed to amend Abengoa's bylaws as explained below in order to ensure that all these rights can be exercised based on the number of shares and not the amount of share capital. These rights, such as the right to call a general meeting or to request a shareholder derivative action, require a certain percentage of the share capital to be held in nominal terms (in these cases, 3%).

Measures to promote shareholder participation: making the documentation related to the Shareholders' Meeting available to shareholders free of charge, as well as publishing announcements of Shareholders' Meetings on the company's website. The option to grant a proxy vote or to vote on an absentee basis is possible by completing accredited attendance cards. In accordance with Article 539.2 of the Capital Companies Act, Abengoa has approved the Regulation on the Shareholders' Electronic Forum in order to facilitate communication between shareholders regarding the calling and holding of each General Shareholders' Meeting. Prior to each general meeting, shareholders:

- Representing at least 5 percent of the share capital or 5 percent of the voting shares, may send proposals that they intend to submit as supplementary points to the agenda published in the notice of the general meeting.
- May send initiatives to achieve the required percentage to exercise a minority right.
- May send requests for voluntary representation

The bylaws do not limit the maximum number of votes of an individual shareholder or include restrictions to make it more difficult to gain control of the company through the acquisition of shares.

Proposals of resolutions to be submitted to the Shareholders' Meeting are published along with notice of the meeting on the websites of the company and the CNMV.

Points on the agenda that are significantly independent are voted upon separately by the Shareholders' Meeting, so that voters may exercise their voting preferences separately especially when it concerns the appointment or ratification of directors or amendments to the bylaws.

The company allows votes cast by shareholders' appointed financial representatives that are acting on behalf of more than one shareholder, to be split, so that they may vote in accordance with the instructions of each individual shareholder whom they represent.

There are currently no agreements in effect between the company and its directors, managers or employees that entitle them to severance pay or benefits if they resign or are wrongfully dismissed, or if the employment relationship comes to an end due to a public tender offer.

## Treasury stock

At the Ordinary General Shareholders' Meeting on March 29, 2015, it was agreed to authorize the Board of Directors to acquire the company's treasury stock in the secondary market, directly or through subsidiaries or investee companies, up to the limit stipulated in the current provisions, at a price of between one euro cent (€0.01) and twenty euros (€20) per share, and with express authority to appoint any of its members, being able to do so during a period of 18 months as of the above date and subject to Article 144 and subsequent articles of the Capital Companies Act.

The authorization granted to the Board of Directors for these purposes by the resolution adopted by the General Shareholders' Meeting of April 6, 2014 is hereby expressly annulled.

On November 19, 2007, the company entered into a liquidity agreement for Class A shares with Santander Investment Bolsa, S.V. On January 8, 2013, the company entered into a liquidity agreement for Class A shares with Santander Investment Bolsa, S.V., replacing the initial agreement, in compliance with the conditions established in CNMV Circular 3/2007 of 19 December. This liquidity contract was effective suspended on September 28, 2015. On November 8, 2012, the company entered into a liquidity agreement for Class B shares with Santander Investment Bolsa, S.V. in compliance with the conditions established in CNMV Circular 3/2007 of 19 December. This liquidity contract was effective suspended on April 21, 2015.

All the purchases and sales of the company's treasury stock were carried out under the aforementioned liquidity agreements

## Details of the latest Shareholders' Meetings

Abengoa's Ordinary General Shareholders' Meeting was held at second call on March 29, 2015, with a total of 1,220 shareholders present or represented, representing 5,995,649,505 votes and 65.371% of the company's share capital (71.74% including treasury shares). - In the Resolution 3, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,829,561,468 votes in favor, 3,931,039 against and 162,156,998 abstaining.
- In the Resolution 4.1, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,833,019,668 votes in favor, 706,680 against and 161,923,157 abstaining.
- In the Resolution 4.2, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,832,552,436 votes in favor, 1,173,912 against and 161,923,157 abstaining.
- In the Resolution 4.3, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,577,374,475 votes in favor, 255,181,466 against and 163,093,564 abstaining.
- In the Resolution 4.4, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,805,457,984 votes in favor, 28,268,364 against and 161,923,157 abstaining.
- In the Resolution 4.5, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,805,767,174 votes in favor, 27,959,174 against and 161,923,157 abstaining.
- In the Resolution 4.6, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,832,768,978 votes in favor, 957,370 against and 161,923,157 abstaining.

- In the Resolution 4.7, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,833,019,093 votes in favor, 709,255 against and 161,921,157 abstaining.
- In the Resolution 4.8, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,581,393,579 votes in favor, 251,193,647 against and 163,062,279 abstaining.
- In the Resolution 5, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,605,476,677 votes in favor, 226,889,007 against and 163,283,821 abstaining.
- In the Resolution 6, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,577,536,637 votes in favor, 221,913,281 against and 196,199,587 abstaining.
- In the Resolution 7.1, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,574,281,064 votes in favor, 212,221,425 against and 209,147,016 abstaining.
- In the Resolution 7.2, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,594,122,500 votes in favor, 208,372,480 against and 193,154,525 abstaining.
- In the Resolution 8, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,772,975,120 votes in favor, 60,702,513 against and 161,971,872 abstaining.
- In the Resolution 9, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,541,630,384 votes in favor, 292,126,253 against and 161,892,868 abstaining.
- In the Resolution 10, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,552,999,953 votes in favor, 280,666,684 against and 161,982,868 abstaining.
- In the Resolution 11, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,831,680,261 votes in favor, 2,081,722 against and 161,887,522 abstaining.
- The Resolution 12 was an informative point and it's did not come up for vote
- In the Resolution 13, a total of 5,995,649,505 valid votes were cast, corresponding to 55,237,125 Class A shares and 471,937,005 Class B shares, which represent 65.371% of the share capital, with a total of 5,817,940,347 votes in favor, 722,570 against and 176,986,588 abstaining.

Abengoa's Extraordinary General Shareholders' Meeting was held at first call on October 10, 2015, with a total of 698 shareholders present or represented, representing 5,576,493,804 (after excluding the votes attached to own shares in accordance with the provisions of Article 148 of the Capital Companies Act) votes and 60.496% of the company's share capital (88.13% including treasury shares). The following resolutions were passed by the meeting:

One.- Capital reduction in the amount of €90,133,482.3858 by means of a reduction in the par value of the Class A and Class B shares of the Company in the amount of €0.98 for each Class A share and in the amount of €0.0098 for each Class B share, by means of the creation of a restricted reserve in accordance with the provisions of Section 335 c) of the Capital Companies Act, and amendment of article 6 of the Bylaws. Approval of the individual balance sheet of Abengoa, S.A. at June 30, 2015 that is to serve as the basis for the capital reduction.

Two.- Capital increase in order to increase the equity of the Company in the effective amount (par value plus share premium) of €650,000,000 through the issuance and placement into circulation of new Class A shares having a par value of€ 0.02 each, and new Class B shares having a par value of €0.0002 each, which shall be fully subscribed and paid-up at the time of subscription with a charge to cash contributions, with the recognition of pre-emptive rights and with a provision for incomplete subscription. The Board of Directors shall be responsible for determining (i) the nominal amount of the increase and the number of Class A and Class B shares to be issued, which shall be a maximum of €650,000,000 without prejudice to the adjustments that apply to respect proportionality between the classes of shares, and of a number of Class A shares and Class B shares, respectively, equal to the result of multiplying such amount by the proportion of 2 existing Class A and Class B shares, and dividing it by the issue price thereof, and (ii) the issue price of the new Class A and Class B shares, and particularly the amount of the share premium for each new Class A and Class B share issued. Specific approval of the transaction for purposes of NASDAQ Market Rule number 5635. Delegation to the Board of Directors, with powers of substitution, of the powers required to carry out the resolution and to set the conditions thereof to the extent not provided for by the shareholders at the General Shareholders' Meeting, pursuant to the provisions of Section 297.1 of the Capital Companies Act, as well as to amend article 6 of the Bylaws.

Three.- Acceptance of the resignation of directors. Setting of the number of members of the Board of Directors. Ratification and appointment of directors:

3.1. Acceptance of the resignation of directors.

3.2 Setting of the number of members of the Board of Directors.

3.3 Ratification and appointment of Mr. Santiago Seage Medela.

3.4. Ratification and appointment of Mr. José Domínguez Abascal

Four.-Amendment of the Company's Bylaws:

4.1 Amendment of article 20 of the Bylaws in order to remove the bylawmandated prohibition against intervention in management issues by shareholders at a General Shareholders' Meeting.

4.2 Amendment of article 44 bis of the Bylaws in order to support the creation and govern the composition and operation of a new investment committee of the Company's Board of Directors.

Five.- Amendment of article 2 of the Regulations of the General Shareholders' Meeting in order to conform it to the amendments of the Bylaws proposed under item four above.

Six.- Information to the shareholders at the General Shareholders' Meeting of the amendments approved by the Board of Directors to the Regulations thereof.

Seven.- Approval by the shareholders acting at the General Shareholders' Meeting of the instruction to the Board of Directors to observe a maximum limit on capex commitments.

Eight.- Delegation of powers to the Board of Directors for the interpretation, correction, implementation, formalization and registration of the resolutions adopted

In relation to the votes of the aforementioned resolutions:

- In the Resolution 1, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,072,357 votes in favor, 341,240 against and 80,207 abstaining.
- In the Resolution 2, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,533,612,175 votes in favor, 42,793,772 against and 87,857 abstaining.
- In the Resolution 3.1, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,369,503,373 votes in favor, 206,291,589 against and 698,842 abstaining.
- In the Resolution 3.2, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,378,018 votes in favor, 6,001 against and 109,785 abstaining.
- In the Resolution 3.3, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,573,007,711 votes in favor, 3,360,788 against and 125,305 abstaining.
- In the Resolution 3.4, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,495,134,343 votes in favor, 234,156 against and 125,305 abstaining.
- In the Resolution 4.1, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,201,682 votes in favor, 43,530 against and 248,592 abstaining.
- In the Resolution 4.2, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,311,614 votes in favor, 51,955 against and 130,235 abstaining.
- In the Resolution 5, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,302,492 votes in favor, 49,830 against and 141,482 abstaining.
- The Resolution 6 was an informative point and it did not come up for vote
- In the Resolution 7, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,136,062 votes in favor, 6,051 against and 351,691 abstaining.
- In the Resolution 8, a total of 5,576,493,804 valid votes were cast, corresponding to 258,831,762 shares, which represent 60.496% of the share capital, with a total of 5,576,307,242 votes in favor, 17,201 against and 169,361 abstaining.

As of December 31, 2015, the only Director who was a member of the board of directors of another listed company was Mr.. Antonio Formieles Melero, who was Director of Oryzon Genomics, S.A., a listed company on the Madrid Stock Exchanges since December 2015.

In accordance with the register of significant shareholdings that the company maintains, pursuant to the internal code of conduct in relation to the stock market, the percentage shareholdings of the directors in the capital of the company as at December 31, 2015 were as follows:

| | No. of direct class A shares | No. of indirect class A shares | No. of direct class B shares | No. of indirect class B shares | % Total |
|---|---|---|---|---|---|
| José Domínguez Abascal | 6,000 | - | 36,000 | - | 0.0070 |
| Antonio Fornieles Melero | - | - | 16,400 | - | - |
| Joaquín Fernández de Piérola Marín | - | - | - | - | - |
| José Joaquín Abaurre Llorente | 9,870 | - | - | - | - |
| José Luis Aya Abaurre | 1,210 | - | 344,301 | - | 0.0050 |
| Javier Benjumea Llorente | 3,888 | - | 15,552 | - | 0.0040 |
| José Borrell Fontelles | - | - | 71,695 | - | 0.0010 |
| Mercedes Gracia Díez | - | - | 2,500 | - | - |

| Ignacio Solís Guardiola | 1,700 | - | 68,000 | - | 0.0200 |
| Alicia Velarde Valiente | 400 | - | 1,600 | - | - |

# 8.2. Company management structure

## The Board of Directors

› Composition: number and identity

Following changes to Article 39 the company's bylaws, as agreed by the Ordinary Shareholders' Meeting held on April 15, 2007, the maximum number of members of the Board of Directors was set at fifteen, compared to nine established until that time. The Ordinary General Shareholders' Meeting of April 6, 2014, also agreed to once again amend Article 39 of the bylaws, setting the maximum number of members of the board of directors at 16. These modifications reinforced the structure of the Board with a number of directors that allows a more diversified composition as well as facilitating the delegation and adoption of resolutions with minimal attendance, thereby ensuring a multiple and plural presence in the Board of Directors.

| | |
|---|---|
| Maximum number of Board Members | 16 |
| Minimum number of Board Members | 3 |

In accordance with the recommendations established in the Unified Code of Good Governance of Listed Companies, which have been already subject to regulation by Law 31/2014, December 3, the composition of the Board reflects the capital structure. This enables the Board to represent the highest possible percentage of the capital in a stable way and ensures protection of the general interests of the company and its shareholders. The Board is provided, moreover, with a degree of independence in accordance with the practices and professional needs of any company. Its current composition as of December 31, 2015 was the following:

| | |
|---|---|
| José Domínguez Abascal | -Executive President |
| | - Member of the Investment Committee |
| Antonio Fornieles Melero | - Independent (Vice-President) |
| | -Coordinating Director |
| | - Chairman of the Audit Committee and Investment Member of the Appointments and Remuneration Committee |
| Joaquín Fernández de Piérola Marín | - Executive |
| José Joaquín Abaurre Llorente | - External, weekly assistant |
| | - Member of the Strategy and Technology Committee |
| José Luis Aya Abaurre | - External, weekly assistant |
| | -Member of the Strategy and Technology Committee |
| Javier Benjumea Llorente | - Executive |
| José Borrell Fontelles | - Independent |
| | -Member of the Appointments and Remuneration Committee |
| | - Member of the Audit Committee |
| | -Member of the Strategy and Technology Committee |
| Mercedes Gracia Díez | - Independent |
| | - Chairman and Member of the Appointments and Remuneration Committee |
| | - Member of the Audit Committee |
| | - Member of the Investment Committee |
| Claudio Santiago Ponsa | - External, weekly assistant |
| Ignacio Solís Guardiola | - External, weekly assistant |
| Ricardo Martínez Rico | - Independent |
| | -Member of the Strategy and Technology Committee |
| Ricardo Hausmann | - Independent |
| Alicia Velarde Valiente | - Independent |
| | -Member of the Appointments and Remuneration Committee |
| | - Member of the Audit Committee |

(1) Mr.José Dominguez Abascal was ceased as executive chairman of the Board of Directors and its delegated commissions on March 1, 2016.
(2) Mr. Antonio Fornieles Melero, To date Vice-Chairman and Coordinating Director was appointed executive chairman on March 1, 2016. Consequently with this appointment such Director became Executive Director and resigned from the Company´s Audit Committee and Appointments and Remunerations Committee.
(3) Mr.. Joaquín Fernandez de Piérola was appointed CEO on March 1, 2016 and first Vice-chairman and member of the Investment Committee on March 8, 2016.
4) Ms. Alicia Velarde Valiente was appointed Second Vice-chairman, Coordinating Director, President of the Company´s Audit Committee and President of the Investment Committee on March 8, 2016.
(5) On February 12, 2016 Mr. José Luis Aya Abaurre died. On March 8, 2016 it was appointed Ms. Ana Abaurre Aya in representation of Inayaba,S.L. as member of the Strategy and Technology Committee.

The total number of directors is considered to be appropriate to ensure the necessary representation and the effective functioning of the Board of Directors.

Notwithstanding the fact that independence is a condition that must be common to any director, irrespective of the director's origin or appointment, based on the reliability, integrity and professionalism of his or her role, in accordance with the guidelines included under Law 26/2003, in Ministerial Order 3722/2003 and in the Unified Code of Good Governance of Listed Companies and more recently in Law 31/2014, the classification of current directors as stated on the previous table.As may be seen in the table above, the Board is made up of a majority of external, non-executive directors.

› Organizational and functional rules

The Board of Directors is governed by the Regulations of the Board, the company's bylaws and by the Internal Code of Conduct on Stock Exchange Matters. The Regulations of the Board were initially approved by the Board at a meeting on January 18, 1998, clearly in anticipation of the current rules of good governance and efficient internal control. The most recent update of note took place October 10, 2015.

› Structure:

The Board of Directors is currently made up of 13 members. The Regulations of the Board cover the composition of the Board, the functions and its internal organization; additionally, there is the Internal Code of Conduct on Stock Exchange Matters, the scope of which covers the Board of Directors, senior management and all those employees who, due to their skills or roles, are also impacted by its content. The Regulations of the Functioning of Shareholders' Meetings cover the formal aspects and other aspects of Shareholders' Meetings. Finally, the Board is supported by the Audit Committee and the Appointments and Remuneration Committee, which in turn are subject to their own respective internal regulations, as well as the Strategy and Technology Commission. All these regulations, included within the revised Internal Regulations on Corporate Governance are available on the company's website, www.abengoa.es/com.

Since its inception, the Appointments and Remuneration Committee has been analyzing the structure of the company's governing bodies and has worked to align such bodies with regulations in force regarding governance, focusing in particular on the historical and current configuration of such ruling bodies within Abengoa. Consequently, in February 2007 the committee recommended the creation of a Coordination Director, as well as the dissolution of the Advisory Committee to the Board of Directors. The first recommendation was to align the company with the latest corporate governance recommendations in Spain in 2006; the second recommendation reflected that the advisory board had completed the role for which it was established in the first place, and that its coexistence with the remaining company bodies could create a potential conflict of roles. Both proposals were approved by the Board of Directors in February 2007 as well as by the shareholders at the Ordinary General Meeting on April 15, of the same year.

Finally, in October 2007 the Committee proposed to the Board to accept the resignation of Mr. Javier Benjumea Llorente as Vice-chairman, along with the revoking of any powers which had been granted in those entities or companies in which he held a position of responsibility, and the naming of a new representative of Abengoa and the Focus-Abengoa Foundation.

On the basis of the foregoing, the committee decided that it would be opportune to repeat the study on numbers and conditions of the Vice-chairman to the Board of Directors within the current structure of the company's governing bodies.

As a result, the Committee considered it necessary that the Vice-chairman of Abengoa hold the powers as per the Spanish Public Limited Companies Act so that, on the one hand, he or she is granted full representation of the company and to counter-balance the functions of the chairman of the board. On this basis it was considered that the Coordination Director – in accordance with the responsibilities as assigned to the role by the Board of Directors (February 2007) and at the Shareholders' Meeting (April 2007) – was ideal for the role, in addressing the corporate governance recommendations and the structure of the company, as well as the composition and diversity of the directors. The Coordination Director already has the duty to take into account the concerns and goals of the board members and, to achieve this, has the power to call Board meetings and to add items to the agenda. As this role was more in substance than in title, considering the interests of the directors, and conveyed a certain representation of the Board, it was considered appropriate to expand and recognize this representation making it institutional and organic.

For the reasons mentioned, the Committee deemed it appropriate to propose Aplidig, S.L. (represented by Mr. José B. Terceiro Lomba), the current Coordination Director, as the new Vice-Chairman of the Board. Additionally, within the representative duties, it was proposed that the Vice-chairman, in conjunction with the chairman, would represent Abengoa as chairman of the Focus-Abengoa Foundation, as well as for other foundations and institutions in which the company is or should be represented.

In light of the above, on 10 December 2007 the Board of Directors approved the appointment of Aplidig, S. L. (represented by Mr. José B. Terceiro Lomba), the current Coordination Director, as the new Vice-Chairman of the Board, with the unanimous agreement of the independent directors regarding the retention of his role as Coordination Director despite being promoted to an executive board member role. Additionally, within the representative duties, on 23 July 2007 the Board approved that the Vice-chairman, in conjunction with the Chairman, would also represent Abengoa as Chairman of the Focus-Abengoa Foundation Board, as well as for other foundations and institutions in which the company is or should be represented.

As of December 31, 2015 the Coordinating Director and second Vice-chairman of the Board of Director was Mr. Antonio Fornieles Melero. Notwithstanding the above, on March 1, 2016 Mr. Antonio Fornieles Melero was appointed executive President of the Board of Directors, appointing Ms. Alicia Velarde Valiente as Coordinating Director and second Vice-chairman of the Board of Directors.

The Chairman of the Board, as the leading executive of the company is granted full powers excluding those which by law cannot be assigned by the Board of Directors, notwithstanding the powers and competences of the Board itself. With regards to the Vice-chairman, also an executive role, he or she is granted the same powers as above.

At the proposal of the Appointments and Remunerations Committee of November 27, 2015, and previously to the resignation in his position as Director of Mr. Santiago Seage Melero, It was agreed the delegation of all his powers except those that cannot be statutory and legally delegated, in favor of the former president Mr.José Dominguez Abascal. Notwithstanding the above, on March 1, 2016 Mr. José Dominguez Abascal was ceased as executive chairman of the Board of Directors, and appointing executive chairman to Mr. Antonio Fornieles Melero, who became Executive Director, and agreed the delegation of all his powers except those that cannot be statutory and legally delegated to Mr. Joaquin Fernández de Piérola. Mr. Antonio Fornieles Melero and Mr. Joaquín Fernández de Piérola share their executive duties of the Company.

› Functions:

The role of the Board of Directors is to undertake the necessary actions so as to achieve the corporate objectives of the company. It is empowered to determine the financial goals of the company, agree upon the strategies necessary as proposed by senior management so as to achieve such goals, assure the future viability of the company and its competitiveness, as well as adequate leadership and management, supervising the development of the company's business.

› Appointments:

The Shareholders' Meeting, or when applicable the Board of Directors, within the established rules and regulations, is the competent body for appointing members of the Board a proposal, if any, of the Appointments and Remuneration Committee. Only those people that fulfill the legally established requirements may be appointed, as well as being trustworthy and holding the knowledge, prestige and sufficient professional references to undertake the functions of director.

Directors are appointed for a maximum of 4 years, although they may be re-elected.

› Dismissals:

Directors will be removed from their position at the end of their tenure or under any other circumstances in accordance with the appropriate laws. Furthermore, they should relinquish their role as directors in the event of any incompatibility, prohibition, serious sanctions or failure to fulfill their obligations as directors.

› Meeting:

In accordance with Article 42 of the company bylaws, the Board of Directors will meet as deemed necessary given the demands of the company or, at least once a quarter and the cases determined by regulations of the Board of Directors. During 2015, the Board met a total of 42 times

› Duties of the Directors:

The function of the director is to participate in the direction and control of management of the company for the purposes of and with the aim of maximizing its value for shareholders. Each director operates with the diligence and care of a loyal and dedicated professional, guided by the company's interests, as a representative with complete independence to defend and protect the interests of the shareholders.

By virtue of their appointment, the directors are required to:

- Be informed and appropriately prepare for each working session.
- Attend and actively participate in meetings and decision making.
- Carry out any specific task entrusted by the board of directors.
- Encourage people with the authority to call meetings, to call extraordinary meetings of the board or include the issues that they deem relevant on the agenda of the next meeting to be held.

- Avoid conflicts of interest from arising and, if appropriate, report their existence to the board via its secretary.
- Do not hold positions in competing companies.
- Do not use company information for personal ends.
- Do not use company assets inappropriately.
- Do not use company business opportunities for personal ends.
- Keep all information that results from your position confidential.
- Abstain from voting on budget issues that affect them.
- Disclose any direct or indirect interests in the company's securities or derivatives.
- Actively participate and be committed to the issues being discussed by the board, as well as following up these issues and obtaining the necessary information.
- Do not support resolutions that break the law, the company's bylaws or go against the company's interests. Request the corresponding legal and technical reports, as appropriate.
- Notify the company of any significant changes in your professional circumstances which could affect the characteristics or conditions under which you were appointed as a director, or which may give rise to a conflict of interest.
- Notify the company of all legal or administrative claims, or any other type of claim, which could seriously impact the company's reputation due to their significance.

› The Chairman:

The Chairman, in addition to the company bylaws and legal requirements, is the senior-most executive of the company, and as such is effectively responsible for the management of the company, always in accordance with the criteria and decisions of the Board of Directors and the General Shareholders' Meeting. The Chairman is responsible for implementing the decisions made by the company's management bodies, through application of the powers as permanently granted to him by the Board of Directors, which he represents in all aspects. The Chairman also casts the deciding vote in the Board of Directors.

The Chairman is also the Chief Executive Officer. The following measures are in place to prevent an accumulation of power.

Under Article 44 bis of the company bylaws, on December 2, 2002 and 24 February 2003 the Board of Directors agreed to appoint the Audit Committee and the Appointments and Remuneration Committee.

These committees have the powers, which may not be delegated, as per the Law, the company bylaws and internal regulations, acting as regulatory body and supervisory body associate with the matters over which they chair.

Both are chaired by a non-executive independent director and are comprised exclusively of non-executive directors.

› The Secretary:

The Secretary to the Board of Directors undertakes those responsibilities as required by law. Currently the role of Secretary and that of Legal Counsel to the Board is not undertaken by the same person, being responsible for the correct calling of meetings and that resolutions are properly implemented by the Board. In particular, he will advise the Board as to the legality of proposed deliberations and decisions and upon compliance with the company's internal corporate governance regulations, making him responsible as guarantor of the legality, both in law and in substance, of the actions of the Board.

The Secretary, as a specialized role, guarantees the legality in law and in substance of the actions of the Board, with the full support of the board to perform their duties with independent judgment and substance. He or she is also responsible for safeguarding the internal rules of corporate governance.

› Resolutions:

Decisions are made by a simple majority of those directors present at the meeting (present of represented) in each meeting, with the exception of legal matters as previously set out.

› Remuneration and other benefits

› Remuneration:

Directors are remunerated as established in article 39 of the Bylaws. The remuneration of Directors is made up of a fixed amount as agreed upon at the General Shareholders' Meeting, and is not necessarily equal for all directors. Additionally, they may participate in profit sharing programs, for a percentage between 5% and 10% (maximum) of the net income of the Company after the declaration of the dividends for the year. Travel expenses related to work undertaken by the board are reimbursed to Directors.

Salary (both fixed and variable) and allowances paid to the members of the Board of Abengoa S.A. in 2015 were €32,193 thousand (€15,833 thousand in 2014).

Detail of individual remuneration and benefits in 2015 paid to the Board of Directors (in thousands of euros):

Note (1): Represented by Mr. José B. Terceiro Lomba

Additionally, in 2015 overall remuneration for key management of the company (Senior Management which are not executive directors), including both fixed and variable components, amounted to €7,163 thousand (€11,351 thousand in 2013).

For more information on the Corporate Governance Report, the appendix of this Management Report contains the complete version.

# 9.- Appointments and remuneration committee

The Appointments and Remuneration Committee was created by the board of directors of Abengoa, S.A. (hereinafter, the 'Company') on February 24, 2003, under Article 28 of the board of directors regulations, in order to incorporate the recommendations relating to appointments and remuneration committees in Law 44/2002 of November 22 on financial system reform measures. This meeting of the board of directors also approved the Committee's internal regulations.

At present the Appointments and Remuneration Committee is governed by the consolidated text of the Capital Companies Act, approved by Legislative Royal Decree 1/2010 of July 2 (hereinafter, the 'Capital Companies Act'), which are reflected in Abengoa's bylaws, the board of directors regulations and the internal regulations of the Appointments and Remuneration Committee.

## Composition

The Committee currently has the following composition:

| | |
|---|---|
| - Mercedes Gracia Diez | Chairman. Independent director. |
| - José Borrell Fontelles | Member. Independent director. |
| - Alicia Velarde Valiente | Member. Independent director. |
| - Juan Carlos Jiménez Lora | Non-director Secretary |

Ms. Gracia Diez was appointed as a member of the Committee by the meeting of the board of directors of Abengoa, S.A. held on December 12, 2005 and elected as its chairman at the meeting of the Appointments and Remuneration Committee held on March 17, 2015. The secretary of the Committee was appointed by the meeting of the Appointments and Remuneration Committee held on June 23, 2014.

Mr. Antonio Fornieles Melero resigned as chairperson of the committee on March 1, 2016, given his appointment as Executive President of the Board of Directors of the Company, replacing Mr. José Dominguez Abascal.

As a result, the Appointments and Remuneration Committee comprises three independent directors with the chairman of the Committee appointed from among them, in accordance with the requirements of the Capital Companies Act. Article 2 of the Committee's internal regulations also requires the chairman to be an independent director.

## Duties and responsibilities

The Appointments and Remuneration Committee is responsible for the following:

1. Evaluate the skills, knowledge and experience required to be a member of Abengoa's board of directors. The Committee will define the functions and skills required by candidates for each vacancy and assess the time and dedication required for the role to be performed correctly.
2. Establish a representation target for the under-represented gender on the board of directors and prepare guidelines on how to achieve this goal.
3. Submit proposals to the board of directors to appoint independent directors so that they may be appointed by co-optation or for the decision to be submitted to the General Shareholders' Meeting, as well as proposals for re-elections or departures also to be submitted to the General Shareholders' Meeting.
4. Propose appointments of the remaining directors so that they may be appointed by co-optation or for the decision to be submitted to the General Shareholders' Meeting, as well as proposals for re-elections or departures also to be submitted to the General Shareholders' Meeting.
5. Annually verify that the original conditions underlying the appointment of directors continue to apply, including the characteristics and type of directorship applicable to each board member, all of which should be included in the annual report.
6. Report any proposals to appoint or dismiss senior management members and the basic conditions of their contracts.
7. Analyze and organize the succession of the chairman of the board of directors and the Company's CEO, and make proposals to the board of directors so that this succession occurs in an organized and planned way, as appropriate.
8. Propose to the board of directors the remuneration policy for directors and general managers or those people that perform the senior management functions reporting directly to the Board; members of executive committees; and CEOs, as well as the individual remuneration and other contractual conditions of executive directors, ensuring that these conditions are fulfilled.
9. Organize and supervise the annual performance appraisal of the board of directors and its committees, and propose an action plan to correct any deficiencies identified depending on the results obtained.
10. Prepare an annual report on the activities of the Appointments and Remuneration Committee, which must be included in the management report.

## Meetings and calling of meetings

To fulfill the aforementioned duties, the Appointments and Remuneration Committee will meet when necessary and at least once every six months. It will also meet whenever the chairman calls a meeting, although a valid meeting may also be called when all of its members are present and they agree to hold a meeting.

During 2015 the Committee met twelve times. Important issues discussed at these meetings included proposals to appoint or re-appoint members of the board of directors, as well as checking that the original conditions underlying the appointment of directors continue to apply, including the characteristics and type of directorship applicable to each member.

## Quorum

Meetings of the Committee shall be considered as valid when the majority of its members are present. Attendance may only be delegated to other non-executive directors.

The resolutions adopted shall be valid when the majority of the Committee's members, present or represented, vote in favor. In the case of a tie, the chairman shall have the casting vote.

The Company's remuneration manager shall act as Secretary of the Committee at its meetings.

## Analysis, reports and proposals made by the Committee

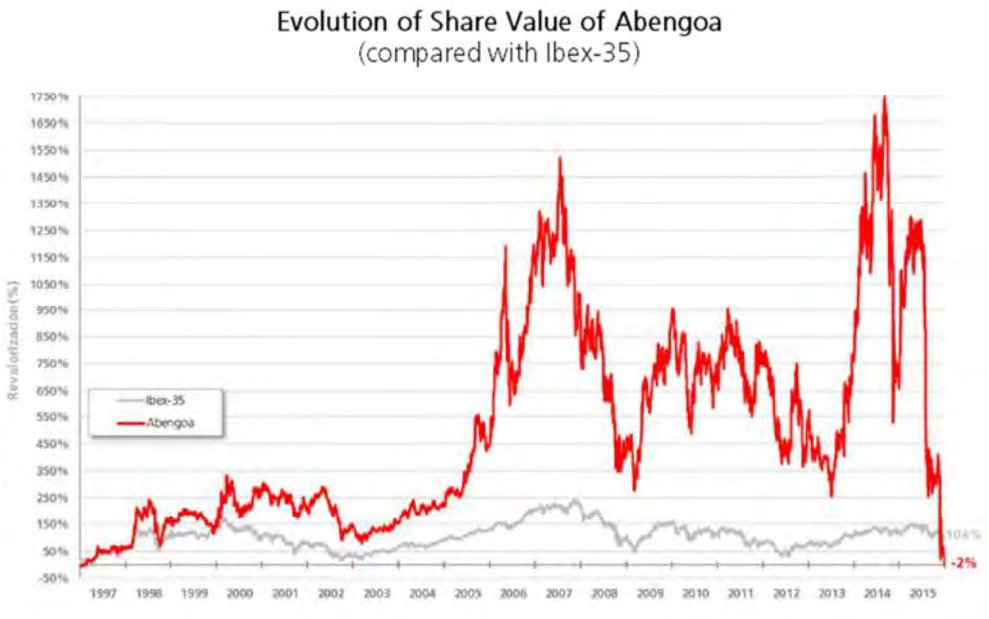
During 2015 the main resolutions of the Appoitment and Remuneration Comitee has been the following:

- Proposal to the Board of Directors to appoint, by co-optation, Mr. Antonio Fornieles Melero, as independent Director, to fill the vacancy due to the resignation of the Director of the Company Aplidig, S.L.
- Report to the Board of Directors on the appointment of Mr. Antonio Fornieles Melero, as second Vice-chairman, Coordinating Director and Member of the Company´s Audit Committee, and of the Appointments and Remuneration Committee of the Board of Directors.
- Report to the Board of Directors about the new regulations in the remuneration system of listed companies Directors.
- Report to the Board of Directors about the appointments of Mr. Manuel Sánchez Ortega, CEO of the Company, as first Vice-chairman of the Board of Directors.

- Report to the Board of Directors about the appointment of Mr. Ignacio García Alvear as new Investors Relations Director, replacing Ms. Bárbara Sofía Zubiría Furest.
- Proposal to the Board of Directors, for its approval, of the individual remunerations and other contractual conditions of the executive directors.
- Proposal to the Board of Directors, for its approval, of the annual report of remunerations of Directors, included in the Directors and Senior management remuneration policy.
- Submission of the results of the annual performance appraisal of the Board of Directors and its committees to the Board of Directors, for its approval.
- Proposal to the Board of Directors to appoint Mr. Antonio Fornieles Melero as lead Director of the Company's Audit Committee.
- Proposal to the Board of Directors to appoint Ms. Mercedes Gracia Díez as lead Director of the Appointments and Remuneration Committee replacing Mr. José Borrell Fontelles.
- Report to the Board of Directors on the appointment of Mr. Santiago Seage Medela as the Company's CEO, replacing Mr. Manuel Sanchez Ortega.
- Report to the Board of Directors of the remuneration settlement in favor of Mr. Manuel Sánchez Ortega, given his resignation as CEO.
- Proposal to the Board of Directors to appoint Mr. Santiago Seage Medela as first Vice-chairman of the Board of Directors and the incorporation of Ms. María Teresa Benjumea Llorente to the Board of Directors, both replacing Mr. Manuel Sánchez Ortega.
- Report to de Board of Directors of the remuneration settlement in favor of D. Felipe Benjumea Llorente, given his resignation as Executive Chairman of the Company.
- Report to the Board of Directors about the proposal of appointment of Mr. José Domínguez Abascal as Proprietary Director and Non-executive Chairman of the Board of Directors.
- Favorable report to Board of Directors about the following changes on the management structure. Appointment of Mr. José Domínguez Abascal as Executive Chairman of the Board of Directors, appointment, by co-optation, of Mr. Joaquín Fernández de Piérola Marín replacing the vacancy by resignation of Mr. Santiago Seage Medela, and appointment as General Director of Mr. Joaquín Fernández de Piérola Marín.
- Favorable report to the Board of Directors about the new contracts with the Executive Chairman with Mr. José Dominguez Abascal and Mr. Joaquín Fernández de Piérola Marín.

# 10.- Other relevant information

## 10.1. Stock exchange information



According to data provided by Bolsas y Mercados Españoles (BME), in 2015 a total of 201,440,452 Class A shares and 5,392,798,418 Class B shares in the company were traded, equivalent to an average daily trading volume of 786,876 Class A shares and 21,065,618 Class B shares, The average daily traded cash volume was €1.5 million for Class A shares and €33.8 million for Class B shares.

| | A-Shares | | B-Shares | |
|---|---|---|---|---|
| Share evolution | Total | Daily | Total | Daily |
| Volume (thousands of shares) | 201,440 | 787 | 5,392,798 | 21,066 |
| Volume (M€) | 382 | 1.5 | 8,642.90 | 33.8 |

| Quotes | Data | | Data | |
|---|---|---|---|---|
| Last | 0.41 | 31-dec | 0.19 | 31-dec |
| Maximum | 3.74 | 30-mar | 3.51 | 30-mar |
| Average | 1.89 | | 1.6 | |
| Minimum | 0.33 | 25-nov | 0.18 | 31-dec |

The last price of Abengoa's shares in 2015 was€ 0.41 for Class A shares, some 81% lower than at the end of 2014; and €0.19 per Class B share, 89% lower than the close of 2014.

Since its IPO in the Spanish stock exchange in November 29, 1996, the value of the company has decreased by 2%. The selective IBEX-35 index has risen by 104% during the same period.

## 10.2 Dividend policy

The General Shareholders' meeting held on March 29, 2015 approved a dividend of €0.113 per share, which amounted to €94,894 thousand, compared to €91,637 thousand in the previous year. On April 17, 2015 the dividend was distributed in one single payment.

Abengoa's Board of Directors held on September 23, 2015 approved the suspension of our dividend until Abengoa achieve a credit rating of "BB-"from Standard & Poors or "Ba3" from Moody's or our leverage ratio of Gross Corporate Debt (including bridge loan), as of the most recent balance sheet date which is approved, to Corporate EBITDA for the twelve months immediately preceding such balance sheet date, falls below 3.5x. As long as Abengoa do not reach the aforementioned credit rating or leverage ratio, Abengoa will not distribute dividends to their shareholders.

## 10.3 Management of credit quality

Credit ratings affect the cost and other terms upon which we are able to obtain financing (or refinancing). Rating agencies regularly evaluate us and their ratings of our default rate and existing capital markets debt are based on a number of factors.

As of March 19, 2015 Fitch Ratings, Inc ("Fitch") reduced the rating from B+ to B with stable Outlook. On November 26, after the announcement of the company´s situation reduced the rating to CC and at December 14, to RD (restricted default). Afterwards on January 16, 2016, Fitch announced that leaves the coverage of Abengoa.

On August 7, 2015, Moody´s Investors Service, Inc. ("Moody´s) confirmed the rating of B2 changing its Outlook from stable to on review. On November 19, 2015 reduced the rating to B3 (on review) and on November 26 to Caa2 with negative outlook. On December 11, 2015 announced the reduction of its rating to Caa3 with negative outlook.

Lastly, the investment services of Standard & Poor´s ("S&P") announced on June 9, 2015 an Outlook upgrade to credit watch from positive, confirming the rating upgrade to B+ from B in June 30, 20415. On November 26 reduced its rating to CCC- with negative Outlook and on December 16 to SD (Selective default).

## 10.4 Average supplier payment time

In compliance with the duty to report the average period of payment to suppliers stated in article 539 and the eighth additional provision of `Ley de Sociedades de Capital` according to the new composition given by the second final provision of` Ley 31/2014 de reforma de la ley de Sociedades de Capital` the company informs that the average period of payment to suppliers related to all the companies in the Group in Spain has been 95 days.

The following detail required by the article 6 of the January 29, 2016 resolution of the Instituto de Contabilidad y Auditoría de Cuentas, related to the information to be provided about the average period of payment during the year

| | Days |
|---|---|
| **Average period of payment** | **95** |
| Paid transactions ratio | 60 |
| Unpaidtransactions ratio | 133 |

| | Amount |
|---|---|
| Total payments | 1256739 |
| Total outstanding payments | 1163119 |

There is not comparative information in compliance with the additional provision of the mentioned resolution.

## 10.5 Furher information

To correctly measure and value the business and the results obtained by Abengoa, it is necessary to draw out the business trends from the consolidated figures.

In addition to the accounting information, as provided within the financial accounts and within this management report, Abengoa also publishes an 'Annual Report' which sets out the key events of 2015. This report is available in Spanish, and English. The Annual Report, which is published prior to the Shareholders' Meeting at which the financial statements of 2015 will be approved, includes not only the consolidated accounts of Abengoa, as well as the strategic objectives of the business and the key events of the three Business Units into which Abengoa is structured as of December 31, 2015.

The annual report is available on the company's website at www.abengoa.com.

The requirement to provide the market with information which is useful, truthful, complete, comparable and up-to-date would not be of such value to the user if the means of communicating such information were insufficient, as it would result in such information not being as effective, timely and useful. As such. The requirement to provide the market with information which is useful, truthful, complete, comparable and up-to-date would not be of such value to the user if the means of communicating such information were insufficient, as it would result in such information not being as effective, timely and useful. As such, the Aldama Report, the Financial System Reform Law and the Transparency Law recommend and enforce, in the light of recent technologies, the use of a website by listed companies as an information tool (including historical, qualitative and quantitative data on the company) and a means of disseminating information (on a timely or real-time basis, making such information available to investors).

Abengoa has a website, which was recently renewed and updated, that features far-reaching and comprehensive content, including information and documentation made available to the public and, in particular to shareholders. This website offers periodic information (quarterly and half-yearly) as well as other relevant information and facts upon which it is mandatory that Abengoa report to the CNMV to comply with the rules of the stock exchange. Through this website, it is also possible to request a copy of the Annual Report.

# 11.- Subsequent events

During the month of February 2016, the investment that Abengoa owned in Shams, which is the owner of a thermo-solar plant of 100 MW developed by the Company in Abu Dhabi (United Arab Emirates) has been sold for a total amount of USD €30 million. No impact in the results for the year is expected from this transaction.

As of March 1, 2016, the Company ceased Mr. José Dominguez Abascal, formerly appointed by Inversión Corporativa IC, S.A. as Chairman and revoked the powers he may have delegated. Since that date, he will continue as Director (external Director). Replacing him, the Board of Directors of Abengoa previously agreed by the Appointment and Remuneration Committee, appointed as Executive Chairman to Mr. Antonio Fornieles Melero, former Vice-chairman and Coordinator Director, delegating him all powers except those that cannot be legally delegated. As a consequence of this appointment this mentioned Director begun to have the executive Director consideration and left the Audit Committee and the Appointments and Remuneration Committee.

Also, and with prior approval of the Appointment and Remuneration Committee, the Board of Directors of Abengoa delegated on Mr. Joaquín Fernández de Piérola Marín all powers except those that cannot be legally delegated. As a consequence of this appointment, Mr. Joaquín Fernández de Piérola Marín was appointed CEO and maintained the executive Director consideration.

Additionally, in the framework of the negotiations, it is maintaining, with a group of its creditors comprised of banks and holders of bonds issued by the Abengoa group, for the restructuring of its indebtedness and its recapitalization in line with the grounds of an agreement that was announced on March 10, 2016 (relevant fact number 236094), on March 21, 2016, Abengoa Concessions Investments Limited ("ACI"), a subsidiary of the Company, entered into a Secured Term Facility Agreement (the "Facility Agreement") among, inter alia, the lenders as describe below (the "Lenders") and the agent appointed thereunder (the "Agent"), pursuant to which it is entitled to borrow up to €137,094,751.30 (the "Loan Amount") and is required to enter into related security documents (collectively, the "Loan Documents").The Facility Agreement will be used for the general corporate and working capital purposes of the Company and its subsidiaries (the "Group").

Upon the occurrence of certain events that are customary for this type of loan, the Lenders may exercise their right to require ACI to repay all or part of the Loan Amount, post additional collateral or foreclose on, and dispose of, the Pledged Shares (as described below under "Security") in accordance with the Loan Documents.

The loan will mature on 23 September 2016 or (if maturity for the September Facility and the December Facility is extended to at least the same date) 12 months after the utilization date. Loans will initially bear interest at a rate per annum equal to the aggregate of EURIBOR plus 14.5% (on a payment in kind basis). Default interest will be payable at a rate of 5% above the interest rate.

In certain circumstances, a make-whole amount, a restructuring fee and/or a rollover fee may become payable under the Facility Agreement.

Abengoa and the following subsidiaries will each provide a guarantee of all amounts payable to the finance parties under the Facility Agreement. Under the terms of the Loan Documents, ACI will pledge and grant a security interest in 14,327,124 ordinary shares of Atlantica Yield (formerly Abengoa Yield Plc.) held by it (the "Pledged Shares"), in favour of the Lenders as security for the Loan Amount and its obligations under the Loan Documents.

The Facility Agreement will require compliance with certain financial covenants consisting of (i) an initial loan to value ratio of 60% and (ii) maintaining a loan to value ratio of not more than 80%.

In relation to the Pledged Shares that were previously the subject of security interests in favour of the lenders under either (i) the loan agreement granted to the Company in 23 September 2015 or (ii) the loan agreement entered into in 24 December 2015 (see Note 20 to the Consolidated Financial Statements):

- the lenders under (i) the September Facility will release all of the Pledged Shares that are pledged as security for such financing and (ii) the December Facility will release a certain number of the Pledged Shares that are pledged as security for such financing. ACI will pledge and grant a second ranking pledge in respect of the Pledged Shares and the remaining shares securing the December Facility in favour of the lenders under the September Facility; and

- in connection with the granting of such releases, the September Facility and the December Facility will be amended to align certain provisions relating to the interest, the restructuring and rollover fees, the loan to value financial covenants, the maturity and the disposal covenants with those in the Loan Documents.

The Facility Agreement is governed by English law and the courts of England have exclusive jurisdiction to settle any dispute arising out of or in connection therewith.

Since December 31, 2015, no other events have occurred that might significantly influence the information reflected in the Consolidated Financial Statements, nor has there been any event of significance to the Group as a whole.

## A.9 Provide details of the conditions and current timeframes that shareholders confer upon the Board of Directors to issue, repurchase or transfer treasury stock.

The Ordinary General Meeting of Shareholders held on March 29 2015 authorized the Board of Directors to buy back the Company's shares, of any of the classes of shares stipulated in the company Bylaws, either directly or through its subsidiary or investor companies up to the maximum permitted by current laws at a rate set between one hundredth part of a euro (€ 0.01) as a minimum and twenty euros (€ 20) as maximum, with the specific power of substitution in any of its members. Said power shall remain in force for five (5) years from this very date, subject to article 144 and following of the Spanish Corporate Law. This authorization expressly includes the acquisition of shares that must be delivered directly to the company's employees or the option rights to which they are entitled. Thus, the authorization conferred upon the Board of Directors for the same purposes, by virtue of the decision taken at the Shareholders' Ordinary General Meeting held on Sunday, April 06, 2014, was specifically revoked.

On November 19 2007, the company signed a Liquidity Agreement regarding Class A shares with Santander Investment Bolsa, S.V. In replacement of said Liquidity Agreement, on January 10 2013, the company signed a Liquidity Agreement regarding class A shares, pursuant to the conditions set forth in Circular 3/2007, of December 19, of the CNMV. This Liquidity Agreement has been suspended since September 28 2015.

On November 8 2012, the company signed a Liquidity Agreement regarding Class B shares, with Santander Investment Bolsa, S.V., pursuant to the conditions set forth in Circular 3/2007, of December 19, of the CNMV. This Liquidity Agreement was terminated on April 21 2015.

As of December 31 2015, treasury stock amounted to 5,662,480 shares, all of which were Class A.

Regarding transactions performed during the financial year, the acquired treasury stock amounted to 86,671,439, out of which 9,997,508 were Class A and 76,673,931 Class B, and treasury stock sold amounted to 122,633,224, out of which 9,885,560 were Class A while 112,747,664 were Class B, The net result of the transactions amounted to 35,961,785 shares.

## A.9 bis Estimated Floating Capital:

| | % |
|---|---|
| Estimated Floating Capital | 67.5 % |

## A.10 Indicate whether there are any restrictions on the transferability of stocks and/or any restrictions on the voting rights. In particular, issue report on the existence of any kind of restrictions that could impede complete takeover of the company through the acquisition of its shares on the market.

No

**Description of the Restrictions**

## A.11 Indicate whether the General Shareholders' Meeting agreed to implement any neutralization measures to prevent public takeovers pursuant to the provisions of Law 6/2007.

No

**Where applicable, explain the approved measures and terms under which restrictions will be rendered ineffective:**

## A.12 Indicate whether the company has issued securities not negotiated on the community regulated market.

Yes

**If so, indicate the various classes of shares and, for each class of shares, the rights and obligations entailed therein.**

Class B shares are also listed in NASDAQ Global Select Market through "American Depositary Shares" represented by "American Depositary Receipts" (with five class B shares interchangeable by one American Depositary Share).

The ADS (American Depositary Shares) on Class B Shares of Abengoa, S.A. have been officially admitted for trade on the Nasdaq, American electronic stock market, since 17 October 2013.

# B General meeting

## B.1 Indicate and list the differences, if any, between the quorum required and what is set forth in the Spanish Corporate Law (LSC) for convening the General Shareholders' Meeting.

No

| | % of quorum different to that set forth in art. 193 of the Spanish Corporate Law for general cases | % of quorum different to that set forth in art. 194 of the Spanish Corporate Law for special cases of art. 194 LSC |
|---|---|---|
| Quorum required in 1st call | | |
| Quorum required in 2nd call | | |

Description of the differences

## B.2. Indicate and list the differences, if any, with regards to the system contemplated in Spanish Corporate Law (LSC) for signing corporate agreements

No

**Describe how it is different from the system set forth in the LSC.**

| | Reinforced majority different to that set forth in article 201.2 of the Spanish Corporate Law for cases outlined in art 194.1 LSC | Other reinforced majority cases |
|---|---|---|
| % established by the company for signing agreements | | |

Describe the differences

## B.3 Indicate the rules applicable to the amendment of the company's bylaws. In particular, the majority required to amend the bylaws and, where applicable, the legal provisions for the protection of partner rights regarding the amendment of the bylaws shall be communicated.

Article 13 of the rules and regulations of the General Meeting establishes a special quorum that may enable the ordinary or extraordinary general assembly to validly agree on bond issuance, on capital increase or decrease, on changing, merging or splitting of the company and, in general, on any amendments whatsoever to the Bylaws, thus requiring, on the first call, the attendance of shareholders present or represented with at least fifty percent of the subscribed equity with voting rights. On the second call, only requiring the attendance of twenty-five percent of said capital. In the event of the attendance of shareholders with less than twenty-five percent of the subscribed capital with voting rights, decisions may only be taken with the favorable votes of two thirds of the capital present or represented in the Meeting".

Article 8 of the bylaws establishes certain rules and regulations for the purpose of protecting minority shareholders in bylaw amendment matters:

"1st Separate voting in matters regarding the amendment of bylaws or agreements and other operations that may negatively affect class B shares.

Bylaw or agreement amendments that may directly or indirectly damage or negatively affect the pre-emptive rights or privileges of class B shares (including any amendments to the precautionary bylaws regarding class B shares or any agreements that may damage or negatively affect class B shares in comparison with class A shares, or that may benefit or favorably affect class A shares in comparison with class B shares) shall require, in addition to being approved pursuant to the stipulations of these bylaws, the approval of a majority of class B shares in circulation at the time. For explanatory but by no means limiting purposes, said precaution shall entail as follows: the elimination or amendment of the precautions set forth herein on the principles of proportionality between the number of shares representing class A shares, those of class B and those of class C (if previously issued) over the total of the company's shares in the issuance of new shares or securities or instruments that may give rise to conversion, exchange or acquisition, or in any other manner, that may suppose a right to receive the company's shares; the partial or total exclusion, of a non-egalitarian nature for shares of class A, class B and class C (as the case may be), of the pre-emptive and other analogous rights that may be applicable by Law and by these bylaws; the repurchase or acquisition of the company's own shares that may affect class A shares, class B shares

and class C shares (as the case may be), in non-identical manner, in terms and conditions, in price or otherwise therein, and which may exceed what is produced under the framework of ordinary operation of treasury stock or which may cause amortization of shares or the reduction of capital in non-identical manner for class A, class B or class C shares (as the case may be); the approval of the company's structural modification that does not amount to treatment identity in all of its aspects for class A and class B shares; the exclusion of the shares of the company from trading on any secondary stock exchange or securities market except through the presentation of an offer of acquisitions for the exclusion from trading as envisaged in the considerations for the class A, class B and class C shares (as the case may be); the issuance of class C or of any other class of preferred or privileged shares that may be created in future.

For that purpose, separate voting rights shall not be required for the various existing classes of shares to decide on whether to totally or partially exclude, as the case may be, the pre-emptive and other analogous rights that may be applicable pursuant to the Law and to these bylaws, simultaneously and identically for class A, class B and, as the case may be, class C shares. "

[…]

"2nd Separate voting in matters regarding the amendment of bylaws or agreements and other operations that may negatively affect class C shares

Notwithstanding Article 103 of the Spanish Corporate Law, amendments of bylaws or agreements that may directly or indirectly damage or negatively affect the pre-emptive rights or privileges of class C shares (including any amendments to the precautionary bylaws relating to class C shares or to any agreement that may damage or negatively affect class C shares in comparison with class A and/or class B shares, or that may benefit or favorably affect class A and/or class B shares in comparison with class C shares) shall require, in addition to approval pursuant to the stipulations of these bylaws, approval by a majority of class C shares in circulation at the time. For explanatory but by no means limiting purposes, said precaution shall entail as follows: the elimination or amendment of the precaution set forth herein on the principles of proportionality between the number of shares representing class A shares, those of class B (if previously issued) and those of class C over the total of the company's shares in the issuance of new shares or securities or instruments that may give rise to conversion, exchange or acquisition, or otherwise, that may suppose a right to receive the company's shares; the partial or total exclusion, of a non-egalitarian nature for shares of class A and/or class B and class C of the pre-emptive and other analogous rights that may be applicable by Law and these bylaws; the repurchase or acquisition of the company's own shares that may affect class A and/or class B shares with regards to class C shares, in non-identical manner, in terms and conditions, in price or in any other manner, and which may exceed what is produced under the framework of ordinary operation of treasury stock or which may cause amortization of shares or reduction of capital in non-identical manner for class A, class B (as the case may be) and class C shares; the approval of the company's structural modification that does not amount to treatment identity in all of its aspects for class A, class B shares (as the case may be) with regards to class C; the exclusion of the shares of the company from trading on any secondary stock exchange or securities market except through the presentation of an offer of acquisitions for the exclusion from the trading as envisaged in the considerations for class A, (class B as the case may be) and class C shares; the issuance of any other class of preferred or privileged shares that may be created in future.

Notwithstanding the provisions of Article 293 of the Spanish Corporate Law, whatever the case may be, the Company's agreements on capital increase under whichever modality and under any formula that may give rise to the first issuance of class C shares shall, in addition to its approval in accordance with the legal provisions and with Article 29 of these Bylaws, require the approval of the majority of class B shares that may be in circulation."

See section H "Other Information of Interest"

## **B.4** Give details of attendance at general shareholder meetings held in the financial year to which this report refers and also in the previous financial year:

**Attendance Data**

| Date of General Shareholders' Meeting | % of physical presence | % of proxy | % of absentee voting | | Total |
|---|---|---|---|---|---|
| | | | Electronic voting | Other | |
| 10-10-2015 | 64.399 | 3.328 | 0.0012 | 0.400 | 68.130 |
| 29-3-2015 | 64.651 | 6.784 | 0.00 | 0.305 | 71.74 |
| 6-4-2014 | 7.172 | 65.014 | 0.00 | 0.00 | 72.186 |

## **B.5** Indicate whether there are any restrictions in the Bylaws establishing a minimum number of shares needed to attend the General Shareholders' Meeting:

Yes

| Number of shares required for attendance at the General Shareholders' Meeting | 375 |
|---|---|

See section H "Other Information of Interest"

## B.6 Section repealed.

## B.7 Indicate the address and how to access the company's website to obtain corporate governance and General Shareholders' Meeting information that should be made available to the shareholders through the company's website.

The address of the Abengoa SA website is www.abengoa.com/.es and all the necessary and updated information relating to shareholders meetings can be found under the section of Shareholders and Corporate Governance.

The complete link to be followed:

http://www.abengoa.es/web/es/accionistas_e inversores/juntas_generales/

In compliance with the provisions of article 539.2 of the Spanish Corporate Law, Abengoa approved the regulations for the electronic forum for shareholders in order to facilitate communication between shareholders regarding convening and holding all of the general shareholders' meetings. Shareholders may send the following prior to each general meeting:

- Proposals intended for inclusion as part of the agenda outlined in the call for the general shareholders' meeting.
- Requests for the inclusion of said proposals.
- Initiatives to reach the required percentage to exercise minority voting rights
- Requests for voluntary representation.

# C Structure of the company's governing body

## C.1 Board of Directors

### C.1.1 Indicate the maximum and minimum number of Directors stipulated in the company bylaws:

| | |
|---|---|
| Maximum number of Directors | 16 |
| Minimum number of Directors | 3 |

### C.1.2 Complete the following table with the Directors of the board:

| Personal or Corporate Name of Director | Representative | Category of the Director | Seat on the Board | Date of 1st appt. | Date of last appt. | Election procedure |
|---|---|---|---|---|---|---|
| Mr. José Domínguez Abascal | | Executive | Chairman | 23/09/2015 | 10/10/2015 | Appointed by co-optation and subsequently ratified and appointed in Shareholders' Meeting |
| Mr. Antonio Fornieles Melero | | Independent | Vice-chairman Coordinating Director | 19/01/2015 | 29/03/2015 | Appointed by co-optation and subsequently ratified and appointed in Shareholders' Meeting |
| Mr. Joaquín Fernández de Piérola Marín | | Executive | Director and General Director | 27/11/2015 | 27/11/2015 | Appointed by co-optation |
| Mr. José Joaquín Abaurre Llorente | | Proprietary | Director | 25/06/1988 | 7/04/2013 | Voting Rights in Shareholders' Meetings |
| Mr. José Luis Aya Abaurre (passed away on 12 February 2016) | | Proprietary | Director | 25/06/1983 | 7/04/2013 | Voting Rights in Shareholders' Meetings |
| Mr. Javier Benjumea Llorente | | Executive | Director | 25/06/2013 | 7/04/2013 | Voting Rights in Shareholders' Meetings |
| Prof. Mr. José Borrell Fontelles | | Independent | Director | 27/07/2009 | 7/04/2013 | Voting Rights in Shareholders' Meetings |
| Prof. Ms. Mercedes Gracia Diez | | Independent | Director | 12/12/2005 | 6/04/2014 | Voting Rights in Shareholders' Meetings |
| Mr. Ricardo Martínez Rico | | Independent | Director | 24/10/2011 | 1/04/2012 | Voting Rights in Shareholders' Meetings |
| Mr. Ricardo Hausmann | | Independent | Director | 6/04/2014 | 6/04/2014 | Voting Rights in Shareholders' Meetings |

See section H "Other Information of Interest"

## C.1.3 Complete the following tables on the Directors and their different categories:

**Executive directors**

| Personal or corporate name of the Director | Position within the company structure |
|---|---|
| Mr. José Domínguez Abascal | Chairman |
| Mr. Joaquín Fernández de Piérola Marín | Director and General Director |
| Mr. Javier Benjumea Llorente | Director |

| | |
|---|---|
| Total number of Executive Directors | 3 |
| Total % of Directors | 23.08 % |

**Independent directors**

| Personal or corporate name of the Director | Profile |
|---|---|
| Mr. Ignacio Solís Guardiola. | Inversión Corporativa, I.C., S.A. |
| Mr. José Joaquín Abaurre Llorente | Inversión Corporativa, I.C., S.A. |
| Mr. José Luis Aya Abaurre (passed away on 12 February 2016) | Inversión Corporativa, I.C., S.A. |
| Mr. Claudi Santiago Ponsa | First Reserve Corporation |

| | |
|---|---|
| Total number of proprietary Directors | 4 |
| % Total of Board of Directors | 30.77 % |

**External independent directors**

| Personal or corporate name of the Director | Profile |
|---|---|
| **Mr. Antonio Fornieles Melero** | Antonio Fornieles Melero has focused almost his entire professional career on auditing. He joined the Spanish Institute of Chartered Accountants in 1987 and was appointed associate in KPMG in 1994. He was subsequently appointed as member of the firm's Partners Board, auditing manager for KPMG Spain and Chief Operations Officer for global auditing. Until he joined Abengoa, Antonio Fornieles Melero was responsible for the middle market program for all KPMG Spain offices. In January 2015, he was appointed Second Vice-Chairman and Coordinating Director of Abengoa; a position which he currently holds. He graduated with a Bachelor's Degree in Economics and Business Studies from the Complutense University of Madrid and a Diploma in Senior Leadership in Business Management from San Telmo International Institute. He has been a professor in the Faculty of Economics and Business Studies at the University of Cadiz, regularly lectures and gives talks in different universities and professional corporations on issues related to financial information, business management and corporate governance and ethics. |
| **Prof. Mr. José Borrell Fontelles** | Professor of Introduction of Economic Analysis at the Complutense University of Madrid. Aeronautical Engineering at the Polytechnic University of Madrid, Doctorate in Economics, Master's Degree in Operational Research from Stanford University, Master's Degree from the French Institute of Petroleum in Paris. He worked as an engineer for the Spanish Petroleum Company (1972-1981). Between 1982 and 1996 he was successively appointed Secretary-General for Budgetary Affairs, Secretary of State for Finance and Minister for Public Works, Telecommunications, Transport and the Environment. In the first half of his term in office between 2004 and 2009 he was elected President of the European Parliament and in the second half Chairman of the Development Assistance Committee. |
| **Ms. Alicia Velarde Valiente** | He studied in the ICE Pablo VI School where she finished with Honors. She completed a Bachelor's Degree in Law (1983-1987) in the San Pablo Center of University Studies (Complutense University) and obtained 21 Honors, 3 Distinctions and 1 Excellent for the 25 modules. In October 1987 she began preparing for the competitive exams to join the Spanish Association of Notaries under the guidance of Mr. Juan Bolás Alfonso. She sat the exam in 1990 and gained a place as notary after the first round of exams in April 1991. Since then she has worked in several notary offices and as of 2001 in Tarancón (Madrid). Meanwhile, since passing the competitive exams, she was delegated responsibility by Mr. Juan Bolás (appointed Dean of the School) to prepare Group No. I of candidates competing to become Notary Publics from the Madrid Academy of Preparation for Notaries, and has been carrying out this role since 2006. In the 1994-1995 academic year she began to teach classes on Civil Law in the Francisco de Vitoria University and continued doing so until 1999 (when her third child was born). Since 1999 she has continued to work closely with the university, giving guest lectures on the Master's Degree on Canon Law under the guidance of Mr. José Mª Iglesias Altuna. |
| **Prof. Ms. Mercedes Gracia Diez** | Professor of Econometrics at the University Center of Financial Studies (CUNEF). She graduated from the Autonomous University of Madrid in 1978 with a Bachelor's Degree in Economics and completed a PhD in Economics at New York University in 1986. She has carried out her academic work in the Complutense University of Madrid (on leave since 2011) and has had several scientific papers published in international journals. She served as the Director of Balance Sheet Management at Caja Madrid from 1996 to 1999 and Head of the Economics and Law Division of the Interministerial Commission for Science and Technology from 1993 to 1996. |
| **Mr. Ricardo Martínez Rico** | Ricardo Martínez Rico is a founding member of Equipo Económico (2006) and has been serving as its Executive Chairman since 2008. Under his leadership the company offers strategic consultancy services to clients thanks to professional and personalized advice based on extensive knowledge of the economic, financial, tax and legal-regulatory spheres. Formerly, between 2005 and 2006, he directed the Economic and Commercial Office of Spain in Washington, with hands-on participation in commercial negotiations, analysis of American economy and support for Spanish companies in their incorporation to the American market, particularly through investments. He is also responsible for relations with multinational financial institutions: International Monetary Fund, World Bank and Inter-American Development Bank. After successfully executing public duties associated with various significant roles within the Ministries of Economy and Finance, at the start of 2003 he was appointed Secretary of State for Budgetary Affairs and Expenses. In this position, he managed and oversaw one of the largest portfolios of the Spanish Government, with a budget in excess of € 250 billion and a team of more than 3,000 people. He promoted four fundamental laws for Budgetary Consolidation in Spain. Alongside these efforts, he propelled liberalization policies, privatizations, private funding of infrastructure and structural reforms of the Spanish economy, all of which had extremely positive impacts on Spanish economic growth. He was also the Spanish representative in the European Committee on Budgets and in the European Commission on Regional Policy. He actively takes part in debates on international economy and economic policy in the media, specialist journals and seminars, and Spanish and North American business schools. He is one of the main drivers behind the RCC at Harvard Executive Program. This program focuses on the analysis of building a competitive advantage in the global market It is held every year at Harvard Business School and is now up to its thirteenth edition. He also sits on the Board of Directors of several Spanish companies. He is a Commercial Expert and State Economist (currently on voluntary leave). After studying in the German Institutes of Bilbao and Valencia (Colegio Alemán), he graduated in Business from the University of Zaragoza, both times obtaining the outstanding end-of-course award. He furthered his training in the London School of Economics, Harvard Kennedy School of Government and Wharton Business School. |
| **Mr. Ricardo Hausmann** | Professor Ricardo Hausmann, Venezuelan economist and academic, is the current Director of the Center for International Development and Professor at Harvard University. He formerly served as the first Chief Economist of the Inter-American Development Bank, where he created the Research Department. He also served in the capacity as Minister of Planning of Venezuela and as a member of the Board of the Central Bank of Venezuela. He was Professor of Economics at the IESA [Institute for Advanced Administration Studies] in Caracas, where he founded the Center for Public Policy. |

| | |
|---|---|
| Total number of independent external Directors | 6 |
| % Total of Board of Directors | 46.15 % |

Indicate whether any director classified as independent receives any amount or benefit from the company or from his/her own group, in any concept other than in remuneration as Director, or whether he/she maintains or has maintained a business relation with the company or with any company within its group during the last financial year, in his/her own name or as significant shareholder, Director or top executive of a company that maintains or has maintained such relationship.

As the case may be, the board shall include a statement outlining the reasons why it deems that said Director can perform his/her duties in the capacity as independent Director.

| Personal or Corporate name of the Director | Description of relationship | Reasoned statement |
|---|---|---|
| **Mr. Ricardo Martínez Rico** | Service agreement signed between Abengoa S.A. and Equipo Económico S.L. by virtue of which said company is obliged to provide integral and strategic consultancy services for Abengoa and other companies within its group. Mr. Ricardo Martínez Rico is Chairman of Equipo Económico S.L. | In accordance with the definition of Independent Director, Mr. Ricardo Martínez Rico fulfils the independence requirements necessary for him to perform his duties in his capacity of independent director, since the money received is not significant in comparison with the yearly turnover of Equipo Económico. |

**Other external directors**

**Other external Directors will be identified and reasons will be explained as to why they cannot be considered independent or proprietary, and their connections with the company, its executives or shareholders will be outlined:**

Not applicable

| Personal or Corporate name of the Director | Reasons | Company, executive or shareholder with which the connection is held |
|---|---|---|
| Total number of other external Directors | | |
| % Total of Board of Directors | | |

**Indicate the variations, as the case may be, that occurred during the period in the category of each Director:**

| Personal or Corporate name of the Director | Date of Change | Previous category | Category |
|---|---|---|---|
| José Domínguez Abascal | 27/11/2015 | proprietary | Executive |

See section H "Other Information of Interest"

## C.1.4 Complete the following table with the information on the number of female Directors for the last four financial years, including the nature of such Directors:

| | Number of Female Directors | | | | % of total of Directors in each category | | | |
|---|---|---|---|---|---|---|---|---|
| | Financial Year t | Financial Year t-1 | Financial Year t-2 | Financial Year t-3 | Financial Year t | Financial Year t-1 | Financial Year t-2 | Financial Year t-3 |
| Executive | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

| Independent | 2 | 2 | 2 | 2 | 33.33 | 40 | 50 | 50 |
| Other External | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Total: | 2 | 3 | 3 | 3 | 15.38 | 18.75 | 20 | 20 |

## C.1.5 Explain, where applicable, the measures taken by the company to ensure that females are included on the Board of Directors in a number that allows for a balanced representation of men and women.

**Explanation of the measures**

Six of the members that comprised the Board of Directors at the closing of the financial year were independent and two of those are female. The Appointments and Remunerations Commission promotes the inclusion of females on to the Board of Directors, specifically focusing on the posts of independent Directors since the rest of the other member-posts that make up the Board are proprietary Director posts whose selections do not directly depend on the Commission. Thus, Abengoa ensured that the number of women is representative based on the number of independent members by applying the policy established in Article 1 of the regulations of the Appointments and Remunerations Commission which specifically outlines the quest for equal opportunities: "Article 1 - Composition and Structure". [...] [ ] "The Appointments and Remunerations Commission shall establish procedures and, in the event of new vacancies, shall ensure that:

- a) The selection process for board vacancies has no implicit bias against female candidates;

› b) The company makes a conscious effort to include female candidates that meet the professional profile sought."

It is the responsibility of the Appointments and Remunerations Commission to notify the Board about any issues of gender diversity. It is also obliged to establish a representation target for the less represented sex in the Company's Board of Directors and draft guidelines on how to achieve this target.

Moreover, through the company's Equality Framework Plan, Abengoa has defined a corporate strategy in the field of equal rights between male and female. Thus, all Abengoa companies and work centers take and use this Plan as a reference for developing and approving their own. In 2009, to ensure the practice of these values, Abengoa created the Equal Opportunity and Treatment Office (OITO) under the Equality Framework Plan. The mission of this office is to advocate gender equality with the whole organization, promoting, developing and managing the Equality Framework Plan and all plans associated with it.

In addition, the company created the Equal Opportunity and Treatment Commission, chaired by the Human Resources Director and integrated by the HR heads from the various areas and geographical locations of the business, as well as by the CSR director as permanent members, for the purpose of worldwide follow-up, and subsequent development of the issues relating to equal opportunity among male and female employees of Abengoa

**C.1.6** Explain any measures that the Appointments Commission may have agreed upon to ensure that selection procedures refrain from implicit bias that would otherwise impede the selection of female directors, and that the company purposefully seeks to include and includes female candidates that meet the professional profile sought:

**Explanation of the measures**

The Appointments and Remunerations Commission objectively and transparently assesses the potential candidates based on merit criteria, promoting male and female equality and rejecting all kinds of direct or indirect discrimination based on sex.

The Commission, which includes women in its rank and file, assesses the competencies, knowledge and experience that the Board requires, and defines the aptitude and functions sought in the candidates to occupy the vacancy in question, evaluating the time and dedication such candidates may require to be able to diligently perform their duties, and then decide by majority vote.

If in spite of implementing the measures, as the case may be, the number of female Directors is still scarce or non-existent, explain the reasons to justify such circumstance:

**Explanation of Reasons**

Not applicable

**C.1.6.bis** Explain the conclusions reached by the Appointments Commission with regard to the verification of compliance with the director selection policy. And specifically, with regard to how this policy is pursuing the goal of having at least 30 % of total board places occupied by women directors before the year 2020.

Not applicable, as the company did not have a director selection policy for the financial year 2015.

**C.1.7** Explain the manner in which shareholders with significant shares are represented on the board.

Shareholders with significant shares are represented by proprietary (dominion) Directors who exercise their functions based on the company's code of conduct and on the other regulations deemed applicable to all members of the board.

**C.1.8** Explain, where applicable, the reasons why proprietary directors were appointed at the request of shareholders with stakes amounting to less than 3 % of the share capital:

| Personal or Corporate name of the Shareholder | Reason |
|---|---|
| First Reserve Corporation (Mr. Claudi Santiago Ponsa) | On 9 November, 2011, Inversión Corporativa IC S.A. and Finarpisa SA, in the capacity of shareholders of Abengoa, signed an agreement to regulate the exercise of their respective voting rights in the Abengoa general shareholders' meetings regarding the proposal, appointment, ratification, re-selection or substitution of the Director to represent First Reserve Corporation.<br><br>By virtue of said commitment, among other things, Inversión Corporativa I.C., S.A. and Finarpisa, S.A., jointly agreed on the following:<br><br>(i) to vote on the following through their representatives on the Board of Directors of Abengoa: (a) the appointment of the candidate proposed to said board to serve as Director designated by investor based on the co-optation procedure envisaged in the Spanish Corporate Law; and (b) the proposal to recommend that during the next meeting of the general Meeting the Shareholders of Abengoa appoint, as the case may be, a replacement for the Director designated by investor on the Board of Directors.<br><br>(ii) to vote in the corresponding general assembly of shareholders of Abengoa in favor of the appointment of the candidate proposed by Investor to serve as investor's representative on the Board of Directors. |

**Detail any failure to address formal requests for board representation made by shareholders with stakes equal to or exceeding that of others at whose request proprietary members were appointed. If so, explain the reasons why the request was not carried out:**

Not applicable

| Personal or Corporate name of the Shareholder | Reason |
|---|---|
| | |

**C.1.9** Indicate whether any Director resigned from his/her post before the end of term of office, if reasons were given to the Board and if so, how, and, if reasons were given in writing, explain the reasons given, at least, by the Director him/herself:

| Name of Board Member | Reason for resignation |
|---|---|
| Aplidig, S.L. (Mr. José B. Terceiro) | Submitted his resignation in writing dated 19/01/2015 without stating his reasons |
| Mr. Manuel Sánchez Ortega | Submitted his resignation in writing to the Secretary of the Board of Directors dated 27/07/2015 as a result of undertaking a new professional position |
| Mr. Felipe Benjumea Llorente | Submitted his resignation in writing to the Board of Directors dated 23/09/2015 as a result of his resignation as Executive Chairman and partly due to certain commitments made by the Company with certain financial bodies |
| Ms. María Teresa Benjumea Llórente | Submitted her resignation in writing to the Chairman of the Board of Directors dated 10/10/2015 partly due to certain commitments made by the Company with financial bodies |
| Mr. Fernando Solís Martínez-Campos | Submitted his resignation in writing to the Chairman of the Board of Directors dated 10/10/2015 partly due to certain commitments made by the Company with financial bodies |
| Mr. Carlos Sundheim Losada | Submitted his resignation in writing to the Chairman of the Board of Directors dated 10/10/2015 partly due to certain commitments made by the Company with financial bodies |
| Mr. Santiago Seage Medela | Submitted his resignation in writing to the Board of Directors dated 27/11//2015 as a result of starting work for Abengoa Yield plc as Managing Director |

**C.1.10** Indicate, where applicable, the powers delegated by any Chief Executive Officers:

| Personal or Corporate name of the Director | Brief description |
|---|---|
| Mr. José Domínguez Abascal (Executive Chairman) | All powers of the Board except those of a legal and statutorily non-delegable nature |

See section H "Other Information of Interest"

**C.1.11** Identify, where applicable, the Directors holding administrator or management posts in other companies forming part of the company group listed on the stock market:

| Personal or Corporate name of the Director | Corporate name of entity of group | Post | Does he/she hold executive responsibilities? |
|---|---|---|---|
| Mr. José Domínguez Abascal | Abengoa Solar, S.A. | Physical representative of Abengoa S.A. | No |
| | Sociedad Inversora en Energía y Medioambiente, S.A. | Physical representative of Abengoa S.A. | No |
| | Europea de Construcciones Metálicas, S.A. | Physical representative of Abengoa S.A. | No |
| | Abeinsa Ingeniería y Construcción Industrial, S.A. | Director | No |
| | Abengoa Energy Crops, S.A. | Director | No |
| | Fotovoltaica Solar Sevilla, S.A. | Director | No |
| | Abengoa Biotechnology Research S.A. | Director | No |
| | Abengoa Solar Research S.A. | Director | No |
| Mr. Joaquín Fernández de Piérola Marín | Abengoa Servicios, S.A. de C.V. | Chairman | No |
| | Gestión Integral de Recursos Humanos, S.A. | Chairman | No |
| | Abengoa Concessions, S.L. | Chairman | Yes |
| | Abengoa Concessions Investments, Ltd. | Director | Yes |
| | Abengoa México O&M, S.A. de C.V. | Chairman | No |
| | Abeinsa Monterrey VI, S.A. de C.V. | Chairman | No |
| | Servicios Auxiliares de Administrativos Tabasco, S.A. de C.V. | Chairman | No |
| | Consultora de Servicios y Proyectos Centronorte, S.A. de C.V. | Chairman | No |
| | Concesionaria del Acueducto El Zapotillo, S.A. de C.V. | Alternate Executive Chairman | No |
| | Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V. | Chairman | No |
| | Abengoa Servicios Industriales, S.A. de C.V. | Chairman | No |
| | Abeinsa Juárez N-III, S.A. de C.V. | Chairman | No |
| Mr. Javier Benjumea Llorente | Abengoa Bioenergía, S.A. | Chairman | No |

**C.1.12** Provide details, where applicable, of company Directors who also sit on the boards of other entities listed on different official stock markets to their group, of which the company is aware:

Mr. Antonio Fornieles Melero is a member of the Board of Directors of the company Oryzon Genomycs, S.A.

| Personal or Corporate name of the Director | Corporate name of the listed entity | Post |
|---|---|---|

**C.1.13** Indicate, and if so, explain whether the company has established rules regarding the maximum number of Boards on which its own Directors may sit:

No

**Explanation of the rules**

See section H "Other Information of Interest"

**C.1.14** Section repealed.

**C.1.15** Indicate the overall remuneration of the Board of Directors:

| | |
|---|---|
| Comprehensive remuneration of the Board of Directors (in thousands of euros) | 32,213 |
| Amount of the comprehensive remuneration for the concept of accumulated pension entitlements for current directors (in thousands of euros) | 0 |
| Amount of the comprehensive remuneration for the concept of accumulated pension entitlements for former directors (in thousands of euros) | 0 |

**C.1.16** Identify any senior management staff member who is not also an executive Director and indicate the total remuneration they received during the financial year:

| Personal or Corporate name | Post |
|---|---|
| Alfonso González Domínguez | Director of Ingeniería y Construcción Industrial and Iberoamérica |
| Antonio José Vallespir de Gregorio | Director of Abengoa Bioenergía |
| Carlos Cosin Fernández | Director of Abengoa Water |
| Manuel Doblaré Castellano | Director of Abengoa Research |
| Armando Zuluaga Zilbermann | Director of Abengoa Solar |
| Enrique Aroca Moreno | General Director of Simosa IT |
| Daniel Alaminos Echarri | Secretary General |
| Miguel Angel Jiménez-Velasco Mazarío | Director of Compliance |
| Álvaro Polo Guerrero | Director of Human Resources |
| Luis Fernández Mateo | Director of Organizations and Budget |
| Jesús Angel García-Quílez Gómez | Co-CFO Financial Markets |
| Juan Carlos Jiménez Lora | Director Planning and Control and Remunerations |
| Luis Enrique Pizarro Maqueda | Director of Internal Audits |
| Enrique Borrajo Lovera | Director of Consolidation |
| Ignacio García Alvear | Co-CFO Capital Markets & IR |
| German Bejarano García | Director of International Institutions Relations |

| | |
|---|---|
| Total remuneration for senior management (in thousands of euros) | € 7,163 thousand euros |

**C.1.17** Identify, where applicable, the Directors of the Board who are also Directors of the Board for significant shareholding companies and/or entities of their group:

| Personal or Corporate name of the Director | Corporate name of significant shareholder | Post |
|---|---|---|
| Mr. José Domínguez Abascal | Inversión Corporativa, IC, S.A. | Director |
| Mr. Javier Benjumea Llorente | Inversión Corporativa, IC, S.A. | Director |
| Mr. José Luis Aya Abaurre (passed away on 12 February 2016) | Inversión Corporativa, IC, S.A. | Director |
| Mr. José Joaquín Abaurre Llorente | Inversión Corporativa, IC, S.A. | Director |
| Mr. Ignacio Solís Guardiola | Inversión Corporativa, IC, S.A. | Director |

See section H "Other Information of Interest"

**Provide details, where applicable, of any relevant relations other than those contemplated in the previous section, between members of the Board of Directors and significant shareholders and/or group entities:**

Not applicable

| Personal or Corporate name of associate Director | Personal or Corporate name of significant associate Director | Description of relationship |
|---|---|---|

**C.1.18** Indicate whether any of the rules and regulations of the board were amended during the financial year:

Yes

**Description of amendments**

By virtue of the Board of Directors' decision taken on January 19 2015, Article 22 of the Board of Directors Regulations was amended to add the following paragraph:

"The Board of Directors will be entitled to designate the lead independent director referred to in article 529 septies of the Spanish Corporate Law as second vice-chairman of the Board of Directors".

Likewise, by virtue of the Board of Directors' decision taken on February 23 2015, the Board of Directors Regulations were amended to fully adapt the content thereof to the most recent reforms of the Spanish Corporate Law and, in particular, to add the latest improvements in terms of corporate governance introduced by Law 31/2014 dated December 3, whereby the Spanish Corporate Law is amended to improve corporate governance; to update references made in the regulations to repealed law or that to which the Company as of today's date is not subject; and in general terms, to standardize the terminology used throughout the Articles of the Regulations.

In particular, it was agreed upon to remove the preamble and amend articles 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 16, 17, 18, 19, 20, 21, 22, 23, 26, 27, 28 and 29 of the Board of Directors' Regulations as well as to draft the Revised Text thereof.

Lastly, by virtue of the Board of Directors' decision made on 23 September 2015, article 30 was added to the Board of Directors' Regulations in order to regulate the creation of the Investment Commission:

"Article 30. Investment Commission

The Board of Directors shall establish and sustain an Investment Commission to be governed by the following provisions:

› (a) The Investment Commission shall comprise a minimum of three directors appointed by the Board of Directors, at the proposal of the Executive Chairman of the Board and following a report from the Appointments and Remunerations Commission. The majority of the appointed directors should be external independent Directors. The Board of Directors shall also appoint a Chairman from among the independent directors that make up the Commission. The post of Secretary of the Investment Commission shall be undertaken by whoever carries out the post of Technical Secretary-General of the Company or by the person who, as the case may be, appoints the Board of Directors for such purpose.

› (b) The members of the Investment Commission shall exercise their posts while their appointment as directors of the Company remains in force, unless otherwise agreed by the Board of Directors. The renewal, reelection and designation of the directors of the Investment Commission shall be governed by the terms of agreement reached by the Board of Directors.

› (c) Notwithstanding any other obligations that may be assigned at any time by the Board of Directors, the Investment Commission shall be responsible for:

- (i) Controlling and monitoring commitments for capex. Capex is defined as the investment in capital or equivalent instruments in projects which require cash outflow of the Company. To this end, the Investment Commission must propose, prior to approval by the Board of Directors, any investment commitment for capex in new projects. The Commission shall have sole authorization to propose new capex investments in new projects to the Board of Directors. The Board of Directors shall abstain from approving any capex investment projects that have not been proposed by the Commission.
- (ii) Follow-up of the budget and external capex objectives that the Company has established at each moment.
- (iii) Reporting on the commitments to increase and reduce financial debt and follow-up the Company's financial deleveraging policy.
- (iv) Reporting on the dividend distribution policy and the amendments thereof.

› (d) The Investment Commission may operate according to the rules that, where applicable, are defined by the Board of Directors in a specific regulation."

See section H "Other Information of Interest"

**C.1.19** Indicate the procedures for the selection, appointment, reappointment, appraisal and removal of Directors. Provide details of the authorized bodies, the procedures to follow and criteria to use in each of the procedures.

The Appointments and Remunerations Commission is the competent body for drafting, insofar as independent directors are concerned, and reporting on, in the case of all other directors, the proposal to be presented to the Board of Directors for appointment by co-optation or for subsequent submission before the General Shareholders' Meeting, as well as proposals for their re-election or discharge by the General Shareholders' Meeting, applying criteria of independence and professionalism set forth in the Board of Directors' Regulations and the Commission's Regulations, and ensuring that they hold the recognized creditworthiness and suitable knowledge, prestige and professional experience to perform their duties.

The performance appraisal of the Board of Directors and its Commissions is overseen and organized by the Appointments Commission through substantiated reports filed to the Board during the meeting held in the following first quarter, after the previous financial year-end and after obtaining or at least knowing the accounting estimate for the financial year closing and upon receipt of the auditor's report since both are essential as assessment criteria, proposing, based on the result of the appraisal, a plan of action to correct the identified shortcomings.

With regards to the procedures for selecting and appointing independent Directors, the Appointments and Remunerations Commission is the body in charge of selecting profiles that best represent the needs of the different interest groups among professionals of different fields and of renowned national and international prestige. The procedure for selecting them is based on merits and on the intention to cover any vacancy with professional profiles that are not linked to any specific interests.

Thus, the Appointments and Remunerations Commission performs annual inspections to verify the sustenance of the conditions met for the appointment of the Director and the nature and typology assigned to said member, and then includes the information in the annual report on corporate governance. The Appointments Commission likewise strives to ensure that the selection procedures for filling vacancies refrain from implicit biases that may hinder the inclusion of females that fit the required profile among the potential candidates. Its functions also include reporting to the Board of Directors on appointments, re-elections, terminations and remuneration for senior management, as well as proposing to the Board the general remuneration policy and incentives for Directors and senior management, individual remuneration of Directors, the other contractual terms and conditions of each Executive Director and the basic contractual conditions for senior management, as well as informing the Board of Directors beforehand on all proposals to be submitted to the General Shareholders' Meeting for the appointment or dismissal of Directors, even in cases of co-optation by the Board of Directors itself.

**C.1.20** Explain to what extent the annual evaluation of the Board has led to important changes being made to its internal structure and the procedures applicable to its activity:

There were no significant amendments made as a result of the annual evaluation of the Board.

**Description of amendments**

**C.1.20.bis** Describe the evaluation process and the areas assessed by the Board of Directors with support, where applicable, from an external consultant, with regards to its diversity and competencies, the operation and composition of its commissions, the performance of the Executive Chairman of the Board of Directors and the Chief Executive Officer of the company, as well as the performance and contribution of each director.

The evaluation was carried out from two clearly defined and different perspectives: that of the Board of Directors and its commissions, and the individual performance of directors.

› Performance of the Board of Directors and its commissions

With the intention of gathering the opinions and concerns of directors with regard to certain significant issues in terms of the performance of the Board of Directors and its commissions, the Secretaries of the Board of Directors and the Appointments and Remuneration Commission have sent all Abengoa directors (acting in that capacity and, where applicable, as members of commissions to which they have been appointed) a questionnaire.

The main assessment indicators of the questionnaires distributed to directors of the company are as follows:

› (a) The members of the governing body are aware of the changes in the business environment and are kept abreast of all developments with regard thereto.

› (b) The members of the governing body are aware of the strategic direction of the business.

› (c) The members of the governing body are regularly informed by senior management of any progress made regarding the Company's strategic plan.

› (d) The members of the governing body are informed of and participate in the resolution of Company problems.

- (e) The profiles of members making up the governing body are adequate to address the needs of the Company, providing added value and representing the interests of different stakeholders.
- (f) The members of the governing body are aware of the Company's primary risks.
- (g) The members of the governing body receive the necessary documentation regarding business development and participate therein.
- (h) The members of the governing body have access to reports on the work carried out by the commissions.

In addition, as part of the performance assessment of the Board of Directors and its commissions, the Chairwoman of the Appointments and Remuneration Commission held individual meetings with Abengoa directors (acting in that capacity and, where applicable, as members of commissions to which they have been appointed).

Furthermore, the Secretary of the Appointments and Remuneration Commission collected the information deemed necessary from the Secretary of the Board of Directors and the respective secretaries of the Board of Directors' commissions, having provided them with attendance forms for the respective meetings held.

In the performance assessment of the Board of Directors and its commissions, the Appointments and Remuneration Commission also took account of the first-hand knowledge acquired by the members of the aforementioned commission through serving in the capacity as members of the Company's Board of Directors and of the commissions to which each one is appointed.

- Individual performance assessment of directors

With the aim of assessing the individual performance of the Abengoa directors, the Chairman of the Appointments and Remuneration Commission held various working sessions with the Chairman of the Board of Directors and the Chairmen of the commissions. During these working meetings, they conducted detailed analyses of the participation and individual performance of each Company director in light of their roles and responsibilities which, depending on the different categories to which they belong, are assigned to them by law and the Company's internal corporate governance regulations.

**C.1.20.ter** Give details of, where applicable, any business dealings that the consultant or any members of its corporate group maintain with the company or members of its corporate group.

Not applicable

**C.1.21.** Indicate the cases where Directors are obliged to resign.

In accordance with the provisions in article 13 of the Board of Directors' Regulations, Directors are removed from office when the term for which they were appointed comes to an end, and in all other cases deemed appropriate by Law, the Bylaws or the Board of Directors' Regulations.

Directors are obliged to surrender their posts to the Board of Directors and to formalize their resignation, if the board deems it convenient, in the following cases:

- (a) If they fall within any of the grounds for incompatibility or prohibition as prescribed by the law.
- (b) If deemed severely liable by any public authority for infringing upon their obligations as Directors.
- (c) If the Board itself requests so due to a Director having infringed upon his/her obligations

See section H "Other Information of Interest"

**C.1.22.** Section repealed.

**C.1.23** Does the company require reinforced majorities other than the legal majorities for any type of decision?:

No

**If so, provide a description of the differences.**

**C.1.24** Explain whether or not there are specific requirements other than those relating to Directors to be appointed Chairman of the Board of Directors.

No

**Description of the differences**

**C.1.25** Indicate whether or not the Chairman has the deciding vote:

Yes

| Matters in which there is a deciding vote |
|---|
| In the event of draws. |

**C.1.26** Indicate whether or not the bylaws or board regulations establish any age limit for Directors:

No

| Age limit for Chairperson | Age limit for Chief Executive | Age limit for Director |
|---|---|---|

**C.1.27** Indicate whether or not the bylaws or board regulations establish a limited mandate for independent Directors, other than that established by the law:

No

| Maximum number of years of mandate | |
|---|---|

**C.1.28** Indicate whether or not the Bylaws or the Board of Directors' Regulations establish specific regulations for delegating voting rights on the Board of Directors, how it is done and, in particular, the maximum number of delegations that may be conferred upon a Director, as well as whether or not any restriction has been established with regard to the categories in which it is possible to delegate, beyond the constraints imposed by the legislation. Where applicable, give a brief outline of these regulations.

Article 10 of the Board of Directors' Regulations governs the delegation of voting rights in the following way:

"Members of the Board of Directors may only delegate their representation to another member of the Board. Non-executive Directors may only be represented by other non-executive members of the Board of Directors. Representation of absent Directors may be granted by means of written communication of any nature addressed to the Chairmanship, which is sufficiently competent to accredit the representation granted and the identity of the represented Director.

**C.1.29** Indicate the number of board meetings held during the financial year. Likewise indicate, where applicable, the number of times the Board met without the Chairman in attendance. Proxies granted specific instructions for meetings shall be counted as attendances.

| | |
|---|---|
| Number of board meetings | 42 |
| Number of board meetings without the attendance of the Chairman | 0 |

**If the Chairman is an executive director, indicate the number of meetings held, without the attendance or representation of any executive director and under the chairmanship of the Coordinating Director.**

| | |
|---|---|
| Number of meetings | 0 |

**Indicate the number of meetings held by the different board commissions during the financial year:**

| | |
|---|---|
| Number of meetings of the Executive Commission | Not applicable |
| Number of meetings of the Audit Commission | 12 |
| Number of meetings of the Appointments and Remunerations Commission | 12 |
| Number of meetings of the Appointments Commission | Not applicable |
| Number of meetings of the Remunerations Commission | Not applicable |
| Number of meetings of the Strategy and Technology Commission | 4 |
| Number of meetings of the Investment Commission | 1 |

**C.1.30** Indicate the number of Board meetings held during the financial year with all members in attendance. Proxies granted specific instructions for meetings shall be counted as attendances:

| | |
|---|---|
| Number of meetings with all members in attendance | 31 |
| % of attendance of the total amount of votes throughout the financial year | 76.19 |

**C.1.31** Indicate whether or not the individual and consolidated financial statements submitted for approval to the Board of Directors have been previously certified:

Yes

**Identify, where applicable, the person(s) who has/have certified the individual and consolidated financial statements to be prepared by the Board:**

| Name | Post |
|---|---|
| Enrique Borrajo Lovera | Director of Consolidation |

**C.1.32** Explain the mechanisms, if any, put in place by the board of directors to prevent the board-prepared individual and consolidated financial statements from being presented at the general shareholders' meeting with reservations in the audit report.

The risk control system, the internal auditing services and the audits commission, to which the others report, are set up as frequent and regular monitoring and supervision mechanisms that prevent and, if appropriate, resolve potential situations which, if not addressed, could lead to incorrect accounting treatment. Thus, the Audit Commission receives regular information from the external auditor on the Audit Plan and on the results of its execution, and ensures that senior management acts on its recommendations.

See section H "Other Information of Interest"

**C.1.33** Does the Secretary of the Board hold the status of the Director?

No

**If the Secretary does not hold the status of the Director, complete the following table:**

| Personal or Corporate name of the Secretary | Representative |
|---|---|
| Mr. Daniel Alaminos Echarri | NA |

**C.1.34** Section repealed.

**C.1.35** Indicate, where applicable, the specific mechanisms established by the company to preserve the independence of the external auditors, financial analysts, investment banks and rating agencies.

Article 27 of the Board of Directors' Regulations establishes that the role of the Audit Commission is to ensure the independence of the external auditor, which includes, among other matters, ensuring that the Company and the auditor respect the regulations in force with regard to the provision of services other than those concerning auditing, the limits on the focus of the auditor's services, and in general, other regulations in place to ensure independence of auditors.

In any case, the Audit Commission should annually receive from external auditors the declaration of their independence from the company or companies related directly or indirectly.

See section H "Other Information of Interest"

Insofar as financial analysts and investment banks are concerned, the company has an internal application procedure in place with three tenders for the procurement thereof; in turn the company draws up a mandate letter where the exact terms and conditions of the procured work are outlined.

Insofar as rating agencies are concerned, the Company has the rating from the three current agencies with their corresponding mandate letters.

**C.1.36** Indicate whether the company changed its external auditor during the financial year. If so, identify the incoming and outgoing auditors:

No

| Outgoing auditor | Incoming auditor |
|---|---|
| | |

**In the event of disagreements with the outgoing auditor, please provide details:**

No

| Explanation of the disagreements |
|---|
| |

**C.1.37** Indicate whether or not the auditing firm carries out other tasks for the company and/or its corporate group other than those of an auditing nature. If this is the case, state the amount of fees received for these tasks and the percentage of the fees invoiced to the company and/or its corporate group:

Yes

| | Company | Group | Total |
|---|---|---|---|
| Fees for non-audit work (in thousands of euros) | 376 | 2.063 | 2.439 |
| Fees for non-audit work/total amount invoiced by the audit firm (in %) | 72 % | 36 % | 63 % |

**C.1.38** Indicate whether or not the audit report of the annual financial statements for the previous financial year contain reservations or qualifications. If so, indicate the reasons given by the Chairman of the Audit Commission to explain the content and scope of these reservations or qualifications.

No

**Explanation of the reasons**

**C.1.39** Indicate the number of financial years that the current auditing firm has completed continuously carrying out the audits of the annual financial statements of the Company and/or its corporate group. In addition, indicate the percentage represented by the number of financial years audited by the current auditing firm over the total number of financial years in which the annual financial statements have been audited:

| | Company | Group |
|---|---|---|
| Number of continuous financial years subject to audit | 4 | 4 |
| Number of financial years audited by the current auditing firm / Number of financial years that the Company has been audited (in %) | 0.16 | 0.16 |

**C.1.40** Indicate and, where applicable, provide detail of the procedure whereby Directors can avail of external expertise:

Yes

**Explanation of the reasons**

The Board of Directors has access to external, legal or technical consultants, depending on its needs, which may or may not be arbitrated through the Secretary of the Board. The second paragraph of Article 19 of the Regulations of the Board of Directors sets forth that:

"Through the Chairperson of the Board of Directors, Board Members shall be empowered to submit a proposal by majority to the Board of Directors to engage the services of a legal, accounting, technical, financial, commercial or any other kind of consultants deemed necessary in the interests of the Company to provide assistance in the exercise of their duties in dealing with specific problems of certain magnitude and complexity linked with the exercise of such duties".

**C.1.41** Indicate and, as the case may be, provide detail of the procedure by which Directors can obtain the necessary information in advance to prepare for meetings of the governing bodies:

Yes

**Explanation of the reasons**

Availability of the information before each Board meeting via an online platform that can be accessed by all of the Directors. In addition, via this platform Directors have access at all times to consult the internal regulations and basic legislation applicable to the role and responsibility of the Director, which offers them sufficient knowledge of the Company and its internal rules.

**C.1.42** Indicate and, where applicable, provide detail of whether the company established rules that oblige directors to report and, where appropriate, resign in cases where the image and reputation of the company may be at stake:

Yes

**Explain the rules**

Article 13 of the Board of Directors' Regulations sets forth the following: "Directors are obliged to surrender their posts to the Board of Directors and to formalize their resignation, if the board deems it convenient, in the following cases: (a) If they fall within any of the grounds for incompatibility or prohibition as prescribed by law; (b) If deemed severely liable by any public authority for infringing upon their obligations as Directors; and (c) If the Board itself requests so due to a Board member having infringed upon his/her obligations as Director."

Section (q) of Article 14.2 of the same Regulation also establishes the obligation of the directors to inform the company of all legal and administrative claims and of any other claims that, given the magnitude, may severely affect the reputation of the company.

See section H "Other Information of Interest"

**C.1.43** Indicate whether any member of the Board of Directors has informed the company that they have been tried or formally accused of any of the offences stipulated in Article 213 of the Spanish Corporate Law:

No

| Name of Board Member | Criminal Case | Comments |
|---|---|---|
| | | |

**Indicate whether the Board of Directors analyzed the case. If answered yes, explain with reasons the decision taken on whether or not the Director should continue in his/her post or, where applicable, state the actions taken or plan to be taken by the Board of Directors until the date of this report.**

Not applicable

| Decision taken/action carried out | Reasoned explanation |
|---|---|
| | |

**C.1.44** Provide details of the significant agreements implemented by the company which enter into force, whether amended or expired as a result of a change of control in the company deriving from a takeover bid, and their effects.

The Company has not implemented any significant agreements that enter into force, whether amended or expired as a result of a change of control in the Company deriving from a takeover bid.

While it is true that the Company has signed agreements in which change of control clauses are set forth, these clauses are not necessarily triggered as a result of a takeover bid but rather in the event that "control" of the Company is obtained. Control is understood as the ability or power (whether it be by share ownership, power of attorney, contract, agency or any other way) to (i) vote for or control the vote of more than 50 % of voting rights that may be exercised in the Company's General Meeting; (ii) appoint or dismiss more than 50 % or all members of the Company's Administrative Body; or (iii) establish guidelines on the Company's operating and financial policies that must be complied with by administrators or equivalent staff; or ownership of more than 50 % of capital in the form of common shares or any other type that, where applicable, hold voting rights. These agreements may be terminated in the event of a change of majority control, not necessarily triggered by a takeover bid.

**C.1.45** Identify in aggregate terms and provide details of the agreements reached between the company and its directors and management or employees which contain guarantee or protection clauses or provide for compensation in the event of resignation or unfair dismissal or if the contractual relationship terminates due to a takeover bid or any other type of transaction.

| Number of beneficiaries | 2 |
|---|---|
| **Type of beneficiary** | **Description of the agreement** |
| Chief Executive (Mr. Joaquín Fernández de Piérola Marín) | The business contract of the Chief Executive entitles him to compensation of an amount equivalent to 100% of the remuneration received by the aforementioned in the previous financial year, both in the event of early termination of his contractual relationship with the company (where not due to incompliance of any obligations corresponding to the Chief Executive or exclusively due to his will) and compensation due to a post-contractual non-competition agreement. Both types of compensation are incompatible. As a result, if the Chief Executive receives severance pay due to early termination, he/she would not be entitled to receive compensation due to a non-competition agreement. Any breach of this non-competition obligation shall, at all times, lead to the compensation sum received by the Chief Executive being given back, regardless of the reason why it was received. |

| Number of beneficiaries | 2 |
|---|---|
| **Type of beneficiary** | **Description of the agreement** |
| Executive Chairman (Mr. José Domínguez Abascal) | The Executive Chairman's business contract entitled him, in the event that the company were to dismiss him, to choose between (i) severance pay due to early termination/post-contractual non-competition agreement, which in the case of the Executive Chairman amounted to a sum equivalent to 100% of the remuneration accrued in the previous financial year, or reinstatement in his previous position.Additionally, the Executive Chairman's business contract entitled him to receive, as a one-off compensation payment corresponding to the 2016 financial year, a sum equal to the gross amount of his fixed annual remuneration which is 700,000 euros, subject to the following during the 2016 financial year:-An agreement being reached with the financial and/ or commercial creditors in the process of restructuring the company's balance sheet; and/or -An agreement being reached with investors, where applicable, for them to become Abengoa shareholders or which, in some way, strengthens the structure of the company capital and/or provides a solution for the current financial situation the company is faced with,in one or both of these cases, preventing the company from having to declare insolvency proceedings during the 2016 financial year or, if not prevented, enabling the company to regain solvency and halt the proceedings, also during the 2016 financial year. |

## C.2 Commissions of the Board of Directors

### C.2.1 Give details of all Commissions of the Board of Directors, their members and the proportion of executive, proprietary, independent or other external directors comprising them:

Not applicable

**Executive commission**

| Name | Post | Category |
|---|---|---|
| | | |
| | | |

| | |
|---|---|
| % of executive Directors | |
| % of proprietary Directors | |
| % of independent Directors | |
| % of external Directors | |

**Explain the functions that are assigned to this Commission, describe the procedures and rules for organization and operation thereof and summarize its most important actions during the financial year.**

Not applicable

**Indicate whether or not the composition of the executive commission reflects the participation of the different categories based on their category on the board:**

Not applicable

**If not, explain the composition of the executive commission.**

**Audit commission**

| Name | Post | Category |
|---|---|---|
| Mr. Antonio Fornieles Melero | Chairman | Independent |
| Prof. Mr. José Borrell Fontelles | Member | Independent |
| Ms. Alicia Velarde Valiente | Member | Independent |
| Prof. Ms. Mercedes Gracia Díez | Member | Independent |

| | |
|---|---|
| % of proprietary Directors | 0 |
| % of independent Directors | 100 |
| % of external Directors | 0 |

**Explain the functions that are assigned to this Commission, describe the procedures and rules for organization and operation thereof and summarize its most important actions during the financial year.**

The Audit Commission shall be exclusively made up of non-executive Directors appointed by the Board of Directors; two of which, at least, should be independent Directors and one of them will be appointed in light of his/her knowledge and experience in accounting, auditing or both.

They will meet whenever necessary to carry out their duties or once every quarter, at least. The Commission shall also meet whenever convened by the Chairman, on his own initiative or at the request of any of the members, who may also suggest that the Chairman include a certain issue in the agenda of the following meeting.

The agreements established by the Audit Commission will be adopted in a fair fashion when the majority of the members present or represented in the meeting vote in favor thereof. In the event of draws, the Executive Chairman shall cast the deciding vote.

The following duties, among others, are assigned to the Audit Commission:

- 1. To report on the Annual Accounts, as well as on the quarterly and half-yearly financial statements that must be issued to the regulatory or supervisory bodies of the securities markets, with express mention of the internal control systems, verification of compliance and monitoring through internal audit and, when applicable, on the accounting criteria applied.
- 2. To inform the Board of Directors of any change in the accounting criteria, and any risks either on or off the balance sheet.
- 3. To inform the General Shareholders' Meeting about any matters or questions which arise on issues within its power.
- 4. To propose the appointment of external financial auditors to the Board of Directors for subsequent submission before the General Shareholders' Meeting.
- 5. To oversee internal auditing services. The Commission will have full access to internal auditing and will report on the selection, dismissal, renewal and removal process of its director, on the setting of his/her salary scale, as well as the budget for this department.
- 6. To know the process of the Company's financial reporting and internal monitoring systems.
- 7. To liaise with the external auditors in order to obtain information on any matters that could jeopardize their independence and on any other matters that may be in relation to the financial auditing process.
- 8. To summon the Directors it deems appropriate to the meetings of the Commission to report on issues to the extent the Audit Commission deems fit.
- 9. To prepare annual reports on the activities of the Audit Commission itself and to include it in the Management Report.
- 10. With respect to internal control and reporting systems:
  - (a) To monitor the preparation process and the integrity of the financial report with regard to the Company and, where applicable, the group of which Abengoa is parent company (hereinafter, the "Group"), verifying compliance with legal requirements and the correct application of accounting criteria, and appropriately specifying the scope of consolidation.
  - (b) To periodically revise the internal control and risk management systems so that the main risks, including those of a tax nature, are identified, managed, and properly disclosed, as well as to discuss significant shortcomings of the internal control system identified in the audit with the financial auditor.
  - (c) To supervise and ensure the independence and effectiveness of the duties of internal audits, with full access thereto; to propose the selection, appointment, re-selection and dismissal of heads of internal audits; to propose the budget for said unit, and set the salary scale of its Director; to obtain regular information on the activities and the budget of the unit; and to ensure that the senior management considers the conclusions and recommendations in its reports.

- (d) To establish and supervise a mechanism by which the staff may confidentially and, if necessary, anonymously report any irregularities, especially those of a financial or accounting nature, detected in the course of their duties, with potentially serious implications for the company.
- (e) To summon any Company employee or manager, and even order them to appear before the Commission without the presence of any other senior officer.
- (f) The Audit Commission shall inform the Board, prior to the latter adopting the corresponding decisions, about the following matters:
  - (i) The financial information that all listed companies must periodically disclose. The Commission must ensure that interim statements are drawn up under the same accounting principles as the annual statements and, to this end, may ask the external auditor to conduct a limited review.
  - (ii) The creation or acquisition of shares in special purpose entities or entities resident in countries or territories considered tax havens, and any other similar transactions or operations which, due to their complexity, might impair the transparency of the Group.
  - (iii) Related party transactions.
- (g) To supervise compliance with the Internal Code of Conduct in relation to the Securities Market and the Policy on the Use of Relevant Information and the Rules of Corporate Governance.

11. With regard to the external auditor:

- (a) To propose the selection, appointment, re-selection and replacement of external auditors, including the conditions of their hiring, to the Board of Directors to submit said proposal to the General Shareholders' Meeting for approval.
- (b) To be regularly informed by the external auditor on the progress and findings of the audit plan and to ensure that senior management follow up on its recommendations.
- (c) To make sure the external auditor remains independent and, for that purpose:
  - (i) The Company should notify the National Securities Market Commission of any change of auditor as a significant event, accompanied by a statement of any disagreements arising with the outgoing auditor and the reasons for them.
  - (ii) The Commission must ensure that both Company and auditor respect the current regulations on providing services other than auditing, the limits on the focus on the auditor's services and, in general, other standards and regulations set forth to ensure the independence of auditors.

    In any case, the Commission should annually receive from external auditors the declaration of their independence from the Company or companies with a direct or indirect connection thereto, as well as information on additional services of any kind provided and the corresponding fees received from these companies by the external auditor or by the individuals or companies with a connection thereto in accordance with the provisions set forth in the legislation on financial auditing.
  - (iii) If an external auditor resigns, the Commission must investigate the circumstances leading to the resignation.
- (d) To annually issue, prior to the issuance of the financial auditing report, a report stating the judgment on the independence of the financial auditor. This report should always state the value of the additional services provided and referred to in the previous(c).(ii) section, individually and all together, different to the legal audit and with regard to the independent status or to the governing auditing regulations.
- (e) To ensure that the Group auditor is entrusted with conducting the audits for the individual group companies.

During the 2015 financial year, the main interventions of the Audit Commission were as follows:

- Follow-up of the work carried out in the framework of the process of phasing out situation 5 bis.
- Follow-up of development of the feasibility study carried out by Alvarez & Marsal as part of the restructuring process initiated and caused by situation 5 bis.

**Identify the Director of the Audit Commission who has been appointed in light of his/her knowledge and experience in accounting, auditing or both, and state the number of years that the Chairman of this commission has been carrying out the role.**

| | |
|---|---|
| Name of the Director with experience | Mr. Antonio Fornieles Melero |
| Number of years in Chairman role | 1 |

See section H "Other Information of Interest"

**Appointments and remuneration commission**

| Name | Post | Category |
|---|---|---|
| Prof. Ms. Mercedes Gracia Díez | Chairwoman | Independent |
| Ms. Alicia Velarde Valiente | Member | Independent |
| Prof. Mr. José Borrell Fontelles | Member | Independent |
| Mr. Antonio Fornieles Melero | Member | Independent |

| | |
|---|---|
| % of proprietary Directors | 0 |
| % of independent Directors | 100 |
| % of external Directors | 0 |

Ms. Gracia Díez was appointed member of the Commission in a meeting of the Board of Directors of Abengoa, S.A. held on 12 December 2005, and elected as Chairwoman in a meeting of the Appointments and Remuneration Commission held on 17 March 2015; the Secretary was appointed in the meeting of the Appointments and Remuneration Commission held on 23 June 2014.

Mr. Antonio Fornieles Melero ceased to be a member of the Commission on 1 March 2016 due to his appointment as the new Executive Chairman of the company's Board of Directors, replacing Mr. José Domínguez Abascal, leaving the Commission with three members at present.

**Explain the functions that are assigned to this Commission, describe the procedures and rules for organization and operation thereof and summarize its most important actions during the financial year.**

The Appointments and Remuneration Commission has four independent directors and its Chairwoman was appointed from among the independent directors. Therefore, the requirements established in Spanish Corporate Law are met. In addition, in accordance with the provisions of article 2 of the Internal Regulations, the position of Chairperson of the Commission must go to an independent director.

The functions and competencies of the Appointments and Remuneration Commission are as follows:

- 1. To assess the competencies, knowledge and experience required in order to carry out the role of member of the Board of Directors of Abengoa. Therefore, it defines the roles and capabilities required of the candidates to fill each vacancy and assesses the time and dedication required for them to properly perform their duties.
- 2. To establish a representation target for the least represented sex in the Board of Directors and to draft guidelines on how to achieve this target.
- 3. To present proposals before the Board of Directors to appoint independent directors by co-optation or for submission for approval before the General Shareholders' Meeting, as well as proposals for their re-election or discharge by the General Shareholders' Meeting.
- 4. To present proposals to appoint all other directors by co-optation or for submission for approval before the General Shareholders' Meeting, as well as proposals for their re-election or discharge by the General Shareholders' Meeting.
- 5. To verify on an annual basis that the conditions are met for the appointment of a director and for the nature and typology assigned to him/her. This information is to be included in the annual report.
- 6. To report on the appointment and discharge proposals of top executives and the basic terms and conditions of their contracts.
- 7. To examine and organize the succession of the Chairman of the Board of Directors and the Chief Executive of the company and, where necessary, make recommendation proposals to the Board of Directors to ensure the planned and orderly fashion of said succession.

- 8. To propose to the Board of Directors a remuneration policy for directors, general directors or those with executive responsibilities reporting directly to the Board, and for Executive Commissions or Chief Executives, as well as the individual remuneration and other contractual terms and conditions of executive directors, ensuring it is adhered to.
- 9. To organize and oversee the annual performance appraisal of the Board of Directors and its commissions and propose, based on the result of the appraisal, a plan of action to correct the identified shortcomings.
- 10. To prepare an annual report on the activities of the Appointments and Remuneration Commission, to be included in the management report.

The Appointments and Remuneration Commission shall meet when necessary to carry out the above functions and, at least, once every quarter. It shall also meet whenever convened by the Chairman. Lastly, the meeting shall be valid when all members are present and agree to hold the session.

During the 2015 financial year, the Commission held twelve meetings. Among the important issues dealt with were the proposals for the appointment and renewal of members of the Board of Directors, as well as ensuring that the conditions required for the appointment of Directors and the nature and typology assigned to them were met.

The Commission shall be considered validly constituted when the majority of its members are present. Proxies may only be granted to non-executive directors.

The agreements adopted shall be valid when the majority of the members of the Commission, present or represented, vote in favor thereof. In the event of a tie, the Chairman of the Commission shall cast the deciding vote.

The director of remuneration in the company shall attend the meetings held by the Commission in the capacity of secretary.

During the 2015 financial year, the main interventions of the Appointments and Remuneration Commission were as follows:

- Proposal to the Board of Directors for the appointment by co-optation of Mr. Antonio Fornieles Melero, with the status of independent Director, to fill the vacancy resulting from the resignation of the until then director of the company Aplidig, S.L.
- Report to the Board of Directors on the appointment of Mr. Antonio Fornieles Melero as Second Vice-Chairman, Coordinating Director and member of both the Audit and Appointments and Remuneration Commissions of the company's Board of Directors.
- Report to the Board of Directors on the new regulation of remuneration systems for administrators of listed companies.
- Report to the Board of Directors on the appointment of Mr. Manuel Sánchez Ortega, Chief Executive of the company, as First Vice-Chairman of the company's Board of Directors.
- Report to the Board of Directors on the appointment of Mr. Ignacio García Alvear as new Director of Investor Relations of the company, replacing Ms. Bárbara Sofía Zubiria Furest.
- Proposal to the Board of Directors, for approval, on the individual remuneration and other contractual terms and conditions of executive directors.
- Proposal to the Board of Directors, for approval, regarding the annual report on director remuneration (IAR), including the remuneration policy for directors and top executives of the company.
- Submit to the Board of Directors, for approval, the results of the annual performance appraisal of the Board of Directors and its commissions.
- Proposal to the Board of Directors for the appointment of Mr. Antonio Fornieles Melero as Chairman of the Audit Commission.
- Proposal to the Board of Directors for the appointment of Ms. Mercedes Gracia Díez as Chairwoman of the Appointments and Remuneration Commission, replacing Mr. José Borrell Fontelles.
- Report to the Board of Directors on the appointment of Mr. Santiago Seage Medela as new Chief Executive of the company, replacing Mr. Manuel Sánchez Ortega.
- Report to the Board of Directors on the settlement of paid items to Mr. Manuel Sánchez Ortega, as a result of the end of his tenure as Chief Executive of the company.
- Proposal to the Board of Directors for the appointment of Mr. Santiago Seage Medela as First Vice-Chairman of the Board of Directors and the incorporation of Ms. María Teresa Benjumea Llorente onto the Board of Directors, both replacing Mr. Manuel Sánchez Ortega.

- Report to the Board of Directors on the settlement of paid items to Mr. Felipe Benjumea Llorente, as a result of the end of his tenure as Executive Chairman of the company.
- Favorable report to the Board of Directors regarding the proposal to appoint Mr. José Domínguez Abascal as proprietary director and non-executive Chairman of the Board of Directors.
- Favorable report to the Board of Directors regarding the following changes to the structure of the company's management: appoint Mr. José Domínguez Abascal as executive Chairman of the Board of Directors, appoint by co-optation Mr. Joaquín Fernández de Piérola Marín as director to fill the vacancy created by the resignation of Mr. Santiago Seage Medela, and appoint Mr. Joaquín Fernández de Piérola Marín as General Director of the company.
- Favorable report to the Board of Directors regarding the new executive director business contracts for Mr. José Domínguez Abascal and Mr. Joaquín Fernández de Piérola Marín.

See section H "Other Information of Interest".

**Strategy and technology commission**

| Name | Post | Category |
|---|---|---|
| Mr. José Borrell Fontelles | Chairman | Independent |
| Mr. José Luis Aya Abaurre (passed away on 12 February 2016) | Member | External proprietary |
| Mr. José Joaquín Abaurre Llorente | Member | External proprietary |
| Mr. Ricardo Martínez Rico | Member | Independent |

| | |
|---|---|
| % of executive Directors | 0 |
| % of proprietary Directors | 50 |
| % of independent Directors | 50 |
| % of external Directors | 0 |

On 7 March 2016, the Board of Directors of Abengoa appointed the company Inayaba S.L., represented by Ms. Ana María Abaurrea Aya, as member of this Commission, replacing Mr. José Luis Aya Abaurre.

**Explain the functions that are assigned to this Commission, describe the procedures and rules for organization and operation thereof and summarize its most important actions during the financial year.**

The Strategy and Technology Commission shall comprise at least three Directors appointed by the Board of Directors. More than half of the members shall be non-executive. The head of the General Technical Secretariat in the company shall attend the meetings held by the Commission in the capacity of coordinator.

The functions and competencies of the Strategy and Technology Commission are as follows:

- (i) To jointly analyze any basic matters relating to technology and strategy that can affect Abengoa, including the preparation or assignment of studies on products or services that constitute or may constitute Abengoa's portfolio.
- (ii) To perform prospective analysis on the possible evolution of Abengoa's businesses based on either personal or third party technological developments.
- (iii) To supervise the R+D policy and investments and Abengoa's strategic lines of technology development.
- (iv) To analyze and supervise the main activities related to Abengoa's technology, such as patent portfolios, their management, innovation introduction, etc.
- (v) To gather information on the organization and personnel of the Company through the Executive Chairman of Abengoa.
- (vi) To inform the Board of Directors, or its Executive Chairman, on as many matters as required in relation to Abengoa's strategic and technology development.
- (vii) All other matters relating to aspects of its authority that may be requested by the Board of Directors or its Executive Chairman.

During the 2015 financial year, the main interventions of the Strategy and Technology Commission were as follows:

- Statement regarding the main challenges Abengoa's businesses face for 2015.
- Statement regarding Abengoa's main technological challenges for 2015.
- Strategic Management in Abengoa.

See section H "Other Information of Interest"

**Investment commission**

| Name | Post | Category |
|---|---|---|
| Mr. Antonio Fornieles Melero | Chairman | Independent |
| Mr. José Domínguez Abascal | Member | Executive |
| Ms. Mercedes Gracia Díez | Member | Independent |

| | |
|---|---|
| % of executive Directors | 33.33 |
| % of proprietary Directors | 0 |
| % of independent Directors | 66.66 |
| % of external Directors | 0 |

On 7 March 2016, the Board of Directors of Abengoa appointed Ms. Alicia Velarde Valiente as Chairwoman of this Commission, replacing Mr. Antonio Fornieles Melero. Furthermore, in the same session of the Board of Directors, Mr. Joaquín Fernández de Piérola Marín was appointed member of this Commission, replacing Mr. José Domínguez Abascal.

**Explain the functions that are assigned to this Commission, describe the procedures and rules for organization and operation thereof and summarize its most important actions during the financial year.**

The Investment Commission shall comprise a minimum of three directors appointed by the Board of Directors, at the proposal of the Executive Chairman of the Board and following a report from the Appointments and Remunerations Commission. The majority of the appointed directors should be external independent Directors.

The Investment Commission is responsible for:

- (i) Controlling and Monitoring commitments for capex. Capex is defined as the investment in capital or equivalent instruments in projects which require cash outflow of the Company. To this end, the Investment Commission must propose, prior to approval by the Board of Directors, any investment commitment for capex in new projects. The Commission shall have sole authorization to propose new capex investments in new projects to the Board of Directors. The Board of Directors shall abstain from approving any capex investment projects that have not been proposed by the Commission.
- (ii) Follow-up of the budget and external capex objectives that the Company has established at each moment.
- (iii) Reporting on the commitments to increase and reduce financial debt and follow-up the Company's financial deleveraging policy.
- (iv) Reporting on the dividend distribution policy and the amendments thereof.

During the 2015 financial year, the main interventions of the Investment Commission were as follows:

- Analysis and approval of different investments, which include projects in South Africa, Chile, Mexico and the USA.

See section H "Other Information of Interest"

**C.2.2** Complete the following table using the information relating to the number of female Directors who have served on the Board of Directors' Commissions over the past four financial years:

| | Number of Female Directors | | | |
|---|---|---|---|---|
| | Financial Year t Number % | Financial Year t-1 Number % | Financial Year t-2 Number % | Financial Year t-3 Number % |
| Executive Commission | N/A | N/A | N/A | N/A |
| Audit Commission | 2 (50) | 2 (66.66) | 2(40) | 2 (40) |

**C.2.3** Section repealed.

**C.2.4** Section repealed.

**C.2.5** Indicate, where applicable, the existence of regulations of Commissions of the Board, where they can be reached for consultations and any amendments that may have been made during the financial year. Also state whether annual reports were voluntarily prepared on the activities of each commission.

Both the Audit Commission and Appointments and Remunerations Commission have their own internal operating regulations available on the Company's website.

The last amendment to both texts during the financial year took place on 18 May 2015 for the purpose of including the same amendments that were already approved for the Bylaws in accordance with recent amendments to the Spanish Corporate Law and, in particular, to add the latest improvements in terms of corporate governance introduced by Law 31/2014 dated 3 December, whereby the Spanish Corporate Law is amended to improve corporate governance.

See section H "Other Information of Interest"

These Commissions prepare their own annual report on activities, having published the Audit Commission's activity report in the 2015 financial year as part of the annual report corresponding to the 2014 financial year

**C.2.6** Section repealed.

# D Connected transactions and intra-group transactions

## D.1 Explain, where applicable, the approval procedure for connected and intra-group transactions.

Reporting procedure for the approval of connected transactions.

Before the Board of Directors takes the relevant decisions, the Audit Commission must have informed said Board of the transactions with connected parties.

Upon prior receipt of the Audit Commission report, the Board of Directors is required to approve the transactions carried out between the Company or companies in its group with Directors, or with shareholders, individually or in partnership with others, involving a share legally considered as majority, including shareholders represented in the Company's Board of Directors or the Board of Directors of other companies belonging to the same group or with connected individuals.

The affected Directors or those representing or connected to affected shareholders should abstain from the deliberation and voting process of the agreement in question. Only transactions that simultaneously meet the following three characteristics shall be exempt from this approval:

- (i) They are governed by standardized agreements that are applied on across-the-board bases to a high number of clients;
- (ii) They go through at market rates, generally set by the person supplying the goods or services; and
- (iii) their amount does not exceed one percent of the Company's annual revenues.

Only in duly justified circumstances of urgency may decisions corresponding the previous matters be adopted by the delegated bodies or individuals. In this case, they should be ratified in the first Board meeting that is held following the adoption of the decision.

## D.2 Give details of transactions deemed significant due to their amount or relevant due to their type that are made between the company or companies in its group and the significant shareholders in the company:

| Personal or Corporate name of significant shareholder | Personal or Corporate name of the company or entity of its group. | Nature of the relationship | Type of transaction | Amount (thousands of euros) |
|---|---|---|---|---|
| Inversión Corporativa IC, S.A. | Abengoa S.A. | Significant shareholder | Securities loan | 95.259.077 class B shares (thousand of euros) |

## D.3 Specify the transactions that are significant by amount or those which are relevant due to their type that are made between the company or companies in its Group and the company's Directors or Executives:

| Personal or Corporate name of Directors or Executives | Personal or Corporate name of connected party | Connection | Nature of transaction | Amount (thousands of euros) |
|---|---|---|---|---|
| Felipe Benjumea Llorente | Blanca de Porres Guardiola | Spouse of Felipe Benjumea Llorente | Technical consultancy contract for the optimization of CPA catering services between the company of the Simosa Group and Blanca de Porres Guardiola. | 95 |
| Ricardo Martínez Rico | Equipo Económico, S.L. | Chairman of Equipo Económico S.L. | Integral and strategic consultancy service agreement signed between Equipo Económico, S.L., Abengoa S.A., Abengoa Concessions, S.L. and Abeinsa Ingeniería y Construcción Industrial, S.A. | 319 |

| Personal or Corporate name of Directors or Executives | Personal or Corporate name of connected party | Connection | Nature of transaction | Amount (thousands of euros) |
|---|---|---|---|---|
| Felipe Benjumea Llorente | Felipe Benjumea Llorente | Former Executive Chairman and brother of an Executive Director | Consultancy agreement signed on 23 September 2015 between Felipe Benjumea Llorente and Abengoa, S.A. valid until 31 December 2016 | 1,086 During the 2015 financial year, there were no amounts invoiced pursuant to this agreement. |

See section H "Other Information of Interest"

## D.4 Report on the significant transactions between the company and other entities belonging to the same group provided they are not eliminated during the preparation of the consolidated financial statements and are not part of the normal company transactions with regards to its purpose and conditions.

At any rate, a report shall be issued on any intra-group transaction with entities in countries or territories classified as tax havens:

Not applicable

| Corporate name of entity of group | Short description of transaction | Amount (thousands of euros) |
|---|---|---|

## D.5 Indicate the amount of the transactions carried out with other connected parties

Not applicable

## D.6 Provide details of any mechanisms in place to detect, determine and resolve possible conflicts of interest between the company and/or its group and its Directors, executives or significant shareholders

In accordance with the provisions of the Board of Directors' Regulations, Directors are obliged to inform the Board of any situation of potential conflict in advance, and to abstain until the conflict is resolved.

## D.7 Is more than one company of the Group listed in Spain?

No. However, Abengoa Yield, plc., a company pertaining to the Group, is listed in the US, in Nasdaq.

**Identify the subsidiary companies that are listed in Spain:**

| Listed subsidiary companies |
|---|

**Indicate whether the respective business lines and possible business relations among such companies have been publicly and precisely defined, as well as those of the listed subsidiary with the other companies in the group;**

Yes

**Define any business relations between the parent company and the listed subsidiary company, and between the latter and the other companies in the group.**

Abengoa Yield, Plc. is a company belonging to the Abengoa, S.A. Group in which the latter holds 41.86 %.

Abengoa Yield, Plc has entered into the following agreements:

- A ROFO agreement entered into between Abengoa, S.A. and Abengoa Yield regarding any proposed sale, transfer or other disposition of any of Abengoa's contracted renewable energy, conventional power, electric transmission or water assets in operation located mainly in the United States, Canada, Mexico, Chile, Peru, Uruguay, Brazil, Colombia and the European Union.
- Executive services agreement (resolved on 15 January 2016) between Abengoa Concessions SL and Abengoa Yield.

- Financial support services agreement between Abengoa Yield and Abengoa Concessions SL.
- Trademark license agreement between Abengoa, S.A. and Abengoa Yield.
- Call agreement for Abengoa Yield of up to 100 million euros in assets at 12 % profitability in 2015 between Abengoa, S.A. and Abengoa Yield.
- Non-binding MOU between Abengoa and Abengoa Yield on corporate governance.

**State the mechanisms envisaged to resolve any conflicts of interests between the listed subsidiary and the other companies in the group:**

**Mechanisms to resolve possible conflicts of interests**

Protocol for authorizing and supervising connected Transactions between Abengoa, S.A. and Abengoa Yield plc. approved by the Board of Directors of Abengoa, S.A. based on the proposal by its Audit Commission on 26 May 2014.

See section H "Other Information of Interest"

# E Risk management and monitoring systems

## E.1 Explain the scope of the Company's Risk Management System, including those of a fiscal nature.

Abengoa's risk management system is a global and dynamic system. The scope of action of this system covers the entire organization and its whereabouts on a more permanent basis, and compliance with it is compulsory for all the company's employees, managers and Directors. It works comprehensively and continuously, consolidating this management according to the area, business unit or activity, subsidiaries, geographical areas and support areas at corporate level.

Abengoa's risk management system is designed to mitigate all the risks to which the company may be exposed as a result of its activities. The structure of Abengoa's Risk Management is based on three pillars:

- The Common Management Systems specifically designed to mitigate business risks.
- Internal control procedures aimed at mitigating risks derived from the elaboration of the financial report and at improving the reliability of such report, designed in accordance with the SOX Act (Sarbanes-Oxley Act)
- The universal risk model which is the methodology that Abengoa uses to identify, compress and assess the risks that affect the company. The purpose is to obtain an integral vision of them, designing an efficient system of response that is in line with the business objectives.

These two elements form an integrated system that allows for appropriate management of the risks and their mitigating controls at all the levels of the organization.

In addition, the internal auditing unit is in charge of ensuring compliance with and the good functioning of these systems.

## E.2 Indicate the Company's bodies which are in charge of devising and executing the Risk Management System, including that of a fiscal nature.

The duty of elaborating and executing the risks management system is basically exercised by the Audit Commission specifically through the internal auditor and the risks manager.

The risks manager is in charge of analyzing projects and businesses in the efforts and in aspects regarding the identification and quantification of risks of any nature.

On the other hand, the internal audits department is in charge of supervising and ensuring the correct functioning of the risks management system.

## E.3 Specify the main risks, including those of a fiscal nature, which could affect the attainment of business objectives.

In the process of identifying, understanding and assessing the risks affecting the company, the following risks factors, some of which are outlined in Form 20-F, filed with the SEC on 23 February 2015, have been taken into account:

**General Risks**

- Abengoa operates in a sector of activity particularly linked with the economic cycle.
- Risks derived from depending on regulations in support of activities relating to renewable energy, bioethanol production and also research- and development-related activities.
- Solar power generation.
- Biofuel consumption.
- Risks derived from the sensitivity entailed in the supply of raw materials for biofuel production and the volatility of the price of the final product.
- Risks derived from delays and cost overruns in activities of an Engineering and construction nature due to the technical difficulties of the projects and the lengthy duration of their execution.
- Risks linked to the activities of concession-type infrastructural projects operating under regulated tariffs or extremely long-term license agreements.
- Incomes derived from long-term agreements: risks derived from the existence of clauses and/or renewal of license agreements processed by Abengoa, termination of pending engineering and construction projects and non-renewals of biofuel distribution agreements.
- The variations in the cost of energy may bear negative impact on the company results.
- Risks derived from the development, construction and exploitation of new projects.

- Abengoa's activities may be negatively affected in the event that public support for such activities diminishes.
- Construction projects regarding the engineering and construction activities and the facilities of concession-type infrastructural and industrial production activities are dangerous places of work.
- Risks derived from joining hands with third parties for the execution of certain projects

**Risks that are specific to Abengoa**

- Risk relating to the possibility that Abengoa could request insolvency proceedings in the event that the company does not reach a refinancing agreement with its main financial creditors before 28 october 2016.
- Risks related to Abengoa's short and medium-term liquidity needs.
- Risks related to selling the shareholding or the loss of control of Abengoa Yield.
- Abengoa operates with enormous levels of indebtedness.
- Risks arising from the need to generate positive cash flows.
- Risks derived from the demand for capital intensive investments in fixed assets (CAPEX), which increase the need for external finance for the execution of pending projects.
- Risk entailed in obtaining reduced net profit derived from assets rotation
- Risks arising from Abengoa's credit rating downgrade.
- Risks arising from Abengoa's dividend policy.
- The company has a controlling shareholder.
- The renewable energy sector products and services are part of a market subject to intensive conditions of competition.
- The results of the engineering and construction activity depend significantly on the growth of the company in the concession-type infrastructural and industrial production activities.
- Fluctuations in interest rates and their hedging may affect the results of the company.
- Fluctuations in the currency exchange rates and their hedging may affect the results of the company.
- Risk of litigation and other legal processes.

**Risks derived from internationalization and from country risks**

- Abengoa's activities fall under multiple jurisdictions with various degrees of legal demands requiring the company to undertake significant efforts to ensure its compliance with them.
- Insurance coverage underwritten by Abengoa may be insufficient to cover the risks entailed in the projects, and the costs of the insurance premiums may rise.
- The activities of the company may be negatively affected by natural catastrophes, extreme climate conditions, unexpected geological conditions or other physical kinds of conditions, as well as by terrorist acts perpetrated in some of its locations.
- The practices of tax evasion and product alteration on the Brazilian fuel distributions market may distort the market prices.

## E.4 Indicate whether or not the company has a risk tolerance level, including for risks of a fiscal nature.

Abengoa has a risk tolerance level established at corporate level.

The universal risks model is a tool used for identifying and evaluating all risks affecting Abengoa. All the risks contemplated therein are evaluated considering probability and impact indicators.

Based on such parameters, the risks are classified as follows:

- Minor risks: risks that occur frequently but bear little economic impact. These risks are managed to reduce their frequency only if managing them is economically viable.
- Tolerable risks: risks that occur infrequently and bear little economic impact. These risks are monitored to ensure that they remain tolerable.
- Severe risks: frequent risks that bear extremely high impact. These risks are managed immediately although, due to the risk management processes implemented by Abengoa, it is unlikely that Abengoa needs to tackle these types of risks.
- Critical risks: risks that occur infrequently but bear extremely high economic impact. These risks have a contingency plan since, when they arise, their impact is extremely high.

## E.5 Identify the risks, including those of a fiscal nature, that have materialized during the financial year.

Abengoa endured certain risks during the 2015 financial year, the most significant of which are described below.

Energy and the environment are part of the activities in which Abengoa is engaged. This activity is performed in changing surroundings, with regulations, subsidies or tax incentives that can be changed or even legally challenged. Throughout recent financial years and especially that of 2015, various amendments to regulations took place in the jurisdictions where Abengoa operates (mainly in the United States and Brazil), mainly in relation to activity concerning renewable energy generation and biofuel production, which affected the profitability of Abengoa's current and future projects, the conditions to effectively compete with non-conventional renewables and other kinds of energy, and the ability to complete some ongoing projects.

However, investments in fixed assets (capex) which are higher than those anticipated in projects with a high return but which are extremely demanding in terms of capital in Brazil, Chile and Mexico have impacted on Abengoa's liquidity position and have led to a significant drop in the shares and debt instruments pertaining to Abengoa listed on the stock exchange during the 2015 financial year. All of this has limited access to capital markets and, at the same time, led to a deceleration in the rate of approval of working capital renewals (non-recourse factoring and confirming) by some financial entities, which has all led to a reduction in the liquidity position.

All of the aforementioned, along with Abengoa's high levels of debt, led the company to launch an action plan in September 2015, with measures aimed at reducing the leverage and improving the liquidity position, whereby a set of measures were approved in the Abengoa Extraordinary General Shareholders' Meeting on 10 October 2015, including a capital increase proposal with the aim of increasing the company's own funds by a cash amount of (face value plus premium) of 650,000,000 euros, in order to reinforce the company's liquidity situation and reduce its levels of debt.

The fact that it was not possible to carry out the planned capital increase due to no agreement being reached between the company and the placement financial entities and potential investors led the company to begin a negotiation process with its creditors with the aim of reaching an agreement to guarantee its financial sustainability, pursuant to Article 5 bis of the Spanish Insolvency Law. For these purposes, the company submitted the communication set out in Article 5 bis of the Spanish Insolvency Law to the Commercial Court of Seville on 25 November 2015.

On 28 March 2016 Abengoa submitted before the Commercial Court of Seville a request for approval of the Standstill Agreement which had been supported by the 75.04% of financial creditors that had been addressed.

## E.6 Explain the response and supervision plan for the main risks the Company faces, including those of a fiscal nature.

There is a specific action plan in place for each of the risks identified, which could encompass various departments of the company.

The following committees are in charge of the executive supervision of the company's main risks:

- Risks Management Committees by Business Units.
- Critical Projects Committees.
- Risks Management Committees with the Executive.
- Projects Committee.
- Special Situations Committees

# F Internal risk monitoring and management systems in relation to the process of financial reporting (system of internal control over financial reporting) (SCIIF)

**Describe the mechanisms entailed in the risks monitoring and management system in relation to the company's financial reporting (System of Internal Control over Financial Reporting) process.**

## F.1 The control environment of the company

Report on, pointing out the main characteristics of, at least:

**F.1.1.** The bodies and/or functions in charge of: (i) the existence and maintenance of an appropriate and effective SICFR; (ii) its introduction; and (iii) its supervision.

The System of Internal Control over Financial Reporting, (hereinafter, SICFR), is part of Abengoa's general system of internal control and is set up as a system prepared to provide reasonable assurance of the reliability of the published financial report. The body in charge of it, pursuant to the Regulations of Abengoa's Board of Directors, is the Board of Directors and, within it, the duty of supervision is conferred to the Audit Commission in accordance with its own regulations.

Thus, the Board of Directors is in charge of setting up and maintaining a compulsory Audit Commission as inferred from Article 27 of the Bylaws of the Board of Directors.

According to the foregoing Article, the functions entrusted by the Board of Directors to the Audit Commission, with regard to the SICFR, entail: "Monitoring the preparation process and the integrity of the financial report concerning the Company and, where applicable, the group of which Abengoa is parent company (hereinafter, the "Group"), verifying compliance with legal requirements and the correct application of accounting criteria, and appropriately specifying the scope of consolidation".

Additionally, and in accordance with the same Article, included among the functions of the Board and, by delegation, the Audit Commission, is that which entails "Periodically revising the internal control and risk management system so that the main risks, including those a fiscal nature, are identified, managed, and properly disclosed, as well as discussing significant shortcomings of the internal control system identified in the audit with the financial auditor".

**F.1.2.** Provide details of the following elements, if any, especially in relation to the process of elaborating the financial report:

Departments and/or mechanisms in charge of: (i) designing and revising the organizational structure; (ii) clearly defining the lines of responsibility and authority, with an appropriate distribution of duties and tasks; and (iii) ensuring the existence of sufficient procedures for its correct announcement throughout the entity.

As stipulated by the Board of Directors' Regulations, it is in charge of

- Defining the structure of the Group of companies;
- On the proposal of the company's Chief Executive, the appointment and possible dismissal of senior executives, as well as establishing the basic conditions of its contracts, including their remuneration and, where applicable, their compensation clauses.
- The core components of its mission should be to approve the Company's strategy and the organization required for its execution, and to ensure that management attains the objectives while pursuing the Company's interests and corporate purpose.
- Through the relevant departments, strive for the correct and integral announcement of the relevant information regarding the Company including but not limited to that related to the call for the General Shareholders' Meeting, its agenda and contents of the proposed agreements, relevant facts, agreements signed by the last General Shareholders' Meeting held, the internal regulations of corporate governance and the Annual Report. The means of communication will be the most adequate for ensuring that unrestricted announcements are made and in a timely manner, including the Company's webpage.

› Code of conduct, body of approval, degree of publication and instruction, principles and values including (indicating whether there is specific mention of the recording of transactions and the elaboration of the financial report), body in charge of analyzing breaches and of proposing the correct actions and sanctions.

At Abengoa there is a code of ethics and professional conduct approved by the Board of Directors and available on the Intranet in both Spanish and English, which outlines the ethical and responsible behavior that must be assumed in the execution of Company activities and in managing the businesses, by the management team and all the professionals of Abengoa and its subsidiaries. Abengoa runs a continuous on-the-job training program in which Code of Conduct courses are given. It is compulsory for all employees to attend these courses and to show proof by signing attendance sheets, meanwhile the Company ensures that all Abengoa employees have received and understood said information.

Abengoa's Code of Conduct:

- The highest standards of honesty and ethical behavior, including appropriate and ethical procedures for dealing with actual or possible conflicts of interests between professional and personal relationships.
- The most complete, just, precise, timely and intelligible communication in all periodic reports that Abengoa must submit to the organs of Administration or in all reports that may be made.
- Compliance with the applicable laws, standards, rules and regulations.
- The tackling of actual or possible conflicts of interests and providing guidance to ensure that employees, managers and Directors report such conflicts to Abengoa.
- The interruption of the poor use or poor application of Abengoa's properties and business opportunities.
- The maximum level of confidentiality and fair trade in and outside Abengoa.
- The immediate internal reporting of any breach of said Code of Conduct and the appropriate reporting of all illegal behaviors.

All information made public and all media releases deemed to be affecting Abengoa must first be approved by the Board of Directors or by the manager who may have been previously entrusted with performing such duty.

Its appropriate follow-up is a source of profitability and security in the execution of the activities of Abengoa. These regulations ensure the veracity and reliability of the financial report.

The Board of Directors is in charge of, and, by virtue thereof, its Chairman, established Commissions, delegated commissions or, in turn, Managers entrusted therewith, the classification of the breaches of the Common Management Systems.

Whistle blowing channel, which enables reporting of irregularities of financial and accounting nature to the Audit Commission, in addition to possible breaches of the code of conduct and irregular activities in the organization. The reports may be filed confidentially.

An important aspect of responsibility and transparency is to provide a mechanism by which any interested party may safely and confidentially report irregularities, unethical or illegal conducts that, in his/her opinion, occur in the execution of the Company's activities.

In this manner and following the guidelines provided in section 301 of the Sarbanes-Oxley Act, the Audit Commission decided to establish specific procedures for:

- The reception, safeguard and treatment of complaints or reports that the company may receive in relation to the accounting, internal monitoring of the accounting or auditing matters.
- Employees of the company to be able to confidentially or anonymously send information in good faith on the dubious or arguable policies of accounting and auditing.

In this sense, Abengoa has a double mechanism for receiving complaints or reports:

- An internal channel, which is available to all employees, so that they can notify any alleged irregularity in accounting or audits or breaches of the code of conduct. The communication channel is by e-mail or ordinary mail.
- An external channel, available to anyone outside the company, so that they can notify any alleged irregularities, fraudulent actions or breaches of Abengoa's Code of Conduct through the website (www.abengoa.com).

Abengoa and its various business groups have been operating a whistleblower channel since 2007. Pursuant to the requirements of the Sarbanes-Oxley Act, whereby interested parties may report possible irregularities on accounting, auditing or internal controls over financial

reporting, to the Audit Commission. A register is kept of all communications received in relation to the whistleblower, subject to the necessary guarantees of confidentiality, integrity and availability of the information.

Training programs and regular updates for the personnel involved in the preparation and revision of the financial report, as well as in the evaluation of the System of Internal Control over Financial Reporting, which should at least cover accounting regulations, auditing, internal risks monitoring and management.

The Human Resources Management works together with the Economic-Financial Management to impart regular training, both internally and externally, to the personnel involved in the preparation of the Financial Statements of the Group.

The training programs are fundamentally focused on the correct knowledge and update on the International Financial Reporting Standards (IFRS) and on the laws and other rules and regulations on the Internal Control over Financial Reporting (Common Management Systems).

Both the Internal Audits Management and the Global Risks Management keep themselves informed and up-to-date on the latest on Risks management and Internal Control, especially on Financial Reporting.

During the 2015 financial year, the Departments related to the preparation, revision and reporting of financial information received various publications of updates to the accounting and financial standards, internal control and tax, including courses by internal experts in relation to the update of accounting standards.

## **F.2** Financial reporting risk assessment

**At least reporting the following:**

**F.2.1.** Describe the main characteristics of the risks identification process, including those of error or fraud, with regards to:

If the process exists and is documented.

Abengoa has introduced a process for identifying and evaluating risks: the Universal Risks Model (URM) which is updated on a regular basis. This model numbers the risks identified by the organization, classified into categories and sub-categories, assigns indicators to each to enable them to measure their probability and impact and to define the degree to which they may be tolerated.

And finally, the types of risks related to the accounting and submission of the financial report, the management of debt and equity financing, planning and budgeting and the tax strategy of transactions:

Indicate whether the process covers all of the objectives of financial reporting, (existence and occurrence; integrity; evaluation; presentation, breakdown and comparability; and rights and obligations), and whether it is updated and at what frequency.

The URM is designed to cover all risks that are identified. Among them there is a group that refer to the preparation and submission of the financial report, accounting records, the management of debt and equity financing, planning and budgeting and the tax strategy of transactions:

Identified risks are covered and mitigated by Abengoa's internal monitoring system. All risks previously linked with the process by which the financial information is prepared are under control in such a way that it may be guaranteed that the financial information appropriately adheres to the requirements of existence, occurrence, integrity, evaluation, presentation, breakdown and comparability.

Indicate whether there is a process for identifying the consolidation perimeter, considering, amongst other things, the possible existence of complex corporate structures, instrumental or special purpose entities.

The consolidation perimeter of Abengoa is subject to revisions during each quarterly closing. The Consolidation department is in charge of analyzing companies that enter and those that exit said perimeter. Both the creation and acquisition of companies, as well as their sale or dissolution, are subject to internal authorization processes that permit the clear identification of all entries and exits to and from the consolidation perimeter.

Indicate whether or not the process considers the effects of other types of risks (operational, technological, financial, legal, fiscal, reputation, environmental, etc.) in the manner in which they affect the financial statements.

**As** already mentioned, the URM is the methodology to identify, understand and assess the risks that may affect Abengoa. The purpose is to obtain an integral vision of them, designing an efficient system of response that is in line with the Company's business objectives.

It s made up of 56 risks belonging to 20 categories. These are grouped into 4 large areas (financial risks, strategic risks, regulatory risks and operational risks).

All the risks of the model are evaluated based on two criteria:

- Occurrence Probability: Degree of frequency at which to be sure that a specific cause will expose Abengoa to an event with negative impact.
- Impact on Entity: Set of negative effects on the strategic goals and objectives of Abengoa.

### Which corporate governance body supervises the process?

The financial information preparation process is the ultimate responsibility of the Board of Directors. In accordance with the Board of Directors' Regulations, the integrity and exactitude of the financial reports presented to the Board of Directors for approval must first be certified by the Chairman of the company's Board of Directors and by the Director of the Department of Corporate Consolidation and Audits.

Likewise, as set forth in section F.5 of this document, the Board of Directors entrusts the Audit Commission with the duties of supervising the system of internal control and monitoring which ensures that the preparation of the financial information strictly follows the required standards.

## **F.3** Control Activities

**Give a report on, pointing out the main characteristics, whether or not the following is at least included:**

### **F.3.1.** Procedures for reviewing and authorizing the financial reporting and the description of the System of Internal Control over Financial Reporting to be published in the stock markets, indicating those in charge, as well as the documents describing the cash flows of activities and controls (even in connection with fraud risks) of the various types of transactions that could substantially affect the financial statements, including the accounting closure proceedings and the specific revision of the judgments, estimates, assessments and relevant projections.

In accordance with the Board of Directors' Regulations, the integrity and exactitude of the Annual Accounts presented to the Board of Directors for approval must first be certified by the Chairman of the company's Board of Directors and by the Director of the Department of Corporate Consolidation and Audits.

Once the Board of Directors receives the corresponding reports and after the necessary clarifications, it shall clearly and precisely, in terms that aid comprehension of its content, prepare the annual accounts, the management report and the resolution on the application of the company's profit/loss outcome, as well as the consolidated annual accounts and management report, and the financial reports which the company must regularly publish, due to being a listed company, ensuring that these documents depict the true state of the asset, the financial situation and the profit and loss outcome of the company, in accordance with the stipulations of the applicable Law.

Before signing the annual accounts required by Law, the Directors shall keep a record of all the reservations they deem relevant. Otherwise, it will be understood that they had all the necessary information available to approve this preparation of the annual accounts.

Directors must sign statements of responsibility on the content of the annual financial report and, in turn, on any intermediate financial reports which the company must regularly publish due to being listed.

Thus, the Board of Directors will decide on and take as many actions and measures deemed necessary to ensure the Company's transparency on financial markets, promoting correct information on the prices of the Company's shares, supervising financial-related information regularly made public and performing as many duties as may be required due to the company's status as a listed company.

The process or structure effectively followed in certifying the financial report, done on a quarterly basis, reflects the manner in which the financial report is generated at Abengoa.

In this structure, the information to be reported is prepared by company heads, then revised by heads of the respective Business Units and by the respective Corporate area heads who certify both the reliability of the financial report on the area under their charge - which is what they submit for consolidation at group level- as well as the effectiveness of the internal control system set up to reasonably ensure this reliability. Finally, the Company's Chief Executive and the Directors of Internal Audits and Corporate Consolidation certify the reliability of the consolidated accounts to the Board of Directors in the quarterly Audit Commission. With the support of the management team in Internal Audits, this Commission

supervises the entire certification process, and then submits its conclusions from said analysis to the Board of Directors in the sessions when the accounts will be officially prepared. The information will then be published in the National Securities Market Commission (CNMV) once submitted to the Commission.

The legal consultants department of Abengoa SA meet regularly in committee with the different legal consultants of the various subsidiaries of Abengoa to be informed of the legal situations of ongoing litigations and later report to the Chairman's office where subsequent discussions are held during the Board of Directors meetings on the situations posing the most significant conflicts.

**F.3.2.** Policies and procedures of internal control of information systems (especially on safety and security of access, monitoring of changes, operating them, operational continuity and separation of functions) that back the entity's relevant processes with regards to the drafting and publication of the financial report.

Among the controls studied for mitigating or managing the risks of error in financial reporting are those related to the most relevant computer applications, like controls relating to user access permissions or to the integrity of information transfer between applications.

In addition, Abengoa follows guidelines or standards and procedures of internal control over information systems in relation to acquiring and developing software, acquiring systems infrastructure, installing and testing software, managing changes, managing service levels, managing services performed by third parties, systems security and access to them, managing incidents, managing operations, the continuity of operations and the segregation of functions. Said guidelines and procedures -which in some cases are different based on geographical scope and which are in the process of gradual homogenization- are applied to all information systems including those that house the relevant processes of the generation of financial report, and to the infrastructure necessary for its functioning.

In geographical areas where Abengoa operates, the entire internal network of computer infrastructure is controlled by a Department of internal professionals who are responsible for defining and executing the group's IT and telecommunications strategy, as well as user support, systems operation and IT security. Abengoa has an Internet Technology (IT) security system in place that envisages the recovery of relevant information in the event of a system crash. This security system is managed through the aforementioned internal IT Department.

**F.3.3.** Policies and procedures of internal control aimed at supervising the management of activities sourced out to third parties, including the aspects of evaluation, calculation or assessment entrusted to independent experts, which could materially affect the financial statements.

In general terms, Abengoa does not retain third party subcontractors to perform significant tasks that directly affect financial reporting. Third-party assigned assessments, evaluations or calculations that could materially affect the financial statements are considered activities deemed relevant for generating a financial report that may lead, as the case may be, to the identification of risks of priority errors, thus requiring the design of associated internal controls.

Abengoa has a method of approval through an authorization that grants Executive support which, among other things, must be acquired by the Department that needs to outsource a service. Such contracts are subject to reviews before being signed, including their analysis and internal approval of the fundamental hypothesis to be used.

## F.4 Information and communication

**Give a report on, pointing out the main characteristics, whether or not the following is at least included:**

**F.4.1.** A specific function entrusted with defining, continuously updating accounting policies (area or department of accounting policies) and resolving doubts and conflicts derived from their interpretation, maintaining constant communication with those in charge of the transactions in the organization, continuously updating the accounting policies manual and reporting to the units through which the entity operates.

Abengoa operates with an Accounting Policies Manual. This manual establishes the accounting policies criteria that must be observed when the company is preparing the financial report using the financial reporting framework established by the International Financial Reporting Standards adopted by the European Union.

The manual is available to all employees of Abengoa.

The manual is also subject to regular updates for the purpose of including all new applicable rules and regulations. The department of Consolidations and Accounting Policies is responsible for updating the manual which was last updated during the 2015 financial year.

**F.4.2.** Mechanisms of collecting the information and preparing the financial report with standard formats to be applied to and used by all units of the Company or Group, which support the main financial statements and notes, as well as the information given on the SICFR.

All the entities that make up Abengoa's consolidated group use the same financial information reporting tools and applications, regardless of the information system being used for the maintenance of the accounting records. Said tools, which are regularly supervised by the Consolidation Department, ensure that the financial information reported by companies is complete, reliable and consistent. Thus, the information reported during the closing of financial years includes all breakdowns deemed necessary for the preparation of consolidated financial statements and their explanatory notes.

## **F.5** Supervision of system operation

**Give a report pointing out the main characteristics of at least:**

**F.5.1.** The activities of supervising the System of Internal Control over Financial Reporting performed by the Audit Commission, and on whether the entity has an internal audit system that is able to support the commission in supervising the internal control system, including the SICFR. Also provide information on the scope of the assessment of the SICFR during the financial year and on the process by which the head of the assessment reports the results, whether the entity has an action plan that outlines the possible corrective measures, and whether its impact on the financial reporting has been considered.

The Board of Directors is in charge of ensuring the appropriate registration of the operations in the accounting records, of maintaining a structure of internal control and accounting for the purpose of preventing and detecting errors and irregularities. In accordance with the Board of Directors' Regulations, the Audit Commission is entrusted with the following duties, amongst others:

- To report on the Annual Accounts, as well as on the quarterly and half-yearly financial statements that must be issued to the regulatory or supervisory bodies of the securities markets, with express mention of the internal control systems, verification of compliance and monitoring through internal audit and, where applicable, on the accounting criteria applied.
- Monitoring the preparation process and the integrity of the financial report with regards to the company and, where applicable, the group, verifying compliance with legal requirements and the correct application of accounting criteria, and appropriately specifying the scope of consolidation.
- To periodically revise the internal control and risk management systems so that the main risks are identified, managed, and properly disclosed, as well as to discuss significant shortcomings of the internal control system identified in the audit with the financial auditor.
- To supervise and ensure the independence and effectiveness of the duties of internal audits, with full access thereto; to propose the selection, appointment, re-selection and dismissal of heads of internal audits; to propose the budget for said unit, and set the salary scale of its Director; to obtain regular information on the activities and the budget of the unit; and to ensure that the senior management considers the conclusions and recommendations in its reports.

The Audit Commission's functions also entail supervising the internal audit service and obtaining information on the financial reporting process, the internal control systems and the risks for the Company.

On the other hand, with regards to supervising the internal controls system, the aims of the internal audit duties are as follows:

- To prevent the group companies, projects and activities from exposure to audits risks such as fraud, capital losses, operational inefficiencies and, in general, any risks that may affect the smooth operation of the business.
- To ensure the continuous application of the standards, appropriate procedures and efficient management in accordance with the Common Management Systems.

Abengoa's internal audit department originated as an independent global function, reporting to the Board of Directors' Audit Commission, with the main aim of supervising Abengoa's internal monitoring and significant risk management systems.

Abengoa's internal audit service is structured around seven functional areas:

- Internal control
- Financial Auditing
- Project Auditing
- Monitoring Auditing of specific risks

- Fraud Prevention Auditing
- Non-Financial Auditing
- Systems Auditing

The general goals of internal auditing are as follows:

- To prevent the group companies, projects and activities from exposure to audits risks such as fraud, capital losses, operational inefficiencies and, in general, any risks that may affect the smooth operation of the business.
- To ensure the continuous application of the standards, appropriate procedures and efficient management in accordance with the Common Management Systems.
- To create value for Abengoa and its business units, promoting the construction and maintenance of synergies and the monitoring of optimal management practices.
- To coordinate working criteria and approaches with external auditors to achieve optimum efficiency and profitability of both functions.
- Analysis and processing of the complaints received through whistleblowing and reporting the conclusions of the work performed to the Audit Commission.
- To evaluate the Companies' audit risk in accordance with an objective procedure.
- To develop Work Plans using appropriate scopes for each situation.

Abengoa's internal auditor services are in line with the international standards for the professional practice of internal auditing of the Institute of Internal Audit (IIA).

Likewise, Abengoa has been a member of ACFE Corporate Alliance as of financial year 2014. This association helps companies with tools and specific training focused on the fight against fraud and corruption, as well as resources to obtain the CFE (Certified Fraud Examiner) certification for internal auditors assigned to this area.

**F.5.2.** Indicate whether or not there is a discussion procedure by which, (in accordance with the stipulations of the NTA), the accounts auditor, the internal audits' office and all the other experts, may inform the Company's senior management, its Audit Commission and its directors, on the significant weaknesses identified in the internal control during the revision of the financial statements or of all other documents to which they were assigned. Also report on whether or not there is an action plan for correcting or mitigating the weaknesses uncovered.

The internal audit office regularly informs senior management and the Audit Commission about the weaknesses identified regarding internal control in revisions performed on the processes during the financial year, and on the implementation of the action plans put in place to ensure the mitigation of said weaknesses.

On the other hand, the accounts auditor of the group retains direct access to the group's senior management, holding regular meetings both to obtain the information necessary for the execution of its duties as well as to report on the weaknesses detected in (internal) control during the auditing. External auditors will submit an annual report to the economic-financial director and the Audit Commission detailing the weaknesses they detected regarding internal control while carrying out their work.

## F.6 Other relevant information

During the 2015 financial year, the external auditors issued the following reports which are an integral part of the Annual Report:

- Audit report on the consolidated accounts of the Group, as required by regulations.
- Audit report on internal audit compliance under PCAOB (Public Company Accounting Oversight Board) standards, as required under section 404 of the Sarbanes-Oxley Act (SOX)

## F.7 Report from the External Auditor

**Issue report on:**

**F.7.1.** whether the external auditor revised the SICFR information issued to the markets and, if so, the entity must include the corresponding report as annex but, if not, it must provide the reasons.

Abengoa applies all the rules and regulations dictated by the (CNMV) Stock Market Authorities. This fact implies that for the past six financial years Abengoa has been strictly complying with the reference indicators included in the document of the CNMV's "Systems of Internal Control over Financial Reporting.

Voluntarily since 2007 and mandatorily as of 2014, Abengoa has submitted its internal control systems to an independent external evaluation which issues an audit opinion under the PCAOB (Public Company Accounting Oversight Board) standards, and also to audits to ascertain compliance with section 404 of the Sarbanes-Oxley Act (SOX). This standard is a compulsory law for all companies listed in the United States and is aimed at ensuring the reliability of the financial reporting of these companies and at protecting the interests of their shareholders and investors, by setting up an appropriate internal control system.

The auditor of the individual and consolidated annual financial statements of Abengoa, for the financial year ending Thursday, December 31, 2015, is Deloitte S.L. which is also the Group's main auditor.

# G Degree of compliance with corporate governance recommendations

**Indicate the company's degree of compliance with the recommendations of the Good Governance Code for listed companies.**

**In the event that a recommendation is not or is only partially followed, the Company should include a detailed explanation of its reasons in such a way that the shareholders, investors and the market in general, are provided with sufficient information to assess the performance of the company. Explanations of a general nature shall not be acceptable**

**1. The Bylaws of listed companies should not limit the votes that can be cast by a single shareholder, nor impose other obstacles to impede the takeover of the company by means of share purchases on the market.**

Compliant

See sections: A.10, B.1, B.2, C.1.23 and C.1.24

**2. If a parent and a subsidiary company are listed, both should provide detailed disclosure on:**

- **a) Their respective types of activities, and any business dealings between them, including between the listed subsidiary and other companies in the group;**
- **b) The mechanisms in place to resolve possible conflicts of interest.**

Compliant

See sections: D.1, D.4 and D.7

**3. During the annual general meeting the Chairman of the Board should verbally inform shareholders in sufficient detail of the most relevant aspects of the Company's corporate governance, supplementing the written information circulated in the annual corporate governance report, in particular:**

- **a) Changes taking place since the previous Annual General Meeting.**
- **b) The specific reasons why the company does not follow any Good Governance Code recommendations and, if applicable, any alternative procedures followed in its stead.**

Explain

Since a recommendation was included in the new Code of Good Governance of February 2015, published on a date when the Company's Annual General Meeting for the 2015 financial year had already taken place, the Company will comply with this recommendation in the next General Shareholders' Meeting to be held in the 2016 financial year.

**4. The Company should draw up and implement a policy of communication and contacts with shareholders, institutional investors and proxy advisors that complies in full with market abuse regulations and accords equitable treatment to shareholders in the same position.**

**This policy should be disclosed on the Company's website, complete with details of how it has been put into practice and the identities of the relevant players or those responsible for its implementation.**

Partially compliant

The Company strictly complies with the market abuse regulations and assures that it treats all shareholders equally who are in the same situation, even though there was no communication policy or contact with shareholders, institutional investors and proxy advisors during the 2015 financial year.

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the company approved a communication policy and contact with shareholders, institutional investors and proxy advisors. This policy is published on the company's corporate website.

**5. The Board of Directors should not make a proposal to the general meeting for the delegation of powers to issue shares or convertible securities without pre-emptive subscription rights for an amount exceeding 20 % of capital at the time of such delegation.**

**When a board approves the issuance of shares or convertible securities without pre-emptive subscription rights, the company should immediately post a report on its**

**website explaining the exclusion as envisaged in company legislation.**

Partially compliant

The proposal for the delegation of powers to issue shares or convertible securities presented by the Board of Directors before the 2015 financial year General Meeting does not comply with this recommendation given that the financial structure of the Company and the need to maintain sufficient levels of own funds compared to its volume of activity and its market position, which requires flexibility to undertake this kind of issuance at any time, the Company has deemed it necessary for the delegation to be for the maximum amount permitted by law.

Notwithstanding the foregoing, the mandatory reports on the exclusion of pre-emptive subscription rights which the commercial law makes reference to concerning the delegations currently in force were published immediately and are available on the Company's website.

**6. Listed companies drawing up the following reports on a voluntary or compulsory basis should publish them on their website well in advance of the Annual General Meeting, even if their distribution is not obligatory:**

- **a) Report on auditor independence.**
- **b) Reviews of the operation of the Audit Commission and the Appointment and Remuneration Commission.**
- **c) Audit Commission report on third-party transactions.**
- **d) Report on Corporate Social Responsibility Policy.**

Partially compliant

The Company draws up a report on auditor independence (included in the Audit Commission Report that is published as part of the Annual Report), annual reports on the operation of the commissions, as well as an annual report on Corporate Social Responsibility.

Insofar as the report on connected transactions is concerned, the Audit Commission is obliged to report on related-party transactions and, as a matter of fact, this is the case in practice as all of the relevant information is outlined in the minutes of the Commission's minutes. In addition, the Company reports on the connected transactions made during the period set forth in the Annual Report on Corporate Governance.

However, in the 2015 financial year, only the following reports, forming part of the 2014 Annual Report, were published on their website with enough notice before the Annual General Meeting: (i) the Audit Commission Report; and (ii) the Report on Corporate Social Responsibility.

The reports mentioned in this recommendation are expected to be published on the website with sufficient notice for the 2016 Annual General Meeting.

**7. The company should broadcast its general meetings live on the corporate website.**

**Explain**

The company did not broadcast the General Shareholders' Meetings held in 2015 live through the website, nor does it plan to broadcast those held in 2016. Nevertheless, the company sufficiently publicizes the General Shareholders' Meetings on the BORME [Official Gazette of the Commercial Registry], the CNMV website and its own corporate website. Likewise, the Company, in line with the legislation in force and its own internal regulations, facilitates participation of all shareholders at the General Meeting having recently included in its internal regulations the possibility to attend general meetings via remote online communication

**8. The Audit Commission should strive to ensure that the Board of Directors can present the Company's accounts to the General Meeting without limitations or qualifications in the auditor's report. In the exceptional case that qualifications exist, both the Chairman of the Audit Commission and the auditors should give a clear account to shareholders of their scope and content.**

Partially compliant

Among other duties, the Audit Commission is obliged to liaise with the external auditor, regularly receive information from him/her regarding the auditing plan and results of its implementation, and verify that senior management adheres to the recommendations and therefore the Company partially complies with this recommendation. However, in order to guarantee that the Audit Commission wholly complies with this obligation, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Board of Directors' Regulations and the Audit Commission's Regulations were amended to expressly include this function within the framework of their competencies.

**9. The Company should publish its conditions and procedures for admitting share ownership, the right to attend General Meetings and the exercise or delegation of voting rights, and display them permanently on its website.**

**Such conditions and procedures should encourage shareholders to attend and exercise their rights and be applied in a non-discriminatory manner.**

Compliant

**10. When an accredited shareholder exercises the right to supplement the agenda or submit new proposals prior to the General Meeting, the Company should:**

- **a) Immediately circulate the supplementary items and new proposals.**
- **b) Disclose the model of attendance card or proxy appointment or remote voting form duly modified so that new agenda items and alternative proposals can be voted on in the same terms as those submitted by the Board of Directors.**
- **c) Put all these items or alternative proposals to the vote applying the same voting rules as for those submitted by the Board of Directors, particularly regarding presumptions or deductions about the direction of votes.**
- **d) After the General Shareholders' Meeting, disclose the breakdown of votes on such supplementary items or alternative proposals.**

Not applicable.

In the General Meetings held during the financial year 2015 no shareholder exercised such right.

**11. In the event that a company plans to pay for attendance at the General Meeting, it should first establish a general, long-term policy in this respect.**

Not applicable.

In the General Meetings held during 2015 no pay for attendance were processed.

**12. The Board of Directors should perform its duties with unity of purpose and independent judgment, treating all shareholders equally who are in the same position. It should be guided at all times by the Company's best interest, understood as the creation of a profitable business that promotes its sustainable success over time, while maximizing its economic value.**

**In pursuing the corporate interest, it should not only abide by laws and regulations and conduct itself according to principles of good faith, ethics and respect for commonly accepted customs and good practices, but also strive to reconcile its own interests with the legitimate interests of its employees, suppliers, clients and other stakeholders, as well as with the impact of its activities on the broader community and the natural environment.**

Compliant

The Board of Directors should perform its duties with unity of purpose and independent judgment, according the same treatment to all shareholders in the same position. It should be guided at all times by the Company's best interest, understood as the creation of a profitable business that promotes its sustainable success over time, while maximizing its economic value. Likewise, it should ensure that the Company abides by the laws and regulations in its dealings with stakeholders; performing its obligations and contracts in good faith; respecting the customs and good practices of the sectors and territories in which it operates; and upholding any additional social responsibility principles to which it may have voluntarily subscribed.

**13. The Board of Directors should have an optimal size to operate efficiently and maximize participation. The recommended range is between five and fifteen members.**

Compliant

See section: C.1.2.

**14. The Board of Directors should approve a director selection policy that:**

- **a) Is concrete and verifiable;**
- **b) Ensures that appointment or re-election proposals are based on a prior analysis of the Board's needs.**
- **c) Favors a diversity of knowledge, experience and gender.**

**The results of the prior analysis of board needs should be written up in the Appointment Commission's explanatory report, to be published when the General Meeting that will ratify the appointment and re-election of each director is convened.**

**The director selection policy should pursue the goal of having at least 30 % of total board places occupied by women directors before the year 2020.**

**The Appointment Commission should run an annual check on compliance with the director selection policy and set out its findings in the Annual Report on Corporate Governance.**

Partially compliant

Although the company did not have a director selection policy approved in the 2015 financial year, in practice, the Company's selection policy considers both the needs of the Board of Directors as well as the diversity of knowledge, experience and gender, making sure that the selection procedure refrains from implicit biases that may hinder the inclusion of female directors. In addition, the Board of Directors issues a report upon every appointment and based on a previous report from the Appointments and Remunerations Commission with regard to the candidate in question.

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved a director selection policy which complies with the criteria of the recommendation in the Code of Good Governance.

**15. Proprietary and independent Directors should occupy an ample majority of board places, while the number of executive Directors should be the required minimum bearing in mind the complexity of the corporate group and the percentage of ownership the executive Directors hold in the equity.**

Compliant.

See section C.1.2 and C.1.3

**16. The percentage of proprietary directors out of all non-executive directors should be no greater than the proportion between the ownership stake of the shareholders they represent and the remainder of the company's capital.**

**This criterion can be relaxed:**

- **a) In large cap companies where few or no equity stakes attain the legal threshold for significant shareholdings.**
- **b) In companies with a plurality of shareholders represented on the board but not otherwise related.**

Compliant

See section C.1.2 and C.1.3

**17. Independent directors should be at least half of all Directors.**

**However, when the company does not have a large market capitalization, or when a large cap company has shareholders individually or concertedly controlling over 30 percent of capital, independent directors should occupy, at least, a third of board places.**

Compliant.

See section C.1.2 and C.1.3

**18. Companies should disclose the following details of directors on their websites and keep them regularly updated:**

- **a) Background and professional experience.**
- **b) Directorships held in other companies, listed or otherwise, and other paid activities they engage in, of whatever nature.**
- **c) Statement of the director class to which they belong, in the case of proprietary directors indicating the shareholder they represent or with whom they have links.**
- **d) Dates of their first appointment as a Director and subsequent re-elections.**
- **e) Shares held in the company, and any options thereon.**

Compliant

**19. Following verification by the Appointments Commission, the Annual Corporate Governance Report should disclose the reasons for the appointment of proprietary directors at the request of shareholders controlling less than 3 percent of capital; and explain any rejection of a formal request for a board place from shareholders whose equity stake is equal to or greater than that of others applying successfully for a proprietary directorship.**

Partially compliant

Although the Annual Corporate Governance Report explains the reasons for the appointment of proprietary directors at the request of shareholders controlling less than 3 percent of capital, as well as the reasons for rejection of formal requests for a board place from shareholders whose equity stake is equal to or greater than that of others who applied and were successfully appointed as proprietary directors, the Appointments and Remuneration Commission did not explicitly include the function of verifying the annual corporate governance report in its regulations.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 28 of the Board of Directors' Regulations and article 3 of the Appointments and Remuneration Commission's Regulations to expressly reflect this function of the Appointments and Remuneration Commission.

**20. Proprietary directors should resign when the shareholders they represent dispose of their ownership interest in its entirety. If such shareholders reduce their stakes, thereby losing some of their entitlement to proprietary directors, the latter category's number should be reduced accordingly.**

Compliant.

The Company effectively complies with this recommendation. Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 13 of the Board of Directors' Regulations to expressly include this case of dismissal of proprietary Directors.

**21. The Board of Directors should not propose the removal of independent directors before the expiry of their tenure as mandated by the bylaws, except where they find just cause, based on a proposal from the Appointment Commission In particular, just cause will be presumed when directors take up new posts or responsibilities that prevent them allocating sufficient time to the work of a Director, or are in breach of their fiduciary duties or come under one of the disqualifying grounds for classification as independent enumerated in the applicable legislation.**

**The removal of independent directors may also be proposed when a takeover bid, merger or similar corporate transaction alters the company's capital structure, provided the changes in Directorship ensue from the proportionality criterion set out in recommendation 16.**

Compliant

The Company effectively complies with this recommendation. Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 13 of the Board of Directors' Regulations to expressly include this recommendation regarding independent Directors.

**22. Companies should establish rules obliging directors to disclose any circumstance that might harm the organization's name or reputation, tendering their resignation as the case may be, and, in particular, to inform the board of any criminal charges brought against them and the progress of any subsequent trial.**

**The moment a director is indicted or tried for any of the offences stated in company legislation, the board of directors should open an investigation and, in light of the particular circumstances, decide whether or not he or she should be called on to resign. The board should give a reasoned account of all such determinations in the annual corporate governance report.**

Compliant

The Board of Directors' Regulations establish that, as part of the duty of loyalty amongst other obligations therein, Directors must inform the company of all legal and administrative claims as well as any others that, given their magnitude, may severely affect the reputation of the Company. Therefore, it is established that whenever any Director is severely penalized by any public authority for having breached their obligations as Directors, they are obliged to surrender their post to the Board.

As a result, the Company has established the appropriate channels in order to ensure their image and reputation are safeguarded at all times.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to articles 13 and 14 of the Board of Directors' Regulations to expressly include these obligations concerning Directors.

**23. Directors should express their clear opposition when they feel a proposal submitted for the board's approval might damage the corporate interest. In particular, independents and other directors not subject to potential conflicts of interest should strenuously challenge any decision that could harm the interests of shareholders lacking board representation.**

**When the board makes material or reiterated decisions about which a director has expressed serious reservations, then he or she must draw the pertinent conclusions. Directors resigning for such causes should set out their reasons in the letter referred to in the next recommendation.**

**The terms of this recommendation also apply to the secretary of the board, even if he or she is not a director.**

Compliant

**24. Directors who give up their position before their tenure expires, by resignation or otherwise, should state the reasons in a letter remitted to all Directors. Regardless of whether such resignation is filed as a significant event, the reason must be explained in the annual corporate governance report.**

Compliant

**25. The Appointment Commission should ensure that non-executive directors have sufficient time available to discharge their responsibilities effectively.**

**The Board of Directors regulations should lay down the maximum number of company boards on which directors can serve.**

Partially compliant

Abengoa ensures that Directors dedicate the necessary time and effort to their role. In addition, all Abengoa Directors carry out their Director roles exclusively for the Company, and are not Directors of any other listed companies that do not belong to the Group

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 14 of the Board of Directors' Regulations to expressly include the maximum number of company boards (excluding companies belonging to the Group) on which directors can serve.

**26. The board should meet with the necessary frequency to properly perform its functions, eight times a year at least, in accordance with a calendar and agendas set at the start of the year, to which each director may propose the addition of initially unscheduled items.**

Compliant

See section: C.1.29.

**27. Director absences should be kept to a strict minimum and quantified in the annual corporate governance report. In the event of absence, directors should delegate their powers of representation with the appropriate instructions.**

Compliant

See sections C.1.29 and C.1.30

**28. When directors or the secretary express concerns about some proposal or, in the case of directors, about the company's performance, and such concerns are not resolved at the meeting, they should be recorded in the minute book if the person expressing them so requests.**

Compliant

**29. The company should provide suitable channels for directors to obtain the advice they need to carry out their duties, extending if necessary to external assistance at the company's expense.**

Compliant

**30. Regardless of the knowledge directors must possess to carry out their duties, they should also be offered refresher programs when circumstances so advise.**

Compliant

**31. The agendas of board meetings should clearly indicate on which points directors must arrive at a decision, so they can study the matter beforehand or gather together the material they need.**

**For reasons of urgency, the chairman may wish to present decisions or resolutions for board approval that were not on the meeting agenda. In such exceptional circumstances, their inclusion will require the express prior consent, duly recorded in the minutes, of the majority of directors present.**

Compliant.

The Board of Directors sessions are announced with sufficient notice, whereby all items on the agenda are clearly indicated and all information required to enable the Directors to prepare for the sessions is provided through the "Director portal". In terms of the decisions or agreements that are not included on the agenda but which are effectively subject to majority consent, this recommendation was not included in the Company's internal rules on governance in the 2015 financial year.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 10 of the Board of Directors' Regulations to expressly include that when, for reasons of urgency, the chairman wishes to present decisions or resolutions for board approval that were not on the meeting agenda, this will require the express prior consent, duly recorded in the minutes, of the majority of directors present.

**32. Directors should be regularly informed of movements in share ownership and of the views of major shareholders, investors and rating agencies on the company and its group.**

Compliant

**33. The chairman, as the person charged with the efficient functioning of the Board of Directors, in addition to the functions assigned by law and the company's bylaws, should prepare and submit to the board a schedule of meeting dates and agendas; organize and coordinate regular evaluations of the board and, where appropriate, the company's chief executive officer; exercise leadership of the board and be accountable for its proper functioning; ensure that sufficient time is given to the discussion of strategic issues, and approve and review refresher courses for each director, when circumstances so advise.**

Partially compliant

The Company effectively complies with this recommendation.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 21 of the Board of Directors' Regulations to expressly include these functions within the powers of the Chairman of the Board of Directors.

**34. When a lead independent director has been appointed, the bylaws or Board of Directors regulations should grant him or her the following powers over and above those conferred by law: chair the Board of Directors in the absence of the chairman or vice chairman give voice to the concerns of non-executive directors; maintain contacts with investors and shareholders to hear their views and develop a balanced understanding of their concerns, especially those to do with the company's corporate governance; and coordinate the chairman's succession plan.**

Partially compliant

The Company effectively complies with this recommendation.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 21 of the Board of Directors' Regulations to expressly include these functions within the powers of the Coordinating Director.

**35. The board secretary should strive to ensure that the board's actions and decisions are informed by the governance recommendations of the Good Governance Code of relevance to the company.**

Partially compliant

The Company effectively complies with this recommendation.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 23 of the Board of Directors' Regulations to expressly include these functions within those performed by the Secretary of the Board.

**36. The Board in full should conduct an annual evaluation, adopting, where necessary, an action plan to correct weakness detected in:**

- **a) The quality and efficiency of the Board's operation.**
- **b) How its commissions operate and who is in them.**
- **c) The diversity of Directorship and competences making up the Board.**
- **d) The performance of the Chairman of the Board of Directors and the Company's Chief Executive.**
- **e) The performance and contribution of individual Directors, paying close attention to the heads of the various Board Commissions.**

**The evaluation of board commissions should start from the reports they send the Board of Directors, while that of the board itself should start from the report of the Appointment Commission.**

**Every three years, the Board of Directors should engage an external facilitator to aid in the evaluation process. This facilitator's independence should be verified by the Appointment Commission.**

**Any business dealings that the facilitator or members of its corporate group maintain with the company or members of its corporate group should be detailed in the annual corporate governance report.**

**The process followed and areas evaluated should be detailed in the annual corporate governance report.**

Partially compliant

The Board of Directors undergoes an annual performance evaluation procedure, establishing a plan of action to correct the shortcomings detected.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to articles 4 and 28 of the Board of Directors' Regulations to expressly include the requirement for assistance from an external consultant at least once every three years to carry out the evaluation.

**37. When an executive commission exists, its membership mix by director class should resemble that of the board. The secretary of the board should also act as secretary to the executive commission.**

Not applicable.

**38. The Board should be kept fully informed of the business transacted and decisions made by the executive commission. To this end, all Directors should receive a copy of the commission's minutes.**

Not applicable.

**39. All members of the Audit Commission, particularly its chairman, should be appointed with regard to their knowledge and experience in accounting, auditing and risk management matters. A majority of Commission places should be held by independent directors.**

Compliant

See section: C.2.1.

**40. Listed companies should have a unit in charge of the internal audit function, under the supervision of the Audit Commission, to monitor the effectiveness of reporting and control systems. This unit should report functionally to the board's non-executive chairman or the chairman of the Audit Commission.**

Partially compliant

The Company has an internal audit unit which ensures that the internal reporting and control systems work properly although it does not functionally report to the chairman of the Audit Commission, rather to the Commission itself as a whole. Nonetheless, this effectively does not affect compliance of its duties with the required independence of judgment since, among other issues, the Audit Commission is made up entirely of independent directors.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 27 of the Board of Directors' Regulations and article 3 of the Audit Commission's Regulations to reflect that the internal audit unit reports to the Chairman of the Audit Commission.

**41. The head of the unit handling the internal audit function should present an annual work program to the Audit Commission, inform it directly of any incidents arising during its implementation and submit an activities report at the end of each year.**

Compliant

**42. The Audit Commission should have the following functions over and above those legally assigned:**

› **1. With respect to internal control and reporting systems:**

- **a) Monitor the preparation process and the integrity of the financial information relating to the company and, where appropriate, the group, checking for compliance with legal provisions, accurate demarcation of the consolidation perimeter, and correct application of accounting principles.**
- **b) Monitor the independence of the unit handling the internal audit function; propose the selection, appointment, re-election and removal of the head of the internal audit service; propose the service's budget; approve its priorities and work programs, ensuring that it focuses primarily on the main risks the company is exposed to; receive regular information on its activity; and verify that senior management are acting on the findings and recommendations of the reports.**
- **c) Establish and supervise a mechanism whereby staff can report, confidentially and, if appropriate and feasible, anonymously, any significant irregularities that they detect in the course of their duties, in particular financial or accounting irregularities.**

› **2. With regard to the external auditor:**

- **a) Investigate the issues leading to the resignation of the external auditor, should this come about.**
- **b) Ensure that the remuneration of the external auditor does not compromise their quality or independence.**
- **c) Ensure that the company notifies any change of external auditor to the CNMV as a relevant fact, accompanied by a statement of any disagreements arising with the outgoing auditor and the reasons for the same.**
- **d) Ensure that the external auditor has a yearly meeting with the board in full to inform them of the work undertaken and developments in the company's risk and accounting positions.**
- **e) Ensure that the company and the external auditor adhere to current regulations on the provision of non-audit services, limits on the concentration of the auditor's business and, in general, other requirements concerning auditor independence.**

Partially compliant

As is stated in the Board of Directors' Regulations, as well as in the Audit Commission's Regulations, the latter has been entrusted with the vast majority of the duties set out in this recommendation. Effectively, this commission, whether directly or with the help of the internal audit unit, is responsible for supervising and monitoring the internal reporting and control systems, as well as relations with the external auditor.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 27 of the Board of Directors' Regulations and article 3 of the Audit Commission's Regulations to expressly reflect the functions of the Audit Commission included in this recommendation.

**43. The Audit Commission should be empowered to meet with any company employee or manager, even ordering their appearance without the presence of another senior officer.**

Compliant

**44. The Audit Commission should be informed of any fundamental changes or corporate transactions the company is planning, so the commission can analyze the operation and report to the board beforehand on its economic conditions and accounting impact and, when applicable, the exchange ratio proposed.**

Compliant

**45. Risk control and management policy should identify at least:**

- **a) The different types of financial and non-financial risk the company is exposed to (including operational, technological, financial, legal, social, environmental, political and reputational risks), with the inclusion of contingent liabilities and other off-balance-sheet risks under financial or economic risks.**
- **b) The determination of the risk level the company sees as acceptable.**
- **c) The measures in place to mitigate the impact of identified risk events should they occur.**
- **d) The internal control and reporting systems to be used to control and manage the above risks, including contingent liabilities and off-balance-sheet risks.**

Compliant

See section E.

**46. Companies should establish a risk control and management function in the charge of one of the company's internal department or units and under the direct supervision of the audit committee or some other dedicated board committee. This function should be expressly charged with the following responsibilities:**

- **a) Ensure that risk control and management systems are functioning correctly and, more specifically, that any major risks the company is exposed to are correctly identified, managed and quantified.**
- **b) Participate actively in the preparation of risk strategies and in key decisions about their management.**
- **c) Ensure that risk control and management systems are mitigating risks effectively in the framework of the policy drawn up by the Board of Directors.**

Partially compliant

Although Abengoa has a department that deals with the function of risk control and management, said function was not under the direct supervision of the Audit Commission.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 27 of the Board of Directors' Regulations and article 3 of the Audit Commission's Regulations to expressly reflect that the function of risk control and management is now under the direct supervision of the Audit Commission.

**47. Appointees to the Appointment and Remuneration Commission – or of the Appointment Commission and Remuneration Commission, if separately constituted – should have the right balance of knowledge, skills and experience for the functions they are called on to discharge. The majority of their members should be independent directors.**

Compliant

See section: C.2.1.

**48. Large cap companies should have separate Appointments and Remunerations Commissions.**

**Explain**

The Company has not yet included this recommendation given that the members of the commissions would be the same and the issues to be dealt with would be very closely linked.

**49. The Appointments Commissions should consult the Chairman of the Board and the company's Chief Executive, especially on matters relating to Executive Directors.**

**When there are vacancies on the board, any director may approach the Appointment Commission to propose candidates that it might consider suitable.**

Compliant

**50. The remuneration commission should operate independently and have the following functions in addition to those assigned by law:**

- **a) Propose the basic conditions for senior officer contracts to the board.**

- **b) Monitor compliance with the remuneration policy set by the company.**
- **c) Periodically review the remuneration policy for Directors and senior officers, including share-based remuneration systems and their application, and ensure that their individual compensation is proportionate to the amounts paid to other Directors and senior officers in the company.**
- **d) Ensure that any potential conflicts of interest do not undermine the independence of any external advice given to the commission.**
- **e) Verify the information on Director and senior officers' pay contained in various corporate documents, including the annual report on Directors' remuneration.**

Partially compliant

As is stated in the Board of Directors' Regulations and in the Appointments and Remunerations Commission's Regulations, the latter has been entrusted with the vast majority of the duties set out in this recommendation and effectively performs all of them.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Company approved an amendment to article 28 of the Board of Directors' Regulations and article 3 of the Appointments and Remunerations Commission's Regulations to expressly reflect the functions of the Appointments and Remunerations Commission included in this recommendation.

**51. The remuneration commission should consult with the company's chairman and chief executive, especially on matters relating to executive directors and senior officers.**

Compliant

**52. The terms of reference of supervision and control commissions should be set out in the Board of Directors regulations and aligned with those governing legally mandatory board commissions as specified in the preceding sets of recommendations. They should include at least the following terms:**

- **a) Commissions should be formed exclusively by non-executive Directors, with independent Directors in the majority.**
- **b) They should be chaired by independent directors.**
- **c) The board should appoint the members of such commissions with regard to the knowledge, skills and experience of its Directors and each commission's terms of reference; discuss their proposals and reports; and provide report-backs on their activities and work at the first board plenary following each commission meeting.**
- **d) They may seek external advice whenever they consider necessary in order to carry out their duties.**
- **e) Minutes of all meetings should be taken and a copy made available to all Directors.**

Partially compliant

The company effectively complies with all of these recommendations with the exception of the recommendation stating that the commissions should be made up of non-executive Directors, since one of the members of the Investment Commission is an executive Director.

**53. The task of supervising compliance with corporate governance rules, internal codes of conduct and corporate social responsibility policy should be assigned to one board commission or split between several, which could be the audit commission, the Appointment Commission, the corporate social responsibility commission, where one exists, or a dedicated commission established ad hoc by the board under its powers of self-organization, with at the least the following functions:**

- **a) Monitor compliance with the company's internal codes of conduct and corporate governance rules.**
- **b) Oversee the communication and relations strategy with shareholders and investors, including small and medium-sized shareholders.**
- **c) Periodically evaluate the effectiveness of the company's corporate governance system, to confirm that it is fulfilling its mission to promote the corporate interest and catering, as appropriate, to the legitimate interests of remaining stakeholders.**
- **d) Review the company's corporate social responsibility policy, ensuring that it is geared towards value creation.**
- **e) Monitor corporate social responsibility strategy and practices and assess the extent of their compliance.**
- **f) Monitor and evaluate the company's interaction with the various groups of stakeholders.**

- **g) Evaluate all aspects of the non-financial risks the company is exposed to, including operational, technological, legal, social, environmental, political and reputational risks.**
- **h) Coordinate non-financial and diversity reporting processes in accordance with applicable legislation and international benchmarks.**

Partially compliant

The company effectively complies with this recommendation as the Board of Directors, whose duties include establishing general company policies and strategies, is supported by the Audit Commission regarding performing their duties.

Notwithstanding the foregoing, after the close of the financial year, by virtue of a decision made by the Board of Directors dated [X] March 2016, the Company approved an amendment to article 27 of the Board of Directors' Regulations and article 3 of the Audit Commission's Regulations to expressly reflect the functions included in this recommendation as pertaining to the Audit Commission.

**54. The corporate social responsibility policy should state the principles or commitments the company will voluntarily adhere to in its dealings with stakeholder groups, specifying at least:**

- **a) The goals of its corporate social responsibility policy and the support instruments to be used.**
- **b) The corporate strategy with regards to sustainability, the environment and social issues.**
- **c) Specific practices in matters relating to: shareholders, employees, clients, suppliers, social welfare issues, the environment, diversity, fiscal responsibility, respect for human rights and prevention of unlawful conduct.**
- **d) The methods or systems for monitoring the results of the specific practices referred to above, and identifying and managing related risks.**
- **e) The mechanisms for monitoring non-financial risk, ethics and business conduct.**
- **f) Channels for stakeholder communication, participation and dialogue.**
- **g) Responsible communication practices that prevent the manipulation of information and protect the company's honor and integrity.**

Compliant

**55. The company should report on corporate social responsibility developments in its directors' report or in a separate document, using an internationally accepted methodology.**

Compliant

**56. Director remuneration should be sufficient to attract and retain individuals with the desired profile and compensate the commitment, skills and responsibility that the post demands, but not so high as to compromise the independent judgment of non-executive directors.**

Compliant

**57. Variable remuneration linked to the company and the director's performance, the award of shares, options or any other right to acquire shares or to be remunerated on the basis of share price movements, and membership of long-term savings schemes such as pension plans should be confined to executive directors.**

**The company may consider the share-based remuneration of non-executive directors provided they retain such shares until the end of their mandate. The above condition will not apply to any shares that the director must dispose of to defray costs related to their acquisition.**

Compliant

**58. In the case of variable awards, remuneration policies should include limits and technical safeguards to ensure they reflect the professional performance of the beneficiaries and not simply the general progress of the markets or the company's sector, or circumstances of that kind.**

**In particular, variable remuneration items should meet the following conditions:**

- **a) Be subject to predetermined and measurable performance criteria that factor the risk assumed to obtain a given outcome.**
- **b) Promote the long-term sustainability of the company and include non-financial criteria that are relevant for the company's long-term value, such as compliance with its internal rules and procedures and its risk control and management policies.**

› **c) Be focused on achieving a balance between the delivery of short, medium and long-term objectives, such that performance-related pay rewards ongoing achievement, maintained over sufficient time to appreciate its contribution to long-term value creation. This will ensure that performance measurement is not based solely on one-off, occasional or extraordinary events.**

Compliant

**59. A large part of variable remuneration components should be deferred for a long enough period to ensure that predetermined performance criteria have effectively been met.**

Non-compliant

The variable compensation policy does not provide for a large part of the variable remuneration components being deferred for a long enough period to ensure that predetermined performance criteria have effectively been met, notwithstanding the fact that it can be provided for once the Company has overcome its present circumstances.

**60. Remuneration linked to company earnings should consider the possible deductions reflected in the external auditor's report and should reduce said results.**

Compliant.

**61. Remuneration linked to company earnings should bear in mind any qualifications stated in the external auditor's report that reduce their amount.**

Non-compliant

As of 31 December 2015, the variable remuneration of Abengoa's executive directors does not specifically include the award of shares or share-based financial instruments. Accrual of compensation corresponding to multi-annual extraordinary variable compensation schemes that the Chief Executive is a beneficiary of and, therefore, his right to receive it (but not the compensation amount in itself) depends on the market value of Abengoa's class B shares not falling below certain values in the last quarter that each scheme is in force. Consequently, Abengoa considers that the characteristics of the variable compensation linked to these schemes do not comply with Recommendation 61 of the Code.

**62. Following the award of shares, share options or other rights on shares derived from the remuneration system, directors should not be allowed to transfer a number of shares equivalent to twice their annual fixed remuneration, or to exercise the share options or other rights on shares for at least three years after their award.**

**The above condition will not apply to any shares that the director must dispose of to defray costs related to their acquisition.**

Not applicable

**63. Contractual arrangements should include provisions that permit the company to reclaim variable components of remuneration when payment was out of step with the director's actual performance or based on data subsequently found to be misstated.**

Compliant

**64. Termination payments should not exceed a fixed amount equivalent to two years of the director's total annual remuneration and should not be paid until the company confirms that he or she has met the predetermined performance criteria.**

Compliant

# H Other information of interest

**1. Provide a brief detail of any other relevant aspects in the matter of the corporate governance of the company or entities of the group that have not been included in the other sections of this report, but that the inclusion of which is necessary for the compiling of a more complete and reasonable information on the structure and practices of governance in the entity or group.**

**2. In this section, you may also include any other information, clarification or detail related to the above sections of the report, to the extent that these are deemed relevant and not reiterative.**

**Specifically, indicate whether the company is subject to non-Spanish legislation with regard to corporate governance and, if so, include the information it is obliged to provide and which is different from that required in this report.**

**3. The company may also indicate whether it voluntarily adhered to other codes of the principles of ethics or other good practices, international, sector or otherwise. As the case may be, the company shall identify the code in question and the date of adherence. In particular, it shall mention whether it has adhered to the Code of Good Tax Practices of 20 July 2010.**

**A.1 - Rights inherent in Class A and B shares**

Article 8 of Abengoa's Bylaws regulates the different rights inherent in its Class A and B shares. The extraordinary general shareholders' meeting held on the second call on September 30, 2012, agreed to amend Article 8 of Abengoa's Bylaws to include a mechanism for voluntarily converting class A shares into class B shares. Below is the aforementioned sub-section of the aforementioned Article 8 which includes the right of voluntary conversion:

" […] A.3) The Right of conversion into Class B Shares

Each Class A Share entitles its owner the right to convert it into a Class B Share until December 31, 2017.

Owner may exercise its right of conversion by notifying the company or, better still, as the case may be, the agency designated for such, through the corresponding participating entity of the Securities Registration, Compensation and Liquidation Management Company (Iberclear), by any media that permits the issuance of remittance and reception receipts, of notification, deemed irrevocably and unconditionally submitted, reflecting the total number of class A shares owned by said owner and the exact number of class A shares over which said owner wishes to exercise the inherent rights of conversion, in order for the Company to execute the agreements necessary for effecting the aforementioned conversion and to subsequently inform the CNMV by issuing the corresponding Notice of Significant Event.

The aforementioned notice shall include the corresponding Certificate of Ownership and Legitimacy for the Class A Shares issued by an entity that must be participant in the Iberclear Management Systems, or through an intermediary or depository or financial entity managing the shares under the terms set forth in the regulations governing securities representation by means of book-entry or through any other equivalent means of accreditation to which the Company grants sufficient validity for that purpose.

The exercise of the inherent conversion rights of a class A shares shall be understood as the company's stock capital being reduced in the amount of the difference between the face value of the class A shares for which the inherent rights are exercised and the face value of the same number of class B shares, an amount that will increase the restricted reserve which the company would already have set aside for that purpose and in accordance with Article 335.c) of the Corporate Law.

The Board of Directors, with the specific faculty of substitution by the Chairman or the Chief Executive, shall be empowered to determine the period, frequency and procedure for exercising the inherent conversion rights, including, if applicable, the decision of adequacy of the aforementioned equivalent means of accreditation, as well as all other aspects that may be deemed necessary for the proper and correct exercise of said right, which shall all be appropriately communicated through the corresponding notice of significant event. […]"

**A.3**

It is hereby stated that, after the close of the financial year, the director Mr. José Luis Aya Abaurre passed away on 12 February 2016. Furthermore, on 8 March 2016 the Company's Board of Directors agreed to cover the vacancy left on the Board due to the death of Mr. José Luis Aya Abaurre by co-optation, thereby appointing the company Inayaba, S.L. as Director and Ms. Ana Abaurrea Aya as individual representative.

**B.3 / B.5 Reinforcement to guarantee minority rights**

In the interest of reinforcing minority rights, Abengoa submitted a series of bylaw amendments to the extraordinary general shareholders' meeting for approval for the purpose of ensuring that the so-called "defense of minority rights" does not suffer infringements for the mere fact that two different classes of shares exist with different face values simply because the lesser face value of the class B shares would entail that it is more difficult to obtain the percentages of the stock capital required for the exercise of some policy rights. Thus, the general shareholders' meeting approved the amendments of Abengoa's bylaws in the manner set forth below to envisage that all rights are exercised considering the number of shares as basis for the percentage, and not the stock capital. These rights, such as, for example, the right to convene a general shareholders' meeting or request the exercise of a corporate liability action, requires ownership of a specific percentage of stock capital in the nominal sense (3 % in the aforementioned cases).

In particular, the extraordinary general shareholders' meeting approved the amendment of the bylaws with the aim of reflecting that shareholders be required to own three hundred and seventy-five (375) shares, regardless of whether they are class A or B, to attend the general meeting of the company's shareholders; that shareholders be allowed to request publication of a supplement to the call for an ordinary general meeting of shareholders including one or more points on the agenda and to submit proposals for decisions on issues already included or that should be included in the agenda of the convened meeting based on the number of shares owned by the shareholders; that (i) shareholders who own 1 % of the share capital or 1 % of the voting shares be able to request the presence of a Notary Public to endorse the minutes of the general shareholders' meeting; (ii) shareholders who own 3 % of the share capital or 3 % of the voting shares be able to request the convening of the general shareholders' meeting that is to decide upon the corporate liability action against directors or exercise the corporate liability action without or against the decision made by the board in the general meeting; that the company's Board of Directors convene the general shareholders' meeting when requested by shareholders representing 3 % of the share capital or 3 % of the voting shares; that the company's Board of Directors extend the general shareholders' meeting if requested by the shareholders representing 25 % of the capital present or represented in the board meeting or 25 % of the voting shares and that the company's chairman of the board may cancel the right to information as established in Article 197 of the Spanish Corporate Law if requested so by shareholders representing less than 25 % of the paid-in capital or 25 % of the company's voting shares if this percentage is lower than the voting shares, and, in his opinion, publishing this information is unnecessary to protect partner rights, or there are objective reasons to be considered that could be used for purposes outside the company, or publishing it is detrimental to the company or the connected companies.

**C.1.2**

It is hereby stated that, after the close of the financial year, the director Mr. José Luis Aya Abaurre passed away on 12 February 2016. Furthermore, on 8 March 2016 the Company's Board of Directors agreed to cover the vacancy left on the Board due to the death of Mr. José Luis Aya Abaurre by co-optation, thereby appointing the company Inayaba, S.L. as Director and Ms. Ana Abaurrea Aya as individual representative.

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors adopted the following agreements:

- Appoint Mr. Antonio Fornieles Melero, who until present held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, delegating all powers to him except those which cannot be delegated by Law, until attaining the status of Executive Director.
- Delegate all powers, except those which cannot be delegated by Law, to the Managing Director, Mr. Joaquín Fernández de Piérola Marín, thereby becoming Chief Executive.
- Remove Mr. José Domínguez Abascal as Chairman, whereby he remains as director with the category of other external director.

Furthermore, on 8 March 2016 Abengoa's Board of Directors adopted the following agreements:

- Appoint Mr. Joaquín Fernández de Piérola Marín as First Vice-Chairman of the Board of Directors, thereby merging this position with that of Managing Director (CEO).
- Appoint Ms. Alicia Velarde Valiente as Second Vice-Chairwoman and Coordinating Director.

**C.1.3**

It is hereby stated that, after the close of the financial year, the director Mr. José Luis Aya Abaurre passed away on 12 February 2016. Furthermore, on 8 March 2016 the Company's Board of Directors agreed to cover the vacancy left on the Board due to the death of Mr. José Luis Aya Abaurre by co-optation, thereby appointing the company Inayaba, S.L. as Director and Ms. Ana Abaurrea Aya as individual representative.

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors adopted the following agreements:

- Appoint Mr. Antonio Fornieles Melero, who until present held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, delegating all powers to him except those which cannot be delegated by Law, until attaining the status of Executive Director.
- Delegate all powers, except those which cannot be delegated by Law, to the Managing Director, Mr. Joaquín Fernández de Piérola Marín, thereby becoming Chief Executive.
- Remove Mr. José Domínguez Abascal as Chairman, whereby he remains as director with the category of other external director.

Furthermore, on 8 March 2016 Abengoa's Board of Directors adopted the following agreements:

- Appoint Mr. Joaquín Fernández de Piérola Marín as First Vice-Chairman of the Board of Directors, thereby merging this position with that of Managing Director (CEO).
- Appoint Ms. Alicia Velarde Valiente as Second Vice-Chairwoman and Coordinating Director.

As a result, as of the date of approval of this report, the Company has a total of 3 Executive Directors, 4 external Proprietary Directors, 5 external Independent Directors and 1 external Director (others).

**C.1.10**

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors adopted the following agreements:

- Appoint Mr. Antonio Fornieles Melero, who until present held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, delegating all powers to him except those which cannot be delegated by Law, until attaining the status of Executive Director.
- Delegate all powers, except those which cannot be delegated by Law, to the Managing Director, Mr. Joaquín Fernández de Piérola Marín, thereby becoming Chief Executive.
- Remove Mr. José Domínguez Abascal as Chairman, whereby he remains as director with the category of other external director.

Furthermore, on 8 March 2016 Abengoa's Board of Directors adopted the following agreement:

- Appoint Mr. Joaquín Fernández de Piérola Marín as First Vice-Chairman of the Board of Directors, thereby merging this position with that of Managing Director (CEO).

**C.1.13**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, article 14 of the Board of Directors' Regulations was amended to expressly include the maximum number of company boards (excluding companies belonging to the Group) on which its directors can serve.

**C.1.17**

It is hereby stated that, after the close of the financial year, the director Mr. José Luis Aya Abaurre passed away on 12 February 2016.

Furthermore, on 26 February 2016 Mr. José Domínguez Abascal stood down as Director of Inversión Corporativa IC, S.A.

**C.1.18**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, certain articles of the Board of Directors' Regulations were amended to adapt its content to the new corporate governance recommendations included in the Code of Good Governance for Listed Companies approved by virtue of a decision made by the CNMV Board on 18 February 2015.

**C.1.21**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, article 13 of the Boards' Regulations was amended to include additional cases where Directors are obliged to surrender their posts to the Board of Directors.

**C.1.32**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Boards' Regulations and the Audit Commission's Regulations were amended to explicitly include the following within the Audit Commission's functions: "Strive to ensure that the Board of Directors can present the Company's accounts at the General Shareholders' Meeting without limitations or qualifications in the external auditor's report, whereby the Chairman of the Audit Commission, along with the external auditor, must explain the scope of any such limitations or qualifications to the shareholders".

**C.1.35**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Boards' Regulations and the Audit Commission's Regulations were amended to explicitly include the following within the Audit Commission's functions: "Ensure that the remuneration of the external auditor does not compromise their quality or independence".

**C.1.42**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, articles 13 and 14 of the Boards' Regulations was amended to include (i) an additional case where Directors are obliged to surrender their posts to the Board of Directors "in cases where the image and reputation of the company may be at stake" and (ii) the Directors' obligation to inform the Board of any criminal charges brought against them, as well as any other related legal proceedings.

**C.1.45.**

After the close of the financial year, on 1 March 2016, Abengoa's Board of Directors removed Mr. José Domínguez Abascal as Executive Chairman, whereby he remains as director with the category of other external director.

On 2 March 2016, Mr. José Domínguez Abascal chose to be reinstated in his previous position, thereby not receiving any amount set out in his business contract as severance pay due to early termination/post-contractual non-competition agreement.

On 7 March 2016, the company's Board of Directors determined, on the motion of its Appointments and Remuneration Commission, that on the date of his removal as Executive Chairman of Abengoa, the conditions required for payment of said one-off compensation had not been met, and consequently, there are no grounds for payment thereof.

**C.2.1**

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors appointed Mr. Antonio Fornieles Melero, who until present had held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, thereby attaining the status of Executive Director and no longer forming part of the Audit Commission. Furthermore, on 8 March 2016 Abengoa's Board of Directors appointed Ms. Alicia Velarde Valiente as Second Vice-Chairwoman and Coordinating Director, also appointing her as Chairwoman of the Audit Commission.

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Board of Directors' Regulations and the Audit Commission's Regulations were amended to adapt the content to the new corporate governance recommendations included in the Code of Good Governance for Listed Companies approved by virtue of a decision made by the CNMV Board on 18 February 2015. More specifically, the Audit Commission's functions were expanded and it is stated that the majority of Audit Commission members must be independent Directors, bearing in mind, while appointing members, their knowledge and experience regarding accounting, auditing and risk management.

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors appointed Mr. Antonio Fornieles Melero, who until present had held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, thereby attaining the status of Executive Director and no longer forming part of the Appointment and Remuneration Commission.

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Board of Directors' Regulations and the Appointment and Remuneration Commission's Regulations were amended to adapt the content to the new corporate governance recommendations included in the Code of Good Governance for Listed Companies approved by virtue of a decision made by the CNMV Board on 18 February 2015. More specifically, the Appointment and Remuneration Commission's functions were expanded and it is stated that the majority of Appointment and Remuneration Commission

members must be independent Directors, bearing in mind, while appointing members, any knowledge, skills and experience they hold specific to the roles they will carry out.

It is hereby stated that, after the close of the financial year, the director Mr. José Luis Aya Abaurre passed away on 12 February 2016. Furthermore, on 8 March 2016 the Company's Board of Directors agreed to cover the vacancy left on the Board due to the death of Mr. José Luis Aya Abaurre by co-optation, thereby appointing the company Inayaba, S.L. as Director and Ms. Ana Abaurrea Aya as individual representative. She was also appointed as a member of the Strategy and Technology Commission.

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors adopted the following agreements, which affect certain Investment Commission members:

- Appoint Mr. Antonio Fornieles Melero, who until present held the positions of Vice-Chairman and Coordinating Director, as Executive Chairman, delegating all powers to him except those which cannot be delegated by Law, until attaining the status of Executive Director, thereby no longer forming part of the Investment Commission.
- Remove Mr. José Domínguez Abascal as Chairman, whereby he remains as director with the category of other external director, thereby no longer forming part of the Investment Commission.

Furthermore, on 8 March 2016 Abengoa's Board of Directors adopted the following agreements which affect certain members of the Investment Commission:

- Appoint Mr. Joaquín Fernández de Piérola Marín as First Vice-Chairman of the Board of Directors, thereby merging this position with that of Managing Director (CEO). He was also appointed as a member of the Investment Commission in replacement of Mr. José Domínguez Abascal.
- Appoint Ms. Alicia Velarde Valiente as Second Vice-Chairwoman and Coordinating Director, also appointing her as member and Chairwoman of the Investment Commission.

**C.2.5**

After the close of the financial year, by virtue of a decision made by the Board of Directors dated 30 March 2016, the Audit Commission's Regulations and the Appointment and Remuneration Commission's Regulations were amended to adapt the content to the new corporate governance recommendations included in the Code of Good Governance for Listed Companies approved by virtue of a decision made by the CNMV Board on 18 February 2015.

**D.3**

It is hereby stated that, after the close of the financial year, on 1 March 2016, Abengoa's Board of Directors agreed to terminate the service provision agreement entered into between Abengoa and Mr. Felipe Benjumea Llorente on 23 September 2015.

**D.7**

It is hereby stated that, after the close of the financial year, on 7 January 2016, Abengoa Yield, plc informed the Securities and Exchange Commission of the United States that it was changing its corporate name to Atlantica Yield.

**Other information**

In 2013, Abengoa started to draw up a "corporate compliance" program which it continued to develop in 2014 and 2015.

The concept of "corporate compliance" was introduced in adherence to international practices and to specific compulsory legal rules and regulations, especially practiced in Anglo-Saxon Law and, from December 2014 onwards, in Spain. Up until the Transparency Law and, most recently, Law 31/2014, of December 3, which amends the Corporate Law to improve corporate governance, became effective and enforceable in Spain, good governance recommendations were only as such, recommendations. They were not binding even though, on the international markets, companies were legally obliged to comply with certain codes of conduct to prevent fraud, among other bad practices. Notwithstanding the above, due to the increase in getting closer to the international markets as well as to the recent promulgation of Law 31/2014, it is now necessary, on the one hand, to harmonize the international practice with the Spanish laws, thus introducing the concept of criminal liability for legal entities and, on the other, to adapt the various company standards to the new amendments introduced in the Corporate Law.

The goal and objective that Abengoa hopes to attain by creating this program and by adapting its standards to the recent amendments in the Corporate Law on the aspect of corporate governance is for the Board of Directors and the management to apply and

practice ethics, legality and efficacy in business transactions (good governance), with the organization's systematic focus on evaluating and managing risks, and to ensure that the organization and its employees comply with the existing laws, regulations and standards, including the company's behavioral standards (regulatory compliance), with Abengoa exercising the due control and providing a strategic vision to tackle the legal needs of the organization. The creation of a regulatory compliance monitoring program by introducing an effective system of good governance and crime prevention is an inevitable resource for the reputation of Abengoa.

Abengoa's corporate compliance program establishes standards and procedures for detecting and preventing bad corporate practices, with the Board of Directors acting as the authority in supervising the implementation and improvement of the compliance program and creating the internal post of compliance officer. An appropriate "corporate compliance program" requires an evaluation of the criminal, social and corporate good governance risks, a monitoring authority, a follow-up, action and surveillance program, as well as an important ongoing training program for employees.

This Annual Corporate Governance Report was approved by the company's Board of Directors at its meeting held on _____.

# 03.2 Annual report from the appointments and remunerations committee

# A. The company's remuneration policy for the ongoing year

## A.1. Abengoa's remuneration policy for the ongoing financial year (2016)

In Abengoa, S.A. (hereinafter, "Abengoa" or the "Company" or "Corporation") it is considered important to maintain policies geared towards proposing long-term professional careers in the Group of which Abengoa is the parent company (hereinafter, the "Group") and, at the same time, promoting the Company and its Group's long-term profitability and sustainability, maintaining a reasonable proportion with the importance of the Company, its economic situation at all times and the market standards of companies with similar magnitude. Abengoa's business transactions and operations are conducted in extremely competitive fields in which the achievement of goals and objectives greatly depend on the quality, work capacity, dedication, and the business knowledge of the persons holding the key posts and leading the organization.

These premises determine the Group's remuneration policy in general, that of the directors, in particular, and especially that of the executives, which should make it possible to attract and retain the most distinguished professionals.

Consequently, the aim of the remuneration policy for members of the Board is as follows:

- Remuneration for the supervisory and decision-making duties performed as members of the Board of Directors should be appropriate to reward the dedication, qualification, and the responsibility required for the performance of the duties of member of the Board, bearing in mind the duties performed on the Board of Directors and the Commissions on which they serve.
- Regarding the remuneration of executive directors for performing their executive duties:
  - (i) Ensure that the overall remuneration package and its structure are competitive in comparison with the international sector and compatible with our vocation of leadership.
  - (ii) Maintain an annual variable component linked to the achievement of specific and quantifiable objectives that are in line with the interests of shareholders.

The criteria for establishing a director remuneration policy are in conformity with the provisions of the Spanish Corporate Law (Articles 217 to 219, 249 and 529o to 529r), those of the Bylaws (Article 39) and those of the Regulations of the Board of Directors (Article 20), establishing various criteria depending on whether or not the director performs executive duties:

- Remuneration of members of the Board for their condition as such

The position of director is remunerated following the stipulations of article 39 of the Bylaws. The remuneration may consist of a fixed amount agreed by the General Assembly, which is not necessarily equal for all members. They could also receive an allotment of a share in the Company's profits, of between 5 and 10 percent maximum of the annual profit after subtracting the dividend for the financial year at hand, which shall not be under 4 percent of the paid-in capital in accordance with article 48 of the Bylaws, plus reimbursement of expenses from trips undertaken in the performance of duties entrusted by the Board, and remuneration for Board Commission memberships and, where applicable, for holding the office of Chairperson of the Board.

The maximum annual amount of remuneration payable to the entire Board of Directors for their condition as such shall therefore not exceed the amount of the result of adding, as the case may be, the amount of shares in the company profits, travel expenses and allowance for Commission membership or for holding the office of Chairperson, to the fixed amount agreed upon by the General Assembly. The preceding, understood notwithstanding the remuneration payable to executive members of the Board for the performance of executive duties attributed to such office, different from supervisory and decision-making duties performed by mere members of the Board of Directors.

Determining the remuneration of each Board director for his/her condition as such shall remain the duty of the Board of Directors who, for the purpose thereof, shall consider the duties and responsibilities attributed to each director, their membership of Board Commissions and all other objective circumstances deemed relevant.

- Remuneration for the performance of duties other than those attributed to directorship.

This includes director remuneration for performing executive duties or those of another nature, other than those of supervision and decision-making exercised on the Board or its Commissions.

This remuneration is compatible with receiving payment as set forth in the bylaws and any allowances which they may be due given their condition as members of the Board of Directors.

Remuneration packages for the performance of executive duties include the following basic elements:

› (a) Fixed remuneration

This amount must be in line with that received by executive directors of companies comparable to Abengoa on the market according to the leadership position Abengoa strives to achieve. In order to determine this, market studies conducted by external consultants are taken into account.

Fixed remuneration consists of a fixed gross amount paid annually, divided into twelve equal monthly payments.

› (b) Variable annual remuneration (bonus)

Variable annual remuneration (or bonus) for executive directors is essentially linked to achieving targets. **Said targets are linked to the Earnings Before Interest, Taxes, Depreciation and Amortization** (*EBITDA*). Based on these criteria, a range of total variation of the variable remuneration of executive directors is estimated at the start of financial year.

Variable remuneration corresponds to the annual bonus and is paid in one single payment (accrued for all purposes in the financial year it is settled, where applicable).

The relative weight and the criteria for determining the variable remuneration for executive directors are based on the following:

- Market references based on information provided regarding remuneration by renowned market consultants.
- The main criteria for accrual of variable annual remuneration is achieving the EBITDA target, whether for Abengoa in general or, for executive directors holding non-general responsibilities, commensurate with that of their area of responsibility.
- At the end of the financial year, this basic quantitative element will be considered together with other qualitative non-financial elements aimed at creating long-term value, which may vary from year to year, such as, for example, compliance with the company's internal corporate governance regulations and its policies on risk control and management, which then allows for adjustment of the decision on the actual amount of variable remuneration.

The Chief Executive, Mr. Joaquín Fernández de Piérola Marín, is a beneficiary of the extraordinary variable compensation schemes for executives described in section A.4 and following herein, remuneration that is not tied to the company's share value under the terms and conditions envisaged in article 219 of Spanish Corporate Law, even though the right to receive, rather than the amount to be received in itself, initially depends on whether the company's Class B shares attain specific price quotations goals, a prerequisite, nevertheless, that the Appointments and Remuneration Commission of the Company can decide to overlook if exceptional circumstances occur on the stock market that may be deemed justifiable by the aforementioned. Therefore, there are no significant changes in the remuneration policy of the Board of Directors for this ongoing financial year in comparison to the remuneration policy applied in past financial years, insofar as directors' compensation still does not include share packages or share options.

## **A.2.** Process to determine the remuneration policy

By virtue of the directive issued by the Board of Directors, the remuneration policy for Abengoa's Board of Directors, stated in this report, shall be prepared, discussed and formulated by the Appointments and Remuneration Commission, with the resulting proposal then being submitted to the Board of Directors at the start of each financial year for subsequent submission for approval to the Company's Ordinary General Shareholders' Meeting, at least once every three years.

Below are the current members of the Appointments and Remuneration Commission, and, as such, the main participants in defining the remuneration policy:

| | | |
|---|---|---|
| Mercedes Gracia Díez | Chairwoman | Independent Director |
| José Borrell Fontelles | Member | Independent Director |
| Alicia Velarde Valiente | Member | Independent Director |
| Juan Carlos Jiménez Lora | Secretary | Non-board member |

Ms. Gracia Díez was appointed member of the Commission in a meeting of the Board of Directors of Abengoa, S.A. held on 12 December 2005, and elected as Chairwoman in a meeting of the Appointments and Remuneration Commission held on 17 March 2015; the Secretary was appointed in the meeting of the Appointments and Remuneration Commission held on 23 June 2014.

Mr. Antonio Fornieles Melero is no longer a member of the Commission as of 1 March 2016 due to his appointment as the new Executive Chairman of the company's Board of Directors, replacing Mr. José Domínguez Abascal.

Consequently, the Appointments and Remuneration Commission has three independent directors and its Chairwoman was appointed from among the independent directors. Therefore, the requirements established in Spanish Corporate Law are met. In addition, in accordance with the provisions of article 2 of the Internal Regulations, the position of Chairperson of the Commission must go to an independent director.

No external consultants were involved in determining the remuneration policy, notwithstanding the fact that the previous section A.1.(b) stated that in order to determine the variable remuneration of executive directors, market references are taken into account based on information regarding remuneration provided by renowned market consultants.

## **A.3.** Fixed components of remuneration

In Abengoa, only the executive directors have fixed remuneration as compensation for the performance of their executive duties. In 2015, the amount accrued as salaries for executive directors amounted to €3.298 million euros.

Both the allowance of the Board of Directors as well as the amounts payable for commission membership or chairmanship, are payable solely for attendance. Below are the amounts accrued in 2015 for said items:

- Allowances of the Board of Directors: €1.782 million euros.
- Membership or chairmanship of commissions: €355,000 euros.

Likewise, certain executive directors are offered life and accident insurance coverage for which the Company paid premiums to the value of €2,100 euros in 2015.

## **A.4.** Variable components of the remuneration systems

To date, the variable annual remuneration (or bonus) for executive directors has been essentially linked to achieving EBITDA-related targets, as well as other qualitative non-financial elements aimed at creating long-term value. Based on these criteria, a range of total variation of the variable remuneration of executive directors is estimated at the start of financial year. The variable remuneration corresponds to the annual bonus payable in one single payment.

The total amount of bonuses accrued by executive directors during the 2015 financial year amounted to €10.719 million euros.

Regarding the 2016 financial year, bearing in mind the company's present circumstances, there is no variable compensation system specified for any of its executive directors, although the contract of Mr. Fernández de Piérola (who was appointed Chief Executive on 1 March 2016) establishes that the Board of Directors, on the motion of its Appointments and Remuneration Commission, may establish variable annual compensation for him in the event that his assigned annual targets are met.

In the same way, the Appointments and Remuneration Commission is analyzing whether or not it is convenient to begin a study on possible variable compensation linked to achieving targets related to the restructuring process the company is currently immersed in, in order to, in turn, propose to the Board of Directors that any applicable agreements be adopted, including considering the Chief Executive as a potential beneficiary of this compensation.

Extraordinary Variable Compensation Plans for Executives

There are currently two extraordinary long-term variable compensation plans for Executives.

**1.** Extraordinary Variable Compensation Plan for Executives, January 2014

This plan, which replaces and leaves invalid the Extraordinary Plan previously approved in February 2011, was itself approved by the Board of Directors of the Company in January 2014 as proposed by the Appointments and Remuneration Commission.

The plan includes the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, among other executives, as a beneficiary, and is due to expire on 31 December 2017.

The following conditions are established for payment thereof:

- a) that the beneficiary remain in employment with the company until the plan ends.
- b) that the beneficiary be entitled to receive the annual bonus for each financial year of the period in question.
- c) the degree of compliance (in terms of objectives) shall be 20% annually, notwithstanding the requirement to remain as an employee of the Company until 31 December 2017.

- d) that the 2017 Business Group's and/or Abengoa's consolidated budget be complied with based on the Strategic Plan in force at the time.
- e) that the average trading price of Abengoa's Class B shares not be lower than a specified value for the last three months of 2017.

In the event that a beneficiary of said plan ceases to be such before the maturity deadline (whether voluntarily or as consequence of a legal dismissal), said beneficiary shall not be entitled to any payments whatsoever pursuant to the plan.

In the event of the passing of a beneficiary, the plan shall be halted with the heirs entitled to the total or consolidated amount owed to said beneficiary for the financial year prior to his/her passing, calculated based on the category of the executive.

In the event of a beneficiary's retirement as a result of reaching the age established by law or due to complete permanent disability (preventing him/her from doing any other kind of work) before the Plan's scheduled maturity date, said beneficiary shall be entitled to the amount consolidated during the completed financial years preceding such retirement, as long as the other established conditions are met.

At the end of the 2015 financial year, the recognized accumulated expense regarding the plan was reversed due to considering compliance with all of the requirements established unlikely as a result of the current situation the Company is facing, which has brought along the communication set out in article 5 bis of the Spanish Insolvency Law 22/2003, of 9 July (hereinafter, "Insolvency Law "). Notwithstanding the foregoing, in the event that the plan is executed, the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, as a beneficiary of the plan, would receive the sum that corresponds to him from the Company, up to a maximum of 520,000 euros. The amount that actually corresponds to him shall be determined by the Company's Appointments and Remuneration Commission upon maturity of the plan, after having checked fulfillment of the objectives and the rest of the parameters that accrual of the compensation pertaining to the plan is subject to.

**2.** Extraordinary Variable Compensation Plan for Executives, July 2014

This plan was approved by the Board of Directors of the Company in July 2014 as proposed by the Appointments and Remuneration Commission.

The plan includes the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, as a beneficiary, among other executives. The duration of the plan is five years (2014-2018) and it is scheduled to mature on 31 December 2018.

The following conditions are established for payment thereof:

- a) that the beneficiary remain in employment with the company until the plan ends.
- b) for those executives whose total or partial remuneration is linked to the fulfillment of individual objectives, the beneficiary must have been entitled to the annual bonus.
- c) the degree of compliance (in terms of objectives) shall be 20% annually, notwithstanding the requirement to remain as an employee of the Company until 31 December 2018.
- d) that the average trading price of Abengoa's Class B shares not be lower than a specified value for the last three months of 2018.

In the event of resignation (voluntary or by dismissal) the plan shall be halted without any payment whatsoever being made.

In the event of the passing of a beneficiary, the plan shall be halted with the heirs entitled to the total or consolidated amount owed to said beneficiary for the financial year prior to his/her passing, calculated based on the category of the executive.

In the event of a beneficiary's retirement as a result of reaching the age established by law or due to complete permanent disability (preventing him/her from doing any other kind of work) before the Plan's scheduled maturity date, said beneficiary shall be entitled to the amount consolidated during the completed financial years preceding such retirement, as long as the other established conditions are met.

At the end of the 2015 financial year, the recognized accumulated expense regarding the plan was reversed due to considering compliance with all of the requirements established unlikely as a result of the current situation the Company is facing, which has brought along the communication set out in article 5 bis of the Spanish Insolvency Law. Notwithstanding the foregoing, in the event that the plan is executed, the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, as a beneficiary of the plan, would receive the sum that corresponds to him from the Company, up to a maximum of 180,000 euros. The amount that actually corresponds to him shall be determined by the Company's Appointments and Remuneration Commission upon maturity of the plan, after having checked fulfillment of the objectives and the rest of the parameters that accrual of the compensation pertaining to the plan is subject to.

## A.5. Long-term savings systems

The compensation package for Abengoa directors does not include any long-term savings system.

## A.6. Compensation

There is no provision for the payment of any compensation whatsoever to directors in the event of termination of their duties as such, and no compensation was paid for these purposes during the 2015 financial year. Compensation shall only be paid in the event of termination of executive duties, which can, in turn, be performed, as detailed in section A.7 below.

## A.7. Conditions of contracts signed with executive directors

Based on proposals by the Appointments and Remuneration Commission, the Board of Directors fixes the remuneration of executive directors for the performance of their executive duties and other basic conditions that must be respected in their contracts, duly approved by the Board of Directors under the terms and conditions set out in article 249 of the Spanish Corporate Law. Said conditions are as follows:

› a) Permanent

Contracts of executive directors of the Company are permanent and envisage financial compensation for cases of termination of the contractual relationship with the Company, as long as such termination is not exclusively due to the free will of the executive director or as a consequence of failing to fulfill their obligations (notwithstanding the amounts corresponding to them due to their non-competition obligation in accordance with the provisions of the subsequent section c). Therefore, the only executive director who, upon the date of issue of this report, is contractually entitled to receive this type of compensation is the Chief Executive, Mr. Joaquín Fernández de Piérola Marín.

› b) Applicable regulations

The regulations applicable to executive director contracts is stipulated by the legal system in each case.

› c) Non-competition

In all cases, the contracts of executive directors establish a non-competition obligation in relation to companies and activities of a similar nature while their relationship with the Company is still ongoing.

Additionally, the business contract of the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, includes a post-contractual non-competition agreement for a period of time after his relationship with the Company has come to an end, which shall last for twelve or twenty-four months depending on whether the relationship ends due to the Company's will or the director's and which shall be compensated in the terms set out in the following section (e). If the director fails to comply with the aforementioned post-contractual non-competition agreement, he must pay the Company a penalty equal to 100% of the remuneration received during the financial year immediately before his relationship with the Company came to an end.

› d) Non-disclosure and return of documents

A strict non-disclosure duty is imposed, both during the validity of the contracts as well as upon termination of the relationship. In addition, once the relationship with the Company has ended, executive directors must return to the Company all documents and objects in their possession relating to their activity.

› e) Indemnity clauses

The business contract of the Chief Executive, Mr. Joaquín Fernández de Piérola Marín, entitles him to compensation of an amount equivalent to 100% of the remuneration received by Mr. Fernández de Piérola Marín in the previous financial year, both in the event of early termination of his contractual relationship with the company where not due to incompliance of any obligations corresponding to the Chief Executive or exclusively due to his will , and compensation due to the non-competition agreement described in the previous section (c) (hereinafter, "severance pay due to early termination/post-contractual non-competition agreement").

Both types of compensation are incompatible. As a result, if the director receives severance pay due to early termination, he/she would not be entitled to receive compensation due to a non-competition agreement. Any breach of this non-competition obligation shall, at all times, lead to the compensation sum received by the Executive Director being given back, regardless of the reason why it was received.

During the 2015 financial year, the company paid both the former Executive Chairman of the company, Mr. Felipe Benjumea Llorente, and the former Chief Executive of Abengoa, Mr. Manuel Sánchez Ortega, the sum of 4,484 thousand of euros each, as severance pay due to early termination/post-contractual non-competition agreement.

In addition, during the 2015 financial year, the company paid the former Executive Chairman of the company, Mr. Felipe Benjumea Llorente, the sum of 7,000 thousand of euros pursuant to a length of service bonus which was stated in the business contract signed with the company.

Furthermore, it is hereby stated that in accordance with the service provision business contract signed with the former Executive Chairman, Mr. José Domínguez Abascal was entitled, in the event that the company dismissed him, to choose between the severance pay due to early termination/post-contractual non-competition agreement described above, which in the case of Mr. Domínguez Abascal amounted to a sum equivalent to 100% of the remuneration accrued in the previous financial year, or reinstatement in his previous position. After his removal as Executive Chairman, Mr. Domínguez Abascal chose to be reinstated in his previous position.

› f) One-off compensation for the former Executive Chairman

Additionally, the contract of the former Executive Chairman, Mr. José Domínguez Abascal, entitled him to receive, as a one-off compensation payment corresponding to the 2016 financial year, a sum equal to the gross amount of his fixed annual remuneration which is 700,000 thousand of euros, subject to the following during the 2016 financial year:

- An agreement being reached with the financial and/or commercial creditors in the process of restructuring the company's balance sheet; and/or
- an agreement being reached with investors, where applicable, for them to become Abengoa shareholders or which, in some way, strengthens the structure of the company capital and/or provides a solution for the current financial situation the company is faced with,

thereby, in one or both of these cases, preventing the company from having to declare insolvency proceedings during the 2016 financial year or, if not prevented, enabling the company to regain solvency and halt the proceedings, also during the 2016 financial year.

On 7 March 2016, the company's Board of Directors determined, on the motion of its Appointments and Remuneration Commission, that on the date of his dismissal as Executive Chairman of Abengoa, the conditions required for payment of said compensation had not been met, and consequently, there are no grounds for payment thereof.

## **A.8.** Additional Remuneration

As of 31 December 2015, there was no additional remuneration accrued by the directors of Abengoa.

## **A.9.** Advances, credits and guarantees granted

As of the date of this report, there were no advances, credits or guarantees granted to members of the Board of Directors of Abengoa.

## **A.10.** Remuneration in kind

The concept of remuneration in kind is reduced to the premiums paid by the Company for life and accident insurance for specific executive directors.

## **A.11.** Remuneration accrued by directors by virtue of payments made to a third party entity

No payments were made to any company for the purpose of remunerating the services rendered to Abengoa by external directors.

## **A.12.** Other payable items

There are no other items payable other than those outlined in previous sections.

## **A.13.** Actions put in place to reduce risks

To ensure the effective running of the organization and to guarantee the Company's long-term future, in addition to good strategic planning, it is essential that there is accurate and rigorous management that considers the risks associated with the company's activity itself and anticipates how to mitigate them.

Thus, Abengoa has its own global system for managing risks, included within the common management systems, which means risks can be controlled and identified. It is regularly updated for the purpose of creating a culture of common management, achieving the objectives set in the area and having the capacity to adapt in order to mitigate any threats that may surface in an environment as competitive as the present.

The introduction of this system enforces the following:

- Risk management at all levels of the organization, without any exceptions.
- Its full integration into the strategy and the systems in order to achieve the objectives set.
- The full support of management to evaluate, follow-up and comply with guidelines relating to the management of threats.

This risk management system is based on three tools:

- The mandatory rules (NOC in Spanish).
- The mandatory processes (POC in Spanish).
- The Universal Risk Model (URM).

Compliance with the aforementioned is guaranteed through the checks carried out by the Internal Audit Department and at committee meetings regularly held with senior staff and the Chairman.

These tools and common management systems are designed from quality standards aimed at complying with international rules and regulations such as the ISO 31000 and the Sarbanes-Oxley Act, and have been certified by companies of international repute.

The Universal Risk Model (URM) is the methodology that Abengoa uses to identify, understand and evaluate the risks that may affect the Company. Its main purpose is to obtain a comprehensive view of them, thereby designing an efficient system that is in line with the business goals and objectives of Abengoa.

The URM consists of over 55 risks that belong to 20 different categories grouped into 4 large areas: financial, strategic, regulations and transactions.

The URM is subject to annual revisions to ensure that the calculations designed for each risk are the most appropriate for the day-to-day operations of the Company.

# C. Overall summary of how the remuneration policy was applied during the last financial year.

## C.1. Remuneration policy applied during the financial year: structure and payable items

The structure and remuneration components of Abengoa directors vary based on whether or not the director is an executive, and is approved by the Board of Directors, as part of the director remuneration policy that this report deals with:

- Remuneration for non-executive director post

The position of director is remunerated following the stipulations of article 39 of the Bylaws. The remuneration may consist of a fixed amount agreed by the General Assembly, which is not necessarily equal for all members. They could also receive an allotment of a share in the Company's profits, of between 5 and 10 percent maximum of the annual profit after subtracting the dividend for the financial year at hand, which shall not be under 4 percent of the paid-in capital in accordance with article 48 of the Bylaws, plus reimbursement of expenses from trips undertaken in the performance of duties entrusted by the Board, and remuneration for Board Commission memberships and, where applicable, for holding the office of Chairperson of the Board.

- Remuneration for the performance of other non-board member duties in the Company

This includes director remuneration for performing executive duties or those of another nature, other than those of supervision and decision-making exercised on the Board or its Commissions.

This remuneration is compatible with receiving payment as set forth in the bylaws and any allowances which they may be due given their condition as members of the Board of Directors.

Remuneration packages for the performance of executive duties include the following basic elements:

- (a) Fixed remuneration

This amount must be competitive in comparison to the market standard in line with the leadership position Abengoa strives to achieve. In order to determine this, market studies conducted by external consultants are taken into account.

› (b) Variable annual remuneration (bonus)

The variable annual remuneration (or bonus) for executive directors is essentially linked to achieving EBITDA-related targets, as well as other qualitative non-financial elements aimed at creating long-term value. Based on these criteria, a range of total variation of the variable remuneration of executive directors is estimated at the start of financial year.

Variable remuneration corresponds to the annual bonus and is paid in one single payment.

# **D.** Breakdown of individual remuneration accrued by each director

## **D.1** Breakdown of individual remuneration accrued by directors

**a) Remuneration accrued in Abengoa, S.A. (in thousands of euros):**

| Name | Type | Period | Salary | Fixed remuneration | Allowances | Short-term variable remuneration [14] | Long-term variable remuneration | Remuneration for Board Commission memberships | Severance compensation | Other items | Total Financial year 2015 | Total Financial year 2014 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Felipe Benjumea Llorente [1] | Executive | 01/01-23/09 | 814 | | 68 | 3,304 | | | 4,484 [11] | 7,000 [12] | 15,671 | 4,484 |

| Joaquín Fernández de Piérola Marín [10] | Executive | 27/11-31/12 | 23 | | | | | | | | 23 | 0 |
| Total | | | 3,298 | 0 | 1,782 [13] | 10,719 | 0 | 355 [13] | 8,968 | 7,000 | 32,123 | 15,757 |

Note (1): Mr. Felipe Benjumea Llorente submitted his resignation from his position as director of Abengoa in writing to the Board of Directors on 23 September 2015 as a result of having been removed as Executive Chairman and as part of certain commitments undertaken by the Company with certain financial entities. The removal of Mr. Felipe Benjumea came about due to a non-negotiable requirement by the underwriting and financing banks within the framework of a capital increase that the Company needed to address. Subsequently, during the third quarter of 2015 until 1 March 2016, he worked as consultant to the Board of Directors, pursuant to the consultancy agreement signed with Abengoa and which was terminated on that same date. Mr. Benjumea Llorente has renounced any sum that he may have been entitled to pursuant to this agreement.
Note (2): Represented by Mr. José B. Terceiro Lomba. Aplidig, S.L. submitted its resignation as director of Abengoa on 19 January 2015.
Note (3): Mr. Sánchez Ortega submitted his resignation from his position as Chief Executive of Abengoa on 18 May 2015, being replaced by Mr. Santiago Seage Medela, and subsequently, on 27 July 2015, also from his position as Company director. Until resigning from his position as Abengoa director on 27 July 2015, Mr. Sánchez Ortega performed certain duties aimed at facilitating the transition and integration of the new Chief Executive of the Company in terms of the service provision business contract.
Note (4): Ms. Benjumea Llorente submitted her resignation as Abengoa director on 18 May 2015, subsequently returning to the Board of Directors on 27 July 2015. Finally, on 10 October 2015, within the framework of the Company's Extraordinary General Shareholders' Meeting held on that same date, she again submits her resignation as director of Abengoa.
Note (5): Mr. Solís Martínez-Campos submitted his resignation as Abengoa director on 10 October 2015, within the framework of the Company's Extraordinary General Shareholders' Meeting held on that same date.
Note (6): Mr. Sundheim Losada submitted his resignation as Abengoa director on 10 October 2015, within the framework of the Company's Extraordinary General Shareholders' Meeting held on that same date.
Note (7): Mr. Fornieles Melero was appointed independent director of Abengoa on 19 January 2015, replacing Aplidig, S.L. Subsequently, on 1 March 2016, Mr. Fornieles Melero was appointed Executive Chairman of Abengoa's Board of Directors, replacing Mr. José Domínguez Abascal.
Note (8): Mr. Seage Medela was appointed director of the Board and Chief Executive of Abengoa on 18 May 2015, replacing Mr. Sánchez Ortega. He subsequently submitted his resignation as Chief Executive of Abengoa and director of the Board on 27 November 2015.

Note (9): Mr. Domínguez Abascal was appointed proprietary director and non-executive Chairman of Abengoa's Board of Directors on 23 September 2015, replacing Mr. Felipe Benjumea Llorente. Subsequently, on 27 November 2015, Abengoa's Board of Directors approved that Mr. Domínguez Abascal was to be delegated all powers that may be delegated legally and pursuant to the bylaws. Subsequently, on 1 March 2016, Mr. Domínguez Abascal was removed as Executive Chairman of Abengoa's Board of Directors, being replaced by Mr. Fornieles Melero, and from that date on held the position of other external director.
Note (10): Mr. Fernández de Piérola Marín was appointed Managing Director of Abengoa, replacing Mr. Seage Medela, on 27 November 2015. Until being appointed Managing Director, Mr. Fernández de Piérola Marín carried out the role of Chairman of the Board of Directors of Abengoa México, S.A. de C.V. Subsequently, on 1 March 2016, Mr. Fernández de Piérola Marín was appointed Chief Executive of Abengoa.
Note (11): As severance pay due to early termination/post-contractual non-competition agreement.
Note (12): As a length of service bonus.
Note (13): The total amount accrued is shown, although at the time this report was issued the allowances amount was still pending payment for those relating to the Board of Directors meeting held in December in the 2015 financial year (132,000 euros) and to the Strategy and Technology Commission meetings held in November and December in the 2015 financial year (60,000 euros).
Note (14): This corresponds to fulfillment of the objectives set for the 2014 financial year.

As has been described in previous sections, the Company has no share-based remuneration system or any long-term savings system. In the same way, at the time of this report, there were no advances, credits or guarantees granted to members of Abengoa's Board of Directors.

In the 2015 financial year, the Company paid €2,100 euros for life and accident insurance premiums for the following executive directors:

| Name / Type | Financial year 2015 | Financial year 2014 |
|---|---|---|
| Felipe Benjumea Llorente / Executive | 0.4 | 1 |
| Manuel Sánchez Ortega / Executive | 0.3 | 1 |
| Javier Benjumea Llorente / Executive | 0.5 | _ |
| Santiago Seage Medela / Executive | 0.2 | _ |
| José Domínguez Abascal / Executive | 0.5 | _ |
| Joaquín Fernández de Piérola Marín / Executive | 0.1 | _ |
| Total | 2.1 | 2 |

**b) Remuneration accrued by the directors of Abengoa, S.A. for membership of Boards in other Group companies (in thousands of euros):**

| Name | Type | Accrual period Financial year 2015 | Salary | Fixed remuneration | Allowances | Short-term variable remuneration | Long-term variable remuneration | Remuneration for Board Commission memberships | Severance compensation | Other items | Total Financial year 2015 | Total Financial year 2014 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Javier Benjumea Llorente [1] | Executive | 01/01-31/12 | | | 52 [3] | | | | | | 52 [3] | 52 |
| María Teresa Benjumea Llorente [2] | Proprietary | 01/01-23/12 | | | 18 | | | | | | 18 | 24 |

Note (1): Represented by Mr. José B. Terceiro Lomba.

## D.2 Relationship between remuneration and profit/loss of the Company

- The essential reference for the variable annual remuneration is the evolution of the EBITDA, whether for Abengoa in general or, for executive directors holding non-general responsibilities, commensurate with the degree of responsibility.
- At the end of the financial year, this basic quantitative element will be considered together with other qualitative non-financial elements aimed at creating long-term value, which may vary from year to year, such as, for example, compliance with the company's internal corporate governance regulations and its policies on risk control and management, which then allows for adjustment of the decision on the actual amount of variable remuneration.
- Based on the criteria established for determining the annual bonus, it is paid in proportion to the degree of compliance with them.

## D.3 Result of advisory voting of the General Shareholders' Meeting regarding the annual report on remuneration of the previous financial year

| | Number | % of total |
|---|---|---|
| Votes cast | 5,995,649,505 | 65.371% |

| | Number | % of votes cast |
|---|---|---|
| Votes in favor | 5,577,536,637 | 93.027% |
| Votes against | 221,913,281 | 3.701% |
| Abstentions | 196,199,587 | 3.272% |

# E. Other information of interest

Regarding the remuneration policy applied at Abengoa, there are no other relevant elements than those already outlined in previous sections of this report.

This annual remuneration report was unanimously approved by a meeting of the Company's Board of Directors held on 30 March 2016.

**INDEPENDENT AUDITOR'S REPORT ON CONSOLIDATED FINANCIAL STATEMENTS**

To the Shareholders of
Abengoa, S.A.,

We have audited the accompanying consolidated statements of financial position of Abengoa, S.A. ("the Parent") and Subsidiaries ("the Company" or "the Group") as of December 31, 2015 and 2014, and the related consolidated statements of profit or loss, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the two years in the period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement or irregularities. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provides a reasonable basis for our opinion.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Abengoa, S.A. and Subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for the years then ended, in conformity with International Financial Reporting Standards as adopted by the European Union ("IFRS-EU").

Notes 2 and 4 to the consolidated financial statements describe the events that occurred in the second half of 2015 which led the Parent's directors to submit the notification provided for in Article 5 bis of Spanish Insolvency Law 22/2003 at Seville Commercial Court no. 2 on November 25, 2015, and to request similar proceedings for certain subsidiaries both in Spain and in other countries. On March 16, 2016, the Parent presented its business plan and financial restructuring proposal were previously agreed upon with a significant number of its financial creditors based on the aforementioned plan and which included, inter alia, the adherence of the financial creditors to a seven-month standstill agreement and which, following obtainment of the majorities required by current legislation, was accepted by Seville Commercial Court no. 2 on April 6, 2016. The aforementioned agreement provides for the negotiation of the restructuring of the Group's debt and capital in order to ensure the viability of its operations.

Deloitte S.L. Inscrita en el Registro Mercantil de Madrid, tomo 13.650, sección 8ª, folio 188, hoja M-54414, inscripción 96ª. C.I.F. B-79104469.
Domicilio social: Plaza Pablo Ruiz Picasso, 1, Torre Picasso, 28020, Madrid.

Therefore, the directors prepared the accompanying consolidated financial statements considering the entity's ability to continue as a going concern.

The above-mentioned events and their impact on the financial and economic position of the Group, as reflected in the accompanying consolidated financial statements for 2015, indicate the existence of a significant uncertainty as to the Group's ability to continue to operate as a going concern. Consequently, the recovery of the assets, the settlement of the liabilities and the fulfilment of the guarantee and collateral commitments for the amounts indicated in the accompanying consolidated financial statements will depend on the success of such financial and corporate restructuring measures as might be approved, on the performance of the Group companies' operations and on the possible future decisions that the Group's managers may make on dispositions of assets or business lines.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States of America), the Company's internal control over financial reporting as of December 31, 2015, based on the criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated April 20, 2016, expressed an unqualified opinion on the Company's internal control over financial reporting.

## INDEPENDENT AUDITOR'S REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders of
Abengoa, S.A.,

We have audited the internal control over financial reporting of Abengoa, S.A. ("the Parent") and subsidiaries ("the Company" or "the Group") as of December 31, 2015, based on the criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Responsibility for Financial Statements and Internal Control over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the Company's principal executive and financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Deloitte S.L. Inscrita en el Registro Mercantil de Madrid, tomo 13.650, sección 8ª, folio 188, hoja M-54414, inscripción 96ª. C.I.F. B-79104469
Domicilio social: Plaza Pablo Ruiz Picasso, 1, Torre Picasso, 28020, Madrid

Because of the inherent limitations of the system of internal control over financial reporting, including the possibility of collusion or improper management override of established controls, material misstatements may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States of America), the Company's consolidated financial statements for the year ended December 31, 2015, and our report dated April 20, 2016, expressed an unqualified opinion on those consolidated financial statements and included an emphasis of matter paragraph in relation to the Company's description in Notes 2 and 4 to the consolidated financial statements of the events that occurred in the second half of 2015 which led the Parent's directors to submit the notification provided for in Article 5 bis of Spanish Insolvency Law 22/2003 at Seville Commercial Court no. 2 on November 25, 2015, and to request similar proceedings for certain subsidiaries both in Spain and in other countries. On March 16, 2016, the Parent presented its business plan and financial restructuring proposal were previously agreed upon with a significant number of its financial creditors based on the aforementioned plan and which included, inter alia, the adherence of the financial creditors to a seven-month standstill agreement and which, following obtainment of the majorities required by current legislation, was accepted by Seville Commercial Court no. 2 on April 6, 2016. The aforementioned agreement provides for the negotiation of the restructuring of the Group's debt and capital in order to ensure the viability of its operations. Therefore, the directors prepared the accompanying consolidated financial statements considering the entity's ability to continue as a going concern. The above-mentioned events and their impact on the financial and economic position of the Group, as reflected in the accompanying consolidated financial statements for 2015, indicate the existence of a significant uncertainty as to the Group's ability to continue to operate as a going concern. Consequently, the recovery of the assets, the settlement of the liabilities and the fulfilment of the guarantee and collateral commitments for the amounts indicated in the accompanying consolidated financial statements will depend on the success of such financial and corporate restructuring measures as might be approved, on the performance of the Group companies' operations and on the possible future decisions that the Group's managers may make on dispositions of assets or business lines.

## Management's Reports on Responsibility for Financial Statements and Internal Control over Financial Reporting

### Management's Report on Responsibility for Financial Statements

As members of the company management, we are responsible for the preparation of the financial statements as of December 31, 2015 which have been prepared in accordance with international financial reporting standards and present fairly the Company's financial position, results of operations and cash-flows. The consolidated annual accounts include some amounts that are based on best estimates and judgments made by the company.

The consolidated financial statements, as of December 31, 2015, have been audited by the Company's independents registered public accounting firm, Deloitte, S.L. The purpose of their audit is to express an opinion, which is included in this Annual Report, as to whether the consolidated financial statements as of December 31, 2015 present fairly, in all material respects, the Company's financial position, results of operations and cash flows.

### Management's Reports on Internal Control over Financial Reporting

The Company's Management is responsible for establishing and maintaining effective internal control over financial reporting. This system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements under generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making this assessment, it used the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on its assessment and those criteria, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2015.

The Company's internal control over financial reporting, as of December 31, 2015, has been audited by Deloitte S.L., an independent registered public accounting firm, as stated in their report which is included herein.

There have been no changes in internal controls over financial reporting that occurred during the period covered by this consolidated financial statements that have materially affected, or are reasonably likely to materially affect. the Company's internal control over financial reporting.

REPORT ON LIMITED REVIEW OF CONSOLIDATED CONDENSED INTERIM FINANCIAL STATEMENTS

To the Shareholders of Abengoa, S.A. at the request of the Board of Directors:

Report on the Consolidated Condensed Interim Financial Statements

*Introduction*

We have reviewed the accompanying consolidated condensed interim financial statements ("the interim financial statements") of Abengoa, S.A. ("the Parent") and Subsidiaries ("the Group"), which comprise the condensed consolidated statement of financial position as of 30 June 2016, and the consolidated condensed statement of profit or loss, consolidated condensed statement of comprehensive income, condensed consolidated statement of changes in equity, consolidated condensed statement of cash flows and explanatory notes thereto for the six-month period then ended. The Parent's directors are responsible for the preparation of these interim financial statements in accordance with the requirements of International Accounting Standard (IAS) 34, Interim Financial Reporting, as adopted by the European Union, for the preparation of consolidated condensed interim financial information, in conformity with Article 12 of Royal Decree 1362/2007. Our responsibility is to express a conclusion on these interim financial statements based on our limited review.

*Scope of Review*

We conducted our limited review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A limited review is substantially less in scope than an audit conducted in accordance with the audit regulations in force in Spain and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the accompanying interim financial statements.

*Conclusion*

Based on our limited review, which under no circumstances may be considered to be an audit of financial statements, nothing has come to our attention that causes us to believe that the accompanying interim financial statements for the six-month period ended 30 June 2016 are not prepared, in all material respects, in accordance with the requirements of International Accounting Standard (IAS) 34, Interim Financial Reporting, as adopted by the European Union, for the preparation of consolidated condensed interim financial statements, pursuant to Article 12 of Royal Decree 1362/2007.

*Emphasis of Matters*

We draw attention to Note 2 to the accompanying interim financial statements, which indicates that the aforementioned financial statements do not include all the information that would be required for a complete set of consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and, therefore, the accompanying interim financial statements should be read in conjunction with the Group's consolidated financial statements for the year ended 31 December 2015. Our conclusion is not modified in respect of this matter.

In addition, without modifying our conclusion, we draw attention to the information included by the directors in Notes 2 and 4 to the accompanying interim financial statements, which describe the evolution of operations and the events that took place in 2016 which led the Parent's directors to approve a restructuring agreement ("Abengoa Restructuring Agreement") entered into with various banks and new investors on 24 September 2016.

On 25 November 2015, the Parent's directors submitted the notification provided for in Article 5 bis of Spanish Insolvency Law 22/2003 at Seville Commercial Court no. 2 and requested similar proceedings for certain Spanish and foreign subsidiaries. On 18 March 2016, the Parent entered into a Standstill Agreement with a significant group of its main financial creditors which, once the majorities required by current legislation had been obtained, was accepted by the Seville Commercial Court no. 2 on 6 April 2016. This agreement provided for the negotiation within seven months of the restructuring of the Group's debt and capital in order to ensure the viability of its operations.

In 2016 the inability to access sufficient financing has paralysed the majority of the Group's operations and made it impossible for it to meet its deadline commitments in existing concessions and projects, whilst preventing it from undertaking significant new projects, all of which affected the performance of the business during these six months. As a result of all the foregoing, certain foreign companies have undergone court insolvency proceedings that have resulted in company or asset liquidation processes that are out of the Group's control.

Lastly, as mentioned above, on 24 September 2016 a restructuring agreement was entered into which envisages, among other matters, the restructuring of the Group's debt and of the Parent's share capital, with certain financial creditors and new investors becoming shareholders.

This agreement provides for the reorganisation of the Group's companies and businesses in accordance with the revised viability plan presented by the Parent on 16 August 2016. Under this plan, certain business lines and construction projects that are regarded in the viability plan as unnecessary for the continuity of the Group given the new agreed financing structure, or which the directors consider to be unfeasible in view of the current situation of the companies or the assets, will be discontinued.

As a result of all the foregoing, the Parent's directors have disclosed in the accompanying consolidated condensed interim financial statements the impacts of both the liquidation and discontinuation of the companies not included in the Group's viability plan and the effects of the restructuring of the debt and the corresponding debt reduction. Also, the loss for the first six months of 2016 includes the impact of the impairment losses which, in accordance with International Financial Reporting Standards (IFRSs), must be recognised at 30 June 2016. As a result, both the Group and the Parent had an equity deficit at 30 June 2016 and, therefore, the Parent was in a situation of mandatory dissolution. The directors consider that the agreed-

upon restructuring, the effectiveness of which is subject to certain conditions precedent, including court approval and approval by the Annual General Meeting, will make it possible to restore the equity and financial position of the Group.

The aforementioned circumstances are indicative of the existence of a significant uncertainty regarding the ability of the Group to continue operating as a going concern. As a result, the viability of the Group, and the recovery of its assets, the settlement of its liabilities and the fulfilment of its guarantee commitments for the amounts reflected in the accompanying interim financial statements will depend on the effective application of the measures envisaged in the restructuring agreement, the evolution of the Group companies' operations and such future decisions as the current or future managers of the Group might make regarding its equity.

Report on Other Legal and Regulatory Requirements

The accompanying interim consolidated directors' report for the six-month period ended 30 June 2016 contains the explanations which the Parent's directors consider appropriate about the significant events that took place in that period and their effect on the interim financial statements presented, of which it does not form part, and about the information required under Article 15 of Royal Decree 1362/2007. We have checked that the accounting information in the interim consolidated directors' report is consistent with that contained in the interim financial statements for the six-month period ended 30 June 2016. Our work was confined to checking the interim consolidated directors' report with the aforementioned scope, and did not include a review of any information other than that drawn from the accounting records of Abengoa, S.A. and Subsidiaries.

Other Matters

This report was prepared at the request of the Board of Directors in relation to the publication of the half-yearly financial report required by Article 119 of the Consolidated Spanish Securities Market Law, approved by Legislative Royal Decree 4/2015, of 23 October, and implemented by Royal Decree 1362/2007, of 19 October.

# Notes to the Consolidated Condensed Interim Financial Statements as of June 30, 2016

## Note 1.- General information

Abengoa, S.A. is the parent company of the Abengoa Group (referred to hereinafter as 'Abengoa', 'the Group' or 'the Company'), which at the end of the six month period ended June 30, 2016, was made up of 677 companies: the parent company itself, 567 subsidiaries, 81 associates and 28 joint ventures. Additionally, the Group held a number of interests, of less than 20%, in other entities.

Abengoa, S.A. was incorporated in Seville, Spain on January 4, 1941 as a Limited Liability Company and was subsequently transformed into a Limited Liability Corporation ('S.A.' in Spain) on March 20, 1952. Its registered office is Campus Palmas Altas, 1 Energía Solar St., Seville, 41014.

The Group's corporate purpose is set out in Article 3 of its Bylaws. It covers a wide range of activities, although Abengoa is principally an applied engineering and equipment manufacturer, providing integrated project solutions to customers in the following sectors: energy, telecommunications, transport, water utilities, environmental, industrial and services.

Abengoa's shares are represented by class A and B shares which are listed on the Madrid and Barcelona stock exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. The company completed the delisting process to exclude its class B shares from on the NASDAQ Global Select Market in the form of American Depositary Shares, which were quoted from October 29, 2013, following the capital increase carried out on October 17, 2013. The Company presents mandatory financial information quarterly and semiannually.

As of April 6, 2016, the company announced its intention to initiate the process for voluntary delisting of its Class B shares and American Depositary Shares Receipts (ADSs), as well as the conclusion of the American Depositary Receipt (ADR) program with Citibank, N.A. which delisting was effective on May 12, 2016.

Additionally, on April 29, 2016, the Company announced that the voluntary delisting of its Class B shares and American Depositary Shares (ADSs) from the NASDAQ Stock Market became effective on 28 April 2016 and that has taken steps to deregister those securities from the SEC and thereby terminate its reporting obligations under the U.S. Securities Exchange Act of 1934, as amended (Exchange Act). The Company has already filed Form 25 and Form 15F, resulting the exclusion effective from Sections 12(b) and 12(g) of the Exchange Act of 1934 and the reporting obligations related to the third quarter of 2016.

As a result of the delisting of the Class B shares and ADSs from the NASDAQ Stock Market, all trading in Abengoa, S.A. shares is now concentrated in the Spanish Stock Exchanges.

The shares of the associate Atlantica Yield (formerly Abengoa Yield, Plc.) are also listed in the NASDAQ Global Select Market since June 13, 2014. As of June 30, 2016 the Abengoa's investment on Atlantica Yield amounts to 41.47%.On January 7, 2016, the company announced to the Securities and Exchange Commission US (S.E.C) that the corporate name change to Atlantica Yield. However, the ticker "ABY" remains the same.

Abengoa is an international company that applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. The Company supplies engineering projects under the 'turnkey' contract modality and operates assets that generate renewable energy, produces biofuel, manages water resources, desalinates sea water and treats sewage.

Abengoa`s business is organized under the following three activities:

- Engineering and construction: includes the traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market and the development of solar technology. Abengoa is specialized in carrying out complex turnkey projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuel plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.

- Concession-type infrastructures: groups together the company's extensive portfolio of proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes the operation of electric energy generation plants (solar, cogeneration or wind), desalination plants and transmission lines. These assets generate low demand risk and the Company focuses on operating them as efficiently as possible.

- Industrial production: covers Abengoa's biofuel business with a high technological component. The Company holds an important leadership position in this activity in the geographical markets in which it operates.

Since March 28, 2016, the company is under the standstill agreement framework to reach an agreement with financial creditors to restructure its financial debt and the recapitalization of the group (see Note 2.1). On September 24, 2016, the Restructuring Agreement was signed between Abengoa and a group of financial creditors and the accession period started, which is expected to be accomplished on October 25, 2016 with the judicial approval of the agreement. The effective application of such restructuring agreement will allow the Company to rebalance its equity, which is currently negative, once the positive effect of the debt to equity swap is registered in the income statement of the Company (see Note 2.1 and 29).

These Consolidated condensed interim financial statements for the period ended June 30, 2016 have been formulated on September 29, 2016.

All public documents of Abengoa may be viewed at www.abengoa.com.

These Consolidated condensed interim financial statements are a free translation of the Consolidated condensed interim financial statements originally issued in Spanish and prepared in accordance with International Financial Reporting Standards adopted by the European Union. In the event of a discrepancy, the Spanish-language version prevails.

# Note 2.- Basis of presentation

The Group's consolidated financial statements corresponding to the fiscal year ended December 31, 2015 were prepared by the Directors of the Company in accordance with International Financial Reporting Standards adopted by the European Union (IFRS-EU), applying the principles of consolidation, accounting policies and valuation criteria described in Note 2 of the notes to the aforementioned Consolidated financial statements, so that they present the Group's equity and financial position as of December 31, 2015 and the consolidated results of its operations, the changes in the consolidated net equity and the consolidated cash flows for the financial year ending on that date.

The Group's consolidated financial statements corresponding to the 2015 financial year were approved by the General Shareholders' Meeting of the Parent Company held on June 30, 2016.

These Consolidated condensed interim financial statements are presented in accordance with IAS (International Accounting Standard) 34, 'Financial Reporting' approved by the European Union.

These Consolidated condensed interim financial statements have been prepared based on the accounting records of Abengoa S.A. and the subsidiary companies which are part of the Group, and include the adjustments and re-classifications necessary to achieve uniformity between the accounting and presentation criteria followed by all the companies of the Group (in all cases, in accordance with local regulations) and those applied by Abengoa, S.A. for the purpose of preparing consolidated financial statements.

In accordance with IAS 34, consolidated condensed interim financial information is prepared solely in order to update the most recent annual Consolidated financial statements prepared by the Group, placing emphasis on new activities, occurrences and circumstances that have taken place during the six month period ended June 30, 2016 and not duplicating the information previously published in the annual Consolidated condensed financial statements for the year ended December 31, 2015. Therefore, the Consolidated condensed interim financial statements do not include all the information that would be required in complete Consolidated financial statements prepared in accordance with the International Financial Reporting Standards as issued by the EU.

In view of the above, for an adequate understanding of the information, these Consolidated condensed interim financial statements must be read together with Abengoa's consolidated financial statements for the year ended December 31, 2015.

Given the activities in which the companies of the Group engage, their transactions are not of a cyclical or seasonal nature. For this reason, specific breakdowns are not included in these explanatory notes to the Consolidated condensed interim financial statements corresponding to the six month period ended June 30, 2016.

In determining the information to be disclosed in the notes to the Consolidated condensed interim financial statements, the Group, in accordance with IAS 34, has taken into account its materiality in relation to the Consolidated condensed interim financial statements.

The amounts included within the documents comprising the Consolidated condensed interim financial statements (Consolidated condensed interim statements of Financial Position, Consolidated Income Statement, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity, Consolidated Condensed Cash Flow Statement and notes herein) are, unless otherwise stated, all expressed in thousands of Euros.

Unless otherwise stated, any presented percentage of interest in subsidiaries, joint ventures (including temporary joint operations) and associates includes both direct and indirect ownership.

## 2.1. Going concern

In accordance with IAS1, which requires the financial statements to be prepared regarding the going concern principle, unless Directors have the intention or any other real alternative of liquidation or cease of activity, the consolidated condensed interim financial statements at June 30, 2016 have been prepared applying this principle.

- In relation to the facts and circumstances occurred during the second half of the year 2015, which significantly deteriorated the liquidity position and the financial structure of Abengoa, that made the Directors of the Company to submit the communication provided by the Article 5 bis of Act 22/2003 of July 9, on insolvencies (Ley Concursal) and to initiate a refinancing process to try to reach an agreement with its main financial creditors, the following summary shows the facts related during the first six month period of the year 2016 until the preparation of the present Consolidated Condensed Interim Financial Statements for the six month period ended June 30, 2016:

a) In relation to the proceeding provided by the law 22/2003 (Ley Concursal) and the beginning of the aforementioned refinancing process, it should be noted that;

› On January 25, 2016, the Company announced that the independent and specialized consulting firm on refinancing process Alvarez&Marsal presented to the Board of Directors of Abengoa the Industrial Viability Plan that defined the structure of the future activity of Abengoa on an operating basis focusing on the activity of engineering and construction either developing its own technology or using technology developed by others.

› Based on this Initial Viability Plan, that confirms the industrial viability of Abengoa, the Company began negotiations with its creditors to restructure the debt and the necessary resources and provide Abengoa the optimal capital structure and the sufficient liquidity to continue operating competitively and sustainably in the future.

› In this sense, and in relation to the negotiations between the Company and a group of its creditors comprised of banks and holders of bonds issued by the Group, as of March 10, 2016, the Company informed that it has agreed with the advisers of such creditors the grounds for an agreement to restructure the financial indebtedness and recapitalize the Group. The Company believed that such agreement contained the essential elements to achieve a future restructuring agreement that, in any event, would be subject to reaching the accessions percentage required by Ley Concursal. On March 28, 2016, the Company and a group of creditors comprised of banks and holders of bonds Issued by the Group had reached a standstill agreement with the objective of providing the time necessary to keep working and reaching, as soon as possible, a full and complete agreement about the terms and conditions to restructure the financial indebtedness and recapitalize the Group. In order to reach this purpose, among other obligations assumed by all parties, the arrangement with parties contains expressly the compromise of creditors to abstain from claiming or accepting the payment of any amount owed as current amortization debt or advanced payments of capital or interest, as well as to charge default interests as a consequence of non-performance by the debtor.

› With respect to the foregoing, as of March 28, 2016, an application for the judicial approval of the standstill agreement (the "Standstill Agreement") have been filed to the Mercantile Court of Seville nº 2 which obtained the support of 75.04% of financial creditors to which it was addressed, being therefore over the legally required majority (60%). Additionally, on April 6, 2016, the judge of the Mercantile Court of Seville nº2 issued the approval of the Standstill Agreement and extended the maturity of the agreement until October 28, 2016 (included), to the financial liability creditors which have not subscribed it or which showed the disconformity to the agreement. This agreement has been impugned by some creditors and currently is in court.

› From that moment until now, the Company has continued with the negotiation process with its main financial creditors and potential investors in order to develop the agreed terms of reference. In the context of these negotiations and the circumstances that have been affecting our projects since the Initial Viability Plan was prepared by Alvarez&Marsall, an Updated Viability Plan was prepared during the second half of May, which has been approved by the Board of Directors after the end of the six month period ended June 30, 2016, on August 3, 2016 as well as the term sheet of the restructuring agreement which was subscribed afterwards by the main creditors and which is mentioned below.

› This Updated Viability Plan shows the negotiations and difficulties that Abengoa experienced in certain projects as well as the changes which, as a result, have been made with respect to the Initial Viability Plan, as well as the review of certain hypothesis in the mentioned Plan and the update of the expected date of reactivation of our operations. Therefore, all of this calls for a significant reduction of Abengoa's cash needs, which have been identified in this Updated Viability Plan, in approximately €1,200 million, compared to the initially estimated figure of €1,500 - €1,800 million.

› Pursuant to the preparation of the Updated Viability Plan and the ongoing negotiations, on June 30, 2016, Abengoa announced that had reached grounds for an agreement with the Bank Coordination Committee and a group of bondholders and investors on the main terms of the proposed financial restructuring to be signed.

› Afterwards, on August 11, 2016, the term sheet of the restructuring agreement was subscribed between Abengoa, S.A. and a group of entities comprising the main financial creditors and potential investors. Moreover, the Company has received acceptance letters in order to underwrite the new money financing in an amount which exceeds the liquidity requirement of the Revised Viability Plan. The agreement is subject to several conditions precedent which are common in this kind of transactions.

The fundamental principles of such agreement are the following:

(i) The amount of new money to be lent to the Group totals €1,169.6 million (including refinancing of the September and December 2015, March and September 2016 facilities). This financing would rank senior with respect to the preexisting debt and would be divided into different tranches:

- Tranche I: amounts to €945.1 million, with a maximum maturity of 47 months and secured by, among other things, certain assets that include the A3T project in Mexico and the shares of Atlantica Yield held by the Company. Creditors would be entitled to 30% of Abengoa's new share capital post restructuring.

- Tranche II: amounts to €194.5 million, with a maximum maturity of 48 months and secured by, among other things, certain assets in the engineering business. Creditors would be entitled to 15% of Abengoa's new share capital post restructuring.

- Tranche III: contingent credit facility of up to €30 million, with a maximum maturity of 48 months secured by, among other things, certain assets that include the A3T project in Mexico and the shares of Atlantica Yield held by the Company and with the sole purpose of providing guaranteed additional funding for the completion of the A3T project. Creditors would be entitled to receive 5% of Abengoa's new share capital post restructuring.

(ii) New bonding facilities amount to €307 million. Financing entities would be entitled to 5% of Abengoa's new share capital post restructuring.

(iii) The restructuring proposal for the preexisting debt will involve a 97% reduction of its nominal value, while keeping the remaining 3% with a ten year maturity, with no annual coupon or option for capitalization.

(iv) Creditors who adhere to the agreement can choose either the conditions laid out in section (iii), or alternative conditions which consist of the following:

- Capitalization of 70% of preexisting debt in exchange for 40% of Abengoa's new share capital post restructuring.

- The remaining 30% of the nominal value of the preexisting debt will be refinanced through new debt instruments, replacing the preexisting ones, which will rank as senior or junior depending on whether or not such creditor participates in the new money facilities or new bonding facilities. Such instruments will have maturities of 66 and 72 months respectively, with the possibility of an extension of up to 24 months, accruing annual interest of 1.50% (0.25% cash payment and 1.25% Pay If You Can). The junior instrument could be subject to additional reductions (provided that total reduction does not exceed 80% of the nominal value prior to the capitalization) if the aggregate amount of refinanced preexisting debt (after the aforementioned capitalization) exceeds €2,700 million due to the crystallization of contingencies.

(v) At the end of the restructuring process, the current shareholders of the Company would hold around 5 % of the share capital. Eventually, through the issuance of warrants, they could increase such stake in a percentage to be agreed that will not exceed an additional 5%, if, within 96 months, the group has paid in full all outstanding amounts under the new financing to be provided in the framework of the restructuring and under the existing indebtedness (as this indebtedness may have been restructured), including its financial costs. Furthermore, the company intends to submit a proposal to merge the two types of existing shares into one sole class of shares for approval by a General Shareholders Meeting, although this is not considered a prerequisite of the restructuring agreement.

(vi) Within the context of the restructuring agreement and until its implementation, the Company has appointed Mr. Gonzalo Urquijo Fernández de Araoz as independent advisor, with no executive or management functions, to the board of directors for matters related with the Viability Plan and the fulfillment of the conditions precedent.

› As of the signed restructuring agreement on September 24, 2016, it is open a process, that will be finished on October 25, 2016, with the rest of financial creditors aiming to obtain the minimum required level of support required in the law of 75%.

b) On the other hand, in relation with the proceedings in Brazil, on the occasion of the mentioned situation of Abengoa, it should be known that;

› On January 29, 2016, Abengoa filed the recuperação judicial applications in Brazil about the companies Abengoa Concessões Brasil Holding S.A., Abengoa Construção Brasil Ltda and Abengoa Greenfield Brasil Holding S.A, which were admitted on February 22, 2016. This measure was undertaken provided that the Company incurred in a "Crise econômico scenario", which is contemplated in Brazillian Law 11.101/05. "Recuperação judicial" consists in a proceeding provided by the Brazillian Law which allows corporations to restructure their debt in an orderly manner and continue as a going concern once the financial difficulties are overcome.

› In relation to the aforementioned, on April 20, 2016, Abengoa presented the viability plan (plano de Recuperaçao) in which the main premises are based on the divestment of certain concessional transmission line assets in operation, as well as the divestment of lines which currently are under construction. It is expected that these divestments will allow a favorable agreement to repay the debt already restructured in companies under recuperação judicial (negotiations are in progress with creditors) as well as the possible preservation of the construction activity in Brazil. As explained in Note 7 of these consolidated condensed interim financial statements, both asset batches have been classified as non-current assets held for sale due to the compliance, at June 30, 2016,of the IFRS 5´s requirements. In relation with lines in operation, on June 24, 2016, Abengoa has received an offer by which the asset fair value estimation have been made. This offer, will serve as starting price in the judicial auction process provided to this kind of insolvency proceedings in Brazil

› On the other hand, and regardless the mentioned negotiation process, on June 28, 2016, ANEEL´s Board of Director decided to authorize the Electricity Inspection Service Office "SFE" and the Superintendent of Economy and Financial Inspection " SFF" for the issuance of a communication to the owner companies of construction in progress (ATEs), informing about the contract compliance, which may lead to an expiration declaration of concessions.

c) Additionally, in relation to the proceedings in United States, on occasion as well of the mentioned situation of Abengoa, indicate that,

› On February 1, 2016 and February 10, 2016, certain creditors initiated involuntary bankruptcy petitions to the Missouri Bankruptcy Court against the American affiliates Abengoa Bioenergy Nebraska, L.L.C. and Abengoa Bioenergy Company, L.L.C. respectively. After responding to the petitions, on February 24, 2016, both companies mentioned above along with Abengoa Bioenergy Outsourcing, LLC, Abengoa Bioenergy Engineering and Construction, LLC, Abengoa Bioenergy Trading US, LLC, and Abengoa Bioenergy Holding US, LLC opted to file for voluntary creditors´ protection under Chapter 11 provided by the USA Law. These petitions have been filed in order to allow the Company to continue as a going concern and, consequently, they included the authorization request for the payment of taxes, salaries and insurance premiums and other first day motions. Additionally, a request for the approval of a debtor-in-possession financing arrangement amounting to US$41 million was also filed. The hearing for these initial motions took place on March 2, 2016 and, during them, such companies were authorized to borrow an initial amount of US$8 million (which were additionally complemented with US$1.5 million authorized on March 29, 2016).

› Moreover, on March 23, 2016, certain creditors filed an involuntary insolvency proceeding against Abengoa Bioenergy Biomass of Kansas, LLC (ABBK)at the Kansas court.

› Also on March 29, the following American affiliates Abeinsa Holding Inc.; Abencor USA, LLC; Teyma Construction USA, LLC; Abeinsa EPC, LLC; Inabensa USA, LLC; Nicsa Industrial Supplies, LLC; Abener Construction Services, LLC; Abener North America Construction, LP; Abengoa Solar, LLC; Teyma USA & Abener Engineering and Construction Services General Partnership; Abeinsa Abener Teyma General Partnership; Abener Teyma Mojave General Partnership; and Abener Teyma Inabensa JV filed, under the "United States Bankruptcy Code" and the Delaware court, the named Chapter 11 in order to allow the companies to comply with their obligations and minimize the loss of value of their businesses. Such companies have requested authorization for the payment of taxes, salaries and insurances as well as other first day motions.

› In relation to all the above, on March 28 and 29, 2016, and in accordance with the clause 5.2 of the Standstill agreement mentioned before, Abengoa, S.A. and several of its Spanish affiliates (the "Chapter 15 Debtors") commenced cases under Chapter 15 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware ("Delaware Bankruptcy Court"). In these cases, the Chapter 15 Debtors seek recognition by the Delaware Bankruptcy Court of the proceeding commenced in the Spanish Court to obtain judicial approval (homologación judicial) of the Standstill Agreement (the "Spanish Proceeding") and application of the Standstill Agreement within the territorial jurisdiction of the United States. In the initial hearings held on March 31, 2016, the Delaware Bankruptcy Court granted the Chapter 11 Debtors' requests relief and the Initial Chapter 15 Debtors' requested provisional relief to stay creditor actions against them. Both hearings were uncontested and all motions were granted.

› Additionally, on April 7, 2016 Abengoa US Holding, LLC and seven other affiliated U.S. debtors (collectively, the "Additional Chapter 11 Debtors") each filed a voluntary petition for relief under Chapter 11 of the United States Bankruptcy Code in the Delaware Bankruptcy Court (together with the Chapter 11 cases filed on March 29, 2016, the "Chapter 11 Proceedings"). All of the cases filed by the Additional Chapter 11 Debtors are being jointly administered with the lead Chapter 11 Proceeding filed on March 28, 2016 in the Delaware Bankruptcy Court. The Additional Chapter 11 Debtors are comprised of the following legal entities: Abener Teyma Hugoton General Partnership, Abengoa Bioenergy Biomass of Kansas, LLC, Abengoa Bioenergy Hybrid of Kansas, LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy Technology Holding, LLC, Abengoa US Holding, LLC, Abengoa US Operations, LLC and Abengoa US, LLC.

› The Company further informs that at the initial hearing held on April 27, 2016 on the Chapter 11 petitions filed on April 7, 2016 by the additional Chapter 11 Debtors, the Delaware Bankruptcy Court granted the first-day relief requested by all but one of those debtors. With respect to ABBK's Delaware case, it was noted that on April 25, 2016 the U.S. Bankruptcy Court for the District of Kansas (the "Kansas Bankruptcy Court") had issued an order denying ABBK's request to transfer to the Delaware Bankruptcy Court an involuntary Chapter 11 case commenced against it on March 23, 2016 in the Kansas Bankruptcy Court. Referring to the Kansas Bankruptcy Court's ruling and the Delaware Bankruptcy Court stated that it would honor that decision, ordered a stay of ABBK's Chapter 11 case in Delaware, and directed ABBK to show why its Delaware case should not be dismissed. On May 2, 2016, ABBK moved to certify the Kansas Bankruptcy Court's ruling for direct appeal to the U.S. Court of Appeals for the Tenth Circuit and requested a stay of the Kansas bankruptcy case order pending the outcome of that appeal.

- The Company further informs that on April 26, 2016 its subsidiary Abengoa Solar LLC ("Abengoa Solar"), one of the Initial Chapter 11 Debtors, filed a motion requesting the Delaware Bankruptcy Court's authorization to consummate the sale of interests that two of Abengoa Solar's non-debtor subsidiaries hold in project entities responsible for the financing, design, construction, operation, maintenance, and transfer to the State of Israel of a concentrated solar energy thermal power station plant currently under construction there (the "Ashalim Project"). At the hearing on the motion held on May 3, 2016, the Delaware Bankruptcy Court authorized Abengoa Solar to make this transaction.

- On May 3, 2016, the American affiliate companies Abengoa Bioenergy Meramec Renewable, LLC, Abengoa Bioenergy Funding, LLC, Abengoa Bioenergy Maple, LLC, Abengoa Bioenergy of Indiana, LLC, Abengoa Bioenergy of Illinois, LLC y Abengoa Bioenergy Operations, LLC, commenced a voluntary Chapter 11 case in the Missouri Bankruptcy Court. In the framework of these proceedings and the already initiated Chapter 11 proceeding by Abengoa Bioenergy US Holding, LLC, this and the affiliate companies mentioned have filed motions in the East Missouri Bankruptcy Court in relation with the sale proceeding of the two Maple plants located on Indiana and Illinois, the plant of Ravenna and the plant of York. Additionally, to facilitate the sale of the Maple plant, the current creditors of such plants have agreed to concede additional financing for an amount of US$10 million (debtor-in-.possession financing).

- Continuing with the sale proceeding commented above, on August 22, 2016 as approved by the United States Bankruptcy Court for the Eastern District of Missouri (the "Bankruptcy Court"), an auction over certain assets of Abengoa Bioenergy US Holding, LLC (the Company.) has been conducted following the process previously agreed among certain debtors and debtors in possession (the "Debtors") and such Company, on June 12, 2016, Abengoa Bioenergy US Holding, LLC and certain Debtors filed a motion (the "Motion") with the Bankruptcy Court seeking, among other things, entry of an order (the "Bidding Procedures Order"); (a) approving certain auction and bidding procedures (the "Bidding Procedures") in connection with the sale of the Debtors' bioenergy plants in Ravenna, Nebraska, York, Nebraska, Mt. Vernon, Indiana, Madison, Illinois and Colwich, Nebraska (collectively, the "Purchased Assets"), (b) authorizing the Debtors to enter into stalking horse purchase agreements with KAAPA Ethanol Holdings, LLC for the Ravenna Assets, Green Plains, Inc. for the Mt. Vernon and Madison Assets (the "Maple Assets") and Biourja Trading, LLC for the York Assets, (c) approving procedures relating to the assumption and assignment of executory contracts and unexpired leases, and (d) scheduling an auction (the "Auction") and sale approval hearing (the "Sale Hearing").

- On June 15, 2016, the Bankruptcy Court entered the Bidding Procedures Order, and subsequently, the Debtors' investment banker, Carl Marks, engaged in an extensive marketing process for all of the Purchased Assets. Pursuant to the Bidding Procedures Order, certain competing bids were submitted, and on the aforementioned date (August 22, 2016), the Debtors conducted the Auction, the results of which were that: (i) KAAPA Ethanol Holdings, LLC was the successful bidder for the Ravenna Assets at US$115 million, (ii) Green Plains, Inc. was the successful bidder for the Maple Assets at US$200 million, (iii) Green Plains, Inc. was the successful bidder for the York Assets at US$37.375 million, and (iv) ICM, Inc. was the successful bidder for the Colwich Assets at US$3.15 million.

- The Bankruptcy Court has scheduled to conduct a hearing to approve these sales on August 29, 2016, and it is expected that these transactions will close by September 30, 2016. Following the completion of the sales of the bioenergy assets, after the payment of debtor-in-possession financing provided with regard to the Ravenna Assets and the Maple Assets, the net sale proceeds will then be distributed pursuant to a plan of liquidation. The plan will be filed with the Bankruptcy Court following the closing on the sale of Purchased Assets.

- Additionally, on date July 18, 2016, and in the Chapter 11 proceeding framework, already initiated by ABBK, the investment bank Ocean Park Advisors was hired to seek a strategic partner interested in buying the bioethanol plant and the co-generation plant located in Hugoton, Kansas.

- Finally, the companies Abengoa Bioenergy Holdco, Inc. and Abengoa Bioenergy Meramec Holding, Inc., have initiated voluntary proceedings of Chapter 11 in the Delaware Bankruptcy Court, where the pending chapter 11 resolutions of other American affiliates exist, as well as the Chapter 15 proceeding of Abengoa mentioned before.

d) In relation to the bankruptcy declaration by the Court of Rotterdam of Abengoa Bioenergy Netherlands, B.V. on date May 11, 2016, and appointing both a liquidator and supervising judges, should be known the following;

- After such bankruptcy declaration and the appointment of a liquidator, the liquidation process of the company started and therefore, since that moment, the loss of control was effective.

- In the framework of such bankruptcy proceeding, on date May 11, 2016, the company Alcogroup communicated the agreement to acquire the plant without disclosing the agreed acquisition price .

- Once completed the restructuring agreement and the recapitalization of the Group described in Note 2.1.a), the company will develop the agreed Updated Viability Plan with creditors and investors, which is focused on the traditional business of Engineering and Construction, where the company accumulates more than 75 years of experience. Specifically, this Updated Viability Plan focusses the activity in the energy and environmental industry. This business will be combined, in a balanced manner, with concessional infrastructure projects in sectors where Abengoa has a competitive advantage, mainly of technological kind, which allows a bigger added value projects. Regarding the mentioned Updated Viability Plan, will allow Abengoa to grow sustainably, based on the following five principles:

    1) A multidisciplinary team and a culture and ability to multifunctional work.

    2) Experience in engineering and construction and specially the outstanding strength in business development of high potential growing such as energy and water.

    3) Technology abilities in our targets, mainly in solar energy and water.

    4) A more efficient organization with more competitive general expenses.

    5) A financial approach adjusted to the current reality in which financial discipline and a rigorous evaluation of financial risks are key milestones.

- Based on the foregoing, and in prevision of the fulfilment of the agreement with financial creditors of the Company which assure the financial stability of Abengoa and the ability to generate resources from its operations as stated in the Updated Viability Plan, Abengoa´s Directors have deemed it appropriate to present the Consolidated Condensed Interim Financial Statements as of June 30, 2016 on a going concern.

  Based on the application of the going concern basis, Abengoa´s Directors have prepared these Consolidated condensed interim financial statements applying the International Accounting Standards consistently with Consolidated condensed interim financial statements and Consolidated financial statements filed in prior periods. For that purpose, and according to the aforementioned accounting framework, Abengoa´s Directors have made their best estimates and assumptions (see Note 3) in order to record the assets, liabilities, revenues and expenses as of June 30, 2016 in accordance with the existing information by the time of formulating these Consolidated condensed financial statements.

- The situation of the Group continues being affected by a strong limitation of financial resources, which has significantly influenced the evolution of the business by means of general business deceleration in all segments for one year. Thus, certain projects have left idle without possibility to assist with suitable financial resources to operate them. This situation has led on the one hand to breaches in contractual milestones, and on the other, to a very significant increase in estimated costs of their reactivation and therefore their continuance are not included in the viability plan associated to the Restructuring Agreement signed on September 24, 2016. Additionally, in certain countries, Group´s companies have incurred in judicial insolvency situations or bankruptcy in business which are not included in the mentioned viability plan. Given this situation, Directors have collected the significant negative impacts in the income statements at June 30, 2016 based on the best estimations made by Directors and in accordance with the International Accounting Standards. In this sense, the most significant negative impacts recorded in results at June 30, 2016, which have reached €-3,253 million, are mainly related to provisions in construction projects, to results from the sale of certain assets and the impairment of certain assets caused by the situation of the company.

  The following table shows the detail of such impacts (in million euros):

| Item | Total |
|---|---|
| Project Construction costs (see Note 5.1 a) | (139) |
| Sale of assets (see Note 6.2 b) | 56 |
| Impairment of assets (see Note 5.1 b) | (3,079) |
| Default interests and guaranty executions (see Note 22) | (70) |
| Others | (21) |
| | **(3,253)** |

Due to all the above, the parent company, Abengoa, S.A., has incurred in losses since 2015 which has supposed a significant decrease in Equity and, as a consequence, at June 30, 2016 presents a negative net equity. In accordance with the Article 363 of the Spanish Corporation Law, a Company will be in dissolution situation when losses lead Net Equity to an amount lower than half shared capital, unless an increase or decrease in capital share were enough.

The effective application of the signed Restructuring Agreement will allow to an immediate restoration of financial stability from the recognition of results from debt write-offs considered, in addition to provide the Group with the necessary financial resources to reactivate the activity. On the other hand, Directors are confident on generating future resources from operations given such financial resources and the application of the Updated Viability Plan, which will allow to rise the market confidence, the provision of liquidity to the Company and the continuance of its activity to operate in a competitive and sustainable manner in the future.

For further information about the restructuring process, see Note 29 `Subsequent events`.

## 2.2. Application of new accounting standards

a) Standards, interpretations and amendments effective from January 1, 2016 under IFRS-EU, applied by the Group:

- Improvements to IFRSs 2012-2014 cycles. These improvements are mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.
- IAS 1 (Amendment) 'Presentation of Financial Statements'. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.
- IAS 16 (Amendment) 'Property, Plant and Equipment' and IAS 38 'Intangible Assets', regarding to acceptable methods of amortization and depreciation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.
- IAS 27 (Amendment) 'Separate financial statements' regarding the reinstatement of the equity method as an accounting option in separate Financial statements. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.
- IFRS 11 (Amendment) 'Joint Arrangements' regarding acquisition of an interest in a joint operation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

Abengoa's Directors believe that the applications of these amendments have not had any material impact.

b) Standards, interpretations and amendments published by the IASB that will be effective for periods after June 30, 2016:

- IFRS 10 (Amendment)' Consolidated Financial Statements' and IAS 28 'Investments in Associates', regarding to sale or contribution of assets between an investor and its associate or joint venture. The application of these amendments has been delayed with not specific date of application under IFRS-EU.
- IFRS 9 'Financial Instruments'. This Standard will be effective from January 1, 2018 under IFRS-IASB and has not yet been adopted by the EU.
- IFRS 15 'Revenues from contracts with Customers'. IFRS 15 is applicable for periods beginning on or after 1 January 2018 under IFRS-IASB, earlier application is permitted, IFRS 15 has not yet been adopted by the EU.
- Introduction of IFRS 16 "Leases" which supersedes IAS 17. Lessees will recognize most leases in the balance sheet as financed purchases. This standard will apply to periods beginning after January 1, 2019 under IFRS-EU.
- IFRS 10 (Amendment) 'Consolidated financial statements', IFRS 12 'Disclosure of interests in other entities' and IAS 28 'Investments in associates and joint ventures' regarding the exemption from consolidation for investment entities. These amendments are mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and have not yet been adopted by the EU.
- IAS 7 (Amendment) "Statement of cash flow" related to disclosures. This standard will apply to annual periods beginning after January 1, 2017 under IFRS-EU.
- IAS 12 (Amendment) "Income taxes" related to the recognition of not realized deferred taxes. This standard will apply to annual periods beginning after January 1, 2017 under IFRS-IASB, earlier application is permitted, and annual periods beginning after January 1, 2018 under IFRS-EU.

The Group is currently in the process of evaluating the impact on the Consolidated condensed interim financial statements derived from the application of the new standards and amendments that will be effective for periods beginning after June 30, 2016.

# Note 3.- Critical accounting policies

These Consolidated condensed interim financial statements under IFRS-EU standards require estimates and assumptions that have an impact in assets, liabilities, income, expenses and disclosures related. Actual results could be shown differently than estimated. The most critical policies, which show the most significant estimates and assumptions of the business to determine the amounts in theses Consolidated condensed interim financial statements, are:

The most critical accounting policies that involve estimations are as follows:

- Impairment of intangible assets and goodwill.
- Revenue and expense from construction contracts.
- Service concession agreements.
- Income taxes and recoverable amount of deferred tax assets.
- Derivatives and hedging.

› Guarantees provided to third parties.

Some of these critical accounting policies require the deployment of significant judgement by The Board of Directors in order to determine appropriate assumptions and estimates to determine these critical accounting policies. These estimates and assumptions are not only based on historical experience of the Company, but also, on the advice of experts and consultants, expectations and forecasts as of the end of the reporting period. Directors´ assessment has to be considered given the business environment of the industries and geographies in which the Group operates, taking into account the future development of the business. Provided its nature, these judgments and assumptions are subject to an inherent degree of uncertainty and, thus, the real results may materially differ from assumptions and estimates used. Upon the occurrence of such event, assets and liabilities will be adjusted.

Based on what has been exposed in Note 2.1 regarding the application of the going concern accounting principle and during the accounting policies adaptation process, the best estimates and assumptions have been made by the Board of Directors in order to determine the impacts of that situation over the assets, liabilities, income and expenses.

Upon the occurrence of a significant change in the facts and circumstances upon which estimates and assumptions have been made, it may require the management to amend such estimates and assumptions in future periods. Changes in accounting estimates are recognized prospectively, in accordance with IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors".

# Note 4.- Financial risk management

Abengoa's activities are undertaken through its operating segments and are exposed to various financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

Due to the facts and circumstances occurred during the second half of the year 2015, Abengoa had at the end of November 2015 substantial liquidity needs mainly to attend capital expenditure in assets, short and medium term debt maturities related to operations and negative working capital.

On November 25, 2015, due to the circumstances explained above, the Company decided to initiate a refinancing process to try to reach an agreement with its main financial creditors that would ensure a suitable framework in which to undertake the said negotiations and the financial stability of the Group in the short and medium term.

In relation to the refinancing process, after carefully evaluating the situation described above and in order to ensure the stability necessary to conduct these negotiations with the creditors, the Board of Directors of the Company deemed that the most appropriate approach was to submit the communication provided under Article 5 bis of Ley Concursal. In this regard, on December 15, 2015, Commercial Court No. 2 of Seville issued a Decree agreeing that the communication provided for under Article 5 bis of Ley Concursal had been filed.

Afterwards, on August 11, 2016, it has been subscribed a Term Sheet of the restructuring agreement between Abengoa, S.A. and a group of entities comprised of main financial creditors and potential investors. Moreover, acceptance confirmations have been received to the comfort letter to finance the new money provided in the restructuring agreement in excess to the previous requirements in the Updated Viability Plan. The agreement is subject to certain documentation and a number of usual conditions in this kind of transactions.

Abengoa´s Directors are confident on reaching a final agreement with creditors and, once signed, the achievement of the Viability Plan associated by means of the Group´s ability to generate cash from operations which will allow the financial restitution of Abengoa, S.A., and to provide to Abengoa the optimal capital structure and the liquidity enough to continue its activity and operate in a competitive and sustainable manner in the future.

# Note 5.- Financial information by segment

## 5.1. Information by business segment

As indicated in Note 1, Abengoa's activity is grouped under the following three activities which are in turn composed of six operating segments:

› Engineering and construction; includes the traditional engineering business in the energy and water sectors, with more than 70 years of experience in the market. This activity comprises one operating segment Engineering and Construction.

  Abengoa specializes in carrying out complex "turnkey projects" for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others. In addition, this segment includes activities related to the development of thermo-solar technology, water management technology and innovative technology businesses such as hydrogen energy or the management of energy crops.

› Concession-type infrastructures; groups together the company's proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts or power purchase agreements. This activity includes the operation of electric energy generation plants (solar, cogeneration or wind), desalination plants and transmission lines. These assets generate low demand risk and the Company focuses on operating them as efficiently as possible.

  The Concession-type infrastructures activity comprises four operating segments:

  › Solar – Operation and maintenance of solar energy plants, mainly using thermo-solar technology.

  › Water – Operation and maintenance of facilities aimed at generating, transporting, treating and managing water, including desalination and water treatment and purification plants.

  › Transmission – Operation and maintenance of high-voltage transmission power line infrastructures.

  › Cogeneration and other – Operation and maintenance of conventional cogeneration electricity plants.

› Industrial production; covers Abengoa's businesses with a high technological component, such as development of biofuels technology. The company holds an important leadership position in these activities in the geographical markets in which it operates.

  This activity is comprised of one operating segment:

  › Biofuels – Production and development of biofuels, mainly bioethanol for transport, which uses cellulosic plant fiber, cereals, sugar cane and oil seeds (soy, rape and palm) as raw materials.

Abengoa's Chief Operating Decision Maker ('CODM') assesses the performance and assignment of resources according to the above identified segments. The CODM in Abengoa considers revenues as a measure of the activity and the EBITDA (Earnings before interest, tax, depreciation and amortization) as measure of the performance of each segment. In order to assess the performance of the business, the CODM receives reports of each reportable segment using revenues and EBITDA. Net interest expense evolution is assessed on a consolidated basis given that the majority of the corporate financing is incurred at the holding level and the majority of investments in assets are held at project companies which are financed through project debt. The depreciation, amortization and impairment charges are assessed on a consolidated basis in order to analyze the evolution of net income and to determine the dividend pay-out ratio. These charges are not taken into consideration by CODM for the allocation of resources because they are non-cash charges.

The process to allocate resources by the CODM takes place prior to the award of a new project. Prior to presenting a bid, the company must ensure that the project debt for the new project has been obtained. These efforts are taken on a project by project basis. Once the project has been awarded, its evolution is monitored at a lower level and the CODM receives periodic information (revenues and EBITDA) on each operating segment's performance.

Directors consider that the restructuring agreement will lead the application of measures determined in the Updated Viability Plan (see Note 2.1) and therefore the assessment of the consequences that could derive to the financial information by segment shown so far.

a) The following table shows the Segment Revenues and EBITDA for the six month period ended June 30, 2016 and 2015:

| | Revenue | | EBITDA | | |
|---|---|---|---|---|---|
| | For the six months period ended | | For the six months period ended | | |
| Item | 06.30.16 | 06.30.15 (2) | 06.30.16 | | 06.30.15 |
| **Engineering and construction** | | | | | |
| Engineering and construction | 610,697 | 2,160,240 | (103,308) | (1) | 450,687 |
| **Total** | **610,697** | **2,160,240** | **(103,308)** | | **450,687** |
| | | | | | |
| **Concession-type infrastructure** | | | | | |
| Solar | 16,880 | 123,249 | 10,952 | | 86,057 |
| Water | 30,698 | 26,131 | 21,786 | | 23,945 |
| Transmission lines | 1,653 | 1,591 | (426) | | 423 |
| Cogeneration and other | 23,902 | 24,420 | 13,403 | | 11,998 |
| **Total** | **73,133** | **175,391** | **45,715** | | **122,423** |
| | | | | | |
| **Industrial production** | | | | | |
| Biofuels | 531,516 | 971,728 | 7,089 | | 15,676 |
| **Total** | **531,516** | **971,728** | **7,089** | | **15,676** |
| | | | | | |
| **Total** | **1,215,346** | **3,307,359** | **(50,504)** | | **588,786** |

(1) Includes construction cost provisions of projects given the situation of the company and the applications of measures established in the approved viability plan for an amount of €-139 million (see Note 2.1).

(2) Restated figures. On June 30, 2016, the Company has reclassified the income statements for the six-month period ended June 30, 2016 and 2015 of the concessional assets LAT Brazil owner companies to Profit/loss from discontinued operations due to their significant activities developed within Abengoa (see Note 7).

The conciliation of EBITDA and the profit attributable to owners of the parent is as follows:

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Total segment EBITDA | (50,504) | 588,786 |
| Amortization and depreciation | (1,812,555) | (186,254) |
| Financial expenses net | (506,237) | (394,359) |
| Share in profits/ (losses) of associates | (331,946) | 5,581 |
| Income tax expense | (27,641) | 61,359 |
| Profit (loss) from discontinued operations, net of tax | (954,453) | 6,236 |
| Profit attributable to non-controlling interests | (5,625) | (9,211) |
| **Profit attributable to the parent company** | **(3,688,961)** | **72,138** |

b) The assets and liabilities by segment as of June 30, 2016 and December 31, 2015 are as follows:

| | Engineering and construction | Concession-type infrastructure | | | | Industrial production | |
|---|---|---|---|---|---|---|---|
| Item | Eng. and const. (1) | Solar (1) | Water | Trans. (1) | Cog. and other (1) | Biofuels (1) | Balance as of 06.30.16 (2) |

The criteria used to obtain the assets and liabilities per segment, are described as follows:

› With the only objective of presenting liabilities by segment, Net Corporate Debt has been allocated by segments, since its main purpose is to finance investments in projects and in companies with the need to expand their businesses and lines of activity of the Group. Additionally, bridge loans issued at the corporate level have been allocated between different operating segments depending on the projects where funds have been allocated.

c) The investments in intangible assets and property, plant and equipment and fixed assets in projects by segments for the six month period ended June 30, 2016 and 2015 is as follows:

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 (1) |
|---|---|---|
| **Engineering and construction** | | |
| Engineering and construction | 17,940 | 70,767 |
| **Total** | **17,940** | **70,767** |
| | | |
| **Concession-type infrastructure** | | |
| Solar | 1,066 | 743,178 |
| Water | 3,520 | 118,926 |
| Transmission lines | 3,455 | 41,438 |
| Cogeneration and other | 100,721 | 311,804 |
| **Total** | **108,762** | **1,215,346** |
| | | |
| **Industrial production** | | |
| Biofuels | 16,214 | 76,467 |
| **Total** | **16,214** | **76,467** |
| | | |
| **Total investments by segments** | **142,916** | **1,362,580** |
| | | |
| **Discontinued operations** | 31,283 | 331,063 |
| | | |
| **Total** | **174,199** | **1,693,643** |

(1) Restated figures. On June 30, 2016, the Company has classified the cash flow statement of the period June 30, 2016 and 2015 of the transmission line owner companies in Brazil as profit/loss from discontinued operations, given their significant activities developed within Abengoa (see Note 7).

d) The distribution of depreciation, amortization and impairment charges by segments for the six month period ended June 30, 2016 and 2015 is as follows:

| Item | For the six months ended 06.30.16 (1) | For the six months ended 06.30.15 |
|---|---|---|
| **Engineering and construction** | | |
| Engineering and construction | 117,178 | 55,581 |
| **Total** | **117,178** | **55,581** |
| | | |
| **Concession-type infrastructure** | | |
| Solar | 72,883 | 45,950 |
| Water | 175 | 6,634 |
| Transmission lines | 9,870 | 1,223 |
| Cogeneration and other | 236,259 | 473 |
| **Total** | **319,187** | **54,280** |
| | | |
| **Industrial production** | | |
| Biofuels | 1,376,190 | 76,393 |
| **Total** | **1,376,190** | **76,393** |
| | | |
| **Total** | **1,812,555** | **186,254** |

(1) Includes an impairment recognized during the six month period ended June 30, 2016 amounted to -€1,629 million given the situation of the Company (see Notes 7, 8 and 9). Additionally, at June 30, 2016, the company has recognized an impairment amounted to -€1,450 classified as results from discontinued operations, as financial expense and as share in profit (loss) of associates carried under the equity method (see Notes 9, 10 and 11).

(2) Restated figures. On June 30, 2016, the Company has reclassified the income statements for the six-month period ended June 30, 2016 and 2015 of the concessional assets LAT Brazil owner companies to Profit/loss from discontinued operations due to their significant activities developed within Abengoa (see Note 7).

## 5.2. Information by geographic areas

The revenue distribution by geographical region for the six month period ended June 30, 2016 and 2015 is as follows:

| Geographical region | For the six months period ended 06.30.16 | % | For the six months period ended 06.30.15 (*) | % |
|---|---|---|---|---|
| - North America | 429,096 | 35 | 952,305 | 28 |
| - South America (except Brazil) | 47,412 | 4 | 819,403 | 24 |
| - Brazil | 93,543 | 8 | 302,684 | 12 |
| - Europe (except Spain) | 260,288 | 21 | 354,492 | 10 |
| - Other regions | 174,715 | 14 | 417,647 | 12 |
| - Spain | 210,292 | 17 | 460,828 | 14 |
| **Consolidated Total** | **1,215,346** | **100** | **3,307,359** | **100** |
| Outside Spain amount | 1,005,054 | 83 | 2,846,531 | 86 |
| Spain amount | 210,292 | 17 | 460,828 | 14 |

(*) Restated figures. On June 30, 2016 there has been classified the income statement for the six-month period ended June 30, 2016 and 2015 of the concessional assets LAT Brazil owner companies as profit/loss from discontinued operations, given their significant activities developed within Abengoa (see Note 7).

# Note 6.- Changes in the composition of the Group

## 6.1. Changes in the consolidation group

During the first semester of the year 2016 a total of 3 associated companies were added to the consolidation perimeter of the group.

In addition, 8 subsidiaries, 2 associated companies and 3 joint ventures are no longer included in the consolidation group.

Within the companies which have left the consolidation perimeter is Abengoa Bioenergy Netherlands, B.V. given that, as a consequence of the declaration of bankruptcy by the Court of Rotterdam of such company on May 11, 2016, the appointment of a Liquidator and the consequent loss of control (see Note 2.1, 8.2 and 18.4).

## 6.2. Main acquisitions and disposals

### a) Acquisitions

There were no significant acquisitions during the six month period ended June 30, 2016.

### b) Disposals

- During the first semester of 2016, the main disposals are the following:
  - At the end of January 2016, the sale of the interest in Abengoa Solar Emirates Investment Company B.V. (TASEIC), parent company of Shams Power Company (Owner company of a 100MW thermo-solar plant developed by Abengoa in Abu Dhabi) was concluded. As a consequence of this sale Abengoa received an amount of US$30 million and has had a positive impact of €1 million in the consolidated Income Statement.
  - On March 31, 2016, the sale of the interest in the company Nicefield (owner company of a 70MW wind farm developed by Abengoa in Uruguay) was concluded. This sale concluded with an amount of US$0.4 million, releasing the company´s obligations of US$38 million of debt and its related guarantees, and has a positive impact in the consolidated Income Statement of €3 million.
  - At the beginning of April 2016, an agreement between Abengoa and Vela Energy, S.L. was closed for the sale of four photovoltaic plants located in the province of Seville and Jaen. The agreement, included in the divestment plan announced by the Company, has contributed with a debt reduction of €50 million, as well as a net cash inflow of €12 million and a negative impact in the consolidated income statements at June 30, 2016 for an amount of €4 million.
  - On April 16, 2016 an agreement between Abengoa and a group of investors (Estudios y Explotaciones de Recursos, S.A.U. Ingeniería de Manutención Asturiana, S.A., Noy Negev Energy, Limited Partnership and Shikun & Binui - Solel Boneh Infrastructure Ltd.) was signed for the transaction of all the Abengoa´s interest until that moment in the Project of Ashalim, consisting on the construction and operation of a 110MW thermo-solar plant located in Ashalim (Israel). The total amount of the transaction has been €64 million and was subjected to a number of conditions including the approval by creditors of the financing terms and the corresponding authorities of the State of Israel. As of June 30, 2016, not all of the conditions have been accomplished and thus, the sale transaction has not been recorded. Although, based on the total transaction amount, the investment has been recorded at fair value recognizing an impairment loss of €19 million (see Note 7). As of August 8, all the conditions have been accomplished and its collection has been effective.
  - On May 30, 2016, an agreement between Abengoa and Layar Castilla, S.A.U. has been signed for the transaction of all Abengoa´s interest in Explotaciones Varias, S.L. which aims the organization and operation of activities and businesses in relation to the acquisition of agricultural plot and its operation in agricultural, hunting and farming businesses directly, on partnership or by lease, the planting of crops, irrigation works and sanitation. This sale was completed for an amount of €16 million and has contributed with a positive impact in the consolidated income statement of €1 million.
  - At the beginning of June 2016, the agreement between Abengoa and the Company Garney has been closed for the transaction of the 80% Abengoa Vista Ridge LLC´s interest as owner Company of the assets associated to a water and conduction plant in United States. The agreement has contributed to a debt reduction of €105 million and no cash generation. As a consequence, the control over the assets has been transferred. Thus, and according to IFRS 10 – Consolidated Financial Statements, the loss of control over the company has supposed the disposal of all the assets and liabilities associated to the Company at book value on the date in which the loss of control was effective, as well as all minority interest of the Company and the valuation of the 20% interest at fair value at the date of loss of control. Due to all the above, it has been recorded a positive impact in the consolidated income statement of €74 million at June 30, 2016 (see Note 22.2).
  - After the closing of the six month period ended June 30, 2016, on July 5, 2016, an agreement between Abengoa and Excellance Field Factory, S.L.U. (affiliate company of Ericsson) has been signed for the sale of the deployment and maintenance of communication networks and subscriber loop business, currently operated by Abentel, to such company expressly created by Ericsson. The agreement, subjected to the compliance of certain conditions, involve the collection of €5 million as established and it would not have a significant impact in the consolidated income statements.
- On the other hand, and following the agreement reached with the infrastructure fund EIG Global Energy Partners ('EIG') on April 7, to establish the Joint Venture (JV) Abengoa Projects Warehouse I, LLP (APW-1) which structure consist of 55% invested by EIG and a remaining non-controlling interest of 45% by Abengoa, it should be note that, at the end of the year, the two asset transfer contributions to such JV were made by Abengoa (One corresponds to the 100% interest on CSP Atacama 1 and PV Atacama 1, solar plant project companies located in the Atacama Desert, Chile, and another second corresponds to a minority interest contribution of the power transmission line assets in Brazil.

After the end of the year 2015, and taking into account the situation in which the Company was, a process of reaching an understanding with EIG which will regulate the relationship between both parties about the contribution transferred to date considering the global agreement initially signed which resulted to the establishment of APW-1. The completion of these negotiations is a necessary condition to make the Restructuring Agreement effective which was signed on September 2016. As a consequence of the inability to accomplish the initial agreement, Abengoa has recognized an impairment charge in the APW-1 interest for an amount of €253 million in the income statements for the six month period ended June 30, 2016 while the negotiation process is completed.

## 6.3. Business combinations

During the first semester of the year 2016, there has not been further business combinations in the Group.

# Note 7.- Assets held for sale and discontinued operations

The asset rotation plan started at the end of 2014. Abengoa's Board of Directors, on September 23, 2015, aimed to reinforce the implementation of the plan through the sale or partial divestment, in case of external equity partners, of certain assets through a new plan that involves the divestment of those assets included in the initial plan which had not been sold at that date, as well as the new assets which were incorporated. Based on this plan others assets have been incorporated given the situation of the company described on Note 2.1.

The table below shows the included assets of such plan at June 30, 2016. These assets are classified as non-current assets and liabilities held for sale in the consolidated condensed statement of financial position because of the compliance of all the stipulations and requirements of IFRS 5, 'Non-Current Assets Held for Sale and Discontinued Operations':

| Asset | Details | Capacity |
|---|---|---|
| Cogeneration | 2 cogeneration plants in Brazil | 140 MW |
| Solar Power Plant One (SPP1) | Combine cycle in Algeria | 150 MW |
| Manaus Hospital / Concecutex | Concessions in Brazil and Mexico | 300 beds / 10,000 people |
| Khi Solar One / Xina Solar One | Solar plants in South Africa | 150 MW |
| Tenés / Ghana / Chennai | Desalination plants | 360,000 m3/day |
| Abent 3T & ACC4T (**) | Cogeneration plant in Mexico | 840 MW |
| Atacama 2 (**) | Solar platform in Chile | 280 MW |
| Ashalim (*) | Solar plant in Algeria | 110 MW |
| Norte III | Combine cycle in Mexico | 924 MW |
| ATN 3, S.A. (**) | Transmission lines in Peru | 355 km |
| Bioethanol USA | 1G and 2G bioethanol plant | 405 Mgal |
| ATE IV-VIII, XVI-XXIV, Manaus y Norte Brasil | Transmission lines in Brazil | 9,750 km |
| Xfera Móviles, S.A | Financial investment | - |

(*) Sold during July 2016.

(**) Companies with assets held for sale at December 31, 2014. Circumstances and loss of control of these companies since last August (see Note 2.1) have delayed the rotation process. However, the intention of Directors remains completing such companies.

Additionally, in relation to the transmission lines in Brazil, and due to their significant activities developed within Abengoa, there has been classified in the income statement, as well as, the cash flow statement for the period ended June 30, 2016, and 2015, to Discontinued operations in the consolidated income statement and the consolidated cash flow statement, in compliance with all assumptions and requirements of the IFRS 5 'Non-Current Assets Held for Sale and Discontinued Operations'.

The above-mentioned net assets and liabilities, are accounted at the carrying amount they had prior to being classified as held for sale, except the assets related to the 1G and 2G plants of bioethanol in United States (Indiana, Illinois, Nebraska, York and Hugoton), the solar plants located in Chile (Atacama 2), the generation plans in Mexico (Abent 3and ACC4T), and the investment over Xfera Moviles, S.A. which are recorded at their expected sale or liquidation value and fair value in the case of a sale, after an impairment amounting to €810, €47, €946, €236 and €33 million respectively in the Consolidated Income Statements for the first semester of 2016.

At June 30, 2016 and December 31, 2015, the breakdown of assets and liabilities in the Consolidated condensed interim statements of financial position related to the rotation plan in force in each date, reclassified as assets and liabilities held for sale is the following:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Intangible assets | 279,410 | - |
| Property plant and equipment | 134,211 | - |
| Fixed assets in projects | 4,263,370 | 3,021,586 |
| Investments in associates | 237,151 | 163,667 |
| Financial investments | 343,906 | 3,306 |
| Deferred tax assets | 26,005 | 11,298 |
| Current assets | 295,289 | 31,589 |
| Project debt | (1,663,734) | (923,497) |
| Corporate financing | (255,585) | - |
| Other non-current liabilities | (206,815) | (168,537) |
| Other current liabilities | (253,218) | (74,976) |
| **Total net assets and liabilities held for sale** | **3,199,990** | **2,064,436** |

As of June 30, 2016 and 2015, a breakdown of the income statement of the transmission lines in Brazil concessional assets owner companies reclassified as results from discontinued operations is as follows:

| | For the six months period ended 06.30.16 (*) | For the six months period ended 06.30.15 |
|---|---|---|
| Revenue | 60,626 | 82,963 |
| Other operating income | 1,887 | - |
| Operating expenses (*) | (977,959) | (45,192) |
| I. Operating profit | (915,446) | 37,771 |
| II. Financial expense, net | (37,697) | (35,470) |
| III. Share of profit/(loss) of associates carried under the equity method | (68) | 144 |
| IV. Profit before income tax | (953,211) | 2,445 |
| V. Income tax benefit | (1,242) | (871) |
| VI. Profit for the period from continuing operations | (954,453) | 1,574 |
| VII. Profit attributable to minority interests | (13) | 130 |
| **VIII. Profit for the period attributable to the Parent Company** | **(954,466)** | **1,704** |

(*) The impairment recognized over the assets amounts to €946 million (see Note 9.1)

Additionally, for the six month period ended June 31, 2016 and 2015, the cash flow statement related to transmission lines in Brazil which has been reclassified as discontinued operations is as follows:

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Profit for the year from continuing operations adjusted by non monetary items | 44,610 | 57,332 |
| Variations in working capital | 10,548 | 306,406 |
| Interest and income tax received / paid | (28,510) | (33,143) |
| **A. Net cash provided by operating activities** | **26,648** | **330,596** |
| **B. Net cash used in investing activities** | **(31,283)** | **(300,388)** |
| **C. Net cash provided by financing activities** | **-** | **(6,817)** |
| Net increase/(decrease) in cash and cash equivalents | (4,635) | 23,391 |
| Cash, cash equivalents and bank overdrafts at beginning of the year | 29,844 | 22,988 |
| Translation differences cash or cash equivalent | 5,396 | (2,714) |
| **Cash and cash equivalents at end of the year** | **30,605** | **43,665** |

# Note 8.- Intangible assets and property, plant and equipment

8.1. The detail of the main categories included in intangible assets as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Goodwill | Development assets | Other | Total |
|---|---|---|---|---|
| Intangible assets cost | 418,469 | 426,666 | 178,346 | 1,023,481 |
| Amortization and impairment | (50,843) | (273,981) | (133,491) | (458,315) |
| **Total as of June 30, 2016** | **367,626** | **152,685** | **44,855** | **565,166** |

| Item | Goodwill | Development assets | Other | Total |
|---|---|---|---|---|
| Intangible assets cost | 364,429 | 1,241,032 | 185,497 | 1,790,958 |
| Amortization and impairment | - | (256,769) | (88,212) | (344,981) |
| **Total as of December 31, 2015** | **364,429** | **984,263** | **97,285** | **1,445,977** |

The most significant variation during the six month period ended June 30, 2016 mainly corresponds to a decrease caused by the reclassification as assets held for sale of the former development assets related to the bioethanol 2G plant of Hugoton in United States given the compliance of all conditions and requirements of the IFRS5 – "non-current assets held for sale and discontinued operations" after the beginning of the sale process initiated within the Chapter 11 proceedings (see Note 2.1). Given that the carrying amount is greater than fair value less cost to sell (taking into account as a reference the price in purchase offer to estimate the fair value) there is an impairment expense in the Consolidated Income Statement (see Note 7).

Additionally, there has been a decrease due to the impairment registered over certain intangible assets (goodwill, and development assets) pertaining to the Engineering and Construction segment, due to the uncertain recovery given the problems arise during the period to keep the activity in an appropriate way because the current situation of the Company; such decrease has been offset with an increase in the period due to the appreciation of the Brazilian real against the Euro. In accordance with the available information for the Directors and, based on the best estimates. An expense of €90 million for this concept has been recorded in the interim consolidated income statements at June 30, 2016.

8.2. The detail of the main categories included in Property, plant and equipment as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Lands and buildings | Technical installations and machinery | Advances and fixed assets in progress | Other fixed assets | Total |
|---|---|---|---|---|---|
| Property, plant & equipment cost | 225,189 | 606,562 | 62,192 | 94,808 | 988,751 |
| Depreciation and impairment | (101,199) | (281,816) | - | (63,635) | (446,650) |
| **Total as of June 30, 2016** | **123,990** | **324,746** | **62,192** | **31,173** | **542,101** |

| Item | Lands and buildings | Technical installations and machinery | Advances and fixed assets in progress | Other fixed assets | Total |
|---|---|---|---|---|---|
| Property, plant & equipment cost | 485,721 | 1,219,862 | 56,589 | 104,992 | 1,867,164 |
| Depreciation and impairment | (125,876) | (512,300) | - | (74,914) | (713,090) |
| **Total as of December 31, 2015** | **359,845** | **707,562** | **56,589** | **30,078** | **1,154,074** |

The most significant variation during the six month period ended June 30, 2016 , mainly corresponds to the decrease generated by the exit of the consolidation perimeter of Abengoa Bioenergy Netherlands, B.V. after its loss of control over this company as a consequence of the beginning of the liquidation (see Note 21) after the declaration of bankruptcy in the last month of May as indicated on Note 2.1. In this way, and in accordance with the IFRS 10 – Consolidated Financial Statements, the loss of control over this Company has generated the disposal of all the assets and liabilities related to the Company at book value on the date in which the loss of control was effective, as well as the recognition of the retained interest over this company. Additionally, all assets and liabilities arisen after the loss of control have been recorded at fair value. Given the situation of bankruptcy of the company, the fair value has been obtained based on the recovery amount after the finalization of the liquidation process, recognizing an impairment charge amounted to €446 million in the consolidated income statement at June 30, 2016.

Additionally, there has been a decrease due to the reclassification as assets held for sale of the fixed assets related to the 1G and 2G bioethanol plant in United States (Nebraska and York) given the compliance of all conditions and requirements of the IFRS5 – "non-current assets held for sale and discontinued operations" after the beginning of the sale process initiated within the Chapter 11 proceedings (see Note 2.1). Given that the carrying amount is greater than its fair value less cost to sell (taking into account as a reference the price in purchase offer to estimate the fair value) there is an impairment expense in the Income Statement (see Note 7).

# Note 9.- Fixed assets in projects

There are several companies which engage in the development of projects including the design, construction, financing, operation and maintenance of owned assets or assets under concession-type agreements.

9.1. The detail of concessional assets in projects as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Intangible and financial assets | Development assets | Total |
|---|---|---|---|
| Concession assets in projects cost | 10,013 | 280,391 | 290,404 |
| Amortization and impairment | (1,998) | (17,925) | (19,923) |
| **Total as of June 30, 2016** | **8,015** | **262,466** | **270,481** |

| Item | Intangible and financial assets | Development assets | Total |
|---|---|---|---|
| Concession assets in projects cost | 2,485,489 | 280,166 | 2,765,655 |
| Amortization and impairment | (354,364) | - | (354,364) |
| **Total as of December 31, 2015** | **2,131,125** | **280,166** | **2,411,291** |

The most significant variation during the six month period ended June 30, 2016, mainly corresponds to the decrease due to the reclassification, as assets held for sale, of intangible assets of the concessional assets related to the transmission lines in Brazil. These assets comply with all assumptions and requirements of the IFRS 5 'Non-Current Assets Held for Sale and Discontinued Operations' after the sale process initiated in the recuperação judicial framework provided by the Brazilian law (see Note 2.1 and 7). Given that the carrying amount is greater than fair value less cost to sell (taking into account as a reference the purchase offer to eliminate the fair value) there is an impairment expense amounted to €946 million in the Consolidated Income Statement. All this variation has been partially offset by the increase caused by the slight progress in Zapotillo Aqueduct concession and Unidad Punta de Rieles concession.

9.2. The detail of the main categories included in Other assets in projects as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Land and buildings | Technical installations and machinery | Advances and fixed assets in progress | Other PP&E | Software and other intangibles | Total |
|---|---|---|---|---|---|---|
| Other assets in projects cost | 201,951 | 350,881 | 8,171 | 366,236 | 62,843 | 990,082 |
| Depreciation and impairment | (23,883) | (169,335) | - | (131,964) | (26,819) | (352,001) |
| **Total as of June 30, 2016** | **178,068** | **181,546** | **8,171** | **234,272** | **36,024** | **638,081** |

| Item | Land and buildings | Technical installations and machinery | Advances and fixed assets in progress | Other PP&E | Software and other intangibles | Total |
|---|---|---|---|---|---|---|
| Other assets in projects cost | 280,505 | 752,550 | 9,561 | 294,591 | 53,737 | 1,390,944 |
| Depreciation and impairment | (48,572) | (275,945) | - | (92,055) | (26,000) | (442,572) |
| **Total as of December 31, 2015** | **231,933** | **476,605** | **9,561** | **202,536** | **27,737** | **948,372** |

The most significant variation during the six month period ended June 30, 2016 mainly corresponds to the decrease caused by the reclassification, as assets held for sale, of the fixed assets related to the 1G bioethanol plants in United States (Indiana and Illinois) in compliance with all assumptions and requirements of the IFRS 5 'Non-Current Assets Held for Sale and Discontinued Operations' after the sale process initiated in the Chapter 11 proceedings framework (see Note 2.1). Given that the carrying amount is greater than fair value less cost to sell (taking into account as a reference the price in purchase offer to estimate the fair value) there has been recognized and impairment charge for such assets in the Income statements (see Note 7).

# Note 10.- Investments accounted for using the equity method

10.1. The detail of the main categories included in Investments accounted for using the equity method as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Associates | 757,883 | 918,136 |
| Joint Ventures | 21,477 | 279,555 |
| **Total Investments accounted for using the equity method** | **779,360** | **1,197,691** |

The most significant variations of investments in associates and joint ventures during the first semester of 2016 correspond to the decrease due to the depreciation caused by the impairment over the APW-1 JV interest (see note 6.2) amounted €253 million after the loss of control of all economic rights over such investment, the sale of the investments over Explotaciones Varias, S.L. (see Note 6.2), the reclassification as assets held for sale of the investment in the thermo-solar project Xina in South Africa and the desalination project of Chennai in India (see Note 7) and the depreciation of the USD dollar against the Euro. All this variation has been partially offset by the reclassification of Abengoa Water USA as associate as a consequence of the loss of control due to the transaction of the 80% interest in Abengoa Vista Ridge LLC (see Note 6.2).

Additionally, there has been a decrease in the investment over the associate Rioglass Solar. In this sense, it should be noted that, related to the agreement reached at the 2015 closing with the minority partner (Rioglass Laminar) in which the control is transferred to that company, a convertible loan had been signed between Abengoa Rioglass as borrower and Rioglass Laminar as lender for an amount of €15 million. Such convertible loan was indispensable to keep the business under going concern and avoid the bankruptcy of Rioglass. The conversion of the loan into preferred equity (with preference only in the case of liquidation of sale of the company if Abengoa would take part in that) would happened if Abengoa would not have made a number of payments as client until April 20, 2016. In case of the 100% conversion, the preferred equity would be transferred to the outstanding capital and thus, Abengoa´s interest would be diluted to 15%. Finished the payment period without compliance by Abengoa given the situation of the Company, a negotiation with the partner Rioglass Laminar in being carried out in order to reach an agreement of shareholders and specifically concerning the minority interest protection. On June 30, 2016 there had not been yet the legally conversion of the loan.

Regardless the aforementioned, and given the high probability conversion of the loan, at the end of the first semester of 2016, it has been registered the potential dilution and the expense due to the impairment in the investment over Rioglass Solar in the Consolidated Income Statement for the six month period ended June 30, 2016 amounted to €82 million.

10.2. At June 30, 2016, the most significant investment to disclose about assets, liabilities and income statements correspond to Atlantica Yield.

As of June 30, 2016 and December 31, 2015, the assets and liabilities breakdown in the Consolidated Statement of Financial Position of Atlantica Yield is the following:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Fixed assets in projects | 8,321,295 | 8,554,873 |
| Investments in associates | 45,570 | 49,880 |
| Financial investments | 84,153 | 92,152 |
| Deferred tax assets | 183,158 | 173,118 |
| Other non-current assets | 121 | - |
| Current assets | 940,908 | 873,135 |
| Project debt | (5,563,060) | (5,648,284) |
| Other non-current liabilities | (2,059,491) | (2,059,018) |
| Other current liabilities | (189,496) | (178,444) |
| **Total net assets and liabilities** | **1,763,158** | **1,857,412** |

The amount related to other comprehensive income amounts to a loss of €85 million (€78 million as of December 31, 2015).

The following breakdown shows the Atlantica Yield Income Statements for the six month period ended June 30, 2016 and 2015:

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Revenue | 419,204 | 225,819 |
| Other operating income | 27,285 | 20,801 |
| Operating expenses | (264,946) | (122,757) |
| I. Operating profit | 181,543 | 123,863 |
| II. Financial expense, net | (186,560) | (116,541) |
| III. Share of profit/(loss) of associates carried under the equity method | 2,997 | 2,997 |
| IV. Profit before income tax | (2,020) | 10,319 |
| V. Income tax benefit | (14,608) | (5,657) |
| VI. Profit for the period from continuing operations, net of tax | (16,630) | 4,662 |
| VII. Profit attributable to non-controlling interests | (4,401) | (5,211) |
| **VIII. Profit for the period attributable to the Parent Company** | **(21,032)** | **(548)** |

# Note 11.- Financial investments

The detail of the main categories included in financial investment as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Available for sale financial assets | 2,696 | 41,057 |
| Other receivable accounts | 483,974 | 1,057,729 |
| Derivative assets | 14,255 | 14,941 |
| **Total non-current financial investments** | **500,925** | **1,113,727** |

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Available for sale financial assets | 5,058 | 5,342 |
| Other receivable accounts | 183,354 | 499,665 |
| Derivative assets | 6,332 | 13,814 |
| **Total current financial investments** | **194,744** | **518,821** |
| | | |
| **Total financial investments** | **695,669** | **1,632,548** |

The most significant variations in current financial investments during the first semester of 2016 mainly correspond to a decrease due to the maturity of deposits associated to non-recourse confirming (see Note 21), the reclassification as held for sale of certain financial investments related to transmission lines in Brazil and the investment own by Abengoa over Xfera Moviles, S.A., and the decrease of the Befesa convertible loan.

In relation to the investment over Xfera Moviles, S.A. it should be known that, on June 20, 2016 an agreement has been signed between Abengoa and Masmovil Phone & Internet, S.A.U. for the transaction of the 3% interest owned by Abengoa until that moment over Xfera Moviles, S.A. (Yoigo as trademark), as well as the corresponding rights on the equity loans conceded to such company. On the other hand, Telia, with a 76.56%; ACS with a 17% and FCC with a 3.44% interest; have agreed the sale of their investments to Masmovil. With this transaction, which will be closed in the following months, Abengoa could collect up to €35 million by mean of the following instruments:

a) An amount of €21 million as loan amortization in 7 years since the seventh year which accrues a fix interest rate of 2% and a variable interest rate of 3% depending on the compliance by Xfera of several financial ratios and an early redemption option by Abengoa since the third month to the second year after the contract enters in force. Such early redemption option would be assured by an unconditional bank guaranty in first requirement. Additionally, it is conceded to Abengoa the right to capitalize the loan when several temporary terms and conditions are met by Xfera of several financial ratios.

b) An amount of €14 million as "earn-Out" in accordance to the established rules in the contract. In early redemption case, Abengoa will not have the right to collect any amount for this concept. €21 million will be collected at the operation closing, while the outstanding €14 million will be subjected to the results obtained by Yoigo in the following years.

Regardless the entry in force of this contract at June 30, 2016 closing, and given that the investment in Xfera is registered at fair value, the company has recognized an impairment of €33 million (see Note 22.2) as the difference between the book value and the amount to be collected of the loan, given the high probability of Abengoa to exercise the right of early redemption given the current situation of the liquidity of the company.

Additionally, and in relation to the Befesa convertible loan, it should be known that, at the beginning of May 2016 the agreement signed between Abengoa and the investment fund Triton Partner to sell the mentioned convertible loan in shares of Befesa Medio Ambiente, S.L.U. after the exercise of the sold purchase option by Abengoa on March 2016 for an amount of €20 million. As of June 30, the sale amount has been already been collected and a loss has been recognized for an amount of €136 million in the Consolidated Income Statement at June 30, 2016 (see Note 22.2).

# Note 12.- Derivative financial instruments

The fair value of derivative financial instruments as of June 30, 2016 and December 31, 2015 is as follows:

| | Balance as of 06.30.16 | | Balance as of 12.31.15 | |
|---|---|---|---|---|
| Item | Assets | Liabilities | Assets | Liabilities |
| Exchange rate derivatives – cash flow hedge | 16,113 | 4,166 | 22,067 | 37,181 |
| Exchange rate derivatives – non-hedge accounting | 3,611 | 1,908 | 4,313 | 4,139 |
| Interest rate derivatives – cash flow hedge | 716 | 16,312 | 1,522 | 6,736 |
| Interest rate derivatives – non-hedge accounting | - | 6,321 | - | 32,998 |
| Commodity derivatives – cash flow hedge | 144 | 1 | 846 | 34,320 |
| Commodity derivatives – non-hedge accounting | 1 | - | - | - |
| Embedded derivatives of convertible bonds, exchangeable bonds and shares options | 2 | 206 | 7 | 30,545 |
| **Total** | **20,587** | **28,914** | **28,755** | **145,919** |
| Non-current part | 14,255 | 19,623 | 14,941 | 38,002 |
| Current part | 6,332 | 9,291 | 13,814 | 107,917 |

The most significant variation during the six month period ended June 30, 2016 corresponds to the net decrease in derivative financial liabilities mainly due to the sale of the convertible bond of Befesa to Triton Investment Fund (see Note 11), to the decrease due to an early settlement of interest rate derivatives associated to the syndicated loan, as well as to the decrease in the fair value of the convertible bond embedded derivative to ordinary shares of Atlantica Yield maturing on 2017 (see Note 18.3).

The fair value amount transferred to the Consolidated income statement in 2016 concerning the financial instruments derivatives designated as hedging instruments is a loss of €6,027 thousand (€49,466 thousand as of June 30, 2015).

The net amount of derivatives fair value transferred directly to the Consolidated income statement as a result of not meeting all the requirements of IAS39 to be designated as accounting hedges represents a loss of €455 thousand (loss of €1,918 thousand as of June 30, 2016).

# Note 13.- Inventories

Inventories as of June 30, 2016 and December 31, 2015 were as follows:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Goods for sale | 6,562 | 5,766 |
| Raw materials and other supplies | 71,850 | 114,424 |
| Work in progress and semi-finished products | 3,529 | 139 |
| Projects in progress | 39,455 | 33,368 |
| Finished products | 38,723 | 55,350 |
| Advance Payments to suppliers | 78,321 | 102,215 |
| **Total** | **238,440** | **311,262** |

# Note 14.- Clients and other receivable accounts

The breakdown of Clients and other receivable accounts as of June 30, 2016 and December 31, 2015 is as follows:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Customer receivables | 695,528 | 515,088 |
| Unbilled revenues | 399,046 | 787,535 |
| Bad debt provisions | (84,046) | (63,707) |
| Tax receivables | 500,172 | 552,958 |
| Other debtors | 196,782 | 212,562 |
| **Total** | **1,707,482** | **2,004,436** |

At the six month period ended June 30, 2016, Abengoa had non-recourse factoring lines, of which €26 million had been factored and a global transfer agreement of non-recourse collection rights related to the construction of a combined cycle plant in Mexico by €391 million.

# Note 15.- Share capital

As of June 30, 2016 the share capital amounts to €1,838,739.13 corresponding to 941,567,871 shares completely subscribed and disbursed, divided into two distinct classes, as follows:

- 83,354,826 class A shares with a nominal value of 0.02 Euro each, all in the same class and series, each of which grants the holder a total of 100 voting rights ('Class A Shares').
- 858,213,045 class B shares with a nominal value of 0.0002 Euros each, all in the same class and series, each of which grants One (1) voting right and which affords its holder economic rights identical to the economic rights of Class A shares as stated in article 8 of the Company's by laws ('Class B Shares' and, together with class A shares, 'Shares with Voting Rights').

The parent company Abengoa, S.A. has incurred in losses since 2015 which has supposed a significant decrease in Equity and, as a consequence, at the end of the period June 30, 2016 presents a situation of financial instability (negative net equity). In accordance with the Article 363 of the Spanish Corporation Law, a Company will be in dissolution situation when losses lead Net Equity to an amount lower than half shared capital, unless an increase or decrease in capital share were enough. In this sense, Directors are adopting necessary measures to restore the financial stability (see note 2.1 and 29).

Abengoa's shares are represented by class A and B shares which are listed on the Madrid and Barcelona stock exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. The Company presents mandatory financial information quarterly and semiannually.

In accordance with notifications received by the company and in compliance with reporting requirements to communicate shareholding percentages (voting rights) and the information received from relevant parties, shareholders with a significant holding as of June 30, 2016 are as follows:

| Shareholders | Share % |
|---|---|
| Inversión Corporativa IC, S.A. (*) | 44,60 |
| Finarpisa, S.A. (*) | 5,94 |

(*) Inversión Corporativa Group

On September 30, 2015 the General Shareholders' Meeting approved a capital increase of 430,450,152 Class B shares with a nominal value of €0.01 each reducing its unrestricted reserves, which would be delivered to all shareholders on a proportion of four Class B share by each owned Class A or B share. Such General Shareholders' Meeting approved a voluntary conversion right to change Class A shares of one euro nominal value (€0.002 nominal value as of December 31, 2015) to Class B shares of €0.01 nominal value (€0.0002 nominal value as of December 31, 2015) during certain pre-established periods until December 31, 2017. After exercising this right and after a capital reduction by means of the nominal value of all the class A shares at 0.98 each at that moment and all Class B shares at 0.0098 each at that moment, agreed by the Extraordinary Shareholders' Meeting of the company in October 10, 2015, a capital reduction by means of the nominal value of the converted shares at the value of €0.0198 per share, with unrestricted reserves credit.

With respect to the foregoing, after closing the 17th liquidity window dated April 15, 2016, the Company carried out on April 19, 2016, a reduction of capital share by the amount of €1,323.91 by means of the conversion of 66,864 Class A shares into new Class b shares.

On the other hand, on July 19, 2016, the Company has carried out a capital increase, without preferential subscription right as well, for an amount of 40.82 euros of nominal value by means the issuance of 204,081 new Class B shares aiming to attend the conversion applications received in relation to the 400,000,000 euros convertible bond at 6.25% interest rate and maturing on 2019 issued by the Company in January 2013. Finally and after closing the 18th liquidity window dated July 15, 2016, the Company carried out on July 28, 2016, a reduction of capital share by the amount of €3,314.12 by means of the conversion of 167,380 Class A shares into new Class b shares.

As a consequence of the mentioned operations, the share capital of Abengoa at the date of July 28, 2016, amounts €1,835,465.83 represented by 941,771,952 shares fully subscribed and paid, pertaining to two different classes: 83,187,446 Class A shares and 858,594,506 Class B shares.

The proposed distribution of 2015 and other reserves of the Parent Company approved by the General Shareholders 'Meeting in June 30, 2016 has been charged to retained earnings.

Abengoa's Board of Directors held on September 23, 2015 approved the suspension of our dividend until Abengoa achieve a credit rating of "BB-"from Standard & Poors or "Ba3" from Moody's or our leverage ratio of Gross Corporate Debt (including bridge loan), as of the most recent balance sheet date which is approved, to Corporate EBITDA for the twelve months immediately preceding such balance sheet date, falls below 3.5x. As long as Abengoa do not reach the aforementioned credit rating or leverage ratio, Abengoa will not distribute dividends to their shareholders

# Note 16.- Non-controlling interest

In the six month period ended June 2016, the increased of Non-controlling interest mainly corresponds to the appreciation of the Brazilian real, as well as the capital increase made in the desalination plant of Agadir.

# Note 17.- Project debt

The Consolidation Group includes interests in various companies that, in general, have been created to develop an integrated product that consists of designing, constructing, financing, operating and maintaining a specific infrastructure (usually a large-scale asset such as a power transmission line). These may be owned outright or under a concession arrangement for a specific period of time and whose financing sources are various non-recourse project financing schemes (project finance).

Project finance (non-recourse financing) is generally used as a means of constructing an asset, using the assets and cash flows of the company or group of companies that will perform the activity associated with the project being financed as collateral. In most cases the assets and/or contracts are used as a guarantee for the repayment of the financing.

Compared to corporate financing, the project finance has certain key benefits, which include a longer borrowing period due to the profile of the cash flows generated by the project and a clearly defined risk profile.

Despite having a commitment from a financial institution during the awarding phase of the project and since the financing is usually completed in the latter stages of a construction project –mainly because these projects require a significant amount of technical and legal documentation to be prepared and delivered that is specific to the project (licenses, authorizations, etc.) –bridge loan (formerly named Non-recourse project financing in process) needs to be available at the start of the construction period in order to begin construction activities as soon as possible and to be able to meet the deadlines specified in the concession agreements.

Obtaining this financing is considered as a temporary funding transaction and is equivalent to the advances that clients traditionally make during the different execution phases of a construction project or works.

Bridge loan has specific characteristics compared to traditional advances from clients. For example the funds are usually advanced by a financial institution (usually for terms of less than 2-3 years), although there are similarities in the implicit risk that mainly relates to the capacity of the company that is going to own the project to construct it correctly in time and form.

The specific funding requirements that usually accompany bridge financing agreements usually include the following:

- The funds that are drawn down as the project is executed can only be used for developing the project to construct the asset, and
- The obligation to use the project finance to repay the bridge loan.

This means that conversion of the bridge loan in a long-term project finance arrangement has a very high degree of security from the start of the project (normally there is a comfort letter or support from the institutions that are going to participate in the long-term financing).

In terms of guarantees, both the bridge loan and the project finance have the same technical guarantees from the contractor in relation to price, deadlines and performance.

The difference is that the bridge loan in most cases also has corporate guarantee from the project's sponsor in order to cover the possibility of a delay in the financial closing of project finance.

Both guarantees (contractor and sponsor) are intended to underwrite the future cash flows from the project in the event that technical risks give rise to variations in them (failure to comply with the construction schedule or with the deadlines for finalizing the project finance).

Therefore the bridge loan and the project finance are –from a contractual perspective– independent loan transactions, although they are linked in terms of their overall aim (for example, with the exception of the aforementioned guarantees, both share the same risks; their sole purpose is for financing projects; they are generally repaid with funds from the project itself; and they are separate from the company's other cash sources) and commercially (the financial institution itself has an interest in favorably resolving the continuity of both transactions). These two types of financing are therefore considered to be similar in terms of managing the company's business.

Consequently, the internal criteria for classifying a financial liability in the Consolidated condensed statement of financial position as project debt is based on the characteristics and use of that financing and not on the guarantees provided, since the security and predictability of the substitution process (based on past guarantees) means that this guarantee is more theoretical or hypothetical with regards to its use (such a guarantee has never been used by the nominal beneficiaries).

In relation to the return on the project, usually it has been more beneficial to obtain bridge loan via the special purpose entity responsible for operating and maintaining the asset to be constructed. However, the cheaper cost of financing obtained at a corporate level has enabled projects to be financed centrally, generating important competitive advantages as well as reducing start times for project construction. Consequently, during the years 2014 and 2015 It was issued various bridge financing with a corporate guarantee were issued, structured in a similar way to the bridge loans used previously in terms of their purpose (project financing) and repayment (from project cash flows). This financing is therefore also

considered to be similar to the project finance in terms of managing the business and the company's risk and it is therefore classified under the same heading.

17.1. The details of project debt applied to projects, for both non-current and current liabilities, as at June 30, 2016 and December 31, 2015 is as follows:

| Project debt | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Project finance (Non-recourse project financing) | 495,074 | 1,021,047 |
| Project bridge loan (Non-recourse project financing in process) | 1,902,139 | 2,049,059 |
| **Total project debt** | **2,397,213** | **3,070,106** |
| Non-current | 14,599 | 503,509 |
| Current | 2,382,614 | 2,566,597 |

At the six month period ended June 30, 2016, the total amount of non-recourse projects overdue and unpaid amounts to €265 million. The corresponding interest associated have been recognized.

At the first six month period ended 2016, the total amount of project finance has decreased mainly due to the reclassification, as liabilities held for sale, of the non-recourse debt of certain transmission lines concessional assets, given its compliance with all assumptions and requirements of the IFRS 5 'Non-Current Assets Held for Sale and Discontinued Operations' after the sale process initiated in the recuperação judicial framework provided by the Brazilian law (see Note 2.1 and 7). All this variation has been partially offset by the net increase in exchange rates (derived from the appreciation of the Brazilian real partially offset by the depreciation of the USD dollar) and the accrual of not paid interests of different loans.

The table below lists projects with bridge loan in progress (bridge loan) as of June 30, 2016 (amount in thousands of euros):

| Item | Bridge financing amount drawn (2) (3) | Guarantee type (4) |
|---|---|---|
| LAT Brasil (1) | 1,057,434 | Contractor and Sponsor / Corporate |
| Abent T3 | 261,833 | Corporate |
| ACC4T | 89,660 | Corporate |
| Plataforma Solar Atacama (1) | 493,212 | Contractor and Sponsor / Corporate |
| **Total** | **1,902,139** | |

(1) Includes the transmission line projects in Brazil relating to ATE XVI Transmissora de Energía, S.A. (Miracema), ATE XVII Transmissora de Energía, S.A. (Milagres), ATE XVIII Transmissora de Energía, S.A. (Estreito), ATE XIX Transmissora de Energía, S.A. (Luiz Gonzaga), ATE XX Transmissora de Energía, S.A. (Teresina), ATE XXI Transmissora de Energía, S.A. (Parauapebas), ATE XXII Transmissora de Energía, S.A., ATE XXIII Transmissora de Energía, S.A. and ATE XXIV Transmissora de Energía, S.A. and to solar plant project in the Atacama Desert, Chile, which combines tower technology based on molten salts and photovoltaic.

(2) Green Bond funds used to finance Green Projects may be used to finance other Green Projects selected in accordance with the requirements of Use of Funds indicated in the Offering Memorandum, once obtained the long term funds related to projects. Additionally, Tranch B funds, once obtained the long term funds, may be allocated to new projects in progress once accomplished the specific requirements of the financing contract.

(3) Excludes amounts withdrawn from the project bridge loans, which have been issued by the projects with Contractor and Sponsor guarantee by Abengoa and/or some of corporate subsidiaries (which are not project companies), amounting to €477,651 thousands and which have been transferred to liabilities held for sale and, for Atacama I project in Chile specifically, included in the consolidated statement of financial position of Abengoa Project Warehouse (APW-1), joint venture accounted for using the equity method (see Note 7and 10) amounted €239,643 thousand.

(4) The guarantee references "Contractor and sponsor" refer to corporate guarantees mainly related to the bridge financing of the projects. The references to "Corporate" guarantees refer to guarantees related to the Green Bonds. These guarantees cover all of the indicated bridge financing.

# Note 18.- Corporate financing

18.1. The breakdown of the corporate financing as of June 30, 2016 and December 31, 2015 is as follows:

| Non-current | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Credit facilities with financial entities | 6,105 | 6,566 |
| Finance lease liabilities | 10,481 | 19,522 |
| Other loans and borrowings | 87,534 | 345,437 |
| **Total non-current** | **104,120** | **371,525** |

| Current | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Credit facilities with financial entities | 2,592,125 | 2,321,654 |
| Notes and bonds | 3,382,981 | 3,300,825 |
| Finance lease liabilities | 14,449 | 17,020 |
| Other loans and borrowings | 1,030,161 | 557,047 |
| **Total current** | **7,019,716** | **6,196,546** |
| | | |
| **Total corporate financing** | **7,123,836** | **6,568,071** |

At the six month period ended June 30, 2016, the total amount of the overdue and unpaid corporate-financing (principal and interest) amounts to €1,848 million. The corresponding default interest expenses have been recognized.

The increase as of June 30, 2016 in corporate financing was mainly due to the consideration as corporate debt of overdue and unpaid suppliers debt through non-recourse confirming instrument (€184 million), the matured and not paid derivative instruments (€135 million), the executed bank guaranty (€58 million), as well as the default interest recognized, all above plus the interest accrued for different loans. Additionally it was subscribed a new liquidity line for an amount of €137 million and until June 30, 2016 it has been disposed an amount of €38 million of debtor-in-.possession financing in United States (see Note 2.1). Moreover, all the mentioned has been affected by the appreciation of the Brazilian real. These amounts has been partially offset the disposal of liabilities of Abengoa Bioenergy Netherlands after the loss of control over such company as a consequence of the beginning of the liquidation process (see Note 8.2), the depreciation of the USD dollar as well as the reclassification to liabilities held for sale of other loans and borrowings related to transmission lines in Brazil (see Note 7).

In relation to the new liquidity line said before, it must be known that, in the framework of the negotiations with a group of creditors comprised of banks and holders of bonds issued by the Abengoa group, for the restructuring of its indebtedness and its recapitalization in line with the grounds of an agreement that was announced on March 10, 2016 (relevant fact number 236094), on March 21, 2016, Abengoa Concessions Investments Limited ("ACI"), a subsidiary of the Company, entered into a Secured Term Facility Agreement (the "Facility Agreement") with, among others, the lenders as describe below (the "Lenders") and the agent appointed thereunder (the "Agent"), pursuant to which it is entitled to borrow up to €137,094,751.30 (the "Loan Amount") and is required to enter into related security documents (collectively, the "Loan Documents").The Facility Agreement will be used for the general corporate and working capital purposes of the Company and its subsidiaries (the "Group").

Upon the occurrence of certain usual events for this type of loan, the Lenders may exercise their right to require ACI to repay all or part of the Loan Amount, grant additional collateral or foreclose on, and dispose of the Pledged Shares (as described below under "Security") in accordance with the Loan Documents.

The loan will mature on September 23, 2016 or (if maturity for the September Facility and the December Facility is extended to at least the same date) 12 months after the disposition date. Loans will initially bear interest at a rate per annum equal to the aggregate of EURIBOR plus 14.5% (on a payment in kind basis). Default interest will be payable at a rate of 5% above the interest rate.

In certain circumstances, a make-whole amount, a restructuring fee and/or a rollover fee may become payable under the Facility Agreement.

## 18.2. Credit facilities with financial entities

Credit facilities with financial entities as of June 30, 2016 and December 31, 2015 are as follow:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Syndicated loan | 703,468 | 690,640 |
| ICO financing | 30,564 | 30,082 |
| Instalaciones Inabensa S.A. financing | 284,885 | 280,930 |
| Abener Energia S.A. financing | 386,234 | 381,893 |
| Teyma, Gestión de Contratos de Contrucc. e Ing. S.A financing | 91,456 | 89,396 |
| Abener Teyma Mojave General Partnership financing | 63,943 | 65,636 |
| Centro Morelos 264, S.A. de C.V financing | 78,151 | 79,913 |
| European Investment Bank financing | 76,709 | 75,694 |
| Revolving credit agreement (€125 million) | 134,346 | 126,150 |
| Working capital line (€106 million) | 109,654 | 100,116 |
| Working capital line (€132 million) | 137,328 | - |
| Remaining loans | 501,492 | 407,770 |
| **Total** | **2,598,230** | **2,328,220** |
| Non-current | 6,105 | 6,566 |
| Current | 2,592,125 | 2,321,654 |

To ensure that the Company has sufficient funds to repay the debt regarding to its capacity to generate cash flow, Abengoa has to comply with a financial ratio (Net Financial Debt/Corporate EBITDA) with financial institutions. According to the financing agreements, the maximum limit of this ratio is 2.5 starting on December 31, 2014. As of June 30, 2016, Corporate Net Debt/EBITDA financial ratio is higher the set maximum indicated above.

As a consequence of the new ICO and BEI R&D&I project financing frame during 2015, Abengoa is obliged to meet a new financial covenant different to Corporate Net Debt/Corporate Ebitda detailed before. In this sense, Abengoa has to hold a ratio which numerator is the net corporate debt plus bridge loans minus treasury shares and the denominator is Group Ebitda, capped by 5.0. On March 31, 2016 this ratio is higher than 5.0.

## 18.3. Notes and bonds

The notional value of notes and bonds as of June 30, 2016 and December 31, 2015 is as follow:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Exchangeable notes Atlantica Yield | 540 | 12,889 |
| Convertible notes Abengoa 2017 and 2019 | 167,200 | 167,300 |
| Ordinary notes Abengoa | 2,915,455 | 2,937,704 |
| Commercial paper Abengoa Mexico | 108,661 | 111,428 |
| Euro-Commercial Paper Program (ECP) | 57,925 | 56,727 |
| **Total** | **3,249,781** | **3,286,048** |
| Non-current | - | - |
| Current | 3,249,781 | 3,286,048 |

In accordance with IAS 32 and 39 and the terms and conditions of the issuance of all convertible notes, except the 2019 notes, since Abengoa has a contractual right to choose the type of settlement and one of these possibilities is paying through a variable number of shares and cash, the conversion option is qualified as an embedded derivative. Thus, the convertible bonds are considered a hybrid instrument, which includes a component of debt and an embedded derivative for the conversion option held by the bondholder. This applies to 2017 convertible bonds and the exchangeable notes Atlantica Yield 2017.

### Convertible notes Abengoa 2017

The liability component carrying value at June 30, 2016 amounts to €5,391 thousand (€5,211 thousand in 2015).

Additionally, at June 30, 2016, the valuation through the Black Sholes model of the embedded derivative liability component amounts to €0 being its impact, at that date, an income of €531 thousand (€4,020 thousand of income in 2015), given the difference between its value at the six month period ended June 30, 2016 and the year ended December 2015.

The key data for the valuation model include the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

| | 06.30.16 | 12.31.15 |
|---|---|---|
| 'Spot Abengoa ' Price (euros) | 0.244 | 0.20 |
| 'Strike ' Price (euros) | 5.24 | 5.24 |
| Maturity | 02/03/2017 | 02/03/2017 |
| Volatility | 91% | 93% |
| Number of shares | 1,068,702 | 1,068,702 |

On June 30, 2016, listed Price of these bonds was 11.16%.

At June 30, 2016, the option´s fair value of the subscribed shares to provide a partial hedge over this issuance obligation amounted €0 without any impact on profit and loss of this period.

The key data for the options valuation model included the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

| | 06.30.16 | 12.31.15 |
|---|---|---|
| 'Spot Abengoa ' Price (euros) | 0.244 | 0.20 |
| 'Strike ' Price (euros) | 6.05 | 6.05 |
| Maturity | 02/03/2017 | 02/03/2017 |
| Volatility | 50% | 73% |
| Number of shares | 26,750,000 | 26,750,000 |

## Convertible notes 2019

On January 4, 2016, it was accepted applications for conversion from Noteholders corresponding to a total principal amount of €100 thousand.

The carrying value of the liability component of the notes at June 30, 2016 amounts to €141,672 thousand.

## Exchangeable notes Atlantica Yield 2017

The value of the liability component of the exchangeable bonds on June 30, 2016 amounts to €514 thousand.

Since the commencement of the exchange period for the Exchangeable Notes Atlantica Yield 2017 on September 1, 2015 (as set out the terms and conditions) through June 30, 2016, exchange notices for a total nominal amount of US$ 278 million, equivalent to 7,595,639 shares of Atlantica Yield, have been received and exchanged. This exchange has generated an income amounted to €8,881 in the Income Statements at June 30, 2016 (see Note 22.2).

On the other hand, the valuation of the embedded derivative liability component pending to exchange was €30,356, being its valuation €206 thousand at June 30, 2016 and the amount written off as a consequence of the exchange was €30,619 thousand, with an effect in the Income Statement of the difference between the two mentioned amounts of €340 thousand of finance expense.

The key data for the valuation model included the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

| | 06.30.16 | 12.31.15 |
|---|---|---|
| 'Spot Atlantica Yield ' Price (euros) | 18.58 | 19.29 |
| 'Strike ' Price (euros) | 36.42 | 36.42 |
| Maturity | 03/05/2017 | 03/05/2017 |
| Volatility | 46% | 76% |
| Number of shares | 16,474 | 384,404 |

## 18.4. Other loans and borrowings

The breakdown of current and not current other loans and borrowings at June 30, 2016 and December 31, 2015 is the following:

| | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Sale and lease back | 32,051 | 35,410 |
| Derivative premiums payable | 13,382 | 35,051 |
| Low interest loans | 8,620 | 9,362 |
| Preferred shares of ACBH (Note 20.1) | 55,646 | 48,426 |
| Non-recourse confirming due and unpaid (group and not group) | 690,326 | 304,204 |
| Non-recourse confirming non due group suppliers | - | 202,316 |
| Holding LAT Brasil's preferential shares | - | 243,070 |
| Overdue and not paid derivatives | 134,610 | - |
| AB Netherlands Debt (*) | 85,274 | - |
| Drawn bank guarantees | 58,130 | - |
| Loans with public institutions and others | 39,656 | 24,645 |
| **Total** | **1,117,695** | **902,484** |

(*) Debt with Abengoa Bioenergy Netherlands, B.V. given the loss of control as a consequence of the declaration of bankruptcy by the Court of Rotterdam over the Company on May 11, 2016, the election of a liquidator and the beginning of the liquidation process opened. At the formulation date of these financial statements, is probable to realize the liability (see Note 6.1 and 2.1).

# Note 19.- Provisions and contingences

› Regarding the legal claims or legal action initiated by creditors in connection with any past due and unpaid debts, we point out that the Company is not aware that any legal claim whatsoever has been initiated, nor any other significant legal measure by any other creditor in connection with past due and unpaid debts at June 30, 2016, in addition to the mentioned in the 2015 annual accounts, except for the following:

Litigation claims regarding unattended accrued debts of different nature and amounts amounting up to US$76,714 thousand, €95,954 thousand, 51,437 thousand Mexican Pesos and 356,627 Chilean Pesos. On the other hand, there exist liens solicitations in United States for an approximate total amount of US$10,179 thousand. These solicitations do not need a reply by the claimed company.

› On the other hand, in relation to the pledged assets deposited by the Group from the date of application by Abengoa S.A. of Article 5 bis of Ley Concursal, we point out that at June 30, 2016 the Group has not been forced to surrender any asset as collateral for debt, in addition to the mentioned in the 2015 annual accounts with the exception of the following:

  › Executions for an amount of €22,998 thousand and US$16,875 thousand deposited in a collateralized bank accounts own by various companies of Abengoa Bioenergy and which guarantee was executed by the beneficiary as a consequence of the maturity of the guaranteed obligation.

# Note 20.- Third-party guarantees and commitments

## 20.1. Third-party guarantees

› At the end of the first semester of 2016, the Group deposited to third parties (clients, financial entities, Public Entities and other third parties), directly by the group or by the parent company to other Group companies, various bank bond and surety insurances as guarantee to certain commitments (bid bonds, performance and others) amounted to €1,611,192 thousand (€1,629,787 thousand at December 31, 2015).

In addition, the Group deposited to third parties (clients, financial entities, Public Entities and other third parties), directly by the group or by the parent company to other Group companies, various guarantees through the declarations of intention and documented commitments undertaken as guarantee of certain commitments (Bid Bonds, performance, financing and others) amounted to €5,565,706 thousand (€7,053,099 thousand at December 31, 2015).

The following table details the guarantees undertaken by de Company classified by commitment type at June 30, 2016:

| Typology | Guarantees/Surety Insurance | Guarantees | Total 06.30.2016 | Total 12.31.2015 |
|---|---|---|---|---|
| Bid Bond | 48,598 | 93,995 | 142,593 | 1,161,492 |
| Performance: | 48,598 | 93,995 | 142,593 | - |
| Materials supply | 4,616 | 668,390 | 673,006 | 1,144,090 |
| Advance payments | 90,238 | 8,810 | 99,048 | 285,996 |
| Execution (construction/collection/payments) | 1,362,641 | 4,517,361 | 5,880,002 | 5,653,083 |
| Quality | 17,108 | 25,715 | 42,823 | 72,261 |
| Operation and maintenance | 49,080 | 251,435 | 300,515 | 335,370 |
| Dismantling | 3,726 | - | 3,726 | 3,726 |
| Other | 35,185 | - | 35,185 | 26,867 |
| **Subtotal** | **1,611,192** | **5,565,706** | **7,176,898** | **8,682,886** |
| Group Company financing guarantees | - | 1,686,290 | 1,686,290 | 1,561,591 |
| **Total** | **1,611,192** | **7,251,996** | **8,863,188** | **10,244,477** |

The most significant variations of the undertaken guarantees with third parties, regarding the information presented in the 2015 Consolidated Financial Statements, mainly relate to the settlement of guarantees deposited by the Parent Company to other Group Company for the submission of bids, mainly related to the execution of certain concessional projects of water desalination in Oman, as well as the lack of renewal in overdue guarantees with suppliers and financial entities.

- In addition, regarding the collateral granted to third parties (guarantees, etc.), there have been no significant breaches since the date of the communication provided by the Article 5 bis of the Ley Concursal, at June 30, 2016, which could lead to an outflow of resources and, therefore, to the recognition of a liability, with the following exceptions:
  - Execution of the performance bond and advance guarantee of the client of the project Al Khafji for an aggregate amount of €18 million, the execution of credit letters of the client Portland General Electric Company for a total aggregated amount of US$16 million (€15 million) and the execution of bank guarantees in the project Emera amounted to 39 million Canadian Dollars (€26 million).

# Note 21.- Trade payables and other current liabilities

Trade payables and other current liabilities as of June 30, 2016 and December, 31, 2015 are shown in the following table:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Trade payables for purchases of goods | 1,978,923 | 2,983,046 |
| Trade payables for services | 546,891 | 764,627 |
| Billings in excess and advance payments from clients | 314,857 | 304,830 |
| Remunerations payable to employees | 56,358 | 40,204 |
| Suppliers of intangible assets current | 8,978 | 10,566 |
| Other accounts payables | 192,256 | 275,979 |
| **Total** | **3,098,263** | **4,379,252** |

The most significant variation corresponds to a decrease in trade payables for purchases of goods due to the reclassification of transmission lines in Brazil as held for sale (see Note 7).

At June 30, 2016 the total amount of trade payables and other current payables due and unpaid (principal and interest) amounted to €1,050 million. The corresponding default interests for this item have been recognized.

The table below shows the details of the non-recourse confirming carried out with external and group suppliers as at June 30, 2016 and December 31, 2015:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 |
|---|---|---|
| Non-group amounts payable through Confirming | 690,448 | 1,019,155 |
| Group amounts payable through Confirming | 42,582 | 236,687 |
| **Total** | **733,030** | **1,255,842** |

Related to these amounts, there are deposits and cash recorded under assets in the Consolidated condensed statement of financial position associated with payment of "non-recourse confirming" for an amount of €24 million (€465 million as of December 31, 2015).

Finally, it has been reclassified as corporate financing an amount of €690 million (see Note 18.4) relating to due and not paid confirming transactions (principal and interests) and additionally, €12 million related to companies held for sale.

# Note 22.- Finance income and expenses

## 22.1 Finance income and expenses

The following table sets forth our Finance income and expenses for the six month period ended June 30, 2016 and 2015:

| Finance income | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Interest income from loans and credits | 10,265 | 21,103 |
| Interest rates benefits derivatives: cash flow hedges | 3,014 | 28,630 |
| Interest rates benefits derivatives: non-hedging | 1,621 | 2,872 |
| **Total** | **14,900** | **52,605** |

| Finance expenses | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Expenses due to interest: | | |
| - Loans from credit entities | (137,788) | (104,734) |
| - Other debts | (161,327) | (230,193) |
| Interest rates losses derivatives: cash flow hedges | (15,249) | (35,364) |
| Interest rates losses derivatives: non-hedging | (2,023) | (4,789) |
| **Total** | **(316,387)** | **(375,080)** |
| | | |
| **Net financial loss** | **(301,487)** | **(322,475)** |

Finance income has decreased at the six month period ended June 30, 2016 when compared to the previous year, mainly due to the change in the temporal value of our interest rate derivative hedges and lower yields of fixed-term deposits.

Finance expenses have decreased at the six month period ended June 30, 2106 when compared to the same period of the previous year, mainly due to the effect in 2015 by the 2017 convertible bond early repayment by an expense of €17 million, to lower interests given the reduction of nominal amounts as a consequence of the exchange of the Atlantica Yield 2017 convertible bonds and the 2019 convertible bonds conversion (see Note 18.3), as well as other minor financial expenses of the transfer of solar plants from Rofo 3, 3+ and 4 to Atlantica Yield during 2015.

## 22.2. Other net finance income and expenses

The following table sets out 'Other net finance income and expenses' for the three six period ended June 30, 2016 and 2015:

| Other finance income | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Profit from the sale of financial investments | 78,897 | - |
| Other finance income | 817 | 485 |
| Commodity derivatives gains: Cash flow hedge | 6,116 | 5,878 |
| Commodity derivatives gains: fair value hedging | 8,881 | - |
| Profit from commodity derivatives: cash flow hedges | 829 | - |
| **Total** | **95,540** | **6,363** |

| Other finance expenses | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Loss from sale of financial assets | (290) | (50) |
| Loss from early conversion of convertible notes 2019 | - | (15,141) |
| Outsourcing of payables | (10,404) | (41,843) |
| Other financial losses | (287,554) | (8,192) |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | (9) | (12,167) |
| Commodity derivatives losses: Cash flow hedge | (2,236) | (621) |
| Commodity derivatives losses: non-hedging | (105) | (1,716) |
| **Total** | **(300,598)** | **(79,730)** |
| | | |
| **Other net finance income/expenses** | **(205,058)** | **(73,367)** |

The main variations in "Other financial income" correspond to the profit generated by the transaction of the 80% Abengoa Vista Ridge, LLC´s interest (see Note 6.2) and the partial exchange of convertible bonds of Atlantica Yield into Atlantica Yield shares (see Note 18.3).

"Other financial expenses" have increased mainly due to losses recognized as "other financial losses" because of the sale of the convertible loan in shares of Befesa, S.L.U. to Triton Investment Fund (see Note 11) which has contributed with €136 million, the impairment over the Xfera Moviles, S.A. interest for an amount of €33 million (see Note 11), due to higher financial expenses derived from the execution of bank guarantees for an amount of €63 million, from the default interests for an amount of €7 million, as well as the increase in banking fees, guarantee fees, credit letters, transfer fees and other banking expenses given the aforementioned current situation of the Company. Additionally, "outsourcing payables" are decreasing given the decrease in PPB issued.

The net amount of "Other net finance income and expenses" related to companies with project finance is a loss of €5,800 thousand (a loss of €18,767 thousand at June 30, 2015).

# Nota 23.- Income tax

23.1. The effective tax rate for the period presented has been established based on Management's best estimates (see Note 3).

23.2. Income tax decrease to an expense of €28 million for the six month period ended June 30, 2016, compared to an income tax benefit of €61 million in the same period for 2015, mainly due the current circumstances in which the Company is involved and pending to have greater visibility about the realization of the Updated Viability Plan announced by the Company, it has not recognized the deferred tax assets (which could be realized against taxable income to be generated in the future, according to the aforementioned Updated Viability Plan) of the losses generated on the last semester, including those generated by the provisions and impairment charges as a consequence of the actual Company situation.

# Note 24.- Fair value of financial instruments

The information on the financial instruments measured at fair value, is presented in accordance with the following:

- Level 1: assets or liabilities listed on active markets.
- Level 2: Measured on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Measured on inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following is a breakdown of the Group's assets and liabilities measured at fair value as of June 30, 2016 and December 31, 2015 (except assets and liabilities with a carrying amount close to their fair value, non-quoted equity instruments measured at cost and contracts with components that cannot be measured reliably):

| Category | Level 1 | Level 2 | Level 3 | Balance as of 06.30.16 |
|---|---|---|---|---|
| Non-hedging derivatives | - | (4,821) | - | (4,821) |
| Hedging derivatives | - | (3,506) | - | (3,506) |
| Available-for-sale | 17 | - | 7,737 | 7,754 |
| **Total** | **17** | **(8,327)** | **7,737** | **(573)** |

| Category | Level 1 | Level 2 | Level 3 | Balance as of 12.31.15 |
|---|---|---|---|---|
| Non-hedging derivatives | - | (37,493) | (25,869) | (63,362) |
| Hedging derivatives | - | (53,802) | - | (53,802) |
| Available-for-sale | 29 | - | 46,370 | 46,399 |
| **Total** | **29** | **(91,295)** | **20,501** | **(70,765)** |

The financial instruments at fair value, determined from prices published in active markets (Level 1), consist of shares.

The majority of Abengoa's portfolio comprises financial derivatives designated as cash flow hedges, is classified as level 2 and corresponds mainly to the interest rate swaps (see Note 12).

The caption Non-hedging derivatives includes the fair value of the embedded derivatives in the exchangeable and convertible notes (except for the 2019 convertible notes), the fair value of the call options over Abengoa's own shares, as well as those derivatives purchased with the purpose of hedging market risk (interest rate, foreign exchange or commodities) that do not fulfill all the requirements, according to IAS 39 to be recorded as hedges from an accounting point of view.

At June 30, 2016, the embedded derivative of the convertible loan received as part of the transaction for the sale of Befesa has been cancelled after closing an agreement between Abengoa and the investment fund Triton Partner for the sale of the convertible loan into Befesa, S.L.U. shares. At December 31, 2015, such embedded derivative classified as level 3, had a negative fair value of €25,869 thousand (see Note 12).

The most significant item included under level 3 corresponds to the classification made at June 30, 2016 as assets held for sale due to the sale of the investment that Abengoa had in Xfera Moviles, S.A. (see Note 7).

The following table shows the changes in the fair value of level 3 assets for the six month period ended June 30, 2016 and December 31, 2015:

| Movements | Amount |
|---|---|
| Beginning balance as of December 31, 2014 | 38,118 |
| Gains and losses recognized in Equity | 1,240 |
| Changes in Non-hedging derivatives | (17,371) |
| Change in consolidation, reclassifications and translation differences | (1,486) |
| **Total as of December 31, 2015** | **20,501** |
| Gains and losses recognized in Equity | (2,361) |
| Changes in Non-hedging derivatives | (2,042) |
| Change in consolidation, reclassifications and translation differences | (8,361) |
| **Total as of June 30, 2016** | **7,737** |

During the years considered in these Consolidated condensed interim financial statements , there have not been any significant reclassifications amongst the three levels presented above.

# Note 25.- Earnings per share

## 25.1. Basic earnings per share

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares outstanding during the period.

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Profit from continuing operations attributable to equity holders of the company | (2,734,495) | 70,715 |
| Profit from discontinuing operations attributable to equity holders of the company | (954,466) | 1,423 |
| **Average number of ordinary shares outstanding (thousands)** | **941,567** | **865,437** |
| (Losses) / Earnings per share from continuing operations (€ per share) | (2.90) | 0.08 |
| (Losses) / Earnings per share from discontinuing operations (€ per share) | (1.01) | 0.00 |
| **(Losses) / Earnings per share from profit for the year (€ per share)** | **(3.91)** | **0.08** |

## 25.2. Diluted earnings per share

To calculate the diluted earnings per share, the average weighted number of ordinary shares issued and outstanding is adjusted to reflect the conversion of all the potential diluting ordinary shares.

The potential diluting ordinary shares held by the group corresponded to the warrants on Class B shares issued in November 2011. On October 1, 2015 the share capital has been subscribed for the total amount of the outstanding warrants. The assumption is that all warrants would be exercised and a calculation is made to determine the number of shares that may have been acquired at fair value based on the monetary value of the subscription rights of the warrants still to be exercised. The difference between the number of shares issued assuming the exercise of the warrants, and the number of shares calculated based on the above, is included in the calculation of the diluted earnings per share.

In the second quarter of 2016 there are not dilutive factors affecting the diluted (losses) earnings for share.

| Item | For the six months period ended 06.30.16 | For the six months period ended 06.30.15 |
|---|---|---|
| Profit for the year | | |
| - Profit from continuing operations attributable to equity holders of the company | (2,734,495) | 70,715 |
| - Profit from discontinuing operations attributable to equity holders of the company | (954,466) | 1,423 |
| - Adjustments to attributable profit | - | - |
| **Profit for the year attributable to the parent company** | **(3,688,961)** | **72,138** |
| | | |
| Average weighted number of ordinary shares outstanding (thousands) | 941,567 | 865,437 |
| - Warrants adjustments (average weighted number of shares in outstanding since issue) | - | 20,640 |
| **Average weighted number of ordinary shares affecting the diluted earnings per share (thousands)** | **941,567** | **886,077** |
| | | |
| Diluted (losses) / earnings per share from continuing operations (€ per share) | (2.90) | 0.08 |
| Diluted (losses) / earnings per share from discontinuing operations (€ per share) | (1.01) | - |
| **Diluted (losses) / earnings per share to the profit for the year (€ per share)** | **(3.91)** | **0.08** |

# Note 26.- Average number of employees

The average number of employees classified by category during the six month period ended June 30, 2016 and 2015 was:

| | Average number of employees for the six months ended 06.30.16 | | % | Average number of employees for the six months ended 06.30.15 | | % |
|---|---|---|---|---|---|---|
| Categories | Female | Male | Total | Female | Male | Total |
| Directors | 47 | 428 | 2.7 | 61 | 491 | 2.1 |
| Management | 348 | 1,230 | 8.9 | 433 | 1,589 | 7.5 |
| Engineers | 1,012 | 2,269 | 18.6 | 1,450 | 3,293 | 17.7 |
| Assistants and professionals | 789 | 1,505 | 13.0 | 1,177 | 1,678 | 10.6 |
| Operators | 687 | 9,181 | 55.8 | 953 | 15,064 | 59.7 |
| Interns | 67 | 104 | 1.0 | 247 | 387 | 2.4 |
| **Total** | **2,950** | **14,717** | **100** | **4,321** | **22,502** | **100** |

During the six month period ended June 30, 2016 the average number of employees is 28% in Spain and 72% abroad.

# Note 27.- Transactions with related parties

No dividends have been distributed to related parties during the period of 2016 (€29,329 thousand in 2015).

During the six month period ended June 30, 2016 the only transactions associated with related parties were the following:

- Service provision agreement signed between Simosa and Ms. Blanca de Porres Guardiola. The amount invoiced during the period was €47 thousand.
- Service agreement signed between Equipo Económico, S.L. (company related to Mr. Ricardo Martínez Rico, member of Board of Directors) and Abeinsa Ingeniería and Construcción Industrial, S.A. The amount invoiced during the period was €45 thousand.

These operations were subject to review by the Abengoa Audit Committee.

# Note 28.- Employee remuneration and other benefits

Directors are remunerated as established in article 39 of the Bylaws. Directors' remuneration shall consist of all or some of the following concepts, for a total combined amount that shall be agreed by the General Shareholders' Meeting, pursuant to the directors' remuneration policy and conditional, when required by law, on the prior approval of the General Shareholders' Meeting: (a) a fixed fee; (b) expenses for attendance; (c) a share of the profits, under the terms established in Article 48, Paragraph 2, of the company's Bylaws; (d) variable remuneration based on general benchmark indicators or parameters; (e) remuneration through the provision of shares or share options or amounts that are linked to the Company's share price; (f) severance payments, provided that the director is not relieved of office on grounds if failing to fulfill the responsibilities attributable to him/her; and (g) savings or pension systems considered to be appropriate

On February 12, 2016, Mr. José Luis Aya Abaurre deceased.

On March 1, 2016 the Board of Directors agreed to cease Mr. José Dominguez Abascal as chairman of the Company, continuing as Director in the external director category. In his replacement, the Board of Directors appointed as executive chairman to Mr. Antonio Fornieles Melero, who became Executive Director, delegating all his powers except those that cannot be statutory and legally delegated and leaving the Audit Committee and the Appointments and Remunerations Committee.

On the same date, the Board of Directors agreed to delegate to the CEO Mr. Joaquín Fernández de Piérola Marín all the powers in his favor except those that cannot be legally delegated, who became executive director and maintaining this status. The exercise of these powers is several respect to those delegated in the same extension to the chairman Mr. Antonio Fornieles Melero.

On March 7, 2016, the Board of Directors of the Company agreed: a) to appoint as first Vice-President of the Board of Directors Mr. Joaquin Fernández de Piérola Marin joining this position to CEO. Also was appointed as a member of the Investments Committee replacing Mr. José Dominguez Abascal, b) to appoint as second Vice-President and coordinating Director Mrs. Alicia Velarde Valiente, c) to appoint as chairman of the audit committee and member and chairman of the Investments Committee Mrs. Alicia Velarde Valiente, and d) to replace by co-optation the vacancy left by the deceased Director Mr. José Luis Aya Abaurre, appointed as Director of the Company Inayaba, S.L. and appointing it as representative to Mrs. Ana Abaurrea Aya. Also, she is appointed as member of the Strategic and Technology Committee.

On April 18, 2016, the Board of Directors of the Company agreed to accept the resignation of Mr. José Dominguez Abascal as Director.

On May 25, 2016, the Board of Directors agreed to accept the resignation of Mr. Claudi Santiago Ponsa as Director.

The General Shareholders' Meeting held on June 30, 2016 approved, among other agreements, the following:

1. To cease Mr. Javier Benjumea Llorente as executive Director.
2. To fix the number of Directors to ten members.
3. To confirm and appoint as Director Mr. Joaquín Fernandez de Piérola Marín, as executive, Mr. Ricardo Martinez Rico, as independent, Mrs. Alicia Velarde Valiente, as independent and Inayaba, S.L. represented by Mrs. Ana Abaurrea Aya as weekly assistant.

Additionally, on June 30, 2016 overall remuneration accrued by Key Management of the Company (Senior Management which are not executive directors), including both fixed and variable components, amounted to €1,455 thousand (€4,135 thousand at June 30, 2015). As in previous years, this amount is determined based on the most updated stimulation of the Company considering the remuneration of Senior Management accrue uniformly during the year.

No advanced payments or credits are granted to members of the Board, nor are any guarantees or obligations granted in their favor.

As of December 31, 2015 the Company derecognized the existing provision regarding the two existing variable remuneration plans for managers, because Abengoa´s Directors considers that the accomplishment of all established requisites in order to consolidate the benefits provided as a consequence of the company situation resulting from the presentation of the communication provided by article 5 bis of the Ley Concursal.

# Note 29.- Subsequent events

› As of September 18, 2016, and in the framework of the Updated Viability Plan and Financial Restructuring Terms announced on 16 August 2016, Abengoa Concessions Investments Limited ("ACI"), a subsidiary of the Company, entered into a secured term facility agreement (the "Facility Agreement") among, inter alia, the lenders as described below (the "Lenders") and the agent appointed thereunder (the "Agent"), pursuant to which it is entitled to borrow US$211,000,000 (the "Loan Amount") and is required to enter into related security documents (collectively, the "Loan Documents").

As of the date of the Facility Agreement, the Lenders are Arvo Investment Holdings S.À R.L., CCP Credit Acquisition Holdings Lxco S.À R.L, Lajedoa Investments S.À R.L., OCM Luxembourg ABG Debt S.À R.L., Potter Netherlands Coöperatief U.A., y SPV Capital Funding Luxembourg S.À R.L.

The amounts borrowed under the Facility Agreement will be used to refinance all amounts owing under a secured term facility agreement between ACI and Talos Capital Designated Activity Company (formerly Talos Capital Limited) dated 22 October 2015 for a nominal amount of US$130,000,000 (the "Talos Loan") and for the general corporate and working capital purposes of the Company and its subsidiaries (the "Group").

Upon the occurrence of certain events that are customary for this type of loan, the Lenders may exercise their right to require ACI to repay all or part of the Loan Amount, post additional collateral or foreclose on, and dispose of, the Pledged Shares (as described below under "Security") in accordance with the Loan Documents.

Maturity

The loan will mature (a) on 18 September 2017 (provided that, prior to 29 March 2017, the maturity date for the existing September Facility, December Facility and March Facility are extended to at least the same date) or (b), absent such extensions, on 29 March 2017.

Interest

The loan under the Facility Agreement will bear interest at a rate per annum equal to the aggregate of LIBOR plus 12.5% (on a payment in kind basis). Default interest will be payable at a rate of 5% above the interest rate.

Material Fees

An arrangement and participation fee are, and in certain circumstances, a make-whole amount may become, payable under the Facility Agreement.

Guarantees

The Company and the following subsidiaries (the "Subsidiaries") will each provide a guarantee of all amounts payable to the finance parties under the Facility Agreement (in respect of the Company, on and from the date of the Facility Agreement, and in respect of the Subsidiaries, no later than 45 days after the date of the Facility Agreement): Abeinsa Asset Management, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abeinsa Inversiones Latam, Abeinsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abengoa Water, S.L., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea De Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestion De Contratos de Construcción E Ingeniería, S.A., Abengoa Bioenergy Trading Europe B.V., Abeima Teyma Zapotillo S. De R.L. de C.V., Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V., Nicsamex, S.A. de C.V., Teyma Internacional, S.A., Teyma Uruguay Zf, S.A..

Security

Under the terms of the Loan Documents, ACI will pledge and grant a security interest in 16,000,000 ordinary shares of Atlantica Yield plc (formerly Abengoa Yield plc) held by it (14,000,000 of which were previously secured in relation to the Talos Loan) (the "Pledged Shares"), in favour of the Lenders as security for the Loan Amount and its obligations under the Loan Documents.

Financial covenants

The Facility Agreement requires ACI to maintain a loan to value ratio of not more than 80%.

Governing law and enforcement

The Facility Agreement is governed by English law and the courts of England have exclusive jurisdiction to settle any dispute arising out of or in connection therewith.

› On the other hand, on September 24, 2016 the Restructuring Agreement has been signed, and granted by public deed before the Notary public of Madrid, Mr. José Miguel García Lombardía, between the Parent Company, a group of Subsidiaries which debt is subject to the restructuring and a group of financial creditors which either are holders of existing debt instruments or will also be participating in the new money and new bonding facilities.

From the abovementioned date onwards, the Company announced the beginning of the accession period for the rest of financial creditors to adhere to the Restructuring Agreement. Once this period finalizes and after obtaining the support of creditors representing at least 75% of financial liabilities as required by Spanish Bankruptcy Law, Abengoa will apply for the judicial approval (homologación judicial) of the Restructuring Agreement so that the Standard Restructuring Terms (consisting on a 97% of the nominal value debt extinguishment and the remaining 3% due in 10 years from the restructuring date, accruing no interest and not able to be capitalized) will also be extended to those unsecured creditors of the Parent Company or its affected Subsidiaries who decided not to adhere to the Restructuring Agreement or that, having done so, did not specifically choose the Alternative Restructuring Terms that, in summary, consist of:

- Capitalization of 70% of preexisting debt in exchange for 40% of Abengoa's new share capital post restructuring.

- The remaining 30% of the nominal value of the preexisting debt will be refinanced through new debt instruments, replacing the preexisting ones, which will rank as senior or junior depending on whether or not such creditor participates in the new money facilities or new bonding facilities. Such instruments will have maturities of 66 and 72 months respectively, with the possibility of an extension of up to 24 months, accruing annual interest of 1.50% (0.25% cash payment and 1.25% Pay If You Can). The junior instrument could be subject to additional reductions (provided that total reduction does not exceed 80% of the nominal value prior to the capitalization) if the aggregate amount of refinanced preexisting debt (after the aforementioned capitalization) exceeds €2,700 million due to the crystallization of contingencies.

Once the homologation request has been filed, the following procedures in the United States and the United Kingdom will be initiated:

- A Company Voluntary Arrangement ("CVA") in England and Wales at the request of Abengoa Concessions Investments Limited in accordance with Part I of the English Insolvency Act 1986; and

- Various procedures under Chapter 11 ("Chapter 11") of the U.S. Bankruptcy Code at the request of various subsidiaries incorporated in the United States.

Both the CVA and the Chapter 11 procedures have the objective of extending the Standard Restructuring Terms described previously to the liabilities of the companies promoting the procedures for those creditors that have not acceded to the Restructuring Agreement.

- On the date of formulating the present consolidated condensed interim financial statements at June 30, 2016, and in accordance to the International Financial Reporting Standards (IFRS), the Company has recognized in the income statement those impairments related to judicial proceedings and the approved discontinued operations. Directors consider that the signature of the Restructuring Agreement will lead to the application of measures determined in the Updated Viability Plan, among them the abandonment of new activities and the liquidation or sale of assets which could trigger new losses. In accordance with the IFRS, these losses will be registered during the second semester of 2016. Likewise, and in compliance of accounting standards, the positive impact derived from the debt write-offs and capital increases contained in the restructuring plan, will be recognized during the second semester of 2016, which will allow to offset all accumulated negative results and to restore the financial stability at December 31, 2016.

Since June 30, 2016, no other events have occurred that might significantly influence the financial information detailed in this report, nor has there been any event of significance to the Group as a whole.

# Consolidated Condensed Interim Management Report as of June 30, 2016

## 1.- Organizational structure and activities

Abengoa, S.A. is the parent company of the Abengoa Group (referred to hereinafter as 'Abengoa', 'the Group' or 'the Company'), which at the end of the six month period ended June 30, 2016, was made up of 677 companies: the parent company itself, 567 subsidiaries, 81 associates and 28 joint ventures. Additionally, the Group held a number of interests, of less than 20%, in other entities.

Abengoa, S.A. was incorporated in Seville, Spain on January 4, 1941 as a Limited Liability Company and was subsequently transformed into a Limited Liability Corporation ('S.A.' in Spain) on March 20, 1952. Its registered office is Campus Palmas Altas, 1 Energía Solar St., Seville, 41014.

The Group's corporate purpose is set out in Article 3 of its Bylaws. It covers a wide range of activities, although Abengoa is principally an applied engineering and equipment manufacturer, providing integrated project solutions to customers in the following sectors: energy, telecommunications, transport, water utilities, environmental, industrial and services.

Abengoa's shares are represented by class A and B shares which are listed on the Madrid and Barcelona stock exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. The company completed the delisting process to exclude its class B shares from on the NASDAQ Global Select Market in the form of American Depositary Shares, which were quoted from October 29, 2013, following the capital increase carried out on October 17, 2013. The Company presents mandatory financial information quarterly and semiannually.

As of April 6, 2016, the company announced its intention to initiate the process for voluntary delisting of its Class B shares and American Depositary Shares Receipts (ADSs), as well as the conclusion of the American Depositary Receipt (ADR) program with Citibank, N.A. which delisting was effective on May 12, 2016.

Additionally, on April 29, 2016, the Company announced that the voluntary delisting of its Class B shares and American Depositary Shares (ADSs) from the NASDAQ Stock Market became effective on 28 April 2016 and that has taken steps to deregister those securities from the SEC and thereby terminate its reporting obligations under the U.S. Securities Exchange Act of 1934, as amended (Exchange Act). The Company has already filed Form 25 and Form 15F, resulting the exclusion effective from Sections 12(b) and 12(g) of the Exchange Act of 1934 and the reporting obligations related to the third quarter of 2016.

As a result of the delisting of the Class B shares and ADSs from the NASDAQ Stock Market, all trading in Abengoa, S.A. shares is now concentrated in the Spanish Stock Exchanges.

The shares of the associate Atlantica Yield (formerly Abengoa Yield, Plc.) are also listed in the NASDAQ Global Select Market since June 13, 2014. As of June 30, 2016 the Abengoa's investment on Atlantica Yield amounts to 41.47%.On January 7, 2016, the company announced to the Securities and Exchange Commission US (S.E.C) that the corporate name change to Atlantica Yield. However, the ticker "ABY" remains the same.

Abengoa is an international company that applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. The Company supplies engineering projects under the 'turnkey' contract modality and operates assets that generate renewable energy, produces biofuel, manages water resources, desalinates sea water and treats sewage.

Abengoa`s business is organized under the following three activities:

- Engineering and construction: includes the traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market and the development of solar technology. Abengoa is specialized in carrying out complex turnkey projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuel plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.

- Concession-type infrastructures: groups together the company's extensive portfolio of proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes the operation of electric energy generation plants (solar, cogeneration or wind), desalination plants and transmission lines. These assets generate low demand risk and the Company focuses on operating them as efficiently as possible.

- Industrial production: covers Abengoa's biofuel business with a high technological component, such as development of biofuels technology. The Company holds an important leadership position in these activities in the geographical markets in which it operates.

Since March 28, 2016, the company is under the standstill agreement framework to reach an agreement with financial creditors to restructure its financial debt and the recapitalization of the group. On September 24, 2016, the Restructuring Agreement was signed between Abengoa and a group of financial creditors and the accession period started, which is expected to be accomplished on October 25, 2016 with the judicial approval of the agreement. The effective application of such restructuring agreement will allow the Company to rebalance its equity, which is currently negative, once the positive effect of the debt to equity swap is registered in the income statement of the Company.

All public documents of Abengoa may be viewed at www.abengoa.com.

The amounts included within the present business evolution report at June 30, 2016 are expressed in millions of euros.

This business evolution report is a free translation of the report originally issued in Spanish. In the event of a discrepancy, the Spanish-language version prevails.

For an adequate understanding of the financial information, this business evolution report of the evolution of the business must be read together with Abengoa's Consolidated Financial Statements for the year 2015.

# 2.- Evolution and business results

## a) Going concern

In accordance with IAS1, which requires the financial statements to be prepared regarding the going concern principle, unless Directors have the intention or any other real alternative of liquidation or cease of activity, the consolidated condensed interim financial statements at June 30, 2016 have been prepared applying this principle.

- In relation to the facts and circumstances occurred during the second half of the year 2015, which significantly deteriorated the liquidity position and the financial structure of Abengoa, that made the Directors of the Company to submit the communication provided by the Article 5 bis of Act 22/2003 of July 9, on insolvencies (Ley Concursal) and to initiate a refinancing process to try to reach an agreement with its main financial creditors, the following summary shows the facts related during the first six month period of the year 2016 until the preparation of the present Consolidated Condensed Interim Financial Statements for the six month period ended June 30, 2016:

  a) In relation to the proceeding provided by the law 22/2003 (Ley Concursal) and the beginning of the aforementioned refinancing process, it should be noted that;

     - On January 25, 2016, the Company announced that the independent and specialized consulting firm on refinancing process Alvarez&Marsal presented to the Board of Directors of Abengoa the Industrial Viability Plan that defined the structure of the future activity of Abengoa on an operating basis focusing on the activity of engineering and construction either developing its own technology or using technology developed by others.

- Based on this Initial Viability Plan, that confirms the industrial viability of Abengoa, the Company began negotiations with its creditors to restructure the debt and the necessary resources and provide Abengoa the optimal capital structure and the sufficient liquidity to continue operating competitively and sustainably in the future.

- In this sense, and in relation to the negotiations between the Company and a group of its creditors comprised of banks and holders of bonds issued by the Group, as of March 10, 2016, the Company informed that it has agreed with the advisers of such creditors the grounds for an agreement to restructure the financial indebtedness and recapitalize the Group. The Company believed that such agreement contained the essential elements to achieve a future restructuring agreement that, in any event, would be subject to reaching the accessions percentage required by Ley Concursal. On March 28, 2016, the Company and a group of creditors comprised of banks and holders of bonds Issued by the Group had reached a standstill agreement with the objective of providing the time necessary to keep working and reaching, as soon as possible, a full and complete agreement about the terms and conditions to restructure the financial indebtedness and recapitalize the Group. In order to reach this purpose, among other obligations assumed by all parties, the arrangement with parties contains expressly the compromise of creditors to abstain from claiming or accepting the payment of any amount owed as current amortization debt or advanced payments of capital or interest, as well as to charge default interests as a consequence of non-performance by the debtor.

- With respect to the foregoing, as of March 28, 2016, an application for the judicial approval of the standstill agreement (the "Standstill Agreement") have been filed to the Mercantile Court of Seville nº 2 which obtained the support of 75.04% of financial creditors to which it was addressed, being therefore over the legally required majority (60%). Additionally, on April 6, 2016, the judge of the Mercantile Court of Seville nº2 issued the approval of the Standstill Agreement and extended the maturity of the agreement until October 28, 2016 (included), to the financial liability creditors which have not subscribed it or which showed the disconformity to the agreement. This agreement has been impugned by some creditors and currently is in court.

- From that moment until now, the Company has continued with the negotiation process with its main financial creditors and potential investors in order to develop the agreed terms of reference. In the context of these negotiations and the circumstances that have been affecting our projects since the Initial Viability Plan was prepared by Alvarez&Marsall, an Updated Viability Plan was prepared during the second half of May, which has been approved by the Board of Directors after the end of the six month period ended June 30, 2016, on August 3, 2016 as well as the term

sheet of the restructuring agreement which was subscribed afterwards by the main creditors and which is mentioned below.

› This Updated Viability Plan shows the negotiations and difficulties that Abengoa experienced in certain projects as well as the changes which, as a result, have been made with respect to the Initial Viability Plan, as well as the review of certain hypothesis in the mentioned Plan and the update of the expected date of reactivation of our operations. Therefore, all of this calls for a significant reduction of Abengoa's cash needs, which have been identified in this Updated Viability Plan, in approximately €1,200 million, compared to the initially estimated figure of €1,500 - €1,800 million.

› Pursuant to the preparation of the Updated Viability Plan and the ongoing negotiations, on June 30, 2016, Abengoa announced that had reached grounds for an agreement with the Bank Coordination Committee and a group of bondholders and investors on the main terms of the proposed financial restructuring to be signed.

› Afterwards, on August 11, 2016, the term sheet of the restructuring agreement was subscribed between Abengoa, S.A. and a group of entities comprising the main financial creditors and potential investors. Moreover, the Company has received acceptance letters in order to underwrite the new money financing in an amount which exceeds the liquidity requirement of the Revised Viability Plan. The agreement is subject to several conditions precedent which are common in this kind of transactions.

The fundamental principles of such agreement are the following:

(i) The amount of new money to be lent to the Group totals €1,169.6 million (including refinancing of the September and December 2015, March and September 2016 facilities). This financing would rank senior with respect to the preexisting debt and would be divided into different tranches:

- Tranche I: amounts to €945.1 million, with a maximum maturity of 47 months and secured by, among other things, certain assets that include the A3T project in Mexico and the shares of Atlantica Yield held by the Company. Creditors would be entitled to 30% of Abengoa's new share capital post restructuring.

- Tranche II: amounts to €194.5 million, with a maximum maturity of 48 months and secured by, among other things, certain assets in the engineering business. Creditors would be entitled to 15% of Abengoa's new share capital post restructuring.

- Tranche III: contingent credit facility of up to €30 million, with a maximum maturity of 48 months secured by, among other things, certain assets that include the A3T project in Mexico and the shares of Atlantica Yield held by the Company and with the sole purpose of providing guaranteed additional funding for the completion of the A3T project. Creditors would be entitled to receive 5% of Abengoa's new share capital post restructuring.

(ii) New bonding facilities amount to €307 million. Financing entities would be entitled to 5% of Abengoa's new share capital post restructuring.

(iii) The restructuring proposal for the preexisting debt will involve a 97% reduction of its nominal value, while keeping the remaining 3% with a ten year maturity, with no annual coupon or option for capitalization.

(iv) Creditors who adhere to the agreement can choose either the conditions laid out in section (iii), or alternative conditions which consist of the following:

- Capitalization of 70% of preexisting debt in exchange for 40% of Abengoa's new share capital post restructuring.

- The remaining 30% of the nominal value of the preexisting debt will be refinanced through new debt instruments, replacing the preexisting ones, which will rank as senior or junior depending on whether or not such creditor participates in the new money facilities or new bonding facilities. Such instruments will have maturities of 66 and 72 months respectively, with the possibility of an extension of up to 24 months, accruing annual interest of 1.50% (0.25% cash payment and 1.25% Pay If You Can). The junior instrument could be subject to additional reductions (provided that total reduction does not exceed 80% of the nominal value prior to the capitalization) if the aggregate amount of refinanced preexisting debt (after the aforementioned capitalization) exceeds €2,700 million due to the crystallization of contingencies.

(v) At the end of the restructuring process, the current shareholders of the Company would hold around 5 % of the share capital. Eventually, through the issuance of warrants, they could increase such stake in a percentage to be agreed that will not exceed an additional 5%, if, within 96 months, the group has paid in full all outstanding amounts under the new financing to be provided in the framework of the restructuring and under the existing indebtedness (as this indebtedness may have been restructured), including its financial costs. Furthermore, the company intends to submit a proposal to merge the two types of existing shares into one sole class of shares for approval by a General Shareholders Meeting, although this is not considered a prerequisite of the restructuring agreement.

(vi) Within the context of the restructuring agreement and until its implementation, the Company has appointed Mr. Gonzalo Urquijo Fernández de Araoz as independent advisor, with no executive or management functions, to the board of directors for matters related with the Viability Plan and the fulfillment of the conditions precedent.

› As of the signed restructuring agreement on September 24, 2016, it is open a process, that will be finished on October 25, 2016, with the rest of financial creditors aiming to obtain the minimum required level of support required in the law of 75%.

b) On the other hand, in relation with the proceedings in Brazil, on the occasion of the mentioned situation of Abengoa, it should be known that;

› On January 29, 2016, Abengoa filled the recuperação judicial applications in Brazil about the companies Abengoa Concessões Brasil Holding S.A., Abengoa Construção Brasil Ltda and Abengoa Greenfield Brasil Holding S.A, which were admitted on February 22, 2016. This measure was undertaken provided that the Company incurred in a "Crise econômico scenario", which is contemplated in Brazillian Law 11.101/05. "Recuperação judicial" consists in a proceeding provided by the Brazillian Law which allows corporations to restructure their debt in an orderly manner and continue as a going concern once the financial difficulties are overcome.

› In relation to the aforementioned, on April 20, 2016, Abengoa presented the viability plan (plano de Recuperaçao) in which the main premises are based on the divestment of certain concessional transmission line assets in operation, as well as the divestment of lines which currently are under construction. It is expected that these divestments will allow a favorable agreement to repay the debt already restructured in companies under recuperação judicial (negotiations are in progress with creditors) as well as the possible preservation of the construction activity in Brazil. As explained in Note 7 of these consolidated condensed interim financial statements, both asset batches have been classified as non-current assets held for sale due to the compliance, at June 30, 2016,of the IFRS 5´s requirements. In relation with lines in operation, on June 24, 2016, Abengoa has received an offer by which the asset fair value estimation have been made. This offer, will serve as starting price in the judicial auction process provided to this kind of insolvency proceedings in Brazil

› On the other hand, and regardless the mentioned negotiation process, on June 28, 2016, ANEEL´s Board of Director decided to authorize the Electricity Inspection Service Office "SFE" and the Superintendent of Economy and Financial Inspection " SFF" for the issuance of a communication to the owner companies of construction in progress (ATEs), informing about the contract compliance, which may lead to an expiration declaration of concessions.

c) Additionally, in relation to the proceedings in United States, on occasion as well of the mentioned situation of Abengoa, indicate that,

› On February 1, 2016 and February 10, 2016, certain creditors initiated involuntary bankruptcy petitions to the Missouri Bankruptcy Court against the American affiliates Abengoa Bioenergy Nebraska, L.L.C. and Abengoa Bioenergy Company, L.L.C. respectively. After responding to the petitions, on February 24, 2016, both companies mentioned above along with Abengoa Bioenergy Outsourcing, LLC, Abengoa Bioenergy Engineering and Construction, LLC, Abengoa Bioenergy Trading US, LLC, and Abengoa Bioenergy Holding US, LLC opted to file for voluntary creditors´ protection under Chapter 11 provided by the USA Law. These petitions have been filed in order to allow the Company to continue as a going concern and, consequently, they included the authorization request for the payment of taxes, salaries and insurance premiums and other first day motions. Additionally, a request for the approval of a debtor-in-possession financing arrangement amounting to US$41 million was also filed. The hearing for these initial motions took place on March 2, 2016 and, during them, such companies were authorized to borrow an initial amount of US$8 million (which were additionally complemented with US$1.5 million authorized on March 29, 2016).

› Moreover, on March 23, 2016, certain creditors filed an involuntary insolvency proceeding against Abengoa Bioenergy Biomass of Kansas, LLC (ABBK)at the Kansas court.

› Also on March 29, the following American affiliates Abeinsa Holding Inc.; Abencor USA, LLC; Teyma Construction USA, LLC; Abeinsa EPC, LLC; Inabensa USA, LLC; Nicsa Industrial Supplies, LLC; Abener Construction Services, LLC; Abener North America Construction, LP; Abengoa Solar, LLC; Teyma USA & Abener Engineering and Construction Services General Partnership; Abeinsa Abener Teyma General Partnership; Abener Teyma Mojave General Partnership; and Abener Teyma Inabensa JV filed, under the "United States Bankruptcy Code" and the Delaware court, the named Chapter 11 in order to allow the companies to comply with their obligations and minimize the loss of value of their businesses. Such companies have requested authorization for the payment of taxes, salaries and insurances as well as other first day motions.

- In relation to all the above, on March 28 and 29, 2016, and in accordance with the clause 5.2 of the Standstill agreement mentioned before, Abengoa, S.A. and several of its Spanish affiliates (the "Chapter 15 Debtors") commenced cases under Chapter 15 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware ("Delaware Bankruptcy Court"). In these cases, the Chapter 15 Debtors seek recognition by the Delaware Bankruptcy Court of the proceeding commenced in the Spanish Court to obtain judicial approval (homologación judicial) of the Standstill Agreement (the "Spanish Proceeding") and application of the Standstill Agreement within the territorial jurisdiction of the United States. In the initial hearings held on March 31, 2016, the Delaware Bankruptcy Court granted the Chapter 11 Debtors' requests relief and the Initial Chapter 15 Debtors' requested provisional relief to stay creditor actions against them. Both hearings were uncontested and all motions were granted.

- Additionally, on April 7, 2016 Abengoa US Holding, LLC and seven other affiliated U.S. debtors (collectively, the "Additional Chapter 11 Debtors") each filed a voluntary petition for relief under Chapter 11 of the United States Bankruptcy Code in the Delaware Bankruptcy Court (together with the Chapter 11 cases filed on March 29, 2016, the "Chapter 11 Proceedings"). All of the cases filed by the Additional Chapter 11 Debtors are being jointly administered with the lead Chapter 11 Proceeding filed on March 28, 2016 in the Delaware Bankruptcy Court. The Additional Chapter 11 Debtors are comprised of the following legal entities: Abener Teyma Hugoton General Partnership, Abengoa Bioenergy Biomass of Kansas, LLC, Abengoa Bioenergy Hybrid of Kansas, LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy Technology Holding, LLC, Abengoa US Holding, LLC, Abengoa US Operations, LLC and Abengoa US, LLC.

- The Company further informs that at the initial hearing held on April 27, 2016 on the Chapter 11 petitions filed on April 7, 2016 by the additional Chapter 11 Debtors, the Delaware Bankruptcy Court granted the first-day relief requested by all but one of those debtors. With respect to ABBK's Delaware case, it was noted that on April 25, 2016 the U.S. Bankruptcy Court for the District of Kansas (the "Kansas Bankruptcy Court") had issued an order denying ABBK's request to transfer to the Delaware Bankruptcy Court an involuntary Chapter 11 case commenced against it on March 23, 2016 in the Kansas Bankruptcy Court. Referring to the Kansas Bankruptcy Court's ruling and the Delaware Bankruptcy Court stated that it would honor that decision, ordered a stay of ABBK's Chapter 11 case in Delaware, and directed ABBK to show why its Delaware case should not be dismissed. On May 2, 2016, ABBK moved to certify the Kansas Bankruptcy Court's ruling for direct appeal to the U.S. Court of Appeals for the Tenth Circuit and requested a stay of the Kansas bankruptcy case order pending the outcome of that appeal.

- The Company further informs that on April 26, 2016 its subsidiary Abengoa Solar LLC ("Abengoa Solar"), one of the Initial Chapter 11 Debtors, filed a motion requesting the Delaware Bankruptcy Court's authorization to consummate the sale of interests that two of Abengoa Solar's non-debtor subsidiaries hold in project entities responsible for the financing, design, construction, operation, maintenance, and transfer to the State of Israel of a concentrated solar energy thermal power station plant currently under construction there (the "Ashalim Project"). At the hearing on the motion held on May 3, 2016, the Delaware Bankruptcy Court authorized Abengoa Solar to make this transaction.

- On May 3, 2016, the American affiliate companies Abengoa Bioenergy Meramec Renewable, LLC, Abengoa Bioenergy Funding, LLC, Abengoa Bioenergy Maple, LLC, Abengoa Bioenergy of Indiana, LLC, Abengoa Bioenergy of Illinois, LLC y Abengoa Bioenergy Operations, LLC, commenced a voluntary Chapter 11 case in the Missouri Bankruptcy Court. In the framework of these proceedings and the already initiated Chapter 11 proceeding by Abengoa Bioenergy US Holding, LLC, this and the affiliate companies mentioned have filed motions in the East Missouri Bankruptcy Court in relation with the sale proceeding of the two Maple plants located on Indiana and Illinois, the plant of Ravenna and the plant of York. Additionally, to facilitate the sale of the Maple plant, the current creditors of such plants have agreed to concede additional financing for an amount of US$10 million (debtor-in-.possession financing).

- Continuing with the sale proceeding commented above, on August 22, 2016 as approved by the United States Bankruptcy Court for the Eastern District of Missouri (the "Bankruptcy Court"), an auction over certain assets of Abengoa Bioenergy US Holding, LLC (the Company.) has been conducted following the process previously agreed among certain debtors and debtors in possession (the "Debtors") and such Company, on June 12, 2016, Abengoa Bioenergy US Holding, LLC and certain Debtors filed a motion (the "Motion") with the Bankruptcy Court seeking, among other things, entry of an order (the "Bidding Procedures Order"); (a) approving certain auction and bidding procedures (the "Bidding Procedures") in connection with the sale of the Debtors' bioenergy plants in Ravenna, Nebraska, York, Nebraska, Mt. Vernon, Indiana, Madison, Illinois and Colwich, Nebraska (collectively, the "Purchased Assets"), (b) authorizing the Debtors to enter into stalking horse purchase agreements with KAAPA Ethanol Holdings, LLC for the Ravenna Assets, Green Plains, Inc. for the Mt. Vernon and Madison Assets (the "Maple Assets") and Biourja Trading, LLC for the York Assets, (c) approving procedures relating to the assumption and assignment of executory contracts and unexpired leases, and (d) scheduling an auction (the "Auction") and sale approval hearing (the "Sale Hearing").

- On June 15, 2016, the Bankruptcy Court entered the Bidding Procedures Order, and subsequently, the Debtors' investment banker, Carl Marks, engaged in an extensive marketing process for all of the Purchased Assets. Pursuant to the Bidding Procedures Order, certain competing bids were submitted, and on the aforementioned date (August 22, 2016), the Debtors conducted the Auction, the results of which were that: (i) KAAPA Ethanol Holdings, LLC was the successful bidder for the Ravenna Assets at US$115 million, (ii) Green Plains, Inc. was the successful bidder for the Maple Assets at US$200 million, (iii) Green Plains, Inc. was the successful bidder for the York Assets at US$37.375 million, and (iv) ICM, Inc. was the successful bidder for the Colwich Assets at US$3.15 million.

- The Bankruptcy Court has scheduled to conduct a hearing to approve these sales on August 29, 2016, and it is expected that these transactions will close by September 30, 2016. Following the completion of the sales of the bioenergy assets, after the payment of debtor-in-possession financing provided with regard to the Ravenna Assets and the Maple Assets, the net sale proceeds will then be distributed pursuant to a plan of liquidation. The plan will be filed with the Bankruptcy Court following the closing on the sale of Purchased Assets.

- Additionally, on date July 18, 2016, and in the Chapter 11 proceeding framework, already initiated by ABBK, the investment bank Ocean Park Advisors was hired to seek a strategic partner interested in buying the bioethanol plant and the co-generation plant located in Hugoton, Kansas.

- Finally, the companies Abengoa Bioenergy Holdco, Inc. and Abengoa Bioenergy Meramec Holding, Inc., have initiated voluntary proceedings of Chapter 11 in the Delaware Bankruptcy Court, where the pending chapter 11 resolutions of other American affiliates exist, as well as the Chapter 15 proceeding of Abengoa mentioned before.

d) In relation to the bankruptcy declaration by the Court of Rotterdam of Abengoa Bioenergy Netherlands, B.V. on date May 11, 2016, and appointing both a liquidator and supervising judges, should be known the following;

- After such bankruptcy declaration and the appointment of a liquidator, the liquidation process of the company started and therefore, since that moment, the loss of control was effective.

- In the framework of such bankruptcy proceeding, on date May 11, 2016, the company Alcogroup communicated the agreement to acquire the plant without disclosing the agreed acquisition price .

- Once completed the restructuring agreement and the recapitalization of the Group described in Note 2.1.a), the company will develop the agreed Updated Viability Plan with creditors and investors, which is focused on the traditional business of Engineering and Construction, where the company accumulates more than 75 years of experience. Specifically, this Updated Viability Plan focusses the activity in the energy and environmental industry. This business will be combined, in a balanced manner, with concessional infrastructure projects in sectors where Abengoa has a competitive advantage, mainly of technological kind, which allows a bigger added value projects. Regarding the mentioned Updated Viability Plan, will allow Abengoa to grow sustainably based on the following five principles:

  1) A multidisciplinary team and a culture and ability to multifunctional work.

  2) Experience in engineering and construction and specially the outstanding strength in business development of high potential growing such as energy and water.

  3) Technology abilities in our targets, mainly in solar energy and water.

  4) A more efficient organization with more competitive general expenses.

  5) A financial approach adjusted to the current reality in which financial discipline and a rigorous evaluation of financial risks are key milestones.

- Based on the foregoing, and in prevision of the fulfilment of the agreement with financial creditors of the Company which assure the financial stability of Abengoa and the ability to generate resources from its operations as stated in the Updated Viability Plan, Abengoa´s Directors have deemed it appropriate to present the Consolidated Condensed Interim Financial Statements as of June 30, 2016 on a going concern.

  Based on the application of the going concern basis, Abengoa´s Directors have prepared these Consolidated condensed interim financial statements applying the International Accounting Standards consistently with Consolidated condensed interim financial statements and Consolidated financial statements filed in prior periods. For that purpose, and according to the aforementioned accounting framework, Abengoa´s Directors have made their best estimates and assumptions in order to record the assets, liabilities, revenues and expenses as of June 30, 2016 in accordance with the existing information by the time of formulating these Consolidated condensed financial statements.

› The situation of the Group continues being affected by a strong limitation of financial resources, which has significantly influenced the evolution of the business by means of general business deceleration in all segments for one year. Thus, certain projects have left idle without possibility to assist with suitable financial resources to operate them. This situation has led on the one hand to breaches in contractual milestones, and on the other, to a very significant increase in estimated costs of their reactivation and therefore their continuance are not included in the viability plan associated to the Restructuring Agreement signed on September 24, 2016. Additionally, in certain countries, Group´s companies have incurred in judicial insolvency situations or bankruptcy in business which are not included in the mentioned viability plan. Given this situation, Directors have collected the significant negative impacts in the income statements at June 30, 2016 based on the best estimations made by Directors and in accordance with the International Accounting Standards. In this sense, the most significant negative impacts recorded in results at June 30, 2016, which have reached €-3,253 million, are mainly related to provisions in construction projects, to results from the sale of certain assets and the impairment of certain assets caused by the situation of the company.

The following table shows the detail of such impacts (in million euros):

| Item | Total |
|---|---|
| Project Construction costs | (139) |
| Sale of assets | 56 |
| Impairment of assets | (3,079) |
| Default interests and guaranty executions | (70) |
| Others | (21) |
| | **(3,253)** |

Due to all the above, the parent company, Abengoa, S.A., has incurred in losses since 2015 which has supposed a significant decrease in Equity and, as a consequence, at June 30, 2016 presents a negative net equity. In accordance with the Article 363 of the Spanish Corporation Law, a Company will be in dissolution situation when losses lead Net Equity to an amount lower than half shared capital, unless an increase or decrease in capital share were enough.

The effective application of the signed Restructuring Agreement will allow to an immediate restoration of financial stability from the recognition of results from debt write-offs considered, in addition to provide the Group with the necessary financial resources to reactivate the activity. On the other hand, Directors are confident on generating future resources from operations given such financial resources and the application of the Updated Viability Plan, which will allow to rise the market confidence, the provision of liquidity to the Company and the continuance of its activity to operate in a competitive and sustainable manner in the future.

For further information about the restructuring process, see `Subsequent events`.

## b) Application of new accounting standards

a) Standards, interpretations and amendments effective from January 1, 2016 under IFRS-EU, applied by the Group:

› Improvements to IFRSs 2012-2014 cycles. These improvements are mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

› IAS 1 (Amendment) 'Presentation of Financial Statements'. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

› IAS 16 (Amendment) 'Property, Plant and Equipment' and IAS 38 'Intangible Assets', regarding to acceptable methods of amortization and depreciation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

› IAS 27 (Amendment) 'Separate financial statements' regarding the reinstatement of the equity method as an accounting option in separate Financial statements. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

› IFRS 11 (Amendment) 'Joint Arrangements' regarding acquisition of an interest in a joint operation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-EU.

Abengoa's Directors believe that the applications of these amendments have not had any material impact.

b) Standards, interpretations and amendments published by the IASB that will be effective for periods after June 30, 2016:

› IFRS 10 (Amendment)' Consolidated Financial Statements' and IAS 28 'Investments in Associates', regarding to sale or contribution of assets between an investor and its associate or joint venture. The application of these amendments has been delayed with not specific date of application under IFRS-EU.

› IFRS 9 'Financial Instruments'. This Standard will be effective from January 1, 2018 under IFRS-IASB and has not yet been adopted by the EU.

- IFRS 15 'Revenues from contracts with Customers'. IFRS 15 is applicable for periods beginning on or after 1 January 2018 under IFRS-IASB, earlier application is permitted, IFRS 15 has not yet been adopted by the EU.
- Introduction of IFRS 16 "Leases" which supersedes IAS 17. Lessees will recognize most leases in the balance sheet as financed purchases. This standard will apply to periods beginning after January 1, 2019 under IFRS-EU.
- IFRS 10 (Amendment) 'Consolidated financial statements', IFRS 12 'Disclosure of interests in other entities' and IAS 28 'Investments in associates and joint ventures' regarding the exemption from consolidation for investment entities. These amendments are mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB and have not yet been adopted by the EU.
- IAS 7 (Amendment) "Statement of cash flow" related to disclosures. This standard will apply to annual periods beginning after January 1, 2017 under IFRS-EU.
- IAS 12 (Amendment) "Income taxes" related to the recognition of not realized deferred taxes. This standard will apply to annual periods beginning after January 1, 2017 under IFRS-IASB, earlier application is permitted, and annual periods beginning after January 1, 2018 under IFRS-EU.

The Group is currently in the process of evaluating the impact on the Consolidated condensed interim financial statements derived from the application of the new standards and amendments that will be effective for periods beginning after June 30, 2016.

## c) Changes in the composition of the Group

During the first semester of the year 2016 a total of 3 associated companies were added to the consolidation perimeter of the group.

In addition, 8 subsidiaries, 2 associated companies and 3 joint ventures are no longer included in the consolidation group.

Within the companies which have left the consolidation perimeter is Abengoa Bioenergy Netherlands, B.V. given that, as a consequence of the declaration of bankruptcy by the Court of Rotterdam of such company on May 11, 2016, the appointment of a Liquidator and the consequent loss of control (see Note 2.1, 8.2 and 18.4)..

## d) Main acquisitions and disposals

- There were no significant acquisitions during the six month period ended June 30, 2016.
- During the first semester of 2016, the main disposals are the following:
  - At the end of January 2016, the sale of the interest in Abengoa Solar Emirates Investment Company B.V. (TASEIC), parent company of Shams Power Company (Owner company of a 100MW thermo-solar plant developed by Abengoa in Abu Dhabi) was concluded. As a consequence of this sale Abengoa received an amount of US$30 million and has had a positive impact of €1 million in the consolidated Income Statement.
  - On March 31, 2016, the sale of the interest in the company Nicefield (owner company of a 70MW wind farm developed by Abengoa in Uruguay) was concluded. This sale concluded with an amount of US$0.4 million, releasing the company´s obligations of US$38 million of debt and its related guarantees, and has a positive impact in the consolidated Income Statement of €3 million.
  - At the beginning of April 2016, an agreement between Abengoa and Vela Energy, S.L. was closed for the sale of four photovoltaic plants located in the province of Seville and Jaen. The agreement, included in the divestment plan announced by the Company, has contributed with a debt reduction of €50 million, as well as a net cash inflow of €12 million and a negative impact in the consolidated income statements at June 30, 2016 for an amount of €4 million.
  - On April 16, 2016 an agreement between Abengoa and a group of investors (Estudios y Explotaciones de Recursos, S.A.U. Ingeniería de Manutención Asturiana, S.A., Noy Negev Energy, Limited Partnership and Shikun & Binui - Solel Boneh Infrastructure Ltd.) was signed for the transaction of all the Abengoa´s interest until that moment in the Project of Ashalim, consisting on the construction and operation of a 110MW thermo-solar plant located in Ashalim (Israel). The total amount of the transaction has been €64 million and was subjected to a number of conditions including the approval by creditors of the financing terms and the corresponding authorities of the State of Israel. As of June 30, 2016, not all of the conditions have been accomplished and thus, the sale transaction has not been recorded. Although, based on the total transaction amount, the investment has been recorded at fair value recognizing an impairment loss of €19 million (see Note 7). As of August 8, all the conditions have been accomplished and its collection has been effective.

- On May 30, 2016, an agreement between Abengoa and Layar Castilla, S.A.U. has been signed for the transaction of all Abengoa´s interest in Explotaciones Varias, S.L. which aims the organization and operation of activities and businesses in relation to the acquisition of agricultural plot and its operation in agricultural, hunting and farming businesses directly, on partnership or by lease, the planting of crops, irrigation works and sanitation. This sale was completed for an amount of €16 million and has contributed with a positive impact in the consolidated income statement of €1 million.

- At the beginning of June 2016, the agreement between Abengoa and the Company Garney has been closed for the transaction of the 80% Abengoa Vista Ridge LLC´s interest as owner Company of the assets associated to a water and conduction plant in United States. The agreement has contributed to a debt reduction of €105 million and no cash generation. As a consequence, the control over the assets has been transferred. Thus, and according to IFRS 10 – Consolidated Financial Statements, the loss of control over the company has supposed the disposal of all the assets and liabilities associated to the Company at book value on the date in which the loss of control was effective, as well as all minority interest of the Company and the valuation of the 20% interest at fair value at the date of loss of control. Due to all the above, it has been recorded a positive impact in the consolidated income statement of €74 million at June 30, 2016 (see Note 22.2).

- After the closing of the six month period ended June 30, 2016, on July 5, 2016, an agreement between Abengoa and Excellance Field Factory, S.L.U. (affiliate company of Ericsson) has been signed for the sale of the deployment and maintenance of communication networks and subscriber loop business, currently operated by Abentel, to such company expressly created by Ericsson. The agreement, subjected to the compliance of certain conditions, involve the collection of €5 million as established and it would not have a significant impact in the consolidated income statements.

- On the other hand, and following the agreement reached with the infrastructure fund EIG Global Energy Partners ('EIG') on April 7, to establish the Joint Venture (JV) Abengoa Projects Warehouse I, LLP (APW-1) which structure consist of 55% invested by EIG and a remaining non-controlling interest of 45% by Abengoa, it should be note that, at the end of the year, the two asset transfer contributions to such JV were made by Abengoa (One corresponds to the 100% interest on CSP Atacama 1 and PV Atacama 1, solar plant project companies located in the Atacama Desert, Chile, and another second corresponds to a minority interest contribution of the power transmission line assets in Brazil.

  After the end of the year 2015, and taking into account the situation in which the Company was, a process of reaching an understanding with EIG which will regulate the relationship between both parties about the contribution transferred to date considering the global agreement initially signed which resulted to the establishment of APW-1. The completion of these negotiations is a necessary condition to make the Restructuring Agreement effective which was signed on September 2016. As a consequence of the inability to accomplish the initial agreement, Abengoa has recognized an impairment charge in the APW-1 interest for an amount of €253 million in the income statements for the six month period ended June 30, 2016 while the negotiation process is completed.

## e) Main figures

Financial data

- Revenues of €1,215 million, a 63.3% lower to the same period of 2015.
- EBITDA of €-51 million, a decrease of 108.7% compared to the same period of 2015.

| Item | Balance as of 06.30.16 | Balance as of 06.30.15 (1) | Var (%) |
|---|---|---|---|
| **Income Statement** | | | |
| Revenue | 1,215 | 3,307 | (63.3) |
| EBITDA | (51) | 589 | (108.7) |
| EBITDA Margin | (4%) | 18% | (123.6) |
| Net Income | (3,689) | 72 | (5,223.6) |
| **Balance Sheet** | | | |
| Total Assets | 12,782 | 28,616 | (55.3) |
| Equity | (2,911) | 3,603 | (180.8) |
| Corporate Net Debt | 5,569 | 2,555 | 117.9 |
| **Share Information** | | | |
| Last price (€ per B share) | 0.24 | 2.82 | (91.5) |
| Capitalization (A+B share) (€ million) | 256 | 2,610 | (90.2) |
| Daily trading volume (€ million) | 6 | 42 | (85.7) |

(1) Restated figures in income statement due to the classification of transmission lines activity as discontinued operations.

- Corporate debt amounts to €7,124 million in comparison to €6,568 million at December 31, 2015.
- Project finance amounts to €2,397 million in comparison to €3,070 million at December 31, 2015. Within project finance are included €1,902 million of bridge loan with corporate guaranty (€2,049 million at December 31, 2015). Such bridge finance, does not include bridge financing for an amount of €478 million (€399 million at December 31, 2015) which have been classified as assets and liabilities held for sale, nor bridge financing for the Atacama I project in Chile for an amount of €240 million (€238 million at December 31,2015), given its integration by the equity method.

Operating figures

- The international activity represents 84% of the consolidated revenues.
- The main operating figures of June 30, 2016 and 2015 are the following:

| Key operational | June 2016 | June 2015 |
|---|---|---|
| Transmission lines (km) | 3,532 | 5,275 |
| Water Desalination (Cap. ML/day) | 475 | 775 |
| Cogeneration (GWh) | 263 | 793 |
| Solar Power Assets (MW) | 201 | 1,603 |
| Biofuels Production (ML/year) | 2,790 | 3,270 |

## f) Consolidated income statement

The following summary shows the Consolidated Income Statement of Abengoa at June 30, 2016 and June 30, 2015, with an explanation of the main variations between both periods.

| | For the six months period ended | | |
|---|---|---|---|
| Item | 2016 | 2015 (1) | Var (%) |
| Revenues | 1,215 | 3,307 | (63.3) |
| Operating income and expenses | (1,266) | (2,718) | (53.4) |
| **EBITDA** | (51) | 589 | (108.7) |
| Depreciation and amortization | (1,813) | (186) | 874.7 |
| **I. Net Operating Profit** | (1,864) | 403 | (562.5) |
| Financial profit (loss) | (301) | (322) | (6.5) |
| Net Exchange differences and other financial gain / losses | (204) | (73) | 179.5 |
| **II. Finance Cost, net** | (505) | (395) | 27.8 |
| **III. Share of (loss)/(profit) of associates** | (332) | 6 | (5,633.3) |
| **IV. Profit Before Income Tax** | (2,701) | 14 | (19,392.9) |
| V. Income tax expense | (28) | 61 | (145.9) |
| **VI. Profit for the year from continuing operations** | (2,729) | 75 | (3,738.7) |
| Profit (loss) from discontinued operations, net of tax | (954) | 6 | (16,000.0) |
| **Profit for the year** | (3,683) | 81 | (4,646.9) |
| VII. Non-controlling interests and non-controlling interests discontinued operations | (6) | (9) | (33.3) |
| **Net income attributable to the parent company** | **(3,689)** | **72** | **(5,223.6)** |

(1) Restated figures in income statement due to the classification of transmission lines activity as discontinued operations.

Revenues

Revenues have decreased by 63.3% to €1,275 million; this means a decrease of €2,092 million in comparison to the €3,307 million of the same period last year. This decrease in revenues is mainly attributable to the current situation of the Group, derived from a strong limitation of financial resources in the last months and which has significantly affected the evolution of the business after the general deceleration of the business in all activities. In addition to the above, there has been a decrease in revenues due to the negative impact of the finalization of the construction of several projects in 2015 and the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and because of the loss of control of Rioglass at the end of 2015 and the bioethanol plant in Holland during the first semester of 2016. All this have been partially offset by the positive impact of ethanol and sugar sold in Brazil derived from higher stock volume of raw material of the previous harvest and the beginning of the current harvest period as well as higher prices of both products in relation with the same period of the previous year.

EBITDA

The EBITDA amount has been reduced by 108,7% to €-51 million, which is a decrease of €640 million in comparison to the €589 million of the same period last year. This decrease in EBITDA is mainly attributable to the current situation of the Group, as mentioned in the last section, which has derived in a deceleration of the business in all activities and consequently in the EBITDA obtained in each of them. In addition to the above, there has been a decrease in EBITDA due to the negative impacts of the finalization of the construction of several projects in 2015 and the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and because of the loss of control of Rioglass and the bioethanol plant in Holland during the first semester of 2016. All this have been partially offset by the positive impact of ethanol and sugar sold in Brazil derived from higher stock volume of raw material of the previous harvest and the beginning of the current harvest period, as well as better ethanol margins in Europe and the higher prices in ethanol and sugar in Brazil.

Net operating profit

Net operating profit has decreased by 562.5% from a profit of €403 million in the first semester of 2015 to a loss of €1,864 million in the same period in 2016. This decrease in the net operating profit is mainly attributable to all mentioned above in the EBITDA section. Additionally, losses have increased due to the impairment registered over certain intangible assets (goodwill, and development assets) pertaining to the Engineering and Construction segment, due to the doubtful recovery given the problems arise during the period to keep the activity in an appropriate way because of the current situation of the Company. Additionally, there is an impairment recognized due to changes in the fair value of the 1G and 2G bioethanol plants in United States (Indiana, Illinois, Nebraska, York and Hugoton), the solar plants located in Chile, the generation plants in Mexico and the bioethanol plant in Holland. All the mentioned has been partially offset by the lower amortization costs due to the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement.

Net financial costs

Net financial cost has reached a loss of €505 million, which is an increase of a 27,8% in comparison to the net loss of €395 million in the same period last year. This increase of losses is mainly attributable to the impairment registered over Xfera Moviles, S.A., to the financial cost due to the convertible notes derivative settlement of Befesa, to higher financial expenses derived to the execution of guarantees and interest financial expenses and other banking expenses due to the current situation of the Company described before, all partially offset by the profit generated by the transaction of the 80% interest over Abengoa Vista Ridge, LLC and the lower financial costs in project finance after the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement.

Share of results in associates

Results from share in associates companies decreased from a profit of €6 million during the first semester of 2015 to a loss of €332 million in the same period of 2016. This decrease is mainly attributable to the impairment charge in the associated companies Rioglass and APW-1.

Corporate income tax

Corporate income tax decreased from a profit of €61 million in the first semester of the year 2015 up to a loss of €28 million in the same period of 2016. This decrease is mainly attributable to the non-recognition of revenues derived from higher tax credit carryforwards over losses obtained during the period given the current situation of the Group, described in previous sections, until there is better visibility of the implementation of the Viability Plan announced by the Company.

Profit for the year from continuing operations

In addition to all foregoing, profit from continuing operations decrease from a profit of €75 million in the second quarter of the year 2015 up to a loss of €2,729 million in the same period in 2016.

Profit/(Loss) from discontinued operations, net of tax

Profit/ (Loss) from discontinued operations, net of tax, decreased from a profit of €6 million in the second quarter of 2015 to a negative results of €954 million in the same period in 2016. This decrease is mainly attributable to the consideration as discontinued operations of transmission lines in Brazil and the effect to the consolidation of Atlantica Yield and affiliates through the

equity method at the end of the year 2015, once lost the control and left its consolidation through the global integration method (classified until that moment as discontinued operations).

Profit attributable to the parent company

Profit attributable to the parent company decreased from a profit of €72 million in the second quarter of 2015 to a loss of €3,689 million for the same period in 2016 as a consequence of the changes described in previous sections.

## g) Results by activities

The following table shows the distribution between business activities of the consolidate revenues and consolidated EBITDA at June 30, 2016 and June 30, 2015, with an explanation about the main variations between both periods:

| | Revenues | | | Ebitda | | | Margin | |
|---|---|---|---|---|---|---|---|---|
| | For the six months period ended | | | For the six months period ended | | | For the six months period ended | |
| Item | 06.30.16 | 06.30.15 (1) | Var (%) | 06.30.16 | 06.30.15 | Var (%) | 06.30.16 | 06.30.15 |
| **Engineering and construction** | | | | | | | | |
| E&C | 611 | 2,160 | (71.7) | (104) | 451 | (123.1) | (17.0%) | 20.9% |
| **Total** | **611** | **2,160** | **(71.7)** | **(104)** | **451** | **(123.1)** | **(17.0%)** | **20.9%** |

| **Industrial production** | | | | | | | | |
| Bioenergy | 531 | 972 | (45.4) | 7 | 16 | (56.3) | 1.3% | 1.6% |
| **Total** | **531** | **972** | **(45.4)** | **7** | **16** | **(56.3)** | **1.3%** | **1.6%** |
| **Total** | **1,215** | **3,307** | **(63.3)** | **(51)** | **589** | **(108.7)** | **(4.2%)** | **17.8%** |

(1) Restated figures in income statement due to the classification of transmission lines activity as discontinued operations.

Engineering & Construction

Revenues in the Engineering & Construction segment has decreased by 71.7% to €611 million, which is a decrease of €1,549 million compared to the €2,160 million of the same period last year. This decrease in revenues is mainly attributable to the current situation of the Group given the strong limitation of financial resources in which the Company is subjected in the last months and which has significantly affected the evolution of the business after the general deceleration of the Engineering & Construction activity. The main projects under construction affected by all the above situation corresponds to the combined cycle plants in Mexico (AT3 and AT4), to thermo-solar and photovoltaic plants in Chile (Atacama solar plant), thermos-solar plants in South Africa and to transmission lines in Brazil. In addition to the above, there has been a decrease in revenues due to the negative impacts as a consequence of the finalization of the construction in 2015 of certain transmission line projects in Peru and Poland.

Engineering & Construction EBITDA has decreased by 123.1% to €-104 million, which is a decrease of €555 million, compared to the €451 million in the same period in the last year. This decrease is mainly attributable to the current situation of the Group, mentioned in the previous section, which has caused the deceleration in the projects under construction mentioned before and consequently the EBITDA obtained in each of them. Additionally the decrease in EBITDA is due to the negative impacts as a consequence of the finalization in the construction of certain projects of transmission lines during 2015 in Peru and Poland mentioned before.

Concession-type Infrastructures

Revenues in concession-type infrastructures have decreased by 58.3% to €73 million, which is a decrease of €102 million compared to the €175 million of the same period last year. This decrease in revenues is mainly attributable to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and corresponds to desalination plants in Algeria (Skikda and Honanine), to a transmission line in Peru (ATN2), to thermo-solar plants in Spain (Helioenergy 1 and 2, Helios 1 and 2, Solnova 1, 3 and 4, Solaben 1 and 6) and a thermo-solar plant in South Africa (Kaxu Solar One).

Concession-type infrastructure EBITDA has decreased by 62.3% to €46 million, which is a decrease of €76 million compared to the €122 million on the same period last year. This decrease in EBITDA is also mainly attributed to what has been mentioned in the previous section related to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreements mentioned before.

Industrial Production

Industrial production revenues have decreased by 45.4% to €531 million, which is a decrease of €441 million compared to €972 million of the same period last year. This decrease in revenues is mainly attributable to the current situation of the Group mentioned before and has caused a deceleration and the stoppage, in certain situations, of the activity of certain plants in Europe and USA. All this impact has been partially offset by the positive impact in volume of ethanol and sugar sold in Brazil derived from higher raw material stocks from the previous harvest and the early beginning of the current harvest, as well as higher prices in both products in relation with the same period of the previous year.

Industrial production EBITDA has reached a positive outcome of €7 million, which is a decrease of €9 million compared to the positive EBITDA of €16 million in the same period last year. This decrease in EBITDA is mainly attributable to the negative impact given the current situation of the Group which, as mentioned before, has caused the deceleration and the stoppage in certain situations of the activity in certain plants in Europe and USA mainly, including the loss of control of the plant in Holland at the beginning of May. All this impact has been partially offset by the positive impacts in EBITDA in volume of ethanol and sugar sold in Brazil derived from higher raw material stocks from the previous harvest and the beginning of the current harvest, as well as better margins in ethanol in Europe and higher prices in Brazil.

## h) Consolidated statement of financial position

Consolidated balance sheet

A summary of Abengoa's consolidated asset for June 30, 2016 and December 31, 2015 is given below, with main variations:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 | Var (%) |
|---|---|---|---|
| Intangible assets & Tangible fixed assets | 1,107 | 2,600 | (57.4) |
| Fixed assets in projects | 909 | 3,360 | (72.9) |
| Investments accounted for using the equity method | 779 | 1,198 | (35.0) |
| Financial investments | 565 | 1,114 | (49.3) |
| Deferred tax assets | 1,490 | 1,585 | (6.0) |
| **Non-current assets** | **4,850** | **9,857** | **(50.8)** |
| Inventories | 236 | 311 | (24.1) |
| Clients and other receivables | 1,703 | 2,004 | (15.0) |
| Financial investments | 195 | 519 | (62.4) |
| Cash and cash equivalents | 276 | 681 | (59.5) |
| Assets held for sale | 5,522 | 3,256 | 69.6 |
| **Current assets** | **7,932** | **6,771** | **17.1** |
| **Total Assets** | **12,782** | **16,628** | **(23.1)** |

› Non-current assets have decreased by 50.8 % to €5,007 million, which is a decrease of €4,850 million compared to the 9,857 million at December 31, 2015. This decrease in non-current assets is mainly attributable to the disposal of assets in Abengoa Bioenergy Netherlands B.V. after its deconsolidation given its loss of control after starting the liquidation process as a consequence of the declaration of liquidation by the liquidator in Holland and the impairment of assets in Brazil, to the classification as assets held for sale of the property, plant and equipment of the plants in United States, the investment in Yoigo and certain transmission lines in Brazil, to the negative impact of the derivative liability value on the convertible notes of Befesa and the impairment over the investment in Rioglass Solar after its dilution of shares and APW-1. All the previous impact has been partially offset by a light increase of assets in projects under construction related to a slight progress in construction works in the Zapotillo Aqueduct concession and the Unidad Punta de Rieles to the net positive impact due to the appreciation of the Brazilian real and the depreciation of the US dollar.

› Current assets have increased by 17.1% to €7,932 million, which is an increase in €1,161 million compared to the €6,771 million at December 31, 2015. This increase in assets is mainly attributable to new non-current assets classified as assets held for sale mentioned before. The mentioned has been partially offset by the lower financial investments and cash and cash equivalents due to the maturities of collateralized non-recourse confirming liabilities, netted by the cash obtained in the new liquidity lines in March, 2016 and due to the debtor-in-possession financing in United States (see Note 2.1 of the Interim Financial Statements), in which a total amount of US$37.5 million have been disposed at June 30, 2016.

A summary of Abengoa's consolidated liabilities as of June 30, 2016 and December 31, 2015 is given below, with main variations:

| Item | Balance as of 06.30.16 | Balance as of 12.31.15 | Var (%) |
|---|---|---|---|
| Capital and reserves | (3,435) | 62 | (5,640.3) |
| Non-controlling Interest | 524 | 391 | 34.0 |
| **Total Equity** | **(2,911)** | **453** | **(742.6)** |
| Long-term non-recourse financing | 15 | 504 | (97.0) |
| Corporate financing | 104 | 372 | (72.0) |
| Grants and other liabilities | 127 | 234 | (45.7) |
| Provisions and Contingencies | 44 | 63 | (30.2) |
| Derivative financial instruments | 20 | 38 | (47.4) |
| Deferred tax liabilities and Personnel liabilities | 290 | 322 | (9.9) |
| **Total non-current liabilities** | **600** | **1,532** | **(60.8)** |
| Short-term non-recourse financing | 2,383 | 2,567 | (7.2) |
| Corporate financing | 7,020 | 6,197 | 13.3 |
| Trade payables and other current liabilities | 3,098 | 4,379 | (29.3) |
| Current tax liabilities | 216 | 195 | 10.8 |
| Derivative financial instruments | 9 | 108 | (91.7) |
| Provisions for other liabilities and expenses | 6 | 6 | - |
| Liabilities held for sale | 2,362 | 1,191 | 98.3 |
| **Total current liabilities** | **15,094** | **14,643** | **3.1** |
| **Total liabilities** | **12,782** | **16,628** | **(23.1)** |

› Equity has decreased by 742.6% to €-2,911 million, which is a decrease of €3,364 million compared to €453 million at December 31, 2015. This decrease in equity is mainly attributable to the negative outcome as a consequence of the current situation of the Group which has been described before in the Consolidated Income Statement section. This has been partially offset by the net positive evolution of conversion differences of the appreciation of the Brazilian real and the depreciation of the US Dollar.

› Non-current liabilities have decreased by 60.8% to €600 million, which is a decrease of €932 million compared to 1,532 million at December 31, 2015. This decrease in non-current liabilities is mainly attributable to the reclassification as liabilities held for sale of project debt related to certain transmission lines concessional projects in Brazil. The aforementioned has been partially offset by the net increase due to the Exchange rate (derived from the appreciation of the Brazilian real, partially offset by the depreciation of the US$) and the accrual of interests related to unpaid loans to the negative impact of the depreciation of the US dollar, partially offset by the appreciation of the Brazilian real.

› Current liabilities have increased by 3.1% to €15,094 million, which is an increase of €451 million compared to the €14,769 million at December 31, 2015. This increase in current liabilities is mainly attributable to non-current liabilities classified as held for sale mentioned before, as well as by the increase in corporate financing due to the new liquidity line provided at the end of March and due to the debtor-in-possession financing in United States (see Note 2.1 of the Interim Financial Statements), in which a total amount of €37.5 million have been disposed at June 30, 2016. All the mentioned has been partially offset by the decrease in the trade payables and other current liabilities section due to maturities during the period of non-recourse confirming which had cash collateral or equivalent to cash collateral as guaranty of its pay.

## i) Consolidated cash flow statements

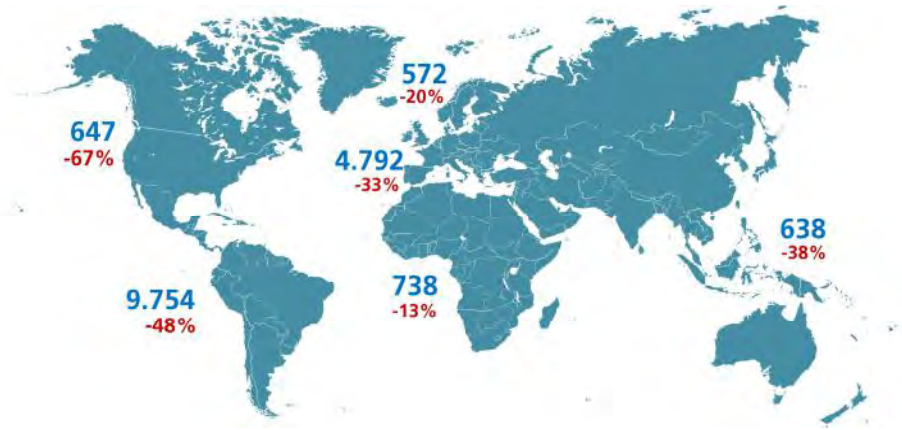
A summary of the consolidated cash flow statements of Abengoa for the periods ended June 30, 2016 and June 30, 2015 with an explanation of the main cash flows:

| Item | 06.30.16 | 06.30.15 (1) | Var (%) |
|---|---|---|---|
| **Profit for the year from continuing operations** | **(2,729)** | **75** | **(3,738.7)** |
| Non-monetary adjustments | 2,516 | 388 | 548.5 |
| Variations in working capital and discontinued operations | (201) | (441) | (54.4) |
| Income tax paid & Interest received/paid | (51) | (452) | (88.7) |
| Discontinued operations | 29 | 152 | (81.2) |
| **A. Net Cash Flows from operating activities** | **(436)** | **(278)** | **56.9** |
| **B. Net Cash Flows from investing activities** | **(50)** | **(1,009)** | **(95.0)** |
| **C. Net Cash Flows from financing activities** | **96** | **1,249** | **(92.3)** |
| **Net increase/(decrease) of cash and equivalent** | **(390)** | **(38)** | **920.3** |
| Cash at beginning of year | 681 | 1,811 | (62.4) |
| Translation differences cash or equivalent | (4) | 38 | (110.5) |
| Assets held for sale and discontinued operations | (10) | (254) | (96.1) |
| **Cash and cash equivalent at end of period** | **277** | **1,557** | **(82.2)** |

(1) Restated figures in the cash flow statement due to the classification of transmission lines activity as discontinued operations.

- As of June 30, 2016, cash outflows from operating activities amounts to €436 million compared to €278 million in 2015, due to the lower cash generated from the profit of the year, the decrease in working capital and the tax and interests credit receipts and payments, mainly derived from the current situation of the Group given by the strong limitation of financial resources in which the Company is subjected in the last months and which has significantly affected the evolution of the business after the general deceleration of all activities.

- In terms of net cash flows from investment activities, there is a net cash outflow of €50 million as of June 30, 2016, compared with net cash outflow of €1,009 million in the same period 2015. The lower cash outflows from investment activities is mainly caused by the current situation of the Group mentioned previously. The main investments were mainly because of transmission lines in Brazil and cogeration projects in Mexico, partially netted by the new money from the sale of Sham´s interest of Abengoa, Explotaciones Varias, for the sale of four photovoltaic plants located in the province of Seville and Jaén and for the sale of the convertible loan into shares of Befesa Medio Ambiente, S.L.U.



- Net cash flow from financing activities was €96 million as of June, 30 2016 compared to €1,249 million in the same period 2015. The lower cash inflows from financing activities is mainly caused by the current situation of the Group previously mentioned. Net cash generation mainly comes from a new liquidity line given at the end of March and the debtor-in-possession financing.

## j) Human Resources

Abengoa's workforce decreased by 31.1% to 17,141 people as of June 30, 2016, compared to June 30, 2015 (24,894 people).

Geographical distribution of the workforce

The distribution of the average number of employees was 28% in Spain and 72% abroad.

Distribution by professional groups

The average number of employees by categories as of June 30, 2016 and 2015 was:

| | Average number of employees for the six months ended 06.30.16 | | | Average number of employees for the six months ended 06.30.15 | | |
|---|---|---|---|---|---|---|
| Categories | Female | Male | % Total | Female | Male | % Total |
| Directors | 47 | 428 | 2.7 | 61 | 491 | 2.1 |
| Management | 348 | 1,230 | 8.9 | 433 | 1,589 | 7.5 |
| Engineers | 1,012 | 2,269 | 18.5 | 1,450 | 3,293 | 17.7 |
| Assistants and professionals | 789 | 1,505 | 13.0 | 1,177 | 1,678 | 10.6 |
| Operators | 687 | 9,181 | 55.8 | 953 | 15,064 | 59.7 |
| Interns | 67 | 104 | 1.0 | 247 | 387 | 2.4 |
| **Total** | **2,950** | **14,717** | **100** | **4,321** | **22,502** | **100** |

# 3.- Information on the foreseeable evolution of the Group

To estimate the outlook for the Group, it is important to take into account the current temporary situation of the Company and the initiated refinancing process based on the Viability Plan that defined the structure of the future activity of Abengoa on an operating basis focusing on the Activity of Engineering and Construction either developing its own technology or using technology developed by others.

Such refinancing plan initiated by the Company with its creditors consists on the restructuration of the debt to provide the optimal capital structure and the sufficient liquidity to continue operating competitively and sustainably in the future.

The approval of the restructuring plan will lead the evolution of the Group in the future.

# 4.- Financial risk management

Abengoa's activities are undertaken through its operating segments and are exposed to various financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

Due to the facts and circumstances occurred during the second half of the year 2015, Abengoa had at the end of November 2015 substantial liquidity needs mainly to attend capital expenditure in assets, short and medium term debt maturities related to operations and negative working capital.

On November 25, 2015, due to the circumstances explained above, the Company decided to initiate a refinancing process to try to reach an agreement with its main financial creditors that would ensure a suitable framework in which to undertake the said negotiations and the financial stability of the Group in the short and medium term.

In relation to the refinancing process, after carefully evaluating the situation described above and in order to ensure the stability necessary to conduct these negotiations with the creditors, the Board of Directors of the Company deemed that the most appropriate approach was to submit the communication provided under Article 5 bis of Ley Concursal. In this regard, on December 15, 2015, Commercial Court No. 2 of Seville issued a Decree agreeing that the communication provided for under Article 5 bis of Ley Concursal had been filed.

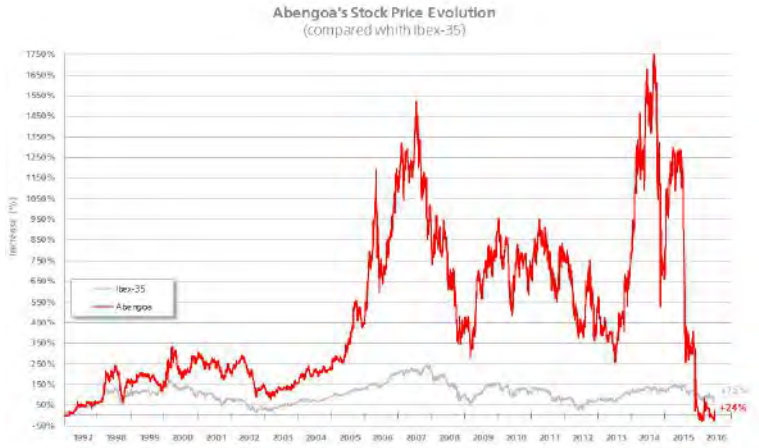
Afterwards, on August 11, 2016, it has been subscribed a Term Sheet of the restructuring agreement between Abengoa, S.A. and a group of entities comprised of main financial creditors and potential investors. Moreover, acceptance confirmations have been received to the comfort letter to finance the new money provided in the restructuring agreement in excess to the previous requirements in the Updated Viability Plan. The agreement is subject to certain documentation and a number of usual conditions in this kind of transactions.

Abengoa´s Directors are confident on reaching a final agreement with creditors and, once signed, the achievement of the Viability Plan associated by means of the Group´s ability to generate cash from operations which will allow the financial restitution of Abengoa, S.A., and to provide to Abengoa the optimal capital structure and the liquidity enough to continue its activity and operate in a competitive and sustainable manner in the future.

# 5.- Information on research and development activities

R&D investments during the second quarter of the year 2016 has been €8 million, lower than the amount invested at June 30, 2015 (€66 million) mainly due because the current situation of the Company.

# 6.- Stock exchange evolution



According to data provided by Bolsas y Mercados Españoles (BME), in the first six months of 2016 a total of 114,225,119 Class A shares and 2,805,624,622 Class B shares in the Company were traded, equivalent to an average daily trading volume of 899,410 Class A shares and 22,091,532 Class B shares. The average daily traded cash volume was €0.6 million for Class A shares and €5.2 million for Class B shares.

| | A-Shares | | B-Shares | |
|---|---|---|---|---|
| **Share Evolution** | **Total** | **Daily** | **Total** | **Daily** |
| Volume (thousands of shares) | 114,225 | 899 | 2,805,625 | 22,092 |
| Volume (M€) | 70.7 | 0.6 | 654.6 | 5.2 |

| **Quotes** | **A-Shares** | **Data** | **B-Shares** | **Data** |
|---|---|---|---|---|
| Last | 0.5630 | 30-jun | 0.2440 | 30-jun |
| Maximum | 1.0000 | 29-mar | 0.4250 | 9-mar |
| Average | 0.6184 | | 0.2331 | |
| Minimum | 0.3380 | 19-jan | 0.1300 | 11-feb |

The last price of Abengoa's shares in the first six months of 2016 was 0.56 euros for Class A shares, 37% higher than at the end of 2015; and 0.24 euros per Class B share, 25% higher than the close of 2015.

Since its IPO in the Spanish stock exchange in November 29, 1996, the value of the Company has risen by 24%. The selective IBEX-35 index has risen by 75% during the same period.

# 7.- Information on the purchase of treasury shares

On November 19, 2007, the Company entered into a liquidity agreement on class A shares with Santander Investment Bolsa, S.V. Replacing this liquidity agreement, on January 8, 2013, the Company entered into a liquidity agreement on class A shares with Santander Investment Bolsa, S.V. in compliance with the conditions set forth in CNMV Circular 3/2007 of December 19. On November 8, 2012, the company entered into a liquidity agreement on class B shares with Santander Investment Bolsa, S.V. in compliance with the conditions set forth in CNMV Circular 3/2007 of December 19. With effects as of April 21, 2015 the agreement related to B class shares has been terminated. With effects as of September 28, 2015, transactions under the liquidity agreement entered into on January 10, 2013 with Santander Investment Bolsa, Sociedad de Valores, S.A. with respect to the Class A shares of the company has been temporarily suspended.

As of June 30, 2016 treasury stock amounted to 5,662,480 shares, all of them class A shares.

Regarding the operations carried out during the period, treasury stock purchased amounted to 0 class A shares and 0 class B shares and treasury stock transferred amounted to 0 class A shares and 0 class B shares.

# 8.- Dividends

Abengoa's Board of Directors held on September 23, 2015 approved the suspension of our dividend until Abengoa achieve a credit rating of "BB-" from Standard & Poors or "Ba3" from Moody's or our leverage ratio of Gross Corporate Debt (including bridge loan), as of the most recent balance sheet date which is approved, to Corporate EBITDA for the twelve months immediately preceding such balance sheet date, falls below 3.5x. As long as Abengoa do not reach the aforementioned credit rating or leverage ratio, Abengoa will not distribute dividends to their shareholders.

# 10.- Alternative performance measures

Abengoa presents the income statement in accordance to the International Financial Reporting Standards (IFRS), however, uses some alternative performance measures (APMs) to provide additional information to assist the comparison and comprehension of the financial information, facilitate decision-making and the assessment of group´s performance.

The most significant APM are the following:

- EBITDA: Operating profit + depreciation, amortization and impairment charges.
- Operating margin: EBITDA / revenue.
- Net corporate debt; Corporate financing – cash and cash equivalents (excluding project companies) – current financial investments (excluding project companies).
- Net cash provided by operating activities; variations in cash arisen as the difference between collections and payments caused by trade transactions in the Group during the period.
- Net cash used in investing activities; variations in cash arisen as the difference between collections and payments caused by divestment and investment transactions in the Group during the period.
- Net cash provided by financing activities; variations in cash arisen as the difference between collections and payments caused by financing transactions in the Group during the period.
- Earnings per share (EPS); Profit for the year attributable to the parent company / number of ordinary shares outstanding.
- Market capitalization; number of shares at the end of the period x quote at the end of the period.

› Backlog: Value of construction contracts awarded and pending to execute.

# 11.- Subsequent events

› As of September 18, 2016, and in the framework of the Updated Viability Plan and Financial Restructuring Terms announced on 16 August 2016, Abengoa Concessions Investments Limited ("ACI"), a subsidiary of the Company, entered into a secured term facility agreement (the "Facility Agreement") among, inter alia, the lenders as described below (the "Lenders") and the agent appointed thereunder (the "Agent"), pursuant to which it is entitled to borrow US$211,000,000 (the "Loan Amount") and is required to enter into related security documents (collectively, the "Loan Documents").

As of the date of the Facility Agreement, the Lenders are Arvo Investment Holdings S.À R.L., CCP Credit Acquisition Holdings Lxco S.À R.L, Lajedoa Investments S.À R.L., OCM Luxembourg ABG Debt S.À R.L., Potter Netherlands Coöperatief U.A., y SPV Capital Funding Luxembourg S.À R.L.

The amounts borrowed under the Facility Agreement will be used to refinance all amounts owing under a secured term facility agreement between ACI and Talos Capital Designated Activity Company (formerly Talos Capital Limited) dated 22 October 2015 for a nominal amount of US$130,000,000 (the "Talos Loan") and for the general corporate and working capital purposes of the Company and its subsidiaries (the "Group").

Upon the occurrence of certain events that are customary for this type of loan, the Lenders may exercise their right to require ACI to repay all or part of the Loan Amount, post additional collateral or foreclose on, and dispose of, the Pledged Shares (as described below under "Security") in accordance with the Loan Documents.

Maturity

The loan will mature (a) on 18 September 2017 (provided that, prior to 29 March 2017, the maturity date for the existing September Facility, December Facility and March Facility are extended to at least the same date) or (b), absent such extensions, on 29 March 2017.

Interest

The loan under the Facility Agreement will bear interest at a rate per annum equal to the aggregate of LIBOR plus 12.5% (on a payment in kind basis). Default interest will be payable at a rate of 5% above the interest rate.

Material Fees

An arrangement and participation fee are, and in certain circumstances, a make-whole amount may become, payable under the Facility Agreement.

Guarantees

The Company and the following subsidiaries (the "Subsidiaries") will each provide a guarantee of all amounts payable to the finance parties under the Facility Agreement (in respect of the Company, on and from the date of the Facility Agreement, and in respect of the Subsidiaries, no later than 45 days after the date of the Facility Agreement): Abeinsa Asset Management, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abeinsa Inversiones Latam, Abeinsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abengoa Water, S.L., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea De Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestion De Contratos de Construcción E Ingeniería, S.A., Abengoa Bioenergy Trading Europe B.V., Abeima Teyma Zapotillo S. De R.L. de C.V., Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V., Nicsamex, S.A. de C.V., Teyma Internacional, S.A., Teyma Uruguay Zf, S.A..

Security

Under the terms of the Loan Documents, ACI will pledge and grant a security interest in 16,000,000 ordinary shares of Atlantica Yield plc (formerly Abengoa Yield plc) held by it (14,000,000 of which were previously secured in relation to the Talos Loan) (the "Pledged Shares"), in favour of the Lenders as security for the Loan Amount and its obligations under the Loan Documents.

Financial covenants

The Facility Agreement requires ACI to maintain a loan to value ratio of not more than 80%.

Governing law and enforcement

The Facility Agreement is governed by English law and the courts of England have exclusive jurisdiction to settle any dispute arising out of or in connection therewith.

› On the other hand, on September 24, 2016 the Restructuring Agreement has been signed, and granted by public deed before the Notary public of Madrid, Mr. José Miguel García Lombardía, between the Parent Company, a group of Subsidiaries which debt is subject to the restructuring and a group of financial creditors which either are holders of existing debt instruments or will also be participating in the new money and new bonding facilities.

From the abovementioned date onwards, the Company announced the beginning of the accession period for the rest of financial creditors to adhere to the Restructuring Agreement. Once this period finalizes and after obtaining the support of creditors representing at least 75% of financial liabilities as required by Spanish Bankruptcy Law, Abengoa will apply for the judicial approval (homologación judicial) of the Restructuring Agreement so that the Standard Restructuring Terms (consisting on a 97% of the nominal value debt extinguishment and the remaining 3% due in 10 years from the restructuring date, accruing no interest and not able to be capitalized) will also be extended to those unsecured creditors of the Parent Company or its affected Subsidiaries who decided not to adhere to the Restructuring Agreement or that, having done so, did not specifically choose the Alternative Restructuring Terms that, in summary, consist of:

- Capitalization of 70% of preexisting debt in exchange for 40% of Abengoa's new share capital post restructuring.

- The remaining 30% of the nominal value of the preexisting debt will be refinanced through new debt instruments, replacing the preexisting ones, which will rank as senior or junior depending on whether or not such creditor participates in the new money facilities or new bonding facilities. Such instruments will have maturities of 66 and 72 months respectively, with the possibility of an extension of up to 24 months, accruing annual interest of 1.50% (0.25% cash payment and 1.25% Pay If You Can). The junior instrument could be subject to additional reductions (provided that total reduction does not exceed 80% of the nominal value prior to the capitalization) if the aggregate amount of refinanced preexisting debt (after the aforementioned capitalization) exceeds €2,700 million due to the crystallization of contingencies.

Once the homologation request has been filed, the following procedures in the United States and the United Kingdom will be initiated:

- A Company Voluntary Arrangement ("CVA") in England and Wales at the request of Abengoa Concessions Investments Limited in accordance with Part I of the English Insolvency Act 1986; and

- Various procedures under Chapter 11 ("Chapter 11") of the U.S. Bankruptcy Code at the request of various subsidiaries incorporated in the United States.

Both the CVA and the Chapter 11 procedures have the objective of extending the Standard Restructuring Terms described previously to the liabilities of the companies promoting the procedures for those creditors that have not acceded to the Restructuring Agreement.

› On the date of formulating the present consolidated condensed interim financial statements at June 30, 2016, and in accordance to the International Financial Reporting Standards (IFRS), the Company has recognized in the income statement those impairments related to judicial proceedings and the approved discontinued operations. Directors consider that the signature of the Restructuring Agreement will lead to the application of measures determined in the Updated Viability Plan, among them the abandonment of new activities and the liquidation or sale of assets which could trigger new losses. In accordance with the IFRS, these losses will be registered during the second semester of 2016. Likewise, and in compliance of accounting standards, the positive impact derived from the debt write-offs and capital increases contained in the restructuring plan, will be recognized during the second semester of 2016, which will allow to offset all accumulated negative results and to restore the financial stability at December 31, 2016.

Since June 30, 2016, no other events have occurred that might significantly influence the financial information detailed in this report, nor has there been any event of significance to the Group as a whole.

**EXHIBIT I-2**

**Abengoa, S.A. Management's Discussion and Analysis of Financial Condition and Results of Operations**

**ABENGOA, S.A.**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*You should read the following discussion and analysis of financial condition and results of operations in conjunction with the financial statements and related notes of Abengoa, S.A. as for and for the years ended December 31, 2015, 2014 and 2013 and as of June 30, 2016 and for the six months then ended set forth at Exhibit I-1 to the Disclosure Statement, with the Master Restructuring Agreement attached as Exhibit H to the Disclosure Statement and the Updated Viability Plan and Financial Restructuring Terms presented publicly by Abengoa, S.A. on August 16, 2016.*

**Overview**

We are a leading engineering and clean technology company with operations in more than 50 countries worldwide that provides innovative solutions for a diverse range of customers in the energy and environmental sectors. Over the course of our 70-year history, we have developed a unique and integrated business model that applies our accumulated engineering expertise to promoting sustainable development solutions, including delivering new methods for generating solar power, developing biofuels, producing potable water from seawater and efficiently transporting electricity. A cornerstone of our business model has been investment in proprietary technologies, particularly in areas with relatively high barriers to entry. Our Engineering and Construction activity provides sophisticated turnkey EPC services from design to implementation for infrastructure projects within the energy and environmental sectors and engages in other related activities with a high technology component. Our Concession-Type Infrastructure activity operates, manages and maintains infrastructure assets, usually pursuant to long-term concession agreements under BOOT schemes, within four operating segments (Solar, Water, Transmission, and Co-generation and other). Finally, our Industrial Production activity produces a variety of biofuels (ethanol and biodiesel).

In order to focus our attention on our key markets, we organized our business into three activities: Engineering and Construction, Concession-Type Infrastructure and Industrial Production. Each activity is further broken into the following reporting segments: Engineering and Construction within the Engineering and Construction activity; Solar, Water, Transmission, and Co-generation and other segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity.

Our three activities are focused in the energy and environmental industries, and integrate operations throughout the value chain, including R&D, project development, engineering and construction, and the operation and maintenance of our own assets and those of third parties. Our activities are organized to capitalize on our global presence and scale, as well as to leverage our engineering and technological expertise in order to strengthen our leadership positions.

Our revenue, Consolidated EBITDA and net fixed assets of the Group and by segment information as of and for the six month periods ended June 30, 2016 and 2015 and as of and for the years ended December 31, 2015 and 2014 are set forth in the following tables.

**Factors Affecting the Comparability of Our Results of Operations**

***Divestments and Business Combinations***

As discussed in Notes 6.1, 6.2, 6.3 and 7 to our Consolidated Financial Statements, certain divestments and business combinations impacted our scope of consolidation and, therefore, our results of operations, including principally the following transactions. *Certain Business Combinations*

Consolidation of Kaxu Solar One, Ltd., the company that owns the thermo-solar plant in Kaxu, in South Africa, previously accounted through the equity method, began during February 2015, once control over this company was obtained as it entered a stage in which relevant decisions were no longer subject to the control and approval of the Public Administration. This change of control of the company and its consolidation means that its assets and liabilities have been integrated according to IFRS 3 ('Business combinations') with no significant differences arising between the book value in Abengoa's consolidation and its fair value.

The sale of Kaxu Solar One to Atlantica Yield was closed on July 30, 2015, in compliance with the Right of First Offer agreement signed between Abengoa and Atlantica Yield.

At the end of the year ended December 31, 2015, as Kaxu Solar One, Ltd became an Atlantica Yield´s subsidiary and has been integrated by the equity method within the Consolidated statements of financial position.

Consolidation of project companies Helioenergy 1 and 2 (thermo-solar assets with a capacity of 100MW in

Spain), previously accounted through the equity method, began on April 29, 2015, once control over these companies was obtained as result of the acquisition of the 50% stake hold from external partners, bringing the holding in Helioenergy 1 and 2 to 100%.This acquisition brought Abengoa a cash outflow of €38.8 million. This change of control of the companies and consequently their consolidation means that their assets and liabilities have been integrated according to IFRS 3 ('Business combinations') with no significant differences arising between the book value in Abengoa's consolidation and their fair value.

In addition, during 2015 the sale of Helioenergy 1 & 2 to Atlantica Yield has been closed, in compliance with the Right of First Offer agreement signed between Abengoa and Atlantica Yield.

Therefore, at the end of year 2015, as Helioenergy 1 & 2 became an Atlantica Yield's subsidiaries and have been integrated by equity method within the Consolidated statements of financial position.

Full consolidation of Abengoa Bioenergy Biomass of Kansas, LLC, the company that owns the assets and liabilities of the second-generation biofuels plant in Hugoton, USA, previously accounted for via the equity method, began in December 2014 once control over this company was obtained. Consequently, all of its assets and liabilities have been consolidated according to IFRS 3, Business Combinations, with no significant differences in the carrying value in Abengoa's Consolidated Annual Financial Statements and its fair value. At June 30, 2016, the Consolidated Financial Statement include this company's assets and liabilities under a single heading in assets held for sale and liabilities held for sale within the consolidated statements of financial position, in accordance with IFRS 5," Non Current Assets Held for Sale and Discontinued Operations", after the beginning of the sale process initiated within the Chapter 11 proceedings.

Full consolidation of Mojave Solar, LLC, the company that owns the assets and liabilities of the thermo-solar plant in Mojave, USA, previously accounted for via the equity method, began in December 2014 once control over this company was obtained. Consequently, all of its assets and liabilities have been integrated according to IFRS 3, Business Combinations, with no significant differences in the carrying value in Abengoa's Consolidated Annual Financial Statements and its fair value. At the end of 2014 and as of September 30, 2015, this company is included in the Atlantica Yield consolidation Group and classified as discontinued operations in accordance with IFRS 5, Non Current Assets Held for Sale and Discontinued Operations. Therefore, the Consolidated Financial Statements include this company's assets and liabilities under a single heading in assets held for sale and liabilities held for sale within the consolidated statements of financial position.

Full consolidation of Arizona Solar One, LLC, the company that owns the assets and liabilities of the thermo-solar plant in Arizona, USA, previously accounted for via the equity method, began in October 2013 once control over this company was obtained. Consequently, all of its assets and liabilities have been consolidated according to IFRS 3, Business Combinations, with no significant differences in the carrying value in Abengoa's Consolidated Annual Financial Statements and its fair value. At the end of 2014 and as of September 30, 2015, this company is included in the Atlantica Yield consolidation Group and classified as discontinued operations in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. Therefore, the Consolidated Financial Statements include this company's assets and liabilities under a single heading in assets held for sale and liabilities held for sale within the consolidated statements of financial position.

*Lossof control of the Rioglass Group*

During December 2015, and as a consequence of the agreement reached with the holder non-controlling shareholder of Rioglass Solar, control over the company was transferred. Accordingly, as established by NIIF 10, Consolidated Financial Statements, the loss of control over the company and its subsidiaries led to the recognition from the financial statements of all the assets and liabilities related to those companies at their book values at the date when control was lost as well as all non-controlling interest on those companies. Additionally, the investment retained was recognized at its fair value at the date when control was lost. This operation had no significant impact in the Consolidated financial statement at the end of 2015.

*Sale of Linha Verde*

In 2014, we signed a share purchase agreement with Centrais Elétricas do Norte do Brasil S.A. (Eletronorte) to sell our 51% stake in Linha Verde Transmissora de Energía S.A. ("**Linha Verde**"), a company with a concession for an electric transmission line in Brazil which was pre-operational. The sale was subject to customary closing conditions for a sale of these types of assets. Accordingly, as of December 31, 2014, the

assets were classified as held for sale in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. In May 2015, the sale was completed for total consideration of 45.8 million Brazilian real (approximately €13 million).

*Sale of Qingdao*

In 2013, Abengoa began negotiations to sell its 92.6% interest in Qingdao. As of December 31, 2013, the subsidiary was available for immediate sale, and the sale was considered to be highly probable. Accordingly, as of December 31, 2013, Abengoa classified the assets of Qingdao as held for sale in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. The sale closed in the last quarter of 2014 for total consideration of €49.7 million and generated after-tax profit of €5.1 million.

*Sale of Bargoa*

In May 2013, we closed the sale of Bargoa, S.A., a Brazilian subsidiary which manufactured telecommunication components, to Corning Incorporated for $80 million, which resulted in $50 million of cash proceeds.

*Sale of Befesa*

On June 13, 2013, Abengoa entered into a share purchase agreement for the sale of 100% of its shares in its subsidiary Befesa (the "**Befesa Sale**") to funds advised by Triton Partners (the "**Triton Funds**"). After customary net debt adjustments and subject to certain adjustments, total consideration to Abengoa amounted to €620 million which was comprised of €348 million total cash, of which a payment of €331 million was received at closing and deferred compensation of €17 million (including €15 million in escrow pending resolution of ongoing litigation and a €2 million long-term receivable from a Befesa customer), a €48 million subordinated vendor note with a five-year maturity and a €225 million (par value) subordinated convertible instrument with a 15 year maturity (subject to two five-year extensions) accruing interest of six month EURIBOR in effect at closing date plus a 6% spread and which, upon the occurrence of certain triggering events including, but not limited to, Befesa's failure to meet certain financial targets or the exit of the Triton Funds from Befesa, may be converted into approximately 14% of the shares of Befesa (subject to certain adjustments). The share purchase agreement contained a two-year non-compete provision concerning Befesa's activities. On February 4, 2015, Abengoa sold the €48 million subordinated vendor note to Triton Partners (see Note 7.3 to the Abengoa Consolidated Annual Financial Statements).

On July 15, 2013, Abengoa received €331 million of cash proceeds corresponding to the price agreed for the shares and the sale of the transaction was closed. The gain on the sale amounted to €0.4 million and is included in "Results for the year from discontinued operations, net of taxes" in the Abengoa consolidated income statement for the year.

Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale were included under a single heading (profit for the year from discontinued operations, net of tax) in the Abengoa Consolidated Annual Financial Statements. Similarly, the consolidated income statements for the years ended December 31, 2013 and 2012 also include the results of Befesa under such heading. The Befesa Sale also resulted in the removal of the Industrial Recycling segment from Abengoa's Industrial Production activity.

***Change in Geographic Segmentation***

During 2013 and 2012, we reported results from Mexico as part of South America (excluding Brazil) (formerly Latin America (excluding Brazil)). In order to better reflect the geographical segmentation of our business, starting in the interim financial report for the nine months ended September 30, 2014, we included results from Mexico in the North America segment (formerly the United States segment). The information by geographic areas for the years ended December 31, 2013 and 2012 has been presented according to the new geographic segmentation.

***Simplification of Engineering and Construction Activity***

Prior to 2014, our Engineering and Construction activity was comprised of two operating segments: Engineering and Construction, and Technology and Other. Beginning in 2014, we began including the Technology and Other segment within the Engineering and Construction segment in accordance with IFRS 8, Operating Segments. As a result, our Engineering and Construction activity is now comprised of a single operating segment, Engineering and Construction, and the information by activities for the years ended December 31, 2013 and 2012 has been presented according to the new segmentation.

***Commencement of Operations of Projects***

The comparability of Abengoa's results of operations is significantly influenced by the volume of projects that become operational during a particular year. The number of projects becoming operational and the length of projects under construction significantly impact Abengoa's revenue and operating profit, as well as its consolidated profit after tax during a particular period, which makes the comparison of periods difficult.

**Factors Affecting Our Results of Operations**

***Commodity Prices***

Our Industrial Production activity is particularly sensitive to commodity price changes. The Biofuels segment of our Industrial Production activity is affected by the availability of supply of grains such as wheat, barley, corn and sorghum as well as sugar. We acquire grain and sugar as raw materials to produce ethanol and distillers, grains and solubles ("**DGS**"). Consequently, any increase in the cost of such grains increases our cost of ethanol production. Our Biofuels segment is exposed to, among other factors, fluctuations in the cost of grain caused by meteorological conditions, such as droughts or excessive rainfall. Furthermore, the output price of ethanol is exposed to regional changes in price. Ethanol prices fluctuate in response to domestic and international prices, competition, governmental policies and regulations, meteorological conditions, market demand for gasoline and market demand for ethanol as an alternative or additive to gasoline. To mitigate these effects, when acquiring raw materials for the production of ethanol, we engage in commodity hedging transactions so as to ensure that there is a sufficient margin between the costs of our raw materials and the price of ethanol sold, which is known in the industry as a "crush margin." Furthermore, in Brazil, we also grow our own sugarcane, which partially insulates us against any extreme price fluctuations in Brazil and allows our ethanol production plants to remain properly supplied.

In addition, our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity require significant consumption of energy, predominantly electricity and natural gas, and we are, therefore, exposed to fluctuations in their price. Although our energy consumption costs account for a relatively small portion of our total operating expenses, the price of energy is volatile and shortages can occur leading to unexpected price increases. To mitigate this risk, some of our energy and gas contracts include mechanisms to limit price increases such as caps, indexing any cost increase to an increase in output price or permitting a pass-through of the cost increase to the customer. Significant increases in energy or oil costs or shortages in supply can have an adverse effect on our business. However, we also benefit from increases in energy prices through our Biofuels segment and our Engineering and Construction activity when plants are not subject to the fixed tariff regime. As the Solar segment of our Concession-Type Infrastructure activity generates revenue from the sale of electricity produced, increases in energy prices may increase our revenue generated by our solar power plants and, in the Biofuels segment of our Industrial Production activity, our biofuel process plants in Europe and Brazil contain co-generation units that produce excess electricity which is sold to public utilities such as Eletrobrás in Brazil.

To mitigate certain risks of variation in market prices of commodities, we seek to hedge our exposure through the use of forward sale and purchase contracts and options listed on organized markets, as well as over-the-counter contracts with financial entities. Nevertheless, our actions may not be successful and such arrangements expose us to the credit risk of our counterparties.

***Regulation***

We operate in a significant number of regulated markets and our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity are, in particular, subject to extensive regulation by governmental agencies in a number of the countries in which they operate. The degree of regulation that each one of our operating segments is subject to varies according to country. In a number of the countries in which we operate, regulation is carried out by national regulatory authorities. In some

countries, such as the United States, Brazil and, to a certain degree, Spain, there are various additional layers of regulation at the state, regional and/or local level. In countries such as these, the degree of state, regional and/or local regulation may also be materially different for operating segments within the particular country, if the operating segments are located in different states and/or localities.

*Renewable Energies*

Demand for a number of our products and services from our operations including our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity, depends significantly on government legislation, regulation, incentives and subsidies aimed at promoting greater use of renewable energies and sustainable products and services. This governmental action has been driven by political change largely precipitated from public perception of climate change and desired action from government, particularly in the United States and Europe.

In our Solar segment, various key jurisdictions, including the United States and Europe, have introduced or bolstered regulation concerning the use of solar and other renewable energies. The United States unveiled legislative changes, and the European Union passed the new Renewable Energies Directive ("**RED**") and the Fuel Quality Directive ("**FQD**") in April 2009, both of which, among other things, impose renewable energy targets for 2020. The RED covers energy consumption as a whole, including for heating and cooling, and lays down legally binding rather than indicative national targets such that the EU, as a whole, achieves a 20% share of renewable energy by 2020. The FQD establishes a 10% renewable energy in transport target by 2020. In our Biofuels segment, we have benefited from regulation which has facilitated the development of new technologies and enabled biofuel producers to operate profitably.

With respect to Spain, Abengoa does not currently hold the ownership of any solar facility in Spain. Abengoa's solar business in Spain is currently limited to O&M services.

*Research, Development and Innovation*

Under Spanish law, our expenditures associated with technological innovation activities are entitled, among other things, to a deduction in corporate tax between 8% and 42%, according to the technological level of the project, for the fiscal year in which they were incurred, provided that such expenditures were incurred in accordance with cost accounting and were specifically undertaken in connection with identified projects. These deductions may be applied in assessments of tax periods that end in the 18 years subsequent to the tax period in which they were generated, provided that the other requirements of the corporate income tax regulations are complied with. The amount of deferred tax assets corresponding to R&D tax deductions amounted to €67 million as of June 30, 2016. At the discretion of the tax payer, under certain circumstances, upon a 20% reduction of the R&D tax deduction, this deduction will not be subject to the ordinary limitations in the application of tax deductions and in case of lack of tax quota of the period in which to apply this tax deduction, it will be refundable in cash. The maximum R&D tax deduction either applicable or refundable is €3 million per year and €1 million for technological innovation. In addition to these deductions, which can be generated during the period of creation of an intangible asset, Spanish law allows the application of another tax incentive during the period of utilization of certain intangible assets. Pursuant to Article 23 of the Spanish Corporate Income Tax Act, we may apply for tax incentives for the transfer or license of use of intangible assets. Such incentives consist of a 60% reduction on the profit generated by the transfer or license of use of such intangible assets. This incentive is expected to be recurring over the coming years. As it is not a deduction to be applied to the income tax payable, it is not carried forward and does not generate a deferred tax asset as is the case with R&D tax deductions.

*Environmental*

Our business is subject to significant environmental regulation, which, among other things, requires us to perform environmental impact studies on future projects, obtain regulatory licenses, permits and other approvals and to comply with the requirements of such licenses, permits and approvals. Over recent years, environmental regulation has increased and changed rapidly and has caused a corresponding increase in our cost of compliance and has impacted our financial condition. Furthermore, if we fail to be in compliance, we may become subject to significant liability, including fines, penalties, damages, fees and expenses and closures.

*Spanish Data Protection Regulations*

Spanish data protection regulations are very stringent as regards information, consent, security measures and other data protection duties, the breach of which may result in significant administrative fines. As part of our operations, we export personal data to different countries, some of which do not offer an adequate level of personal data protection. If those exports of personal data are not performed in accordance with Spanish data protection regulations, the Spanish Data Protection Authority may impose significant sanctions or may even suspend the transfer. Moreover, a recent ruling of the European Court of Justice has declared invalid certain safe harbor provisions (Case C-362/14 –"Schrems"-), under which European companies were allowed to export personal data to the United States without the need to fulfill additional, specific requirements. Consequently, all personal data exports under those safe harbor provisions are no longer valid and, if no alternative legal grounds are found for such international transfers (e.g. consents of individuals or authorization of the Spanish Data Protection Authority), sanctions could be imposed for any exports of personal data to the United States performed under them.

*Spanish Export Tax Credit*

Through our increasing international presence and a corresponding increase in our overseas investments and exports, we have claimed tax benefits provided under Export Tax Credit (Deducción por actividades de exportación, "**DAEX**") of Legislative Royal Decree 4/2004 of March 5 in connection with our overseas investments and exports of goods and services from Spain. Export tax credits provided in connection with overseas investments was calculated as a percentage of investments through the acquisition of interest in foreign companies or the incorporation of subsidiaries established abroad. This percentage, which was initially set at 25%, was progressively reduced since 2007 to reach 3% in 2010 and was finally abolished in 2011.The amount of deferred tax assets recognized for this credit from the years 2007 to 2010 totaled €210 million as of June 30, 2016.

*Spanish Tax System*

The general tax rate in Spain of Corporate Income Tax is 25% in 2016.

***Backlog and Concessions***

We believe that our backlog is a significant indicator of the growth of our Engineering and Construction segment and provides useful trend information and revenue visibility based on our activities over the previous two-years. Backlog serves to measure the total euro value of work to be performed on contracts awarded, in progress and customer subscriptions, but does not include estimated revenue streams from the operating phase of any of our concession based projects, which are reported in a different operating segment. Backlog consists principally of projects, operations and services for which we have signed contracts and in respect of which we have received non-binding commitments from customers or other operations within our Group, where the related revenues are not eliminated upon consolidation. Commitments may be in the form of written contracts for specific projects, purchase orders, or indications of the amount of time and materials we need to make available for customers' anticipated projects. The volume and timing of executing the work in our backlog is important to us in anticipating our operational and financing needs and our ability to execute our backlog is dependent on our ability to meet such operational and financing needs. Our work to be performed in our backlog is typically completed within 12 to 24 months. As of June 30, 2016, December 31, 2015, 2014 and 2013, our backlog (excluding intra group sales) was approximately €4,675 million, €7,547 million €7,953 million and €6,796 million, respectively. As of June 30, 2016, out of the total backlog of €4,675 million, approximately 31% corresponds to projects valued below €100 million, approximately 47% to contracts valued between €100 and €500 million and approximately 22% to contracts valued over €500 million.

Since the beginning of 2016 our backlog has been reduced due to the cancelation and disposal of certain projects as we underwent the financial Restructuring Process. Historically, our backlog has fluctuated on a quarter to quarter basis due to the signing of new contracts, more of which have tended to be executed as the year progresses as customers make purchases under their capital budgets, as well as the pace of execution of existing contracts. As a result of the changes in our backlog, whether due to the signing of new contracts and commitments or the sale, or cancellation of existing contracts, the pace of execution of our contracts or otherwise, our results of operations for certain of the financial periods discussed in this Disclosure Statement may not be directly comparable with our results of operations for other financial periods discussed herein or future financial periods.

As of June 30, 2016, the average remaining duration of contracted assets in our concession contract portfolio was over 21 years. We believe that the average life of our concessions and concession-type agreements is a significant indicator of our forecasted revenue streams and the growth of our business. Concessions consist of long-term projects awarded to, and undertaken by us (in conjunction with other companies or on an exclusive basis) typically over a term of 20 to 30 years. Such projects typically include the construction phase, as well as future provisions associated with the operation and maintenance services provided during the concession period. The revenue that we generate from our concession projects is dependent on regulated tariffs. Under most of our concession agreements, there is an established tariff structure or fixed price that provides us with limited or no possibility to adjust our tariffs as a result of fluctuations in prices of raw materials, exchange rates, labor and subcontractor costs or any other variations in the conditions of specific jurisdictions in which our concessions are located.

***Capital Expenditures***

Our business has significant capital expenditure requirements, including construction as well as R&D&i costs. Our capital expenditure requirements include asset and concession construction costs of power transmission lines, solar power plants and co-generation power plants, as well as infrastructure for the production of ethanol and desalination plants. We finance these capital projects primarily through Project Debt issued by a project finance company, along with debt incurred at the corporate level. Consequently, a significant part of our business is capital intensive and our new assets under construction are highly leveraged. Over the last few years, the costs associated with our requirements have increased significantly, largely due to our increased business activity. See "*—Liquidity and Capital Resources—Capital Expenditures*". As a result, these increases have resulted in an increase of our Project Debt and related increased service costs, resulting in significantly reduced available cash flow from our project finance companies. As of June 30, 2016, our Gross Corporate Debt was €7,343 million and our total Project Debt was €2,622 million of which approximately €2,127 million were bridge loans.

In accordance with the viability plan presented on August 16, 2016 and its new corporate strategy, Abengoa has decided to minimize cash contribution into existing projects, taking the decision to sell or hibernate the most cash-consuming projects. Abengoa also intends not to contribute cash in new concessional projects (Integrated Product) until the first quarter for 2018. From 2018 through 2020, Abengoa plans to limit its equity investment in future projects at a total of €535 million approximately. This limit includes the assumption of limiting the equity participation to 33% of the total equity needs of the individual projects, and a total leverage of 70%. The €535 million are expected to be allocated in the following manner: €146 million in 2018, €189 million in 2019, and an additional €200 million in 2020. See "*–Liquidity and Capital Resources*").

***Interest Rates***

We incur significant indebtedness during the course of our operations. The interest rate risk arises mainly from indebtedness with variable interest rates. To mitigate the interest rate risk, we primarily use interest rate swaps and interest rate options which, in exchange for a fee, offer protection against a rise in interest rates. Our results of operations can be affected by changes in interest rates with respect to the unhedged portion of our indebtedness that bears interest at floating rates, which typically bears a spread over EURIBOR, LIBOR and *Taxa de Juros de Longo Prazo* ("**TJLP**"), for our Brazilian operations.

In the event that EURIBOR had risen by 25 basis points as of December 31, 2015, with the rest of the variables remaining constant, the effect in the consolidated income statement for the year ended December 31, 2015 would have been a a profit of €7,316 thousand (€9,182 thousand in 2014) mainly due to the increase in time value of hedge interest rate options (caps and collars) and an increase of €28,379 (€35,591 thousand in 2014) in other reserves mainly due to the increase in value of hedging interest derivatives (swaps, caps and collars).

A significant increase in interest rates could also reduce the profitability of our projects in the development stage for which we have not yet secured financing and make it more costly for us to submit bids for concessions or third-party construction contracts. In addition, while the financing costs of our subsidiaries tend to be high during the early years of a relevant concession or construction contract, during which the cash flows from the assets support a significant amount of debt in relation to relatively low revenue, we may have opportunities to refinance such debt as such concessions or construction contracts become more mature and their revenue, cash flow and debt coverage ratios improve.

***Exchange Rates***

Our functional currency is the euro, but our revenue and expenses are denominated in the local currency of the jurisdictions in which we operate. As we have globally expanded our business, a large and increasing percentage of our revenue is now derived from countries outside of the Eurozone.

As a result, fluctuations in the value of foreign currencies relative to the euro impact our operating results. In countries with currencies other than the euro, assets and liabilities are translated into euro using end of period exchange rates; revenue, expenses and cash flows are translated using average rates of exchange. The following tables illustrate the rates of exchange used.

| Period | U.S. Dollar per euro | Brazilian real per euro |
|---|---|---|
| Six months ended June 30, 2016 | 1.1106 | 3.5694 |
| Year ended December 31, 2015 | 1.0862 | 4.3006 |
| Year ended December 31, 2014 | 1.2153 | 3.2164 |
| Year ended December 31, 2013 | 1.3764 | 3.2453 |

We are exposed to foreign exchange rate fluctuations principally between the euro and our U.S. Dollar denominated debt. In order to mitigate these exchange risks, we enter into forward exchange contracts and currency options which hedge the fair value of our future cash flows.

In the event that the exchange rate of the U.S. Dollar had risen by 10% against the euro as of December 31, 2015, with the rest of the variables remaining constant, the effect in the consolidated income statement for the year ended December 31, 2015 would have been a loss of €27,185 thousand (loss of €1,103 thousand on 2014) mainly due to the US Dollar net asset position of the Group in companies with eurofunctional currency and a decrease of €1,649 thousand (increase of € 36,615 thousand in 2014) in other reserves as a result of the cash flow hedging effects on highly probable future transactions.

In addition, we are generally exposed to foreign currency exchange translation risk with respect to our subsidiaries whose reporting currency is other than the euro. The contribution of these subsidiaries to our Consolidated Financial Statements is significantly affected by the fluctuations in exchange rate between their reporting currency and the euro. Our primary foreign exchange translation risk results from our Brazilian and U.S. subsidiaries.

***Liquidity Requirements***

Our revenue model is driven to a significant extent by our Engineering and Construction activity's construction of new infrastructure assets used in the Concession-Type Infrastructure activity and the long-term recurrent cash flows generated by those assets. As a result, we require substantial liquidity to fund the costs of operating our business, debt service obligations under our existing and future debt, and capital expenditures for existing and new plants and operations, all of which are largely incurred prior to when we begin to received revenues from the operation of the related assets. If we are not able to meet our significant liquidity requirements, this will materially adversely affect our ability to generate revenues and grow our business. During the third quarter of 2015, as a result of the concerns regarding our liquidity position triggered by the lowering of our guidance for 2015 corporate free cash flow, some financial institutions have delayed renewing their "confirming without recourse" agreements with us, leading to significant cash outflows as we were required to pay suppliers sooner than we typically would under our normal 180-day payment terms and significantly adversely affecting our liquidity position.

**Key Performance Indicators**

In addition to the factors described above, we closely monitor the following key drivers of our businesses' operating performance to plan for our current needs, and to adjust our expectations, financial budgets and forecasts appropriately.

| | As of June 30, | As of December 31, | | |
|---|---|---|---|---|
| | 2016 | 2015 | 2014 | 2013 |
| | | (unaudited) (€ in millions) | | |
| **Key Performance Indicator** | | | | |
| Engineering and Construction Backlog | 4,607 | 8,786 | 7,953 | 6,796 |

| | | | | |
|---|---|---|---|---|
| Concession-Type Infrastructure | | | | |
| *Solar* | | | | |
| MW under development | — | — | — | 210 |
| MW under construction | 590 | 750 | 780 | 430 |
| MW in operation | 201 | 262 | 712 | 1,223 |
| Total MW | 791 | 1,012 | 1,492 | 1,863 |
| *Transmission* | | | | |
| Km of transmission under development | | 188 | 115 | — |
| Km of transmission under construction | 6,876 | 6,688 | 6,705 | 8,753 |
| Km of transmission in operation | 3,532 | 3,532 | 3,532 | 2,660 |
| Total Km | 10,408 | 10,408 | 10,352 | 11,413 |
| *Co-generation and other* | | | | |
| MW of co-generation and other under construction | 1,744 | 1814 | 890 | 0 |
| MW of co-generation and other in operation | 263 | 309 | 393 | 693 |
| Total MW | 2,007 | 2,123 | 1,283 | 693 |
| *Water* | | | | |
| Capacity of desalination in operation (m3/day) | 475,000 | 475,000 | 715,000 | 515,000 |
| Capacity of desalination Construction (m3/day) | 100,000 | 275,000 | 60,000 | 100,000 |
| Total m3/day | 575,000 | 750,000 | 775,000 | 615,000 |

***The Global Economy***

Our results of operations have been and continue to be affected by conditions in the global economy. Concerns over inflation, energy costs, geopolitical issues, sovereign debt and government austerity programs and the availability and cost of credit have contributed to increased volatility and diminished expectations for the economy going forward. These factors, combined with volatile oil prices, declining global business and consumer confidence and increased unemployment, have precipitated an economic slowdown which has been followed by inconsistent signs of growth. For example, in our Engineering and Construction activity, the global downturn resulted in a significant decline in investment and current projects under negotiation or in progress slowed down significantly. These declines were largely driven by reduced spending by governments, public administrations and utility companies and a resultant increase in competition for remaining projects.

Notwithstanding conditions in the global economy generally, some operations within our segments have experienced positive effects due to increased government spending in certain sectors as part of stimulus measures to combat weak economic conditions. For example, there has been recent increased public spending in infrastructure, renewable energies and the water desalination sectors which are all currently experiencing significantly increased growth in certain countries. In addition, a significant part of our business is regulated or benefits from long-term offtake contracts, which provide some protection from the global economic downturn.

***Engineering and Construction***

The revenue and profitability of our Engineering and Construction activity is determined by the demand for our services with respect to new infrastructure, mainly in the energy sector. We primarily monitor the amount of our backlog as a significant indicator of our forecasted revenue streams and the growth of that activity. The margins we are able to achieve with respect to the services we provide in our Engineering and Construction activity drive that activity's revenue and profitability.

***Concession-Type Infrastructure***

The revenue of our Concession-Type Infrastructure activity is determined by the amount of MW capacity under operation in our thermo-solar and co- generation plants, the number of kilometers available and operating in our power transmission lines and the volume (in cubic meters) of water treated in our desalination plants. We are currently making significant investments in the development of such assets and we are continuously looking for new opportunities in the area of public private concession agreements (examples include power transmission lines in Brazil and Peru and co- generation plants near the ACT facility (Mexico), that we expect will contribute to our Concession- Type Infrastructure activity's revenue in the future.

***Industrial Production***

The profitability of our Industrial Production activity is mainly affected by the volume (in ML) of bioethanol produced, crush margin, which is determined by the commodity input price (mainly for corn, sugarcane and

natural gas) and output prices (mainly prices for ethanol and sugar), and prices for the byproducts sold, such as electricity or DGS.

**Critical Accounting Policies and Estimates**

The preparation of our Consolidated Financial Statements in conformity with IFRS requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the specific circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

An understanding of the accounting policies for these items is important to understand the Consolidated Financial Statements. The following discussion provides more information regarding the estimates and assumptions used for these items in accordance with IFRS and should be considered in conjunction with our Consolidated Financial Statements.

The most critical accounting policies, which reflect significant management estimates and judgment to determine amounts in our Consolidated Financial Statements, are as follows:

- Impairment of intangible assets and goodwill.
- Revenue from construction contracts.
- Income taxes and recoverable amount of deferred tax assets.
- Derivative financial instruments.
- Concession agreements.

Some of these accounting policies require the application of significant judgment by management to select the appropriate assumptions to determine these estimates. These assumptions and estimates are based on our historical experience, advice from experienced consultants, forecasts and other circumstances and expectations as of the close of the financial period. The assessment is considered in relation to the global economic situation of the industries and regions where the Group operates, taking into account future development of our businesses. By their nature, these judgments are subject to an inherent degree of uncertainty; therefore, actual results could materially differ from the estimates and assumptions used. In such cases, the carrying values of assets and liabilities are adjusted.

Based in what has been exposed in Note 2.1 regarding the application of the going concern basis of accounting and during the accounting policies adaptation process, the best estimates and assumptions have been made by the Board of Directors in order to determine the impacts of that situation over the assets, liabilities, income and expenses.

Upon the occurrence of a significant change in the facts and circumstances upon which estimates and assumptions have been made, it may require management to amend such estimates and assumptions in future periods. Changes in accounting estimates are recognized prospectively, in accordance with IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors".

***Impairment of intangible assets and goodwill***

Goodwill and intangible assets which have not yet come into operation or that have an indefinite useful life are not amortized and are tested for impairment on an annual basis or whenever there is an impairment indicator. Goodwill is tested for impairment within the cash-generating unit to which it belongs. Other intangible assets are tested individually, unless they do not generate cash flows independently from other assets, in which case they are tested within the cash-generating unit to which they belong.

For those cash generating units with high potential growth, the Group uses cash flow projections for a period of 10 years based on the cash flows identified in the Group’s strategic plans, which are reviewed and approved

every six months by the management of the Group. The residual value is calculated based on the cash flows of the latest year projected using a steady or nil growth rate. The use of a 10-year period is based on the consideration that this is the minimum period that needs to be used in order to appropriately reflect all the potential growth of these cash generating units. In addition, 10-year projections are prepared based on the historical experience within the Group in preparing long-term strategic plans, which are considered reliable and are prepared on the basis of the Group's internal control system. These cash flows are considered reliable since they can easily adapt to the changes of the market and of the business segment to which cash generating units belong, based on the Group's past experience on cash flows and margins and on future expectations.

For other cash generating units the Group uses cash flows projections based on a period of 5 years, calculating the residual value based on the cash flows of the latest year projected, using a zero growth rate.

Projected cash flows are discounted using the weighted average cost of capital ("**WACC**") to our Consolidated Annual Financial Statements), adjusted for the specific risks associated to the business unit to which the cash generating unit belongs.

Based on values in use calculated in accordance with the assumptions and hypotheses described above and in Note 8 to our Consolidated Annual Financial Statements, impairment have been registered over certain intangible assets (goodwill, and development assets) pertaining to the Engineering and Construction segment, due to the doubtful recovery given the problems arisen during the period to keep the activity in an appropriate way because the current situation of the Company. In accordance with the available information for the Directors and, based on the best estimates, it has been recorded an expense for this concept of €89.9 million in the consolidated income statements at June 30, 2016. Main variables considered in sensitivity analysis are growth rates, discount rates based in WACC and the main variables of each business.

During the six months ended June 30, 2016 and the years 2015, 2014 and 2013, there were no intangible assets with indefinite useful life or there were no significant intangible assets not yet in use that were impaired.

***Revenue from construction contracts***

Revenue from construction contracts is recognized using the percentage- of- completion method for contracts whose outcome can be reliably estimated and whose profitability is probable. When the outcome of a construction contract cannot be reliably estimated, revenue is recognized only to the extent it is probable that contract costs incurred will be recoverable.

As described in Note 2.24.b to our Consolidated Annual Financial Statements, the percentage of completion is determined at the date of every consolidated statement of financial position based on the actual costs incurred as a percentage of total estimated costs for the entire contract.

Revenue recognition using the percentage-of-completion method involves the use of estimates of certain key elements of the construction contracts, such as total estimated contract costs, allowances or provisions related to the contract, period of execution of the contract and recoverability of the claims. We have established, over the years, a robust project management and control system, with periodic monitoring of each project. This system is based on the long-track experience of the Group in constructing complex infrastructures and installations. As far as practicable, the Group applies past experience in estimating the main elements of construction contracts and relies on objective data such as physical inspections or third parties confirmations. Nevertheless, given the highly-tailored characteristics of the construction contracts, most of the estimates are unique to the specific facts and circumstances of each contract.

Although estimates on construction contracts are periodically reviewed on an individual basis, we exercise significant judgments and not all possible risks can be specifically quantified.

It is important to point out that, as stated in Note 2.4 to our Consolidated Annual Financial Statements on the measurement of property, plant and equipment, in the internal asset construction projects outside the scope of IFRIC 12 on Service Concession Arrangements (see Note 2.5 to our Consolidated Annual Financial Statements), the totality of the revenues and profits between group companies is eliminated, meaning those assets are shown at their acquisition cost.

***Income taxes and recoverable amount of deferred tax assets***

The current income tax provision is calculated on the basis of relevant tax laws in force at the date of our Consolidated Financial Statements in the countries in which the subsidiaries and associates operate and generate taxable income. Subsidiaries which are not included in the consolidated income tax returns filed in Spain file income tax returns in numerous tax jurisdictions around the world. Determining income tax payable requires judgment in assessing the timing and the amount of deductible and taxable items, as well as the interpretation and application of tax laws in different jurisdictions. Due to this fact, contingencies or additional tax expenses could arise as a result of tax inspections or different interpretations of certain tax laws by the corresponding tax authorities. We recognize deferred tax assets for all deductible temporary differences and all unused tax losses and tax credits to the extent that it is probable that future taxable profit will be available against which they can be utilized.

We consider it probable that we will have sufficient taxable profit available in the future to enable a deferred tax asset to be recovered when:

- there are sufficient taxable temporary differences relating to the same tax authority, and the same taxable entity is expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward;

- it is probable that the taxable entity will have sufficient taxable profit, relating to the same tax authority and the same taxable entity, in the same period as the reversal of the deductible temporary difference (or in the periods into which a tax loss arising from the deferred tax asset can be carried back or forward); or

- tax planning opportunities are available to the entity that will create taxable profit in appropriate periods.

As of June 30, 2016, our deferred tax assets corresponded mainly to tax loss carryforwards in Brazil, Spain and the United States, and to tax credits for export activities and other tax deductions generated in Spain, as shown in the following table:

| | As of June 30, 2016 (€ in millions) |
|---|---|
| **Tax credits for Tax Loss Carryforwards:** | |
| Spain | 18 |
| Brazil | 158 |
| United States | 1923 |
| Other | 40 |
| | 409 |
| **Tax credits for deductions to be applied in future periods:** | |
| Spanish Export Tax Credit (DAEX) | 210 |
| R&D&i Tax Credits (mainly in Spain) | 667 |
| Tax Credits for deduction on reinvestment of certain benefits in Spain | 31 |
| Tax Credits for environmental investments in Spain | 2 |
| Tax Credits for double taxation (mainly in Spain) | 40 |
| Tax Credits for donations and other (mainly in Spain) | 13 |
| | 364 |

The jurisdictions where we have tax credits and where we have also recorded tax losses are Brazil (mainly coming from the bioenergy business), the United States and Spain. The subsidiaries in these jurisdictions, which include companies in our biofuels, engineering and construction, solar and water segments, are expected to generate taxable profit in the upcoming years, as described in more detail below.

*Brazil*

We have credits for tax loss carryforwards in Brazil of €158 million as of June 30, 2016. Tax credits for tax loss carryforwards in Brazil were mainly generated in recent years with very poor weather conditions which affected our sugar cane production. Since 2011, we have implemented a series of plans to improve the quality of our biological assets and to increase the milling capacity of the facilities, as well as in the co-generation plant in

order to increase the profitability of the assets. The tax loss carryforwards are expected to offset future taxable income in Brazil, as there is no time limit under Brazilian tax legislation for their application. We expect to generate taxable income that will help to use the tax credits we have in this jurisdiction. In the last three tax returns submitted in this jurisdiction, we generated taxable losses amounting to €184 million in 2015, €63 million in 2014 and €65 million in 2013.

*United States*

Tax credits for tax loss carryforwards in the United States amount to approximately €193 million as of June 30, 2016 and expire in 20 years. In order to utilize these tax loss carryforwards, we would need to generate future taxable income of approximately €536 million. During the last years the taxable losses generated by the Company in the United States have been driven mainly by specific tax advantages like bonus depreciations and the application of specific Modified Accelerated Cost Recovery System ("**MACRS**"), and due to non-ordinary losses. During 2013, we undertook a restructuring of our subsidiaries in the United States, for business purposes. After the restructuring, most of our U.S. subsidiaries in our Biofuels, Engineering and Construction, Water and Solar segments are subsidiaries of Abengoa US, LLC, which is in turn a subsidiary of newly incorporated entities corresponding to each of the four operating segments mentioned above. This structure permits to calculate our income tax in the United States on an aggregated basis for these companies.

We expect to generate taxable income derived from our activity of construction and delivery services in USA, as well as the posible tax surplus in the sale of assets, in the upcoming years.

In our last three U.S. tax returns submitted, considering all our segments, we generated taxable losses amounting to €55 million in 2014, €153 million in 2013 and €30 million in 2012.

*Spain*

In Spain, we have over €370 million in tax credits on deductions and on tax loss carryforwards, of which €18 million are credits for tax loss carryforwards as of June 30, 2016. These tax credits expire over a period ranging from 15 to 18 years. There is no time limit under Spanish tax regulations for the application of the tax loss carryforwards. Their recoverability is based on our ability to generate taxable income of €2,682 billion from our Spanish subsidiaries. We expect to generate this taxable income mainly from our Engineering and Construction business in energy, solar and water sectors, which we expect to restart in the last quarter of 2016, once finished the restructuring plan which is being closing with financial creditors, as well as possible taxable incomes which would come from the restructuring operation. In the last three tax returns submitted in Spain, we generated taxable losses amounting to €194 million in 2015, taxable income amounting to €128 million in 2014 and taxable losses amounting to €64 million in 2013.

Our management assesses the recoverability of deferred tax assets on the basis of estimates of future taxable profit. These estimates are derived from the projections included in our five- and ten-year strategic plans, which are prepared on a yearly basis and reviewed twice a year for the accuracy of the assumptions used. Based on our current estimates we expect to generate sufficient future taxable income to achieve the realization of our current tax credits and tax loss carryforwards, supported by our historical trend of business performance.

Our current and deferred income taxes may be impacted by events and transactions arising in the normal course of business as well as by special non-recurring items. Assessment of the appropriate amount and classification of income taxes is dependent on several factors, including estimates of the timing and realization of deferred tax assets and the timing of income tax payments.

Actual collections and payments may materially differ from these estimates as a result of changes in tax laws as well as unforeseen future transactions impacting the income tax balances.

***Derivatives and hedging***

Derivatives are recorded at fair value. The Company applies hedge accounting to all hedging derivatives that qualify to be accounted for as hedges under IFRS.

When hedge accounting is applied, hedging strategy and risk management objectives are documented at inception, as well as the relationship between hedging instruments and hedged items. Effectiveness of the hedging relationship needs to be assessed on an ongoing basis. Effectiveness tests are performed prospectively

and retrospectively at inception and at each reporting date, following the dollar offset method or the regression method, depending on the type of derivatives.

We have three types of hedges:

- Fair value hedge for recognized assets and liabilities

  (i) Changes in fair value of the derivatives are recorded in the consolidated income statement, together with any changes in the fair value of the asset or liability that is being hedged.

- Cash flow hedge for forecasted transactions

  (ii) The effective portion of changes in fair value of derivatives designated as cash flow hedges are recorded temporarily in equity and are subsequently reclassified from equity to profit or loss in the same period or periods during which the hedged item affects profit or loss. Any ineffective portion of the hedged transaction is recorded in the consolidated income statement as it occurs.

  (iii) When options are designated as hedging instruments (such as interest rate options described in Note 14 to our Consolidated Annual Financial Statements), the intrinsic value and time value of the financial hedge instrument are separated. Changes in intrinsic value which are highly effective are recorded in equity and subsequently reclassified from equity to profit or loss in the same period or periods during which the hedged item affects profit or loss. Changes in time value are recorded in the consolidated income statement, together with any ineffectiveness.

  (iv) When the hedged forecasted transaction results in the recognition of a non-financial asset or liability, gains and losses previously recorded in equity are included in the initial cost of the asset or liability.

  (v) When the hedging instrument matures or is sold, or when it no longer meets the requirements to apply hedge accounting, accumulated gains and losses recorded in equity remain as such until the forecast transaction is ultimately recognized in the consolidated income statement. However, if it becomes unlikely that the forecast transaction will actually take place, the accumulated gains and losses in equity are recognized immediately in the consolidated income statement.

- Net investment hedges in foreign operation

  (vi) Hedges of a net investment in a foreign operation, including the hedging of a monetary item considered part of a net investment, are recognized in a similar way to cash flow hedges. The foreign currency transaction gain or loss on the non-derivative hedging instrument that is designated as, and is effective as, an economic hedge of the net investment in a foreign operation is reported in the same manner as a translation adjustment. That is, reported in the cumulative translation adjustment section of equity to the extent it is effective as a hedge, as long as the following conditions are met: the notional amount of the non-derivative instrument matches the portion of the net investment designated as being hedged and the non-derivative instrument is denominated in the functional currency of the hedged net investment. In that circumstance, no hedge ineffectiveness would be recognized in earnings.

  (vii) Amounts recorded in equity are reclassified to the consolidated income statement when the foreign operation is sold or otherwise disposed of.

Contracts held for the purposes of receiving or making payment of non-financial elements in accordance with expected purchases, sales or use of goods ("own-use contracts") of the Group are not recognized as derivative instruments, but as executory contracts. In the event that such contracts include embedded derivatives, they are recognized separately from the host contract, if the economic characteristics of the embedded derivative are not closely related to the economic characteristics of the host contract. The options contracted for the purchase or sale of non-financial elements which may be cancelled through cash outflows are not considered to be own-use contracts.

Changes in fair value of derivative instruments which do not qualify for hedge accounting are recognized immediately in the consolidated income statement. Trading derivatives are classified as current assets or liabilities.

In addition, as of June 30, 2016, the Group had €167.2 million of convertible bonds and €0.5 million of exchangeable notes outstanding (see Note 18.3 to our Consolidated Condensed Interim Financial Statements), maturing between one (1) and four (4) years. In accordance with the terms and conditions of the issuances, the bonds, except for the 2019 Notes and the Exchangeable Notes, qualify as hybrid instruments which are bifurcated into a debt component and an embedded derivative. Embedded derivatives are recognized initially at fair value and at each closing date they are re-measured at fair value, with the change in fair value being recorded in the consolidated income statement (see Note 18.3 to our Consolidated Condensed Interim Financial Statements).

The inputs used to calculate fair value of our derivatives are based on prices observable on not quoted markets, through the application of valuation models (Level 2). The valuation techniques used to calculate fair value of our derivatives include discounting estimated future cash flows, using assumptions based on market conditions at the date of valuation or using market prices of similar comparable instruments, amongst others. The valuation of derivatives and the identification and valuation of embedded derivatives and own-use contracts requires the use of considerable professional judgment. These determinations were based on available market information and appropriate valuation methodologies. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

***Concession agreements***

Service concession agreements are recorded in accordance with the provisions of IFRIC 12. IFRIC 12 is applicable to public-to-private service concession arrangements where the grantor of the concession governs what services the operator must provide using the infrastructure, to whom and at what price and also controls any significant residual interest in the infrastructure at the end of the term of the arrangement. When the operator of the infrastructure is also responsible for the engineering, procurement and construction of such asset, IFRIC 12 requires the separate accounting for the revenue and margins associated with the construction activities, which is not eliminated in consolidation even between companies within the same consolidated group, and for the subsequent operation and maintenance of the infrastructure. In such cases, the investment in the infrastructure used in the concession arrangement cannot be classified as property, plant and equipment of the operator, but rather must be classified as a financial asset or an intangible asset, depending on the nature of the payment rights established under the contract. The infrastructures accounted for by us as service concessions under IFRIC 12 are mainly related to the activities concerning power transmission lines, desalination plants and thermo-solar electricity generation plants outside of Spain and, with effect from January 1, 2011, in Spain.

Any analysis regarding whether the IFRIC 12 applies to certain contracts and activities involves various complex factors. It is significantly affected by legal interpretation of certain contractual agreements or other terms and conditions with public sector entities.

Therefore, the application of IFRIC 12 requires extensive judgment in relation with, amongst other factors: (i) the identification of certain infrastructures (and not contractual agreements) in the scope of IFRIC 12; (ii) the understanding of the nature of the payments in order to determine the classification of the infrastructure as a financial asset or as an intangible asset; and (iii) the recognition of the revenue from construction and concessionary activity.

Changes in one or more of the factors described above may significantly affect the conclusions as to the appropriateness of the application of IFRIC 12 and, therefore, the results of operations or our financial position.

***Third-party guarantees***

The analysis of the guarantees committed to third parties, given the exceptional nature and uncertainty of the current situation of the Company provided by the Article 5 bis of Ley Concursal, requires a complex judgment to estimate the contractual breaches that may exits and as a consequence of possible breaches, the outflow of resources probability.

Such situation could affect the facts and circumstances in which these estimations are based and that could arise significant changes on them.

**Explanation of Income Statement Items**

***Revenue***

Revenue consists of the fair value of consideration received for the sale of goods or services excluding any related charges resulting from operations, before any discounts or returns and excluding intra-group transactions. Revenue from the sale of goods is recognized when we deliver the goods to the client, the client accepts them and it is reasonably certain that the related receivables will be collectible. Revenue from the sale of services is recognized in the period in which the service is provided, using the percentage of completion method based on the specific contractual terms and conditions of each service agreement, when the revenue of the service contract and the associated costs, as well as the percentage of completion, can be estimated reliably and when it is reasonably certain that the related receivables will be collectible. When one or more of such elements of the service contract cannot be estimated reliably, ordinary income from the sale of service is recognized only to the extent of the expenses recognized that are recoverable. In addition, revenue is generated by the construction and operation of our concession projects is recognized in accordance with IFRIC 12 as described under "—Critical Accounting Policies and Estimates—Concession Agreements." Revenue in each of our business activities is generated as follows:

- *Engineering and Construction.* Revenue is generated primarily from infrastructure construction contracts, engineering services and maintenance services of electrical, mechanical and industrial infrastructures.

- *Concession-Type Infrastructure.* Revenue is generated primarily from the management and operation of our infrastructure related to power transmission lines, thermo-solar plants, water treatment plants, and co-generation plants which are all regulated through long-term sale agreements.

- *Industrial Production.* Revenue is generated primarily from the production and sale of biofuel products including ethanol, sugar, biodiesel, distillers, grains and solubles, and electricity from co-generation plants.

***Changes in inventories of finished goods and work in progress***

Changes in inventories include the result of changes in inventories of finished products and work in progress during the year.

***Other operating income***

Other operating income includes income from government grants, income from work performed on our own assets, and capitalized and all other income not captured within any other income line item, including income for various services, as well as profit from the sale of subsidiaries. In addition, from time to time, other operating income may include income from litigation and arbitration awards.

***Raw materials and consumables used***

Raw materials consumed include the purchase and consumption of raw materials and changes in inventories of raw materials and other inventories. Primary raw materials include energy in all businesses, wheat, barley, corn, sorghum and sugarcane in our Biofuels segment and steel and iron in our Engineering and Construction activity.

***Employee benefit expenses***

Employee benefit expenses include wages and salaries, social security costs and costs associated with our employee stock option plans, along with other employee retributions.

***Depreciation, amortization and impairment charges***

This line item includes the depreciation of tangible assets, amortization of intangible assets with a finite useful life, charges for the impairment of assets related to the value of goodwill, tangible and intangible assets and accounts receivable, which have been reduced at period end in the event that their book value is lower than their recoverable amount.

***Other operating expenses***

Other operating expenses include external services, including expenses for leases, repairs and maintenance, research and development costs, expenses for independent professional services, such as accounting, banking, consultancy, legal and other advisory fees and commissions, expenses for transportation and supplies, taxes for external services and other management and general expenses.

***Operating profit***

Operating profit consists of revenue, changes in inventories, other operating income, raw materials consumed, employee benefit expenses, depreciation, amortization and impairment charges, research and development costs and other operating expenses.

***Finance income***

Finance income includes income earned from cash deposited with financial institutions and changes in the fair value of some interest rate derivative financial instruments.

***Finance expenses***

Finance expenses includes expenses due to interest and similar expenses, including interest on our outstanding corporate and non-recourse indebtedness and interest related to our factoring and "confirming without recourse" agreements related to our trade payables, and changes in the fair value of some interest rate derivative financial instruments.

***Net exchange differences***

Net exchange differences include gains and losses originating from exchange differences related to assets and liabilities denominated in foreign currencies and changes in the fair value of exchange rate derivatives.

***Other net finance income/expenses***

Other net finance income/expenses includes changes in the fair value of the embedded derivative component of our existing convertible bonds, dividend income from equity instruments, impairment of financial investments, disposals and changes in the fair value of financial investments and changes in the fair value of some commodity derivatives.

***Finance expense net***

Finance expense net represents the total of financial income, financial expenses, net exchange differences and other financial income/expenses.

***Share of (loss)/profit of associates***

Share of (loss)/profit of associates includes the results of companies accounted for using the equity method over which we exercise a significant influence but which are neither subsidiaries nor jointly controlled entities.

***Profit (loss) before income tax***

Profit before income tax represents our profit before the payment of corporate income tax.

***Income tax benefit/expense***

Income tax benefit/expense includes all current and deferred taxes, as calculated in accordance with the relevant tax laws in force in the jurisdictions in which we operate.

***Profit for the year from continuing operations***

Profit for the year from continuing operations represents the profit before income taxes after the deduction of corporate income tax, generated by the continuing operations of the Group.

***Profit (loss) from discontinued operations, net of tax***

Profit (loss) from discontinued operations, net of tax represents the profit before income taxes after the deduction of corporate income tax generated by the discontinued operations of the Group plus any gain or loss, net of tax, from the disposal of discontinued operations of the Group.

***Profit for the year***

Profit for the year represents the total of profit for the year from continuing operations plus profit (loss) from discontinued operations, net of tax.

***Profit attributable to non-controlling interest***

Profit attributable to non-controlling interest represents profit for the year from continuing operations that is allocated to non-controlling interests in accordance with their percentage of the ownership of the affected subsidiaries.

***Profit for the year attributable to the Parent Company***

Profit for the year attributable to the Parent Company represents profit for the year after the deduction of corporate income tax and profit attributable to non-controlling interests.

**Results of Operations**

The tables below illustrate our results of operations for the six month periods ended June 30, 2016 and 2015 and the years ended December 31, 2015, 2014 and 2013.

| | Six months ended June 30, | | Year ended December 31, | | |
|---|---|---|---|---|---|
| | **2016** | **2015** | **2015** | **2014** | **2013** |
| | **(unaudited)** | **(unaudited)** | | | **(unaudited)** |
| | *(€ in millions, except share and per share amounts)* | | | | |
| **Consolidated Income Statement Data** | | | | | |
| Revenue | 1,275.4 | 3,390.4 | 5,755.5 | 7,150.6 | 7,245.1 |
| Changes in inventories of finished goods and work in progress | 0.2 | 46.4 | (9.4) | 1.1 | 7.7 |
| Other operating income | 44.0 | 89.6 | 196.4 | 188.3 | 441.4 |
| Raw materials and consumables used | (677.9) | (1,970.2) | (3,554.9) | (4,083.1) | (4,469.9) |
| Employee benefit expense | (274.2) | (432.9) | (839.5) | (871.9) | (755.4) |

| Profit attributable to non-controlling interest from discontinued operations | - | (4.9) | 126.2 | (0.2) | (1.2) |
| **Profit for the year attributable to the parent company** | **(3,314.2)** | **72.3** | **(1,213.3)** | **125.3** | **101.5** |

***Geographic Reporting***

We report our results in accordance with the following six geographic regions:

- Spain;
- North America;
- Europe (excluding Spain);
- South America (excluding Brazil);
- Brazil; and
- Other (remaining overseas markets).

**Comparison of the Six Months Ended June 30, 2016 and June 30, 2015**

***Revenue***

Revenue decreased by 62.4% to €1,275 million for the six month period ended June 30, 2016 from €3,390 million during the same period for 2015. The decrease in consolidated revenues is mainly attributable to the current situation of the Group, derived from a strong limitation of financial resources in the last months and which has significantly affected the evolution of the business after the general deceleration of the business in all activities. In addition to the above, there has been a decrease in revenues due to the negative impact of the finalization of the construction of several projects in 2015 and to the revenues from the owner companies of concession-type plans sold to Atlantica Yield during 2015 under the ROFO agreement, and the loss of control of Rioglass and the bioethanol plant in Rotterdam (The Netherlands) during the first six months of 2016. All this have been partially offset by the positive impact of ethanol and sugar sold in Brazil derived from higher stock volume of raw material of the previous harvest and the beginning of the current harvest period as well as of the improvement in the prices of both products compared to the same period in the prior year.

Within our Engineering and Construction activity, revenues decreased by 71.8% to €609,4 million during the six month period ended June 30, 2016 compared to the same period of the prior year. This decrease in revenues is mainly attributable to the current situation of the Group given the strong limitation of financial resources in which is the Company is subjected in the last months and which has significantly affected the evolution of the business after the general deceleration of the Engineering & Construction activity. The main projects under construction affected by all the above situation corresponds to the combined cycle plants in Mexico (AT3 and AT4), to solar plants in Chile (Atacama solar platform), and in South Africa and to transmission lines in Brazil. In addition to the above, there has been a decrease in revenues due to the negative impact as a consequence of the finalization of the construction in 2015 of certain transmission line projects in Peru and Poland.

Our Concession-Type Infrastructure activity decreased by 48.2% to €134.5 million during the six month period ended June 30, 2016 compared to the same period of the prior year, mainly due to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and corresponds to desalination plants in Algeria (Skikda and Honanine), to a

transmission line in Peru (ATN2), to thermo-solar plants in Spain (Helioenergy 1 and 2, Helios 1 and 2, Solnova 1, 3 and 4, Solaben 1 and 6, and a thermo-solar plant in South Africa (Kaxu Solar One).

Revenue from our Industrial Production activity decreased by 45.3% to €531.5 million during the six month period ended June 30, 2016 compared to the same period of the prior year. This decrease was mainly due to the current situation of the Group mentioned before and has caused a deceleration and the stoppage, in certain situations, of the activity of certain plants in Europe and USA. All this impact has been partially offset by the positive impact in volume of ethanol and sugar sold in Brazil derived from higher raw material stocks from the previous harvest and the beginning of the current harvest, as well as of the improvement in the prices of both products compared to the same period in the prior year.

***Revenue by geographic regions***

The following table sets forth our revenue for the six month periods ended June 30, 2016 and 2015 by geographic region.

| | **(unaudited)** | | | |
|---|---|---|---|---|
| | **For the six months ended June 30,** | | | |
| | **2016** | | **2015** | |
| | *(€ in millions)* | *% of revenue* | *(€ in millions)* | *% of revenue* |
| **Consolidated Revenue by Geography** | | | | |
| Spain | 210.3 | 16.5% | 460.8 | 13.5% |
| North America | 429.1 | 33.6% | 952.3 | 28.1% |
| Europe (excluding Spain) | 260.3 | 20.4% | 354.5 | 10.5% |
| Brazil | 154.2 | 12.1% | 385.8 | 11.4% |
| South America (excluding Brazil) | 46.8 | 3.7% | 819.4 | 24.2% |
| Other regions | 174.7 | 13.7% | 417.5 | 12.3% |
| **Total revenue** | **1.275.4** | **100.0%** | **3,390.4** | **100.0%** |

Revenue during our international operations (all activities outside of Spain) decreased by 63,6% to €1.065.1 million for the first six months of 2016, from €2.929.6 million for the same period of 2015. Our international operations accounted for 84% of our total revenue, with the Americas (South America, Brazil and North America) representing 50% of our total revenue and North America representing the largest geographic region with 34% of our total revenue.

*Spain.* Revenue decreased by 54,5% to €210.3 million during the six month period ended June 30, 2016, from €460.8 million for the same period of 2015. The decrease was primarily attributable to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and corresponds to thermo-solar plants Helioenergy 1 and 2, Helios 1 and 2, Solnova 1, 3 and 4, Solaben 1 and 6.

*North America*. Revenue decreased by 54,9% to €429.1 million during the first six months of 2016, from €952.3 million in the same period of 2015. The decrease in revenue was primarily attributable to lower revenues in our Industrial Production activity mainly due to the current situation of the Group has caused a deceleration and the stoppage of the activity of certain plants in USA.

*Europe (excluding Spain).* Revenue decreased by 26,6% to €260.3 million during the first six months of 2016, from €354.5 million for the same period of 2015. The decrease in revenue was primarily attributable to the loss of control of the bioethanol plant in Rotterdam (The Netherlands) and to the Engineering and Construction activity as a consequence of the finalization of the construction in 2015 of a transmission line project in Poland.

*Brazil.* Revenue decreased by 60.1% to €154.2 million during the first six months of 2016, from €385.8 million for the same period of 2015. The decrease in revenue was primarily attributable to the general deceleration of the Engineering & Construction activity by the current situation of the Group which has impacted in the construction of the transmission lines in Brazil. All this impact has been partially offset by the positive impact in volume of ethanol and sugar sold derived from higher raw material stocks from the previous harvest and the beginning of the current harvest, as well as of the improvement in the prices of both products compared to the same period in the prior year.

*South America (excluding Brazil).* Revenue decreased by 94,3% to €46.8 million during the first six months of 2016, from €819.4 million for the same period for 2015. The decrease in revenue was primarily attributable to the general deceleration of the Engineering & Construction activity by the current situation of the Group which has impacted in the construction of the combined cycle plants in Mexico (AT3 and AT4), and to solar plants in Chile (Atacama solar platform) and as a consequence of the finalization of the construction in 2015 of a transmission line project in Peru.

*Other (remaining overseas markets).* Revenue decreased by 58,1% to €174.7 million during the first six months of 2016, from €417.6 million for the same period of 2015. The decrease was primarily attributable to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and corresponds to desalination plants in Algeria (Skikda and Honanine), and a thermo-solar plant in South Africa (Kaxu Solar One). Additionally the decrease in revenues is due to the negative impacts as a consequence of to the general deceleration of the Engineering & Construction activity by the current situation of the Group which has impacted in the construction of the thermos-solar plants in South Africa.

***Other operating income***

The following table below sets forth our other operating income for the nine month periods ended June 30, 2016 and 2015.

| | **(unaudited) For the six months ended June 30,** | |
|---|---|---|
| | **2016** | **2015** |
| | *(€ in millions)* | |
| **Other operating income** | | |
| Work performed by the entity and capitalized, and other | 3.4 | 6.0 |
| Grants | 1.0 | 0.0 |
| Income from various services | 39.6 | 83.6 |
| **Total** | **44.0** | **89.6** |

Other operating income decreased by 51.1% to €44.0 million during the first six months of 2016, from €89.6 million for the same period of 2015. The decrease is mainly due to higher income from various services during the first six months of 2015 related to revenue of compensation from insurance companies of construction works as well as incomes from legal claims.

***Raw materials consumed***

Raw materials consumed decreased by 65.7% to €677.9 million during the first six months of 2016, from €1,970.2 million for the same period of 2015, due to the decrease in activity in our Engineering and Construction activity. Raw materials consumed also decreased as a percentage of revenue to 53.16% for the first six months of 2016 from 58.1% in the same period in 2015. This decrease was mainly due to a lower contribution to the revenue mix from our construction activity, an activity which is intensive in raw materials, Engineering and Construction activity, attributable to the current situation of the Group and to a higher contribution to the revenue mix from our concession-type infrastructure activity.

***Employee benefits expenses***

Employee benefits expenses decreased by 36.7% to €274.2 million during the first six months of 2016, from €432.9 million for the same period of 2015. As a percentage of revenue, employee benefit expenses increased to 21.5% in the six month period ended June 30, 2016 from 12.77% in the same period in 2015. This increase was mainly attributable to the current situation of the Group, which has derived in a deceleration of the business in all activities and a decrease in the average number of employees by 34% to 17,677 people as of June 30, 2016, compared to June 30, 2015 (26,823 people).

***Depreciation, amortization and impairment charges***

Depreciation, amortization and impairment charges increased by 980.7% to €2,270.7 million during the first six months of 2016 from €210.1 million for the same period of 2015. The increase is mainly due to the impairment recorded as fair value over certain intangible assets (goodwill, and development assets) pertaining to the Engineering and Construction segment due to the doubtful recovery given the problems arisen during the period to keep the activity in an appropriate way because the current situation of the Company, as well as by the impairment recorded as fair value over certain assets related to certain 1G and 2G plants of bioethanol in United States (Indiana, Illinois, Nebraska, York and Hugoton), and to Brazilian Transmission Lines, partially offset by the lower amortization costs from the owner companies of concession-type plants sold to Atlantica Yield during 2015 under the ROFO agreement.

***Other operating expenses***

The following table below sets forth our other operating expenses for the six month periods ended June 30, 2016 and 2015.

| | **(Unaudited)** | | | |
|---|---|---|---|---|
| | **For the six months ended June 30,** | | | |
| | **2016** | | **2015** | |
| | *(€ in millions)* | *(% of revenue)* | *(€ in millions)* | *(% of revenue)* |
| **Other operating expenses** | | | | |
| Research and development costs | 0.6 | 0.0 | 2.2 | 0.1 |
| Leases and fees | 33.7 | 2.6 | 53 | 1.6 |
| Repairs and maintenance | 22.8 | 1.8 | 38.5 | 1.1 |
| Independent professional services | 89.9 | 7.0 | 139 | 4.1 |
| Transportation | 18.1 | 1.4 | 44.4 | 1.3 |
| Supplies | 31.4 | 2.5 | 48.2 | 1.4 |
| Other external services | 31.4 | 2.5 | 71.4 | 2.1 |
| Taxes | 24.2 | 1.9 | 46.5 | 1.4 |
| Other management expenses | 22.4 | 1.8 | 29.6 | 0.9 |
| **Total** | 274.5 | 21.5 | 472.8 | 13.9 |

Other operating expenses decreased by 42.0% to €274.5 million during the six month period ended June 30, 2016, from €472.8 million for the same period of 2015. This decrease is due to the current situation of the Group which has derived in a deceleration of the business in all activities and consequently in other operating expenses.

***Operating profit***

Operating profit decreased by 594.5% to €-2,177.7 million during the first six months of 2016, from €440.3 million for the same period of 2015. Operating profit also decreased as a percentage of revenues to -170.7% during the first six months of 2016 from 13.0% during the first six months of 2015, mainly due to to the current situation of the Group,which has derived in a deceleration of the business in all activities and consequently in the operating profit obtained in each of them. In addition to the above, there has been a decrease in operating profit due to the increase in depreciation, amortization and impairment charges, as explained above.

***Finance income***

The following table below sets forth our finance income for the six month periods ended June 30, 2016 and 2015.

| | (Unaudited) For the six months ended June 30, | |
|---|---|---|
| | 2016 | 2015 |
| | (€ in millions) | |
| **Finance income** | | |
| Income from loans and credits | 13.2 | 22.9 |
| Gains from interest-rate derivatives: cash flow hedges | 3.0 | 28.6 |
| Gains from interest-rate derivatives: non-hedging | 1.6 | 2.9 |
| **Total** | **17.8** | **54.4** |

Finance income decreased by 67.3% to €17.8 million during the first six months of 2016, from €54.4 million for the same period of 2015. The decrease is primarily due to the change in the time value of our interest rate derivative hedges and lower yields of fixed-term deposits.

***Finance expenses***

The following table below sets forth our finance expenses for the six month periods ended June 30, 2016 and 2015.

| | (Unaudited) For the six months ended June 30, | |
|---|---|---|
| | 2016 | 2015 |
| | (€ in millions) | |
| **Finance expenses** | | |
| Expenses due to interest: | | |
| — Loans from credit entities | (176.7) | (169.4) |
| — Other debts | (161.3) | (198.4) |
| Losses from interest-rate derivatives: cash flow hedges | (15.2) | (35.4) |
| Losses from interest-rate derivatives: non-hedging | (2.0) | (4.8) |
| **Total** | **(355.3)** | **(408.0)** |

Finance expenses decrease by 12.9% to €355.3 million during the first six months of 2016, from €408.0 million for the same period of 2015. The decrease was mainly due to the negative impact during 2015 by the early repayment of the 2017 convertible bond of €17 million, to lower interests given the reduction of debt as a consequence of the exchange of the 2017 Atlantica Yield convertible bonds and the conversion of 2019 convertible bonds, and lower finance expenses from the owner companies of concession-type plants sold to Atlantica Yield during 2015 under the ROFO agreement.

***Net exchange differences***

The following table below sets forth our exchange differences for the six month periods ended June 30, 2016 and 2015.

| | (Unaudited) For the six months ended June 30, | |
|---|---|---|
| | 2016 | 2015 |
| | *(€ in millions)* | |
| **Net exchange differences** | | |
| Gains and losses from foreign exchange transactions | 9.7 | (10.5) |

| | | |
|---|---|---|
| Gains and losses from foreign exchange contracts: cash flow hedges | (11.2) | 12.0 |
| Gains and losses from foreign exchange contracts: non-hedging | - | - |
| **Total** | **(1.5)** | **1.5** |

Net exchange differences decreased by -200.0% to €-1.5 million during the six month period ended June 30, 2016 from €1.5 million for the same period of 2015 and remained at low levels. Gains and losses from foreign transactions were mainly due to loans and credits denominated in U.S. dollars between subsidiaries and associates with different functional currencies (primarily, the Brazilian real and euro). In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, and due to the application of hedge accounting, most of exchange rate differences resulting from foreign operations are offset by the effect of our cash flow hedge derivatives.

***Other net finance income/expenses***

| | (Unaudited) | |
|---|---|---|
| | For the six months June 30, | |
| | 2016 | 2015 |
| | (€ in millions) | |
| **Other finance income** | | |
| Profits from the sale of financial assets | 78.9 | - |
| Income on financial assets | 0.8 | 0.5 |
| Other finance income | 6.2 | 6.1 |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | 8.9 | - |
| Hedging derivatives gains: Cash flow hedge | 0.9 | - |
| Gains from commodities forward contracts: non hedging | - | - |
| **Total** | **95.6** | **6.6** |
| **Other finance expenses** | | |
| Losses from sale of financial assets | (0.3) | (0.1) |
| Loss from early conversion of convertible notes 2019 | | (15.1) |
| Outsourcing of payables | (10.4) | (41.8) |
| Other finance expenses | (848.8) | (13.4) |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | (0.0) | (12.2) |
| Commodity derivatives losses: cash flow hedge | (2.2) | (0.6) |
| Loss from commodities forward contracts: non-hedging | (0.1) | (1.0) |
| **Total** | **(861.8)** | **(84.3)** |
| **Other net finance income/expenses** | **(766.2)** | **(77.7)** |

During the first six months of 2016, total other finance income increased by 1,348.4% to €95.6 million, from €6.6 million for the same period of 2015. This increase is mainly due to the profit generated by the transfer of the 80% Abengoa Vista Ridge, LLC´s interest and the positive impact as a consequence of the exchange of the 2017 Atlantica Yield convertible bond.

Total other finance expenses increased by 922.3% to €861.8 million, from €84.3 million for the same period of 2015, mainly due to the increase in losses recorder by the sale of the Befesa convertible bond to Triton Investment Fund which has contributed with €135.8 million, the impairment recorded over Rioglass Solar financial investment due its potential dilution recognized for €82 million, the impairment recorded over Abengoa Bioenergy Netherlands B.V financial investment after the loss of control for an amount of €445.9 million and by higher financial expenses derived from the execution of construction bond for an amount of €63.1 million, as well as, the increase in banking fees, guarantee fees, credit letters, transfer fees, default

interests and other banking expenses given the aforementioned current situation of the Company. Additionally, "outsourcing payables" decreased given the lower in PPB issued.

Other net finance expense increase to €766.2 million for the year ended June 30, 2015, from €77.7 million for the year ended June 30, 2014.

***Finance expense net***

Net finance expense increased by 157.0% €1,105.2 million for the six month period ended June 30, 2016, from €429.8 million for the same period of 2015. The increase in net finance expense was attributable to the aforementioned changes in finance income, finance expenses, net exchange differences and other net finance income/expenses.

***Profit (loss) before income tax***

Profit before income tax decreased to a €3,279.8 million loss for six month period ended June 30, 2016, from €16.3 million profit for the same period of 2015. This decrease was attributable to the aforementioned results of the period.

***Income tax benefit/expense***

Corporate income tax decreased to a loss of €-28.9 million in the first six months of 2016 from, a profit of €60.5 million for the same period of 2015. This decrease was attributable to the non-recognition of revenues derived from tax credit carryforwards over losses obtained during the period given the current situation of the Group, described in previous sections, until there is better visibility of the implementation of the Viability Plan announced by the Company.

***Profit (loss) for the year from continuing operations***

Due to the aforementioned changes, results from continuing operations of Abengoa decreased to a loss of €3,308.6 million in the first six months of 2016, from a profit of €76.8 million for the same period of 2015.

***Profit (loss) from discontinued operations, net of tax***

Profit/ (Loss) from discontinued operations, net of tax, decreased to a null profit in the first six months of 2016, from a profit of €4.7 million for the same period of 2015. This decrease is fully attributable to the consolidation of Atlantica Yield and affiliates through the equity method at the end of the year 2015, once lost the control and left its consolidation through the full method (classified until that moment as discontinued operations).

***Profit (loss) attributable to non-controlling interests***

Loss attributable to non-controlling interests decreased to a loss of €5.6 million for the first six months of 2016, from a loss of €4.3 million for the same period of 2015. The decrease is primarily due to higher results from our water desalination plant in Marocco.

***Profit (loss) attributable to non-controlling interests discontinued operations***

Losses attributable to non-controlling interests discontinued operation decreased to zero in the first six months of 2016, from a loss of €4.9 million for the same periof of 2015, as a consequence of changes in the consolidation perimeter.

***Profit (loss) attributable to the parent company***

Profit attributable to the parent company decreased to a loss of €3,314.2 million in the first six months of 2016 from a profit of €72,3 million for the same period of 2015, as a consequence of the changes described in previous sections.

***Total comprehensive income (loss)***

Total comprehensive income decreased to a loss of €3,014.7 million for the first six months of 2016, from €29 million for the same period of 2015, due to a decrease in profit for the period after income tax.

Other comprehensive income increased to an income of €293.9 million for the first six months of 2016, compared to a loss of €52.3 million for the same period in 2015. This was primarily due to an income of €308.5 million related to translation differences in equity, which corresponds mainly to our subsidiaries with the Brazilian real as their functional currency, which experienced an appreciation against the euro during the period, partially offset by our subsidiaries with the U.S. dollar as their functional currency, which experienced a depreciation against the euro during the period.

**Comparison of Years Ended December 31, 2015 and December 31, 2014**

***Revenue***

Revenue decreased by 19.5% to €5,755.5 million for the year ended December 31, 2015, from €7,151.6 million for the year ended December 31, 2014. The decrease in consolidated revenues was mainly due to the decreased revenue contribution from our Engineering and Construction activity.

Within Engineering and Construction, revenues decreased by 26.2% to €3,330.2 million for the year ended December 31, 2015 from 4,514.5 million for the year ended December 31, 2014. The decrease in revenues was primarily attributable to the Company's situation during the last quarter, which have prompted lower sales. In addition lower revenues were recorded relating to the construction of projects in the United States (Mojave and PGE), wind farm in Uruguay (Cadonal), thermo-solar plant in Israel (Ashalim) and combined cycle plants in Poland (Stalowa Wola) and Mexico (A3T and A4T). This decrease was partially offset by higher revenues related to the construction of solar plants in Chile (Atacama Solar Platform) and transmission lines in Brazil.

Our Concession-Type Infrastructures activity decreased by 18.5% to €406.8 million for the year ended December 31, 2015. The decrease in revenues was mainly due to a decrease in revenues from the plants sold to Atlantica Yield during 2015 and the last quarter of 2014 under the ROFO agreement. This decrease was partially offset by new assets that were brought into operation during the last quarter of 2014 and the first quarter of 2015 (water desalination plants in Algeria and Ghana, the power transmission line Norte Brazil and the Manaus hospital urgencies unit in Brazil).

Revenue from our Industrial Production activity decreased by 5.53% to €2,018.5 million for the year ended December 31, 2015. The decrease in revenues was mainly due to the decrease in volumes of ethanol sold in Europe and Brazil partially offset by the increase in volumes sold of ethanol sold in the United States (lowered by a decrease in prices of ethanol sold in the United States), and higher prices of biofuels sold in Europe

***Revenue by geographic regions***

The following table sets forth our revenue for the years ended December 31, 2015 and 2014 by geographic region.

| | **For the Years ended December 31,** | | | |
|---|---|---|---|---|
| | **2015** | | **2014** | |
| | *(€ in millions)* | *% of revenue* | *(€ in millions)* | *% of revenue* |
| **Consolidated Revenue by Geography** | | | | |
| Spain | 806.7 | 14% | 889.1 | 12% |
| North America | 1,520.8 | 26% | 2,253.6 | 32% |
| Europe (excluding Spain) | 643.0 | 11% | 892.9 | 13% |
| South America (excluding Brazil) | 1,296.8 | 23% | 1,301.8 | 18% |
| Brazil | 843.1 | 15% | 874.7 | 12% |
| Other regions | 645.1 | 11% | 938.5 | 13% |
| **Total revenue** | **5,755.5** | **100%** | **7,150.6** | **100%** |

Revenue from our international operations (all activities outside of Spain) decreased by 26.5% to €4,949 million for the year ended December 31, 2015 from €6,261.5 million for the previous year. Our international operations accounted for 85.9% of our total revenue, with the Americas (South America, Brazil and North America) representing 63.6% of total revenue and North America representing the largest geographic region with 26.4% of revenue.

*Spain.* Revenue decreased by 9.3% to €806.7 million for the year ended December 31, 2015, from €889.1 million for the year ended December 31, 2014. The decrease in revenues was primarily attributable to a decrease in revenues from the plants sold to Abengoa Yield during 2015 and the last quarter of 2014 under the ROFO Agreement. This decrease was partially offset by higher prices of biofuels sold.

*North America.* Revenue decreased by 32.5% to €1,520.8 million for the year ended December 31, 2015 from €2,253.6 for the year ended December 31, 2014. The decrease in revenue was primarily attributable to lower revenues in our Engineering and Construction activity related to the construction of large projects in the U.S. such as the Mojave thermo-solar plant and PGE combined cycle plant and a decrease in revenues from the construction of co-generation plants in Mexico (A3T and A4T), partially offset by an increase in our Industrial Production activity due to higher volumes of ethanol sold, partially offset by a decrease in ethanol prices.

*Europe (excluding Spain).* Revenue decreased by 27.9% to €643.0 million for the year ended December 31, 2015, from €892.9 million for the year ended December 31, 2014. The decrease was primarily attributable to reduced Engineering and Construction activity in the combined cycle plant in Poland (Stalowa Wola) and lower volumes of ethanol sold for the year ended December 31.2015 compared to the previous year. The decrease was partially offset by higher prices of ethanol sold.

*South America (excluding Brazil).* Revenue decreased by 0.4% to €1,296.8 million for the year ended December 31, 2015, from €1,301.8 million for the year ended December 31, 2014. The decrease in revenue was primarily attributable to lower revenues in our Engineering and Construction activity related to the construction of a wind farm in Uruguay (Cadonal).

*Brazil.* Revenue decreased by 3.7% to €843.1 million for the year ended December 31, 2015, from €874.7 million for the year ended December 31, 2014. The decrease in revenue was mainly due to a depreciation of the Brazilian real in relation to the euro and the decrease in volumes of ethanol sold for the year ended December 31, 2015 compared to the previous year. This decrease has been partially offset by the increased activity in the construction of transmission lines in Brazil, the entry into operation of the Norte Brazil transmission line and the Hospital de Manaus emergency unit as well as the strong performance of transmission lines already in operation.

*Other (remaining overseas markets).* Revenue decreased by 31.2% to €645.1 million for the year ended December 31, 2015, from €938.5 million for the year ended December 31, 2014. The decrease in revenue was primarily attributable to lower construction activity in our thermo-solar plant in Israel (Ashalim), decrease in revenues from a plant sold to Abengoa Yield in the first quarter of 2015 (Skikda) and to the sale of the Quingdao plant in China during the last quarter of 2014. The decrease was partially offset by higher construction activity in our thermo-solar plants in South Africa and our transmission line in Kenya, and higher Concession-Type Infrastructure activity related to revenues from new assets that were brought into operation in the last quarter of 2014 and the first quarter of 2015 (water desalination plants in Algeria and Ghana)

***Other operating income***

| | For the Years ended December 31, | |
|---|---|---|
| | **2015** | **2014** |
| | **(€ in millions)** | |
| **Other operating income** | | |

| | | |
|---|---|---|
| Work performed by the entity and capitalized and other | 57.0 | 76.0 |
| Grants | 20.6 | 16.7 |
| Income from various services | 118.9 | 95.5 |
| **Total** | **196.5** | **188.2** |

Other operating income increased by 4.3% to €196.5 million for the year ended December 31, 2015, from €188.2 million for the year ended December 31, 2014. This increase was mainly due to higher income from various services related to a favorable resolution of the Spanish Court of Arbitration, which contributed €37.1 million, in relation with losses related to Arizona Solar One project that were covered by an insurance policy.

***Raw materials consumed***

Raw materials consumed decreased by 12.9% to €3,554.9 million for the year ended December 31, 2015, from €4,083.1 million for the year ended December 31, 2014, due to the decrease in activity in our Engineering and Construction and Concesion-Type Infrastructure activities. Raw materials consumed increased as a percentage of revenue to 61.8% for the year ended December 31, 2015 from 57.1% for the year ended December 31, 2014. This increase was mainly due to higher contribution to the revenue mix from our Industrial Production activity, which features strong demand for raw materials.

***Employee benefits expenses***

Employee benefit expenses decreased by 3.7% to €839.5 million for the year ended December 31, 2015, from €871.9 million for the year ended December 31, 2014. This increase was mainly due to the derecognition of the existing provision of €57.5 million (€43.1 million, after tax) regarding the two existing variable remuneration plans for managers, because Abengoa´s Directors considered that the accomplishment of all established requisites in order to consolidate the benefits had a low Probability provided as a consequence of the company situation resulting from the presentation of the communication provided by article 5 bis of the Ley Concursal. This decrease was partially offset by the resignation of our former CEO, Mr. Manuel Sánchez Ortega, for €4.5 million, in addition to an obligation to our former executive chairman, Mr. Felipe Benjumea Llorente, for €11.5 million, which was comprised of (i) an early severance and non-competition obligation for €4.5 million, and (ii) a retention bonus amounting to €7.0 million.

***Depreciation, amortization and impairment charges***

Depreciation. amortization and impairment charges increased by 71.5% to €814.3 million for the year ended December 31, 2015, from €474.9 million for the year ended December 31, 2014. Depreciation and amortization charges also increased as a percentage of revenue to 14.1% in 2015 from 6.6% in 2014. The increase was mainly due to new assets that were brought into operation during the first quarter of 2015 (the Hospital de Manaus emergency unit in Brazil and the Kaxu thermo-solar plant in South Africa) as well as due to the higher contribution of plants that were brought into operation during 2014 (the Norte Brazil transmission line) and the resulting commencement of depreciation expense with respect thereof. The increase was partially offset by the plants sold to Atlantica Yield under the ROFO agreement.

Additionally, in 2015, we recorded impairments that mostly correspond to Engineering and Construction R&D investments, thermo-solar investment projects located in US and several concessional assets under construction due to the doubtful recovery given the current problems and the situation of the Company which has resulted in the filing of the communication provided by the article 5 bis of Ley Concursal.

***Other operating expenses***

The following table below sets forth our other operating expenses for the years ended December 31, 2015 and 2014.

**For the Years ended December 31**

| | 2015 | | 2014 | |
|---|---|---|---|---|
| | (€ in millions) | % of revenue | (€ in millions) | % of revenue |
| **Other operating expenses** | | | | |
| Research and development costs | 7.9 | 0.1 | 8.7 | 0.1 |
| Leases and fees | 128.8 | 2.2 | 122.5 | 1.7 |
| Repairs and maintenance | 94.3 | 1.6 | 71.2 | 1.0 |
| Independent professional services | 323.0 | 5.6 | 265.8 | 3.7 |
| Transportation | 98.2 | 1.7 | 78.8 | 1.1 |
| Supplies | 104.8 | 1.8 | 115.5 | 1.6 |
| Other external services | 138.5 | 2.4 | 167.4 | 2.3 |
| Taxes | 96.1 | 1.7 | 85.5 | 1.2 |
| Other management expenses | 41.1 | 0.7 | 61.5 | 0.9 |
| **Total** | **1,032.7** | **17.8** | **976.9** | **13.6** |

Other operating expenses increased by 5.7% to €1,032.7 million for the year ended December 31, 2015, from €976.9 million for the year ended December 31, 2014. As a percentage of revenue, other operating expense increased to 17.8% for the year ended December 31, 2015 compared to 13.6% in the same period in 2014.

Repairs and maintenance increased by 32.4% to €94.3 million for the year ended December 31, 2015 from €71.2 million in the same period in 2014 mainly due to scheduled technical repairs performed in our bioenergy plant in Netherlands as well as repairs and maintenance related to the pre-operational stage of our Hugoton ethanol plant in the U.S.

Independent professional services increased by 21.5% to €323.0 for the year ended December 31, 2015 from €265.8 in the same period in 2014 due to works on the financial Restructuring Process initiated at the beginning of August 2015.

Transportation expenses increased by 24.7% to €98.2 million for the year ended December 31, 2015 from €78.8 million in the same period in 2014 mainly due to costs related to activities of Industrial Production and Engineering and Construction due to increased logistics services managed by us.

Other management expenses decreased by 33.2% to €41.1 million for the year ended December 31, 2015 from €61.5 in the same period in 2014 mainly due to lower costs related to our Engineering and Construction activity. The decrease was mainly due to expenses incurred the year ended December 31, 2014 in connection with the settlement of a legal claim related to the sale of a plot of land by a subsidiary.

***Operating profit***

Operating profit decreased by 132.0% to €-298.9 million for the year ended December 31, 2015, from €933.2 million for the year ended December 31, 2014. Operating profit also decreased as a percentage of revenues, to 5.2% during the year ended December 31, 2015 from 16.2% during the year ended December 31, 2014. The decrease in operating profit for 2015, compared to 2014, was mainly due to the increase, as a percentage of revenue, in employee benefits and depreciation amortization and impairment charges.

***Finance income***

The following table below sets forth our finance income for the years ended December 31, 2015 and 2014.

| | (Unaudited) |
|---|---|
| | For the Year ended December 31, |

| | 2015 | 2014 |
|---|---|---|
| | (€ in millions) | |
| **Finance income** | | |
| Income from loans and credits | 40.1 | 45.3 |
| Gains from interest-rate derivatives: cash flow hedges | 21.7 | 15.6 |
| Gains from interest-rate derivatives: non-hedging | 5.2 | 1.2 |
| **Total** | **67.0** | **62.1** |

Finance income increased by 7.8% for the year ended December 31, 2015, to €67.0 million for the year ended December 31, 2015 from €62.1 million for the year ended December 31, 2014. The increase was primarily due to the change in the time value of our interest rate derivatives.

***Finance expenses***

The following table below sets forth our finance expenses for the years ended December 31, 2015 and 2014.

| | (Unaudited) | |
|---|---|---|
| | For the Year ended December 31, | |
| | 2015 | 2014 |
| | (€ in millions) | |
| **Finance expenses** | | |
| Expenses due to interest: | | |
| — Loans from credit entities | (319.3) | (257.0) |
| — Other debts | (373.4) | (376.6) |
| Losses from interest-rate derivatives: cash flow hedges | (66.3) | (92.3) |
| Losses from interest-rate derivatives: non-hedging | (13.2) | (19.5) |
| **Total** | **(772.2)** | **(745.4)** |

Finance expenses increase by 3.6% to €772.2 million for the year ended December 31, 2015, from €745.4 million for the year ended December 31, 2014.

Finance expenses increased in 2015 when compared to the same period of the previous year, mainly due to increased interest expense from loans and borrowings as a result of the completion of various projects under construction (interest expense is capitalized when a project is under construction), an increase in notes and bonds finance expenses mainly due to our new bonds issued in second half of 2014 and the first half of 2015, as well as to the 2017 convertible bond early repayment by an amount of €17 million, partially offset by a decrease of expenses recognized related to change in time value of interest rate derivatives and a decrease in cash flow hedges due to the reclassification as discontinued operations of results from plants sold to Atlantica Yield under the ROFO agreement.

***Net exchange differences***

The following table below sets forth our exchange differences for the years ended December 31, 2016 and 2015.

| | (Unaudited) For the six months ended December 31, | |
|---|---|---|
| | 2015 | 2014 |
| | *(€ in millions)* | |
| **Net exchange differences** | | |
| Gains and losses from foreign exchange transactions | 22.9 | (6.5) |
| Gains and losses from foreign exchange contracts: cash flow hedges | (27.1) | 11.2 |
| Gains and losses from foreign exchange contracts: non-hedging | - | 0.3 |
| **Total** | (4.2) | 5.0 |

Net exchange differences decreased by 182.0% to €-4.2 million for the year ended December 31, 2015 from €5.0 million in the year ended December 31, 2014. Net exchange difference remained at low levels, representing -0.1% of revenues in the year ended December 31, 2015 and 0.1% of revenues in the year ended December 31, 2014. Gains and losses from foreign transactions were mainly due to loans and credits denominated in U.S. dollars between subsidiaries and associates with different functional currencies (primarily, the Brazilian real and euro). In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, and due to the application of hedge accounting, most of exchange rate differences resulting from foreign operations are offset by the effect of our cash flow hedge derivatives.

***Other net finance income/expenses***

| | (Unaudited) | |
|---|---|---|
| | For the Years ended December 30, | |
| | **2015** | **2014** |
| | **(€ in millions)** | |
| **Other finance income** | | |
| Profits from the sale of financial assets | 0.8 | 0.4 |
| Income on financial assets | 0.6 | 1.7 |
| Other finance income | 3.4 | 13.1 |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | 90.2 | - |
| Hedging derivatives gains: Cash flow hedge | - | - |
| Hedging derivatives gains: Fair flow hedge | - | - |
| **Total** | **95.0** | **15.2** |
| **Other finance expenses** | | |
| Losses from sale of financial assets | (0.7) | (11.3) |
| Outsourcing of payables | (73.9) | (84.8) |
| Other finance expenses | (118.7) | (81.1) |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | (34.0) | (9.7) |
| Loss from early conversion of convertible notes 2019 | (15.1) | - |
| Commodity derivatives losses: cash flow hedge | (6.4) | - |
| Loss from commodities forward contracts: non-hedging | (5.4) | (4.8) |
| **Total** | **(254.2)** | **(191.7)** |
| **Other net finance income/expenses** | **(159.2)** | **(176.5)** |

In the year ended December 31, 2015, total other finance income increased to €95.0 million from €15.2 million mainly due to a gain of €90.2 million recorded as a consequence of the conversion right exercised by the holders of the right to convert the exchangeable notes due 2017 into Atlantica Yield shares.

Other finance expense increase to €254.2 million for the year ended December 31, 2015, from €191.7 million for the year ended December 31, 2014. This increase was mainly due to the 2017 and 2019 convertible bonds early conversion that resulted in a loss of approximately €15.1 million, as well as due to the increase in other finance expenses, due to banking fees and commissions related to guarantees, letters of credit, banking transfers and other banking services, certain expenses related to the process of 5 bis as well as due to other minor banking expenses. Additionally, other finance expenses increased due to losses related to the 2017 convertible bond early repayment by an amount of €17 million, fair value of embedded derivative of convertible bond of Befesa and due to the cancelation of the 2017 convertible bond, due to the valuation of the Befesa convertible bond derivative to changes in the fair value of commodity derivatives that started to be treated as non-hedging derivatives after the hedged transaction was no longer considered highly probable.

Other net finance expense decreased to €159.2 million for the year ended December 31, 2015, from €176.5 million for the year ended December 31, 2014.

***Finance expense net***

Finance expense net increased to €868.6 million for the year ended December 31, 2015, compared with an expense of €854.7 million for the year ended December 31, 2014. This increase was mainly due to the aforementioned changes in finance income, finance expenses, net exchange differences and other net finance income/expenses.

***Profit (loss) before income tax***

Profit before income tax decreased to a loss of €1,175.6 million for the year ended December 31, 2015, compared to a profit of €85.4 million for the year ended December 31, 2014. This decrease was attributable to the aforementioned results of the years.

***Income tax benefit/expense***

We had an income tax expense of €22.9 million for the year ended December 31, 2015, compared to an income tax profit of €58.7 million for the year ended December 31, 2014.

For the year ended December 31, 2015, Income tax expense corresponded primarily to the expense recognized for the proposed tax regularization notified by the Administración Tributaria based on inspection stated in the previous year as well as the non-recognition of tax revenues resulting from the negative impacts provided by the current situation of the Company provided by the article 5 bis of Ley Concursal awaiting a greater visibility of the Viability Plan submitted by the Company.

***Profit (loss) from discontinued operations, net of tax***

Loss from discontinued operation increased to €144.0 million for the year ended December 31, 2015, compared to €22.2 million for the year ended December 31, 2014. The increase was mainly due to the loss recorded of Atlantica Yield and to the impairment recorded on the net assets of Atlantica Yield as well that, according to IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, were marked to fair value (based on the quoted price in the NASDAQ Global Select Market as of September 30, 2015) less the costs to sell, which was lower than the book value of the assets.

***Profit attributable to non-controlling interests***

Profit attributable to non-controlling interests increased to €129.2 million loss for the year ended December 31, 2015, from €3.4 million for the year ended December 31, 2014. The increase is mainly due to the portion attributable to minority interest of the results and the impairment recorded in the net assets of Atlantica Yield.

***Profit attributable to the parent company***

Profit attributable to the parent company decreased by 1,068.5% to a loss of €1,213.3 million for the year ended December 31, 2015, compared to a profit of €125.3 million for the year ended December 31, 2014. This decrease was attributable to the results explained above.

***Total comprehensive income***

Total comprehensive income decreased to a loss of €1,819.9 million for the year ended December 31, 2015, compared to a profit of €58.0 million for the year ended December 31, 2014 due to a decrease in profit for the period after income tax and other comprehensive income.

Other comprehensive income decreased by 49.9% to a loss of €477.3 million for the year ended December 31, 2015, compared to a loss of €63.9 million for the year ended December 31, 2014. This was primarily due to an expense of €704.9 million related to translation differences in equity, which corresponds mainly to our subsidiaries with the Brazilian real as their functional currency, which experienced a depreciation against the euro during the period, partially offset by our subsidiaries with the U.S. dollar as their functional currency, which experienced an appreciation against the euro during the period.

**Comparison of Years Ended December 31, 2014 and December 31, 2013**

***Revenue***

Revenue decreased by 1.3% to €7,150.6 million for the year ended December 31, 2014 from €7,245.1 million in the year ended December 31, 2013. On a constant currency basis, revenue for the year ended December 31, 2014 would have been €7,304.8 million, representing an increase of €59.7 million, or 0.8%, compared to the previous year. The decrease in consolidated revenues was due to the decrease in revenue contribution from our Engineering and Construction segment, partially offset by an increase in our Concessions-Type Infrastructure and Industrial Production activities in 2014 compared to 2013.

Within our Engineering and Construction activity, revenues decreased by 6.6% to €4,514.5 million for the year ended December 31, 2014 from €4,831.7 million for the year ended December 31, 2013. The decrease in revenues was primarily attributable to the lower activity of construction resulting from the completion of the 280 MW Solana plant in Arizona (€224 million decrease year-over-year) and the 280 MW Mojave thermo-solar plant in California (€312 million decrease year- over-year), the completion of the Solaben 1/6 thermo-solar plants in Spain (€280 million decrease year-over-year), the completion of the Palmatir wind farm in Uruguay (€64 million decrease year-over-year), lower construction activity on the Kaxu and Khi thermo- solar plants in South Africa (€189 million decrease year-over- year), and lower construction activity on the transmission lines in Brazil (€235 million decrease year-over-year). This effect was partially offset by higher construction activity related to the Atacama thermo- solar plants in Chile (€757 million increase year-over year) and the co-generation plants in Mexico (€226 million increase year-over year). Consistent with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, when accounting for transactions with our discontinued subsidiaries, services provided to Abengoa Yield are recorded as revenues given that Abengoa Yield is classified as discontinued operations in both years, and a corresponding elimination in the same amount is recorded in the heading "Profit (loss) from discontinued operations, net of tax."

Our Concession-Type Infrastructures activity has also continued its growth path, showing a 30.0% increase in the year ended December 31, 2014 compared to the prior year, which was due to the entry into operation of new assets and the strong performance of assets already in operation. In 2014, we brought two assets into operation, which have contributed to the expansion of this segment. Revenue from our Solar segment increased by 29.6% to €335.2 million for the year ended December 31, 2014, from €258.7 million for year ended December 31, 2013. The increase was mainly attributable to the larger contribution from solar plants that entered into operation in Spain in the fourth quarter of 2013 (Solaben 1/6) and improved performance of the Spanish solar plants previously in operation. Revenue from our Transmission segment increased by 92.3% to €91.3 million for the year ended December 31, 2014, from €47.5 million for the year ended December 31, 2013. The increase was primarily attributable to the entry into operation of the Norte Brazil transmission line (Brazil), which covers 2,375 km, as well as the larger contribution from the power transmission line in Manaus (Brazil), which covers 586 km. Revenue in our Water segment has remained relatively stable at €40.8 million for the year ended December 31, 2014 compared with €40.2 million for the year ended December 31, 2013. Revenue in our Co-generation and other segment decreased by 15.6% to €32.0 million for the year ended December 31, 2014, from €38.0 million for the year ended December 31, 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector, given that after the reform a greater portion of the income is a fixed remuneration that was lower than the amount received in the previous year.

Revenue from our Industrial Production activity increased by 5.3% to €2,136.7 million for the year ended December 31, 2014, from €2,029.1 million for the year ended December 31, 2013. The increase was mainly due to an increase in volume of ethanol sold in Europe and in the United States and due to an increase in volume of sugar sold in Brazil.

***Revenue by geographic regions***

The following table sets forth our revenue for the years ended December 31, 2014 and 2013 by geographic region.

| | For the Years ended December 31, | | | |
|---|---|---|---|---|
| | 2014 | | 2013 | |
| | (€ in millions) | % of revenues | (€ in millions) | % of revenues |
| **Consolidated Revenue by Geography** | | | | |
| Spain..... | 889.1 | 12.4 | 1,129.3 | 15.6 |

| | | | | |
|---|---|---|---|---|
| North America | 2,253.6 | 31.5 | 2,670.4 | 36.9 |
| Europe (excluding Spain) | 892.9 | 12.5 | 863.3 | 11.9 |
| Brazil | 874.7 | 12.2 | 726.0 | 10.0 |
| South America (excluding Brazil) | 1,301.8 | 18.3 | 689.6 | 9.5 |
| Other countries | 938.5 | 13.1 | 1,166.5 | 16.1 |
| **Total** | **7,150.6** | **100.0** | **7,245.1** | **100.0** |

Revenue from our international operations (all activities outside of Spain) increased by 2.4% to €6,261.5 million for the year ended December 31, 2014, compared to €6,115.8 million for the previous year. Our international operations accounted for 87.6% of our total revenue, with the Americas (South America, Brazil and North America) representing 62.0% of our total revenue and North America representing the largest geographic region with 31.5% of our total revenue.

*Spain.* Revenue decreased by 21.3% to €889.1 million for year ended December 31, 2014, from €1,129.3 million for the year ended December 31, 2013. This decline was primarily attributable to the decrease in revenues from the completion of the construction of solar plants in Spain (Solaben 1/6). This effect was partially offset by the entry into operation of solar plants during the fourth quarter of 2013 and by the increase in our Biofuels segment due to higher volumes of ethanol sold.

*North America.* Revenue decreased by 15.6% to €2,253.6 million for the year ended December 31, 2014, from €2,670.4 million for the year ended December 31, 2013. The decrease in revenue was primarily attributable to lower construction activity in the United States due to the completion of the Solana and Mojave plants. The decrease was partially offset by higher construction activity in our co-generation plant in Mexico and the year- over-year increase in our Biofuels segment in North America due to the increase in the volume of ethanol sold.

*Europe (excluding Spain).* Revenue increased by 3.4% to €892.9 million for the year ended December 31, 2014, from €863.3 million for the year ended December 31, 2013. The increase in revenue was primarily attributable to higher volumes of biofuels sold in 2014 compared to the previous year, since our ethanol plant in Rotterdam was closed during the first quarter of 2013.

*Brazil.* Revenue increased by 20.5% to €874.7 for the year ended December 31, 2014, from €726.0 million for the year ended December 31, 2013. This increase was mainly due to higher activity in the construction of new transmission lines in Brazil, partially offset by the completion of large projects such as Norte Brazil and Manaus in 2014 and 2013, respectively, and higher sugar sales from our Industrial Production activity.

*South America (excluding Brazil).* Revenue increased by 88.8% to €1,301.8 million for the year ended December 31, 2014, from €689.6 million for the year ended December 31, 2013. The increase in revenue was primarily attributable to the construction of Atacama thermo-solar plants in Chile.

*Other (remaining overseas markets).* Revenue decreased by 19.5% to €938.5 million for the year ended December 31, 2014, from €1,166.5 million for the year ended December 31, 2013. The decrease in revenue was primarily attributable to the lower construction activity at our two thermo-solar plants in South Africa.

***Other operating income***

The following table below sets forth our other operating income for the years ended December 31, 2014 and 2013.

| | For the Years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Other operating income** | | |
| Work performed by the entity and capitalized, and other | 76.0 | 322.3 |
| Grants | 16.7 | 17.8 |
| Income from various services | 95.5 | 101.3 |

| | | |
|---|---|---|
| **Total** | **188.3** | **441.4** |

Other operating income decreased by 57.3% to €188.3 million for the year ended December 31, 2014, from €441.4 million for the year ended December 31, 2013. This decrease was mainly due to the non-recurrence of the gain obtained in 2013 from the sale of our Brazilian subsidiary, Bargoa, S.A., which amounted to €34.2 million before taxes, and income in 2013 of €141.8 million corresponding to a favorable award in arbitrations against Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola, Ltda. See "*Description of Abengoa and Our Business—Legal Proceedings*". The income from this award was recorded in 2013 under the heading "Work performed by the entity and capitalized and other". Additionally, the decrease in other operating income was due to a lower capitalized amount in the construction of our own assets.

***Raw materials consumed***

Raw materials consumed decreased by 8.7% to €4,083.1 million for the year ended December 31, 2014, from €4,469.9 million for the year ended December 31, 2013, due to the decrease in revenue in our Engineering and Construction activity. Raw materials consumed decreased as a percentage of revenue to 57.1% in 2014 from 61.7% in the previous year. This decrease was mainly due to a lower contribution to the revenue mix from construction, an activity which is intensive in raw materials, and to a higher contribution to the revenue mix from our Concession-Type Infrastructure activity.

***Employee benefits expenses***

Employee benefits expenses increased by 15.4% to €871.9 million for the year ended December 31, 2014, from €755.4 million for the year ended December 31, 2013. This increase was attributable to growth in our employee headcount during the period, mainly in our engineering and construction operations due to the fact that we carried out less work through subcontractors. Also, as result of this shift, our independent professional services expenses, which are accounted for under other operating expenses, decreased as a percentage of revenues.

***Depreciation, amortization and impairment charges***

Depreciation, amortization and impairment charges decreased by 8.0% to €474.9 million for the year ended December 31, 2014, from €516.4 million for the year ended December 31, 2013. The decrease was mainly due to the depreciation of the Brazilian real average exchange rate in 2014 and higher receivables impairment recorded in 2013 compared to 2014, partially offset by the entry into operation of new assets in our Solar segment in the fourth quarter of 2013 (Solaben 1/6).

***Other operating expenses***

The following table below sets forth our other operating expenses for the years ended December 31, 2014 and 2013.

| | For the Years ended December 31, | | | |
|---|---|---|---|---|
| | 2014 | | 2013 | |
| | (€ in millions) | % of revenue | (€ in millions) | % of revenue |
| **Other operating expenses** | | | | |
| Research and development costs | 8.7 | 0.1 | 6.5 | 0.1 |
| Leases and fees | 122.5 | 1.7 | 110.8 | 1.5 |
| Repairs and maintenance | 71.2 | 1.0 | 64.7 | 0.9 |
| Independent professional services | 265.8 | 3.7 | 488.7 | 6.7 |
| Transportation | 78.7 | 1.1 | 75.4 | 1.0 |
| Supplies | 115.5 | 1.6 | 123.7 | 1.7 |
| Other external services | 167.4 | 2.3 | 157.3 | 2.2 |
| Taxes | 85.5 | 1.2 | 71.0 | 1.0 |
| Other management expenses | 61.6 | 0.9 | 103.4 | 1.4 |
| **Total** | **976.9** | **13.6** | **1,201.5** | **16.5** |

Other operating expenses decreased by 18.7% to €976.9 million for the year ended December 31, 2014, from €1,201.5 million for the year ended December 31, 2013. This decrease was due to a decrease in independent professional services caused mainly by the fact we carried out less work through subcontractors in our Engineering and Construction activity.

***Operating profit***

Operating profit increased by 24.3% to €933.2 million for the year ended December 31, 2014, from €751.0 million for the year ended December 31, 2013. Operating profit also increased as a percentage of revenues, to 13.1% during the year ended December 31, 2014 from 10.4% during the year ended December 31, 2013, mainly due to the reduction in the raw materials and consumables used and the decline in other operating expenses as a percentage of revenues, as explained above.

***Finance income***

The following table below sets forth our finance income for the years ended December 31, 2014 and 2013.

| | For the Years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Finance income** | | |
| Income from loans and debts | 45.2 | 38.1 |
| Gains from interest-rate derivatives: cash flow hedges | 15.7 | 28.4 |
| Gains from interest-rate derivatives: non-hedging | 1.2 | 0.5 |
| **Total** | **62.1** | **67.0** |

Finance income decreased by 7.4% to €62.1 million for the year ended December 31, 2014, from €67.0 million for the year ended December 31, 2013. The decrease was primarily due to lower income from our cash flow hedge interest-rate derivatives, mainly due to a higher fair value in 2013 of our interest rate options resulting from a decrease in expected future interest rates, partially offset by an increase in income from loans and debts from our term deposits in Brazil.

***Finance expenses***

The following table below sets forth our finance expenses for the years ended December 31, 2014 and 2013.

| | For the Years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Finance expenses** | | |
| Expenses due to interest: | | |
| —Loans from credit entities | 257.0 | 229.4 |
| —Other debts | 376.5 | 269.9 |
| Losses from interest-rate derivatives: cash flow hedges | 92.3 | 83.9 |
| Losses from interest-rate derivatives: non-hedging | 19.6 | — |
| **Total** | **745.4** | **583.2** |

Finance expenses increased by 27.8% to €745.4 million for the year ended December 31, 2014, from €583.2 million for the year ended December 31, 2013. The increase was mainly due to higher interest expense from loans and borrowings as a result of the completion of various projects under construction (interest expense is capitalized when a project is under construction). The interest expense from other debts increased mainly due to new notes issued in the last quarter of 2013 and the first quarter of 2014, and the negative impact of interest rate derivatives classified as non-hedging.

***Net exchange differences***

The following table below sets forth our exchange differences for the years ended December 31, 2014 and 2013.

| | For the Years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Net exchange differences** | | |
| Gains and losses from foreign exchange transactions | (6.5) | 0.3 |
| Gains and losses from foreign exchange contracts: cash flow hedges | 11.2 | (4.2) |
| Gains and losses from foreign exchange contracts: non-hedging | 0.3 | 0.3 |
| **Total** | **5.0** | **(3.5)** |

Net exchange differences remained relatively stable period-over- period at low levels, representing 0.1% of revenues for the year ended December 31, 2014 and 0.05% of for the year ended December 31, 2013. In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, and due to the application of hedge accounting, most of our exchange rate differences are offset by the effect of our cash flow hedge derivatives. The increase in net exchange differences for the year ended December 31, 2014 was mainly due to different hedges in several subsidiaries that have not been offset perfectly with the differences generated by the hedged item.

***Other net finance income/expenses***

| | For the Years ended December 31. | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Other finance income** | | |
| Profits from the sale of financial assets | 0.4 | 0.1 |
| Income on financial assets | 1.7 | 0.6 |
| Other finance income | 13.1 | 18.4 |
| Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares | — | 75.6 |
| Hedging derivatives gains: Cash flow hedge | — | 0.2 |
| Gains from commodities forward contracts: non-hedging | — | — |
| **Total** | **15.2** | **94.9** |
| **Other finance expenses** | | |
| Losses from sale of financial assets | (11.3) | (0.4) |
| Outsourcing of payables | (84.8) | (81.2) |
| Other finance expenses | (81.1) | (110.7) |
| Changes in the fair value of derivatives embedded in the convertible bonds and options over shares | (9.6) | — |
| Losses from partial repayment of the convertible notes due 2014 | — | (12.0) |
| Commodity derivative losses: cash flow hedges | — | — |
| Loss from commodities forward contracts: non-hedging | (4.9) | (9.9) |
| **Total** | **(191.7)** | **(214.2)** |
| **Other net finance income/expenses** | **(176.5)** | **(119.2)** |

Other net finance expense increased to €176.5 million for the year ended December 31, 2014, from €119.2 million for the year ended December 31, 2013.

For the year ended December 31, 2014, total other finance income decreased by 84.0% to €15.2 million, from €94.9 in the previous year. This decrease was mainly due to the change in fair value of embedded derivatives of convertible bonds, net of the change in the fair value of the call options over our own shares that hedge the embedded derivatives, which amounted to a €9.6 million loss recorded under the heading "Other finance expenses" for the year ended December 31, 2014, as compared to a profit of €75.6 million in the prior year.

Total other finance expenses decreased by 10.5% to €191.7 million for the year ended December 31, 2014 compared to €214.2 million for the year ended December 31, 2013. The decrease was mainly due to lower banking fees and commissions, the change in fair value of the derivative embedded in the convertible loan

received as part of the consideration for the sale of the shareholding in Befesa, and losses from changes in the fair value of the embedded derivatives in our convertible bonds due 2017 and call options as discussed above, partially offset by losses incurred in 2013 by the partial repurchase of our convertible bonds due 2014 and financial losses due to a higher volume of uncollectible financial accounts with partners projects in South America recorded in 2013.

***Finance expense net***

Finance expense net increased by 33.8% to €854.8 million for the year ended December 31, 2014, from €638.9 million for the year ended December 31, 2013. The increase in finance expense net was attributable to the aforementioned changes in Finance income, Finance expenses, Net exchange differences and Other net finance income/expenses.

***Profit (loss) before income tax***

Profit before income tax decreased to €85.4 million for year ended December 31, 2014, from €106.9 million for the year ended December 31, 2013. This decrease was attributable to the aforementioned results of the year.

***Income tax benefit/expense***

We had an income tax benefit of €58.7 million for the year ended December 31, 2014, compared to an income tax benefit of €26.2 million for the year ended December 31, 2013, although we actually received income tax for an amount of €8.6 million in 2014 and we paid €12.1 million in 2013. The subsidiaries within the consolidated Group that generate profits usually generate income tax expenses and pay taxes, whereas companies with negative taxable income recognize income tax benefit but they do not obtain a tax refund; instead, they generate tax loss carryforwards that can be offset in future periods. Different types of tax credits generate an income in the income tax expense calculation but they do not reduce the amount of income tax paid in the current period. Rather, they reduce the amount payable in the future.

For the year ended December 31, 2014, Income tax benefit corresponded primarily to the tax benefits that we generated in the period from the application of a tax incentive for the transfer of the use of intangible assets, as specified in Article 23 of the repealed Spanish Corporate Income Tax Act (a positive impact of €5 million). This benefit results in a direct deduction from taxable income of 50% of the revenue generated from granting the use of the related intangible assets (i.e. licensing revenue, etc.). In addition, in 2014, net operating losses have been generated but they have not been recorded considering that their future recoverability is not sufficiently assured and part of the net operating losses recognized in prior years have been reversed (a negative impact of €56 million). Because of the entry into force in Spain of the modification of the general tax rate to 28% in 2015 and to 25% in 2016 onwards (the tax rate applicable in 2014 was 30%), the negative impact was €49 million. There were differences in foreign tax rates related to companies based in jurisdictions with statutory tax rates different from Spanish statutory tax rate (a positive impact of €13 million). Finally, we have recorded other non taxable income and expense which include, among other things, permanent differences arising in different jurisdictions (a negative impact of €5 million).

***Profit (loss) from discontinued operations, net of tax***

In the years ended December 31, 2014 and 2013 and according to IFRS 5, Non-Current Assets Held For Sale and Discontinued Operations, we recorded the results from Abengoa Yield, amounting to a €22.2 million loss net of tax, and a €22.1 million loss, net of tax, respectively as discontinued operations.

For the year ended December 31, 2013, and according to IFRS 5, Non-Current Assets Held For Sale and Discontinued Operations, we recorded the results from the Befesa Sale, amounting to a €0.6 million loss net of tax as discontinued operations.

***Profit attributable to non-controlling interests***

Profit attributable to non-controlling interests increased to €3.4 million for the year ended December 31, 2014, from a loss of €8.9 million for the year ended December 31, 2013. The increase is mainly due to lower from Rioglass Group, Procesos Ecológicos Vilches, S.A. and our construction activities in Brazil and South Africa.

***Profit attributable to the parent company***

Profit attributable to the parent company increased by 23.5% to €125.3 million for the year ended December 31, 2014, compared to €101.4 million for the year ended December 31, 2013. This increase was attributable to the results explained above.

***Total comprehensive income***

Total comprehensive income was €58.0 million for the year ended December 31, 2014, compared to total comprehensive loss of €253.3 million for the year ended December 31, 2013, due to the increases in Profit for the year and Other comprehensive income as explained above.

Other comprehensive loss was €63.9 million for the year ended December 31, 2014, compared to other comprehensive loss of €363.7 million for the year ended December 31, 2013. The increase was mainly due to translation differences in equity, which corresponds mainly to an increase in 2014 from our subsidiaries with the U.S. Dollar as their functional currency, which experienced an appreciation against the euro during the period, and a decrease in 2013 from our subsidiaries with the Brazilian real as their functional currency, which experienced a depreciation against the euro during the year. The increase was partially offset by the increase in fair value of cash flow hedges recorded directly in equity which correspond mainly to interest rate derivatives. These losses are principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable that are higher than the expected variable interest rate receivable. Additionally, €21.4 million corresponds to the amounts related to cash flow hedges transferred to income statements during 2014 compared to €62.2 million in 2013.

In year ended December 31, 2013, we recorded €89.9 million directly in equity corresponding to the change in fair value of cash flow hedges, mostly corresponding to interest rate derivatives. The impact was mainly due to long-term swaps maturing in 2020 and subsequent years. This effect was offset by negative translation differences recorded in equity for an amount of €483.8 million which corresponds mainly to our subsidiaries with the Brazilian real as their functional currency, which experienced a depreciation against the euro during the period.

**Comparison of the Six Months Ended June 30, 2016 and June 30, 2015**

***Revenue by activity***

The following table sets forth our revenue for the six month periods ended June 30, 2016 and 2015, broken down by our three activities and six segments.

| | **(Unaudited) For the six months ended June 30,** | | | |
|---|---|---|---|---|
| | **2016** | | **2015** | |
| | *(€ in millions)* | *(% of revenue)* | *(€ in millions)* | *(% of revenue)* |
| **Revenue** | | | | |
| **Engineering and Construction** | **609.4** | **48%** | **2,159.2** | **64%** |
| Engineering and Construction | 609.4 | 48% | 2,159.2 | 64% |
| **Concession-Type Infrastructures** | **134.5** | **11%** | **259.4** | **8%** |
| Solar | 16.9 | 1% | 123.2 | 4% |
| Water | 30.7 | 2% | 26.1 | 1% |
| Transmission | 63.0 | 5% | 85.7 | 3% |
| Co-generation and other | 23.9 | 2% | 24.4 | 1% |
| **Industrial Production** | **531.5** | **42%** | **971.7** | **29%** |
| Biofuels | 531.5 | 42% | 971.7 | 29% |
| **Total** | **1,275.4** | **100%** | **3,390.3** | **100%** |

*Engineering and Construction.* Revenues in the Engineering & Construction segment has decreased by 71.8% to €609.4 million, which is a decrease of €1,549.8 million compared to the €2,159.2 million of the same period last year. This decrease in revenues is mainly attributable to the current situation of the Group given the strong limitation of financial resources in which is the Company is subjected in the last months and which has significantly affected the evolution of the business after the general deceleration of the Engineering & Construction activity. The main projects under construction affected by all the above situation corresponds to the combined cycle plants in Mexico (AT3 and AT4), to thermo-solar plants and photovoltaic in Chile (Atacama solar plant), thermos-solar plants in South Africa and to transmission lines in Brazil. In addition to the above,

there has been a decrease in revenues due to the negative impacts as a consequence of the finalization of the construction in 2015 of certain transmission line projects in Peru and Poland.

*Concession-Type Infrastructure.* Revenues in concession-type infrastructures decreased by 47.9% to €134.5 million, which is a decrease of €125.1 million compared to the €259.4 million of the same period last year. This decrease in revenues is mainly attributable to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreement and corresponds to desalination plants in Algeria (Skikda and Honaine), to a transmission line in Peru (ATN2), to thermo-solar plants in Spain (Helioenergy 1 and 2, Helios 1 and 2, Solnova 1, 3 and 4, Solaben 1 and 6) and a thermo-solar plant in South Africa (Kaxu Solar One).

- *Solar*: Revenue decreased by 86.3% to €16.9 million for the six months ended June 30, 2016, from €123.2 million for the six months ended June 30, 2015. The decrease was mainly due to lower revenues due to the plants sold to Atlantica Yield under the ROFO Agreement. As a result, we achieved a lower net electricity production for the six months ended June 30, 2016 compared the same period in 2015.

- *Water*: Revenue increased by 17.6% to €30.7 million for the first six months ended June 30, 2016 from €26.1 million for the six months ended June 30, 2015. The increase was primarily attributable to a higher production of the new plants, partially offset due to lower revenue due to the plants sold to Atlantica Yield under the ROFO agreement.

- *Transmission:* Revenue decreased by 26.5% to €63.0 million for the six months ended June 30, 2016, from €85.7 million for the six months ended June 30, 2015. The decrease was primarily attributable to a lower performance of lines in operation and the impact of the depreciation of the Brazilian real.

- *Co-generation and other*: Revenue decreased by 2.4% to €23.9 million for the first six months ended June 30, 2016, from €24.5 million for the six month period ended June 30, 2015. This decrease was mainly due to the depreciation of the Braziliam real.

*Industrial Production:*

- *Biofuels*: Industrial production revenues decreased by 45.3% to €531.5 million, which is a decrease of €440.2 million compared to €971.7 million of the same period last year. This decrease on revenues is mainly attributable to the current situation of the Group mentioned before and has caused a deceleration and the stoppage, in certain situations, of the activity of certain plants in Europe and USA. All this impact has been partially offset by the positive impact in volume of ethanol and sugar sold in Brazil derived from higher raw material stocks from the previous harvest and the beginning of the current harvest, as well as higher prices in both products in relation with the same period of the previous year.

***Consolidated EBITDA by activity***

The following table sets forth our Consolidated EBITDA for the six month periods ended June 30, 2016 and 2015, broken down by our three activities and six segments.

| | **(Unaudited) For the six months ended June 30,** | |
|---|---|---|
| | **2016** | **2015** |
| | *(€ in millions)* | |
| **Consolidated EBITDA** | | |
| **Engineering and Construction** | **(6.7)** | **450.7** |
| Engineering and Construction | (6.7) | 450.7 |
| **Concession-Type Infrastructure** | **92.6** | **184.0** |
| Solar | 10.9 | 86.1 |
| Water | 21.8 | 23.9 |
| Transmission | 46.5 | 62.0 |
| Co-generation and other | 13.4 | 12.0 |
| **Industrial Production** | **7.1** | **15.7** |

| | (Unaudited) For the six months ended June 30, | |
|---|---|---|
| | **2016** | **2015** |
| | *(€ in millions)* | |
| Biofuels | 7.1 | 15.7 |
| **Total** | **93.0** | **650.4** |

*Engineering and Construction.* Engineering & Construction EBITDA decreased by 101.5% to €-6.7 million, which is a decrease of €457.4 million, compared to the €450.7 million in the same period in the last year. This decrease in EBITDA is mainly attributable to the current situation of the Group, which has caused the deceleration in the projects under construction mentioned before and consequently the EBITDA obtained in each of them. Additionally the decrease in EBITDA is due to the negative impacts as a consequence of the finalization of the construction during 2015 of certain projects of transmission lines in Peru and Poland mentioned before.

*Concession-Type Infrastructure.* Concession-type infrastructure EBITDA has decreased by 49.4% to €92.6 million, which is a decrease of €91.4 million compared to the €184.0 million on the same period last year. This decrease in EBITDA is also mainly attributed to what has been mentioned in the previous section related to the negative impacts as a consequence of the sale to Atlantica Yield of certain owner companies of concession-type plants during 2015 under the ROFO agreements mentioned before.

- *Solar:* Consolidated EBITDA decreased by 87.3% to €10.9 million for the first six months of 2016, from €86.1 million for the same period in 2015. The decrease in the Consolidated EBITDA was primarily attributable to the solar plants that were sold to Atlantica Yield under the ROFO Agreement.

- *Water:* Consolidated EBITDA decreased by 8.8% to €21.8 million for the first six months of 2016, from €23.9 million for the same period in 2015. The decrease in the consolidated ebitda was primarily attributable to the water desalination plants of Skikda and Honaine that were sold to Atlantica Yield under the ROFO agreement.

- *Transmission:* Consolidated EBITDA decreased by 25.0% to €46.5 million for the first six months of 2016, from €62.0 million for the same period in 2015. The decrease was primarily attributable to a lower performance of lines in operation.

- *Co-generation and other:* Consolidated EBITDA increased by 11.7% to €13.4 million for the first six months of 2016, from €12.0 million for the same period in 2015. This increase was attributable to a stronger performance in this segment.

*Industrial Production.*

- *Biofuels:* Industrial production EBITDA reached a positive outcome of €7.1 million, which is a decrease of €8.6 million compared to the positive EBITDA of €15.7 million in the same period last year. This decrease in EBITDA is mainly attributable to the negative impact given the current situation of the Group which, as mentioned before, has caused the deceleration and the stoppage in certain situations of the activity in certain plants in Europe and USA, mainly including the loss of control of the plant in Holland at the beginning of May. All this impact has been partially offset by the positive impacts in EBITDA in volume of ethanol and sugar sold in Brazil derived from higher raw material stocks from the previous harvest and the beginning of the current harvest, as well as better margins in ethanol in Europe and higher prices in Brazil.

The following table provides reconciliations of Consolidated EBITDA to line items in our Consolidated Condensed Interim Financial Statements for the six month periods ended June 30, 2016 and 2015.

| | (Unaudited) For the six months ended June 30, | |
|---|---|---|
| | 2016 | 2015 |
| | *(€ in millions)* | |
| **Reconciliation of profit for the year to Consolidated EBITDA** | | |
| **Profit for the year** | (3,314.2) | 72.1 |
| Non-controlling interest | (5.6) | (9.2) |
| Profit/(loss) for the year from discontinued operations, net of tax | - | 4.7 |
| Income tax expenses/(benefits) | (28.9) | 60.5 |
| Share of loss/(profit) of associated companies | 3.2 | 5.7 |
| Net finance expenses | (1,105.2) | (429.8) |
| **Operating profit** | (2,177.7) | 440.3 |
| Depreciation, amortization and impairment changes | (2,270.7) | (210.1) |
| **Consolidated EBITDA (unaudited)** | 93.0 | 650.4 |

**Comparison of Years Ended December 31, 2015 and December 31, 2014**

***Revenue by activity***

The following table sets forth our revenue for the years ended December 31, 2015 and December 31, 2014, broken down by our three activities and six segments.

| | (Unaudited) December 31, | | | |
|---|---|---|---|---|
| | 2015 | | 2014 | |
| | *(€ in millions)* | *(% of revenue)* | *(€ in millions)* | *(% of revenue)* |
| **Revenue** | | | | |
| **Engineering and Construction** | 3,330.2 | 57.9% | 4,514.5 | 63.1% |
| Engineering and Construction | 3,330.2 | 57.9% | 4,514.5 | 63.1% |
| **Concession-Type Infrastructures** | 406.8 | 7.1% | 499.4 | 7.0% |
| Solar | 166.5 | 2.9% | 335.2 | 4.7% |
| Water | 53.0 | 0.9% | 40.8 | 0.6% |
| Transmission | 143.5 | 2.5% | 91.3 | 1.3% |
| Co-generation and other | 43.8 | 0.8% | 32.0 | 0.4% |
| **Industrial Production** | 2,018.5 | 35.1% | 2,136.7 | 29.9% |
| Biofuels | 2,018.5 | 35.1% | 2,136.7 | 29.9% |
| **Total** | **5,755.5** | **100.0%** | **7,150.6** | **100.0%** |

*Engineering and Construction.* Revenue decreased by 26.2% to €3,330.2 million for the year ended December 31, 2015, from €4,514.5 million for the year ended December 31, 2014, primarily due to the situation provided by the article 5 bis of Ley Concursal in the last quarter of 2015, which has prompted lower sales in €1,184.3 million in comparison with the same period in 2014. In addition, lower sales have been recorded in the construction of projects in the U.S. (Mojave and PGE), wind farm in Uruguay (Cadonal), thermo-solar plant in Israel (Ashalim) and combined cycle plants in Poland (Stalowa Wola) and Mexico (A3T and A4T). The decrease was partially offset by higher revenues related to the construction of solar plants Chile (Atacama Solar Platform) and transmission lines in Brazil.

*Concession-Type Infrastructure.* Revenue decreased by 18.4% to €406.8 million for the year ended December 31, 2015, from €499.4 million for the year ended December 31, 2014, primarily due to a decrease in

revenues from the plants sold to Atlantica Yield during 2015 and the last quarter of 2014 under the ROFO agreement. The decrease was partially offset by new assets that were brought into operation during the last quarter of 2014 and the first quarter of 2015 (water desalination plants in Algeria and Ghana, the power transmission line Norte Brazil and the Manaus hospital urgencies unit in Brazil).

- *Solar:* Revenue decreased by 50.3% to €166.5 million for the year ended December 31, 2015, from €335.2 million for the year ended December 31, 2014. The decrease was mainly due to the plants sold to Atlantica Yield during 2015 and the last quartes of 2014 under the ROFO agreement.

- *Water:* Revenue increased by 29.7% to €53.0 million for the year ended December 31, 2015 from €40.8 million for the year ended December 31, 2014. The increase was primarily attributable to the entry into operation in the last quarter of 2014 and first quarter of 2015 of two desalination plants in Africa (Algeria and Ghana). The increase was partially offset by lower revenues generated by the plants sold to Abengoa Yield (Skikda) and by the sale of our Quingdao plant in China during the last quarter of 2014.

- *Transmission:* Revenue increased by 57.1% to €143.5 million for the year ended December 31, 2015, from €91.3 million for the year ended December 31, 2014. The increase was primarily attributable to the entry into operation of the Norte Brazil transmission line in the last quarter of 2014, which covers 2,735 km, as well as due to the strong performance of lines that were already in operation.

- *Co-generation and other:* Revenue increased by 36.8% to €43.8 million for the year ended December 31, 2015, from €32.0 million for the year ended December 31, 2014. This increase was mainly due to the entry into operation of the Hospital de Manaus emergency unit in Brazil.

*Industrial Production:*

- *Biofuels*: *Revenue* decreased by 5.5% to €2,018.5 million for the year ended December 31, 2015, from €2,136.7 million for the year ended December 31, 2014. This decrease was mainly due to the decrease in volumes of ethanol sold in Europe and Brazil partially offset by the increase in volumes of ethanol sold in the United States (lowered by a decrease in prices of ethanol sold in the United States), and higher prices of biofuels sold in Europe.

***Consolidated EBITDA by activity***

*Engineering and Construction.* Consolidated EBITDA decreased by 76.1% to €193.1 million for the year ended December 31, 2015, from €805.9 million for the year ended December 31, 2014. Consolidated EBITDA margin decreased to 5.8% for the year ended December 31, 2015, compared to 17.9% in the same period 2014. The decrease in margin is related to both the lower activity of Engineering and Construction in the last quarter of 2015 and the negative adjustments prompted by the situation provided by the article 5 bis of the Ley concursal, (and have totaled a total of €-383 million of Ebitda).

*Concession-Type Infrastructure.* Consolidated EBITDA decreased by 14.5% to €282.5 million for the year ended December 31, 2015, from €330.7 million for the year ended December 31, 2014. Consolidated EBITDA margin in these activities increased to 69.3% for the year ended December 31, 2015, compared to 66.1% in the year ended December 31, 2014. This decrease is due to a decrease in revenues from the plants sold to Atlantica Yield during 2015 and the last quarter of 2014 under the ROFO agreement.

- *Solar:* Consolidated EBITDA decreased by 51.3% to €115.0 million for the year ended December 31, 2015, from €235.9 million for the year ended December 31, 2014. The decrease was mainly due to the plants sold to Atlantica Yield during 2015 and the last quartes of 2014 under the ROFO agreement.

- *Water:* Consolidated EBITDA increased by 61.5% to €42.3 million for the year ended December 31, 2015, from €26.6 million for the year ended December 31, 2014. The increase was primarily attributable to the entry into operation in the last quarter of 2014 and the first

quarter of 2015 of two desalination plants in Africa (Algeria and Ghana). The increase was partially offset by a decrease in EBITDA generated by the plants sold to Abengoa Yield (Skikda) and by the sale of our Quingdao plant in China during the last quarter of 2014.

- *Transmission:* Consolidated EBITDA increased by 67.2% to €107.3 million for the year ended December 31, 2015, from €64.3 million for the year ended December 31, 2014. The increase was primarily attributable to the entry into operation of the Norte Brazil transmission line, which covers 2,735 km, and to the strong performance of lines that were already in operation.

- *Co-generation and other:* Consolidated EBITDA increased by 358.9% to €17.9 million for the year ended December 31, 2015, from €3.9 million for the year ended December 31, 2014 This increase was mainly due to the entry into operation of the Hospital de Manaus emergency unit in Brazil.

*Industrial Production.*

- *Biofuels:* Consolidated EBITDA decreased by 85.2% to €39.8 million for the year ended December 31, 2015, from €271.5 million for the year ended December 31, 2014. Consolidated EBITDA margin in this segment decreased to 2% for the year ended December 31, 2015, from 12.7% for the year ended December 31, 2014, mainly driven by lower margins in the USA and Brazil. The decrease in margins in the U.S was mainly due to the decrease in ethanol prices. The decrease in margins in Brazil was mainly due to lower yields from raw materials used in ethanol production during the year 2015 compared to the 2014. The decrease in margins in the U.S. and Brazil were partially offset by an increase in the crush spread in Europe (including Spain) due to an increase in biofuels prices in the year 2015 compared to 2014.

The following table provides reconciliations of Consolidated EBITDA to line items in our Consolidated Condensed Interim Financial Statements for the the years ended December 31, 2015 and 2014.

| | **(Unaudited) December 31,** | |
|---|---|---|
| | **2015** | **2014** |
| | *(€ in millions)* | |
| **Reconciliation of profit for the year to Consolidated EBITDA** | | |
| **Profit for the year** | **(1,342.7)** | **121.9** |
| Profit/(loss) for the year from discontinued operations, net of tax | 144.3 | 22.2 |
| Income tax expenses/(benefits) | 22.9 | (58.7) |
| Share of loss/(profit) of associated companies | 8.0 | (7.0) |
| Net finance expenses | 868.6 | 854.8 |
| **Operating profit** | **(298.9)** | **933.2** |
| Depreciation, amortization and impairment changes | 814.3 | 474.9 |
| **Consolidated EBITDA (unaudited)** | **515.4** | **1,408.0** |

**Comparison of Years Ended December 31, 2014 and December 31, 2013**

***Revenue by activity***

The following table sets forth our revenue for the years ended December 31, 2014 and 2013 by our three activities and six segments.

| | **For the Years ended December 31,** | | | |
|---|---|---|---|---|
| | **2014** | | **2013** | |
| | **(€ in millions)** | **% of revenue** | **(€ in millions)** | **% of revenue** |
| **Revenue** | | | | |
| **Engineering and Construction** | **4,514.5** | **63.1** | **4,831.7** | **66.7** |
| Engineering and Construction | 4,514.5 | 63.1 | 4,831.7 | 66.7 |

| | | | | |
|---|---|---|---|---|
| **Concession-Type Infrastructures** | **499.4** | **7.0** | **384.3** | **5.3** |
| Solar | 335.2 | 4.7 | 258.7 | 3.6 |
| Water | 40.8 | 0.6 | 40.2 | 0.6 |
| Transmission | 91.3 | 1.3 | 47.5 | 0.7 |
| Co-generation and other | 32.0 | 0.4 | 38.0 | 0.5 |
| **Industrial Production** | **2,136.7** | **29.9** | **2,029.1** | **28.0** |
| Biofuels | 2,136.7 | 29.9 | 2,029.1 | 28.0 |
| **Total** | **7,150.6** | **100.0** | **7,245.1** | **100.0** |

*Engineering and Construction.* Revenue decreased by 6.6% to €4,514.5 million for the year ended December 31, 2014 from €4,831.7 million for the year ended December 31, 2013. The decrease in revenue was primarily attributable to the lower activity of construction resulting from the completion of the 280 MW Solana plant in Arizona (€224 million decrease year-over-year) and the 280 MW Mojave thermo-solar plant in California (€312 million decrease year- over-year), the completion of the Solaben 1/6 thermo-solar plants in Spain (€280 million decrease year-over-year), the completion of the Palmatir wind farm in Uruguay (€64 million decrease year-over-year), lower construction activity on the Kaxu and Khi thermo- solar plants in South Africa (€189 million decrease year-over- year), and lower construction activity on the transmission lines in Brazil (€235 million decrease year-over-year). This effect was partially offset by higher construction activity related to the Atacama thermo- solar plants in Chile (€757 million increase year-over year) and the co-generation plants in Mexico (€226 million increase year- over year).

*Concession-Type Infrastructure.* Revenue increased by 30.0% to €499.4 million for the year ended December 31, 2014, from €384.3 for the year ended December 31, 2013. The increase in revenue was primarily attributable to the entry into operation of new assets and the larger contribution from assets already in operation. In 2014, we brought two assets into operation, which have contributed to the expansion of this segment.

- *Solar*: Revenue increased by 29.6% to €335.2 million for the year ended December 31, 2014, from €258.7 million for year ended December 31, 2013. The increase was mainly attributable to the larger contribution from solar plants that entered into operation in Spain in the fourth quarter of 2013 (Solaben 1/6), and by better performance of our Spanish solar plants in operation.

- *Water*: Revenue remained stable at €40.8 million for the year ended December 31, 2014, from €40.2 million for the year ended December 31, 2013.

- *Transmission*: Revenue increased by 92.3% to €91.3 million for the year ended December 31, 2014, from €47.5 million for the year ended December 31, 2013. The increase was primarily attributable to the entry into operation in the fourth quarter of 2014 of our Norte Brazil transmission line (Brazil), which covers 2,375 km, as well as the larger contribution from our power transmission line in Manaus (Brazil), which covers 586 km.

- *Co-generation and other*: Revenue decreased by 15.6% to €32.0 million for the year ended December 31, 2014, from €38.0 million for the year ended December 31, 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector, given that after the reform a greater portion of the income is a fixed remuneration, which in turn, represents lower than the amount received in the previous year.

*Industrial Production:*

- *Biofuels*: Revenue increased by 5.3% to €2,136.7 million for the year ended December 31, 2014, from €2,029.1 million for the year ended December 31, 2013. The increase was mainly due to an increase in volume of ethanol sold in Europe and in the United States and an increase in the volume of sugar sold in Brazil.

***Consolidated EBITDA by activity***

The following table sets forth our Consolidated EBITDA for the years ended December 31, 2014 and 2013 by our three activities and six segments.

| | For the years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Consolidated EBITDA** | | |
| **Engineering and Construction** | **806.0** | **806.5** |
| Engineering and Construction | 806.0 | 806.5 |
| **Concession-Type Infrastructure** | **330.6** | **220.0** |
| Solar | 235.9 | 156.8 |
| Water | 26.5 | 28.1 |
| Transmission | 64.3 | 27.7 |
| Co-generation and other | 3.9 | 7.3 |
| **Industrial Production** | **271.4** | **240.9** |
| Biofuels | 271.4 | 240.9 |
| **Total** | **1,408.0** | **1,267.4** |

*Engineering and Construction.* Consolidated EBITDA decreased by 0.1% to €806.0 million for the year ended December 31, 2014, from €806.5 million for the year ended December 31, 2013. Consolidated EBITDA margin increased to 17.9% for 2014, compared to 16.7% in 2013. The increase in margins in 2014 is related to projects with higher contribution of technology where we manufacture many of the components needed for the construction of an asset (such as transmission power lines and solar plants).

*Concession-Type Infrastructure.* Consolidated EBITDA increased by 50.3% to €330.6 million for the year ended December 31, 2014, from €220.0 million for the year ended December 31, 2013. Consolidated EBITDA margin in this activity increased to 66.2% for 2014, compared to 57.2% in 2013.

- *Solar*: Consolidated EBITDA increased by 50.4% to €235.9 million for the year ended December 31, 2014, from €156.8 million for 2013. The increase in Consolidated EBITDA was primarily attributable to the solar plants in Spain that entered into operation in the fourth quarter of 2013 (Solaben 1/6), as a result, the average capacity in terms of installed MW available throughout the period increased by 100 MW. This increase in average capacity, together with better weather conditions registered during 2014 compared to the previous year and the solid performance of the plants, resulted in higher net electricity production for the year ended December 31, 2014 compared with the previous year.

- *Water*: Consolidated EBITDA decreased by 5.7% to €26.5 million for the year ended December 31, 2014, from €28.1 million for the year ended December 31, 2013. This decrease was primarily attributable to lower activity of the desalination plant Aguas de Skikda.

- *Transmission*: Consolidated EBITDA increased by 132.1% to €64.3 million for the year ended December 31, 2014, from €27.7 million for the year ended December 31, 2013. The increase was primarily attributable to the entry into operation of the Norte Brazil transmission line (Brazil), which covers 2,375 km, and to the larger contribution of the Manaus power transmission line in Brazil, which entered into operation in the first quarter of 2013 and covers 586 km.

- *Co-generation and other*: Consolidated EBITDA decreased by 46.6% to €3.9 million for the year ended December 31, 2014, from €7.3 million for the year ended December 31, 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector.

*Industrial Production.*

- *Biofuels*: Consolidated EBITDA increased by 12.7% to €271.4 million for the year ended December 31, 2014, from €240.9 million for the year ended December 31, 2013, mainly driven by higher margins on ethanol in the United States and sugar in Brazil, and partially offset by lower margins on ethanol in Europe due to the decrease in average ethanol prices in Europe.

The following table provides reconciliations of Consolidated EBITDA to line items in our Consolidated Annual Financial Statements for the years ended December 31, 2014 and 2013.

| | Years ended December 31, | |
|---|---|---|
| | 2014 | 2013 |
| | (€ in millions) | |
| **Reconciliation of profit for the year to Consolidated EBITDA** | | |
| **Profit for the year** | **144.1** | **133.1** |
| Income tax expenses/(benefits) | (58.7) | (26.2) |
| Share of loss/(profit) of associated companies | (7.0) | 5.2 |
| Net finance expenses | 854.8 | 638.9 |
| **Operating profit** | **933.2** | **751.0** |
| Depreciation, amortization and impairment changes | 474.9 | 516.4 |
| **Consolidated EBITDA (unaudited)** | **1,408.0** | **1,267.4** |

**Liquidity and Capital Resources**

***Liquidity Sources and Capital Requirements***

Our principal liquidity and capital requirements consist of the following:

- costs and expenses related to the operation of our business;
- capital expenditures for existing and new plants and operations; and
- debt service requirements on our existing and future debt;

Our principal sources of liquidity are the following:

- cash provided by our operations and our financing activities with financial institutions and in the global capital markets
- cash from asset disposals
- cash and cash and equivalents and short-term financial investments

With respect to the costs and expenses relating to the operation of our businesses, as of June 30, 2016, we had current liabilities (trade payables, tax liabilities, derivative financial liabilities and provisions) of €3,378 million, compared to €4,688 million at December 31, 2015. Of this amount, €3,206 million (€4,379 million as of December 31, 2015) represents trade payables. Of this trade payable amount, €733 million (€1,256 million as of December 31, 2015) represents amounts payable to suppliers through "confirming without recourse" agreements entered into with a number of financial entities, whereby suppliers are paid 180 days after approval of invoices, which has historically facilitated a relatively high level of trade payables in our operations. Such amounts payable benefit from required cash deposits, recorded under short-term financial investments and cash and cash equivalents (approximately €9 million as of June 30, 2016 and €464 million as of December 31, 2015), that are linked to suppliers paid through such "confirming without recourse" agreements.

With respect to the debt service requirements on our existing and future debt, as of June 30, 2016, we had €7,342 million of Gross Corporate Debt and €2,607 million of Project Debt (which includes €2.127 million of bridge loans) compared to €6,568 million and €3,070 million as of December 31, 2015, respectively. As of June 30, 2016, we had €6,998 million of short-term Gross Corporate Debt, representing 95% of our Gross Corporate Debt. Our debt maturities as of June 30, 2016 for the following twelve months amount to €12,983 million, out of which €2,607 million relate to Project Debt to be repaid with cash flows to be generated from the projects in respect of which that financing was incurred and €6,998 million relate to corporate financing maturities. For further discussion of our Gross Corporate Debt and Project Debt, see "*−Financing Arrangements−Corporate Financing"* and *"−Financing Arrangements−Project Debt*", below.

As of June 30, 2016, our cash and cash equivalents were €277 million and our short-term financial investments were €200 million, which compare to €681 million and €519 million, respectively as of December 31, 2015. We also had other current assets (clients and other receivables and inventories) amounting to €2,117 million.

Given our inability to serve debt payments as they fall due, we have developed a five year viability plan, which has served as a basis for the Restructuring Agreement entered into on September 23, 2016. This plan takes into

account the primary focus on E&C projects for third parties and the limitation on new concessional investments until 2018 as well as the divestments in certain projects and sectors.

According to this plan, the total operating cash flow expected for the next five years amounts to €1,017 million (out of which, -€140 million and €271 million for 2016 and 2017, respectively). Given that for most of 2016 our business activity was halted due to the financial Restructuring Process, the operational cash flow generation was reduced drastically. In the fourth quarter of 2016, after the completion of the financial restructuring, we expect our business activity to be reactivated and therefore generate higher operating cash-flows starting in 2017. Taking into account overheads, one-off costs and expenses related to the financial Restructuring Process, certain contingencies and corporate taxes, the total cash needs for the next five years amount to €607 million (out of which, €643 million and €187 million for 2016 and 2017, respectively).

Operating cash-flow figures include capital expenditures in addition to other net operational flows needed to complete the projects, mainly supplier payments and proceeds from customers related to the works performed. As a general rule, we do not commit our own equity in projects until the associated long-term financing is obtained. Going forward, as we continue to transition to an "asset-light" business model under our corporate strategy based on the updated viability plan, we intend to postpone any new development of greenfield concessional-projects (Integrated Product) until the first quarter of 2018. In 2018, once we begin again to seek new opportunities in Integrated Products, we intend to reduce the capital required from us during the construction phase of greenfield projects by attracting equity partners that will invest early in the process, and whose capital can be recycled into new projects over time. This figure amounts to €535 million between 2018 and 2020, which will require us to seek projects and partners that do not require significant equity investment by us. Our existing projects will require still some cash contributions to be completed, which has been minimized according to the criteria of our viability plan to focus on selected concessional assets with the objective of minimizing cash-flow consumption.

As a result of the financial Restructuring Process, we expect our working capital needs to be reduced in the future. As we implement the changes in the updated viability plan, for example the divestments in certain projects and sectors, our operational activity will be reduced in comparison to previous years. This will have an effect on the working capital needs of the Company. Going forward we expect to rely to a significant extent on the following tools to generate cash flows from working capital: (i) use non-recourse factoring for many of our receivables, pursuant to which we are able to advance payment of amounts owed to us under such receivables in return for a fee; and (ii) we intend to negotiate payment terms to suppliers of at least 60 days (vs. payment at 180 days vía 'confirming', as was the case prior to our financial restructuring). In this way, we expect to allow our projects to be cash flow positive throughout their life.

We intend to fund our cash needs through asset disposals and the withdrawal of approximately €508 million of the new committed facilities. In the viability plan presented on August 16, 2016 we included the expectation of achieving €421 million in disposal of non-core assets throughout the period 2016-2020, with €285 million expected in 2016 and €136 million in 2017. As of June 30, 2016 €72 million was already received with an additional €65 million as of the date hereof, which would leave €148 million before the end of 2016.

We have a track record of unlocking value through asset disposals. Since the beginning of 2014, we have completed, among others, (i) the Atlantica Yield IPO for total gross proceeds of $828.7 million (€611.1 million) and the sale to Atlantica Yield of four packages of assets in our Concession-Type Infrastructures activity pursuant to the ROFO Agreement for aggregate gross proceeds of €1.3 billion, (ii) on January 22, 2015, we completed an initial divestment of 13% of Atlantica Yield for total gross proceeds of $328 million (iii) in the second quarter of 2015, we received €194.9 million from EIG in connection with the contribution of the Atacama I Project to APW1 (iv) during 2016, we have completed the sales of the thermal solar power plant Shams in the Abu Dhabi (equivalent of €27 million of net cash proceeds in US dollars), five photovoltaic solar assets in Spain (total cash proceeds of €12.2 million), the Campo Palomas wind farm in Uruguay (equivalent of €34million cash proceeds in US dollars), an 80% stake in the San Antonio Water Systems project in Texas, the thermal power plant Ashalim in Israel (equivalent of approximately €78 million of cash proceeds), as well as several real estate assets primarily in Spain (total cash proceeds of approximately €15.5 million). We have also recently entered into an agreement to sell our 3% stake in Yoigo (estimated total cash proceeds of approximately €35 million, out of which 21 million would be paid upon closing in 2016 and 14 million linked to Yoigo's profits over the coming years), monetized the Befesa convertible debt (approximately €26 million in cash proceeds), and the divestment in one of our telecommunication service subsidiaries, Abentel. Additionally, pursuant to a bidding procedures order filed with the Bankruptcy Court, we auctioned the biofuel plants Ravenna, Colwich and York plants in Nebraska, the Mt. Vernon plant in Indiana, and the Madison plant in Illinois on August 22, 2106 and the sales are expected to close by September 30, 2016

Going forward, Atlantica Yield constitutes a vehicle through which we may execute some of our asset disposals, because Atlantica Yield is a natural buyer of the assets we are building and benefits from a significantly lower cost of capital than us. Nevertheless, we also plan to continue selling assets to third parties in cases where Atlantica Yield does not purchase some of our assets. In addition, any joint ventures we enter into in the future are expected to partner with us during the construction period of the assets, providing a significant part of the equity required for the roll-over of our capital expenditure plan over the next seven to eight years. Our asset disposal plan indicated in the updated viability plan will be a key component in our liquidity going forward.

Pursuant to the Restructuring Agreement signed on September 23, 2016, assuming accession thereto by the requisite majorities of creditors and homologation of the Restructuring Agreement by the Mercantile Court of Seville and implementation of the Restructuring Agreement through local recognition proceedings in the relevant jurisdictions, we expect to achieve a reduction in our debt and extension of our debt maturities.

Our liquidity plans are subject to a number of risks and uncertainties, some of which are outside of our control. Macro-economic conditions could limit our ability to successfully execute our business and liquidity plans.

***Sources of Liquidity***

Our primary sources of liquidity have historically been cash provided by our operations and our financing activities with financial institutions and in the global capital markets as well as proceeds from asset disposals. We utilize a combination of Corporate Financing and Project Debt to finance our cash needs and the growth of our business. In addition, we have generated proceeds from asset disposals.

Cash generated by operations includes mostly the EBITDA generated in the period as well as cash flow generated from working capital. See "*—Discussion of Cash Flows*". We rely to a significant extent on the following tools to generate cash flows from working capital: (i) we enter into agreements with financial institutions pursuant to which we outsource payment to suppliers through them and they process payments 180 days after approval of invoices; (ii) we use non-recourse factoring for many of our receivables, pursuant to which we are able to advance payment of amounts owed to us under such receivables in return for a fee; and (iii) we attempt to negotiate advances from customers related to construction works we perform in our Engineering and Construction segment. The use of these tools has allowed some of our projects to be cash flow positive throughout their life. Our outsourcing of payables implies suppliers are paid through financial institutions under "confirming without recourse" agreements 180 days after the invoices are internally approved (which requires us in certain cases to maintain cash deposits within the relevant financial institutions or otherwise on a restrictive basis, €24 million and €465 million as of June 30, 2016 and December 31, 2015 respectively), with suppliers having the option to collect in advance with a discount. Non-recourse factoring allows us to collect on invoices as soon as they are certified by our customers (based on percentage of completion milestones agreed to in our contracts). Therefore, in quarters of high execution and invoicing, we can generate significant cash flows from collections, whereas payments on work performed are generally made in the subsequent two quarters. This

causes certain seasonality in our cash flows, with cash typically generated towards the end of the year, and payments made in the first half of the year.

During the first half of 2016, as a result of the concerns regarding our liquidity position triggered by the lowering of our guidance for 2016 corporate free cash flow, some financial institutions have delayed renewing their "confirming without recourse" agreements with us, leading to significant cash outflows as we were required to pay suppliers sooner than we typically would under our normal 180-day payment terms and significantly adversely affecting our liquidity position. Our ability to improve our short-term liquidity position is dependent on our renewing or replacing those "confirming without recourse" agreements on a timely basis, which in turn depends to a significant extent on the successful completion of the Rights Offering. If we are unable to renew or replace our "confirming without recourse" agreements and fail to raise the anticipated cash proceeds from our asset disposal program, this would materially adversely impact our near-term liquidity position, our ability to manage our working capital requirements across our activities and stabilize our operations and relationships with our business partners, failing which we could become insolvent.

We conduct our financing activities through a diversified network of financial institutions and in the global capital markets. We have historically refinanced or renewed our bilateral credit agreements and other indebtedness coming due at or prior to maturity. Credit ratings affect the cost and other terms upon which we are able to obtain liquidity through financing (or refinancing). A downgrade or negative outlook of our corporate family or of our outstanding securities may adversely affect our ability to obtain financing on commercially acceptable terms, or at all, and therefore materially adversely affect our liquidity position (including our ability to repay our outstanding indebtedness).

We also rely on asset disposals to fund our liquidity requirements. Since the beginning of 2014, we have completed the Abengoa Yield IPO for total gross proceeds of $828.7 million (€611.1 million) and the sale to Abengoa Yield of four packages of assets in our Concession-Type Infrastructures activity pursuant to the ROFO Agreement for aggregate gross proceeds of €1.3 billion (including €71 million from the unlocking of a portion of our equity investment in the fourth package of assets through a refinancing of the related project debt). Furthermore, on January 22, 2015, we completed an initial divestment of 13% of Abengoa Yield for total gross proceeds of $328 million. In addition, in the second quarter of 2015, we received €194.9 million from EIG in connection with the contribution of the Atacama I Project to APW1, and we expect €267.8 million to be released from escrow to us in connection with the sale of a 46.29% preferred equity stake in the holding company for the assets related to the ATE T&D Project as the longer term project finance for each individual project therein is closed. Prior to that, during the period 2011-2013, we completed the sale of Telvent (cash proceeds of €510 million for our 60% stake), the Cemig Sales (equivalent of €833 million of net cash proceeds in Brazilian reais), the sale of Befesa (cash proceeds of €331 million plus deferred compensation and other compensation totaling €289 million) and other asset sales such as Bargoa, Quingdao and Linha Verde (total cash proceeds of approximately €100 million). We intend to continue to rotate assets as part of our strategy when we consider that market conditions are adequate.

As of June 30, 2016, our cash and cash equivalents were €275.9 million and our short-term financial investments were €194.7 million, which compare to €680.9 million and €518.8 million, respectively as of December 31, 2015. Of our total liquidity of €470.6 million, we estimate that approximately €228 million is immediately available, €24 million is related to supplier payments, and €218 million is restricted cash for our business needs. We also had other current assets (clients and other receivables and inventories) amounting to €1,993.4 million.

***Discussion of Cash Flows***

The following table sets forth consolidated cash flow data for each of the six months ended June 30, 2016 and 2015 and for the three years ended December 31, 2015, 2014 and 2013.

| | Six months ended June 30, | | Year ended December 31, | | |
|---|---|---|---|---|---|

***Net Cash Flows from Operating Activities***

For the six month period ended June 30, 2016, we used €409.7 million of net cash flows in our operating activities compared to €51.4 million generated during the same period last year, primarily due to the lower cash generated from the lower profit for the year with non-monetary adjustments (€168.3 million loss for the first six months of 2016 compared to €520.1 million profit in the first six months of 2015), as well as the decrease in working capital and the tax and interests credit receipts and payments, mainly derived from the current situation of the Group given by the strong limitation of financial resources in which the Company is subjected in the last months and which has significantly affected the evolution of the business after the general deceleration of all activities.

The working capital consumption was €190.2 million primarily as a result of the recent economic and financial uncertainty that has affected us since August 3, 2015. Since that date, there has been a slowdown in the pace of approval by some financial institutions to renew our working capital lines, which has in turn created delays in renewing our "confirming without recourse" agreements. These delays resulted in significant cash outflows as we had to pay suppliers before our usual 180 days period. In light of these developments, on September 24, 2015 we announced a comprehensive action plan aimed at, among other things, improving our liquidity position.

For the year ended December 31, 2015, we used €1,196.6 million of net cash flows from operating activities compared to €18.6 million generated during the same period last year, mostly due to cash outflows from lower profit for the year after non-monetary adjustments; (€25 million in 2015 compared to a cash generation of € 1,184 million in 2014) as well as higher net cash consumption due to working capital (consumption of €640 million in 2015 compared with consumption of €524 million in 2014). The decrease in cash generated by the lower profit for the year was mainly due to the lower activity of the Company during the last months of 2015 resulting from the facts and circumstances occurred in August 2015 which led to the current situation of the Company provided by article 5 bis of the Ley concursal. The working capital consumption of €640 million, mainly as a result of the aforementioned the Company situation which has induced the cancelation by some financial institutions of the working capital lines which resulted insignificant cash outflows.

For the year ended December 31, 2014, we generated €18.6 million of net cash flows from operating activities compared to €712.5 million during the same period last year, mostly due to greater consumption of working capital (€523.6 million in 2014 compared to the generation of €221.2 million in 2013), which was offset by higher profit for the period from continuing operations adjusted by non-monetary items (€1,182.7 million in 2014 compared to €930.8 million in 2013). The net cash used in working capital in 2014 was mainly due to our Engineering and Construction activity due to a lower execution compared to prior year due to the completion of the construction of certain projects (which were in a ramp-up phase). This lower execution resulted in a net cash outflow to pay suppliers. Furthermore, the execution in other new projects which have not yet reached the milestone for invoicing resulting in lower net inflow from customers. Finally, net interest and taxes paid, net of discontinued operations were higher in 2014 than in 2013 (€640.5 million compared to €439.5 million, respectively) mainly due to new bonds issued during 2014.

For the year ended December 31, 2013, we generated €712.5 million of net cash flows from operating activities compared to €587.3 million during the previous year mostly due to higher profit for the period from continuing operations adjusted by non-monetary items (€930.8 million in 2013 compared to €753.2 million in 2012, thanks to an increase in our three activities) and increased generation of working capital (€221.2 million in 2013 compared to €149.5 million in the previous year, mainly derived from the variation in tax liabilities and short-term financial investments), which was partially offset by larger net interest and taxes paid, net of discontinued operations (€439.5 million in 2013 compared to €315.4 million in the previous year).

***Net Cash Used in Investing Activities***

For the six month period ended June 30, 2016, a net cash used in investing activities was €81.5 million, compared to net cash outflow of €1,308.7 million in the same period in 2015. The lower cash outflows from investment activities is mainly caused by the current situation of the Group mentioned in the previous paragraph. The main investments were mainly because of transmission lines in Brazil and cogeration projects in Mexico, partially netted by the new money from the sale of Sham´s interest of Abengoa, Explotaciones Varias for the sale of four photovoltaic plants located in the province of Seville, and Jaén and for the sale of the convertible loan into shares of Befesa Medio Ambiente, S.L.U.

For the year ended December 31, 2015, net cash used in investing activities was €1,602.3 million compared to €2,499.7 million in the year ended December 31, 2014. The main investments were mainly because of the progress in the construction of thermo and photovoltaic solar projects in Chile, transmission lines in Brazil and power generation in Mexico, partially offset by the cash flow received from EIG as a result of the first asset purchase package (€195 million) and due to the sale of various assets to Atlantica Yield, which formed part of the Right of First Offer agreement (ROFO 2 and 4) signed between Atlantica Yield and Abengoa (€368 million). In relation to such divestments, selling assets to Atlantica Yield, constitute a divestment flow for Abengoa as a result of Atlantica Yield classification as a discontinued operation during year 2015 (at the end of 2015 and, after the loss of control over the company, it was recorded using the equity method).

For the year ended December 31, 2014, net cash used in investing activities was €2,499.7 million compared to €1,364.4 million in the year ended December 31, 2013. The increase in net cash used in investing activities corresponds to the execution of our capital expenditure plan, which was more intense during 2014 compared to 2013. Our main expenditures during 2014 have been the construction of co-generation projects in Mexico, various transmission lines in Brazil and Peru, the thermo-solar and PV plants in Chile, Hospital de Manaus in Brazil and Hugoton in the United States.

For the year ended December 31, 2013, net cash used in investing activities was €1,364.4 million compared to €1,805.7 million for the year ended December 31, 2012. The decrease in net cash used in investing corresponds to the execution of our capital expenditure plan, which was less intensive during 2013 compared to 2012. Our main expenditures during 2013 have been the construction of power transmission lines in Brazil and Peru, the construction of 11 solar plants in Spain, the construction of the second-generation biofuels commercial plant in Hugoton (United States), the construction of the solar plan of Mojave in California, the construction of projects in Mexico, the construction of wind farms in Uruguay and the construction of desalination plants in Ghana and Algeria. Our contributions into these investments amounted to approximately €729 million (mostly related to Abengoa's equity funding of the solar plant of Mojave in California, the second generation commercial plant in Hugoton, Kansas, and transmission lines in Brazil), which were primarily funded with cash and cash equivalents on balance sheet.

***Net Cash Generated from Financing Activities***

For the six month period ended June 30, 2016, net cash flow generated by financing activities was €95.6 million compared to €1,242.5 million in the same period in 2015. The net cash generated from financing activities during the first six months of 2016 was primarily attributable to the current situation of the Group previously mentioned. Net cash generation mainly comes from a new liquidity line given at the end of March and the debtor-in-possession financing.

For the year ended December 31, 2015, net cash flow from financing activities was €1,986.2 million compared to €1,590.6 million in the year ended December 31, 2014. The net cash generated from financing activities during 2015 was primarily attributable to proceeds from loans and borrowings of €4,010 million and from the public sale offer of Atlantica Yield, has been offset by the repayment of loans and debt amounting to €2,456 million, dividends paid to shareholders amounting to €90 million and because the effect of discontinued operations amounting to €158 million. The proceeds from loans and borrowing from new corporate funding (provision of the syndicated loan tranche A in 2014, issue of bonds exchangeable into shares of Atlantica Yield 2017, issue of ordinary bonds maturing in 2020, the loan granted by the European Investment Bank (EIB), loans with various institutions with the support of Export Credit agencies, and new revolving credit agreements and project financing increase in funding bridge construction projects and non-recourse financing, including financing is obtained in capital markets by Solaben 1 and 6). Repayments made mainly refers to €300 million of bonds maturing in 2015, to the convertible bond maturing in 2017 whose 'put' was exercised in 2015, to the reduction in the balance in the "euro Commercial Paper (ECP) " program, as well as to the repayments to non-recourse financing and bridge loans. Regarding the public sale offer of Atlantica Yield, on January 22, 2015, the divestment of a 13% stake in Atlantica Yield was closed by the secondary public offering, generating a cash flow of €291 million before fees and expenses related to the public offer sale (€278 million after fees and expenses) and dated July 14, 2015, Abengoa has sold 2,000,000 shares of Atlantica Yield at a price of USD 31 per share, generating a cash inflow of €56 million before fees and expenses related to the public offering sales (€54 million after fees and expenses). On the other hand, the cash generated by financing activities comes primarily from the contribution of the minority shareholders of Atlantica Yield in the capital increase to finance a third package of assets (ROFO 3) during the month of May 2015 (€302 million), and the placement among qualified investors of all class B shares treasury of Abengoa, SA.

For the year ended December 31, 2014, net cash flow from financing activities was €1,590.6 million compared to €1,197.5 million in the year ended December 31, 2013. The net cash generated from financing activities during 2014 related to the proceeds from loans and borrowings of €5,038.9 million, which was offset by a repayment of loans and borrowings of €4,108.5 million and dividends paid to shareholders totaling €39.1 million. The proceeds from loans and borrowings are mainly due to the issuance during 2014 of the Notes due 2021, the Notes due 2019, the Euro Commercial Paper program, the increase in our 2014 Syndicated Loan Facility Agreement, and also to the increase in Project Debt related to projects under construction. Additionally, on June 18, 2014, we received €611.0 million from the Abengoa Yield IPO before fees and expenses. After deducting underwriting fees and expenses, we received €575.0 million.

For the year ended December 31, 2013, net cash flow from financing activities was €1,197.5 million compared to €5.6 million in the previous year. The net cash generated from financing activities in 2013 related to proceeds from loans and borrowings of €3,281.5 million, which was partially offset by a repayment of loans and borrowings of €1,802.0 million, the acquisition of treasury shares totaling €89.6 million, dividends paid to shareholders totaling €38.8 million and the effect of discontinued operations of €721.1 million. The proceeds from loans and borrowings are mainly due to increase in Project Debt related to projects under construction. We also had proceeds from corporate financing, consisting mainly of the issuance of the 2019 Convertible Notes, the Senior Unsecured Notes due 2018 and the Senior Unsecured Notes due 2020 for an amount of €400 million, €550 million and $450 million, respectively. Additionally, in October 2013, a capital increase was carried out and we received proceeds for an amount of €517.5 million.

***Clients and other receivable accounts***

| | As of June 30, 2016 | As of December 31, | |
|---|---|---|---|
| | | 2015 | 2014 |
| | *(unaudited)* | *(€ in millions)* | |
| Trade receivables | 695.5 | 515.1 | 592.6 |
| Unbilled revenues | 496.9 | 787.5 | 913.1 |
| Bad debt provisions | (86.7) | (63.7) | (82.2) |
| Tax receivables | 500.2 | 552.9 | 595.8 |
| Other debtors | 151.8 | 212.6 | 137.6 |

| | As of June 30, 2016 | As of December 31, | |
|---|---|---|---|
| | | 2015 | 2014 |
| | *(unaudited)* | *(€ in millions)* | |
| Total ..... | **1,757.7** | **2,004.40** | **2,156.90** |

As of June 30, 2016, clients and other receivable accounts decreased by €143.4 million, or 7.1%, compared to December 31, 2015. This decrease was primarily due to the decrease in unbilled revenues in most of our Engineering and Construction companies during 2016, due to especially large projects under construction that have been billed in the first six months of 2016, according to the milestones of each specific project. Of the total amount of unbilled revenues outstanding as of December 31, 2015, 36.9% has been carried forward to June 30, 2016.

As of December 31, 2015, clients and other receivable accounts decreased by €152.5 million, or 7.1%, compared to December 31, 2014. Of the total amount of unbilled revenues outstanding as of December 31, 2014, 13.8% has been carried forward to December 31, 2015. The unbilled balance that had not been billed as of December 31, 2015 were expected to be billed in the upcoming three months since that closing date according to the milestones of each specific project, except for those projects that will be billed at the end of the construction.

As of December 31, 2014, clients and other receivable accounts increased by €286.9 million, or 15.3%, compared to December 31, 2013. Of the total amount of unbilled revenues outstanding as of December 31, 2013, 10% has been carried forward to December 31, 2014. The unbilled balance that had not been billed as of December 31, 2014 were expected to be billed in the upcoming three months since that closing date according to the milestones of each specific project, except for those projects that will be billed at the end of the construction.

**Financing Arrangements**

We utilize two main sources of financing to meet our financial commitments: corporate financing and Project Debt. As of June 30 2016, the total balance of corporate financing and Project Debt outstanding was €7,342 million and €2,622 million, respectively, compared to €6,568 million and €3,070 million, respectively, as of December 31, 2015. We use our corporate financing to finance our investments (including in joint ventures and financing at the project company level) and for general corporate purposes. Our corporate financing is used by all of our activities and is primarily incurred by the Company with upstream guarantees from our main operating subsidiaries.

Project Debt refers to non-recourse loans obtained by certain Group entities dedicated to long-term projects for the development of integrated products. As of June 30, 2016, we had approximately €2,127 million of borrowings classified as bridge loans. Project Debt also includes bridge loans, which relates to certain operations which are financed in a similar manner to non-recourse projects, generally by financial entities, and which are earmarked to be future development projects which typically will be eventually financed through project finance schemes. The classification of this debt as Project Debt may differ from the classification made by other companies and we have discretion, within applicable IFRS guidelines, to reclassify this type of indebtedness. Such funding typically relates to transitional financing phases of a project (typically periods of less than 2-3 years) during the launch and construction phase of goods/projects, which once completed and ready for operation, become financed under the project finance model. In these situations Abengoa, S.A. and/or its subsidiaries (other than non-recourse subsidiaries) provide, from time to time, guarantees of obligations whereby Abengoa, S.A. and/or its subsidiaries (other than non-recourse subsidiaries) act as sponsors for the period prior to such project companies securing long-term project financing for their projects. However, if during such transitory period we believe there is a risk of non-compliance with the debt repayment schedule necessary in order to obtain project finance (or of construction, which will ultimately require financing), such financing would be reclassified on the consolidated statements of financial position as a type of corporate financing, depending upon the nature of the arrangements, typically being loans with financial entities. For more detailed information on Project Debt refer to Note 17 to our Consolidated Condensed Interim Financial Statements. We generally finance the construction of our own operations by means of Project Debt at the project company level. Project Debt is the principal means of financing for project construction in our Engineering and Construction activity, our Concession-Type Infrastructure activity and our Industrial Production activity.

As of June 30, 2016, we had a total net debt (including other loans and borrowings) as calculated below of €8,152 million outstanding, the majority of which is short-term financing. Our borrowings consist principally of corporate financing and Project Debt. As of June 30, 2016, we had €7,342 million of indebtedness at the

corporate level, €2,622 million of Project Debt (of which approximately €2,127 million were bridge loans) and €€477 million of cash and cash equivalents and short-term financial investments, resulting in total net debt of €€8,152 million.

The table below sets forth our total net debt as of June 30, 2016, December 31, 2015 and 2014.

| | June 30, | As of December 31, | |
|---|---|---|---|
| | 2016 | 2015 | 2014 |
| | *(unaudited)* | *(€ in millions)* | |
| **Corporate financing:** | | | |
| Long-term and short-term bank loans | 2,599 | 2,328 | 1,316 |
| Long-term and short-term notes and bonds | 3,383 | 3,301 | 3,853 |
| Long-term and short-term finance lease liabilities | 25 | 37 | 35 |
| Long-term and short-term other loans and borrowings | 1,335 | 903 | 121 |
| **Total corporate financing** | **7,342** | **6,569** | **5,325** |
| **Project Debt:** | | | |
| Long-term project debt | 15 | 504 | 4,159 |
| Short-term project debt | 2,607 | 2.567 | 799 |
| **Total project debt** | **2,622** | **3,070** | **4,958** |
| **Total indebtedness** | **9,964** | **9,639** | **10,283** |

| Cash and cash equivalents | 277 | 681 | 1,811 |
| Total net debt (including other loans and borrowings) | 9,487 | 8,439 | 7,423 |
| Less: Long-term and short-term other loans and borrowings | -1,335 | -903 | -121 |
| **Total net debt (excluding other loans and borrowings)** | **8,152** | **7,536** | **7,302** |

***Corporate Financing***

Until the effectiveness of the Restructuring Agreement, we were subject to one single financial covenant under the majority of the corporate facilities consisting of the maintenance of a Corporate Net Finance Debt to Consolidated EBITDA (as such terms are defined therein) lower than 2.50x. As of June 30, 2016 the Corporate Net Finance Debt to Consolidated EBITDA ratio is above the maximum allowed of 2.50x under the financial covenant.

As of June 30, 2016, we had €7,342 million of corporate financing outstanding. Our material bank loan financings and bond financings (other than Project Debt) with a principal amount outstanding and available of at least €105 million as of June 30, 2016 consist of the following:

*September 2016 Secured Facility*

*Overview*

On September 18, 2016, Abengoa Concessions Investments Limited entered into a secured facility agreement for a maximum amount of $211 million (the "**September 2016 Secured Facility**"). The loan was intended for the prepayment of the 2015 Secured Term Loan and general corporate purposes. As security for the loan, security interests over certain shares of Atlantica Yield held by the Company were granted.

*Purpose*

The prepayment of the 2015 Secured Term Loan and the general corporate and working capital purposes of the Group, including the payment of restructuring and advisory fees

*Borrowers*

Abengoa Concessions Investments Limited is the original borrower under the September 2016 Secured Facility.

*Guarantees*

The September 2016 Secured Facility is guaranteed on a senior basis by the following guarantors: Abeima Teyma Zapotillo, SRL de C.V., Abeinsa Asset Management, S.A., Abeinsa Inversiones Latam, S.L., Abeínsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa

Bioenergía, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abengoa Bioenergy Trading Europe, BV, Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea de Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Nicsamex, S.A. de C.V., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V.,., Abengoa Water, S.L., Teyma Internacional, S.A., and Teyma Uruguay ZF, S.A.

*Security*

The obligations under the September 2016 Secured Facility are secured by 16,000,000 ordinary shares in Atlantica Yield, plc.

*Amount and Repayment of Borrowings*

The September 2016 Secured Facility has a final maturity date of September 18, 2017, provided that prior to March 29, 2017, the maturity dates of the September 2015 Facility, the December 2015 Facility and the March 2016 Facility have been extended to at least the same date; absent such extensions, the maturity date of the September 2016 Secured Facility is March 29, 2017.

On the date a restructuring becomes effective, the facility will be cancelled and the loan, together with accrued interest and all other amounts accrued under the finance documents, shall become immediately due and payable.

*Interest Rates and Fees*

Interests accrue daily on each Loan at a rate equal to the aggregate of PIK Margin (12.5%) and LIBOR. Such interest shall be automatically capitalised and shall be added to the outstanding principal amount of the Loan.

Any unpaid due amounts drawn down under Secured Facility will accrue default interest equal indicated above, and increased by 5%.

*Covenants*

Subject in each case to certain exceptions, the September 2016 Secured Facility contains negative covenants and restrictions, including among others: restrictions on granting of a security interest; on the provision of loans and guarantees on the disposal of assets; and on a change of business. The September 2016 Secured Facility also contains negative pledge, among others; the mandatory periodic reporting of financial and other information; and notification upon the occurrence of any event of default. The September 2016 Secured Facility also contains to maintain the Loan to Value Ratio to no more than 80%.

*Change of Control*

The change of control provision is substantially similar to the provision contained in the 2014 Syndicated Loan Facility Agreement. The lenders have the ability to require early repayment of all outstanding borrowings under the September 2016 Secured Facility, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as the ability and power to: (a) control 50% or more of our voting rights; and (b) appoint or remove all or the majority of the members of our management.

*Events of Default*

The September 2016 Secured Facility contains provisions governing certain events of default, including mainly: the failure to make payments of the amounts due,; failure to comply with covenants or other obligations; material misrepresentations; events which have a material adverse effect on us; certain insolvency events; certain sanction events; and cessation of business. The occurrence of an event of default could result in the acceleration of payment obligations under the September 2016 Secured Facility.

*March 2016 Secured Facility*

*Overview*

On March 21, 2016, Abengoa Concesiones Investments Limited entered into a secured facility agreement for a maximum amount of €137 million (the "**March 2016 Secured Facility**") with a group of bondholders and financial institutions. The loan was intended for general corporate purposes. As security for the loan, security interests over certain shares of Atlantica Yield held by the Company were granted.

Repayment of the principal amount under the March 2016 Secured Facility was due on September 23, 2016. The March 2016 Secured Facility is governed by English law. As of June 30, 2016 €137 million was outstanding under the March 2016 Secured Facility.

*Purpose*

All funds drawn down under the March 2016 Secured Facility must be used to finance our liquidity needs.

*Borrowers*

Abengoa Concesiones Investments Limited is the original borrower under the March 2016 Secured Facility.

*Guarantees*

The March 2016 Secured Facility is guaranteed on a senior basis by the following guarantors: Abengoa S.A,, Abeima Teyma Zapotillo, SRL de C.V., Abeinsa Asset Management, S.L., Abeinsa Inversiones Latam, S.L., Abeínsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abengoa Bioenergy Trading Europe, BV, Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea de Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Nicsamex, S.A. de C.V., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V., Centro Morelos, 264 S.A. de C.V., Abengoa México, S.A. de C.V., Abengoa Water, S.L., Teyma Internacional, S.A., and Teyma Uruguay ZF, S.A.

*Security*

The obligations under the March 2016 Secured Facility are secured by 14,327,124 ordinary shares in Atlantica Yield, plc.

*Amount and Repayment of Borrowings*

The March 2016 Secured Facility has a final maturity date of September 23, 2016. The interest payable under the March 2016 Secured Facility shall be paid at maturity. As of the present date, the loan has not been repaid.

*Interest Rates and Fees*

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The margin is currently 14.5%. Any unpaid due amounts drawn down under the March 2016 Secured Facility will accrue default interest equal EURIBOR, the applicable margin indicated above, and increased by 5%. Due and unpaid interest will be capitalized, the foregoing default interest rate being therefore applicable to such amount once capitalized.

*Covenants*

Subject in each case to certain exceptions, the March 2016 Secured Facility contains negative covenants and restrictions, including among others: restrictions on the granting of a security interest; on the provision of loans and guarantees on the disposal of assets; and on a change of business. The March 2016 Secured Facility also contains covenants and restrictions, including among others: restrictions on the granting of a security interest (pari passu) and negative pledge, among others; the mandatory periodic reporting of financial and other information; and notification upon the occurrence of any event of default. The March 2016 Secured Facility also

contains a covenant to maintain an initial Loan to Value Ratio of 60% and the obligation to maintain the Loan to Value Ratio to no more than 80%.

*Change of Control*

The change of control provision is substantially similar to the provision contained in the 2014 Syndicated Loan Facility Agreement. The lenders have the ability to require early repayment of all outstanding borrowings under the March 2016 Secured Facility, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as the ability and power to: (a) control 50% or more of our voting rights; and (b) appoint or remove 50% or more of the members of our management.

*Events of Default*

The March 2016 Secured Facility contains provisions governing certain events of default, including mainly: the failure to make payments of the amounts due, not only under the March 2016 Secured Facility but also under other financing agreements, affecting the borrower and the rest of the obligors under the March 2016 Secured Facility; failure to comply with covenants or other obligations; material misrepresentations; events which have a material adverse effect on us; certain insolvency events; certain sanction events; and cessation of business. The occurrence of an event of default could result in the acceleration of payment obligations under the March 2016 Secured Facility.

*December 2015 Secured Facility*

*Overview*

On December 24, 2015, Abengoa Concesiones Investments Limited entered into a secured facility agreement for a maximum amount of €105 million (the "**December 2015 Secured Facility**") with a group of lenders. The loan was intended for general corporate purposes. As security for the loan, security interests over certain shares of Atlantica Yield held by the Company were granted.

Repayment of the principal amount under the December 2015 Secured Facility was initially due on March 17, 2016, however the term was extended until October 28, 2016. The December 2015 Secured Facility is governed by Spanish law. As of June 30, 2016 €105 million was outstanding under the December 2015 Secured Facility.

Purpose

All funds drawn down under the December 2015 Secured Facility must be used to finance our liquidity needs.

*Borrowers*

Abengoa Concesiones Investments Limited is the original borrower under December 2015 Secured Facility.

*Guarantees*

The December 2015 Secured Facility is guaranteed on a senior basis by the following guarantors: Abengoa S.A,, Abeima Teyma Zapotillo, SRL de C.V., Abeinsa Asset Management, S.L., Abeinsa Inversiones Latam, S.L., Abeínsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abengoa Bioenergy Company LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy Trading Europe, BV, Abengoa Bioenergy of Nebraska, LLC, Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea de Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Teyma USA & Abener Engineering and Construction Services General Partnership, Nicsamex, S.A. de C.V., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V., Centro Morelos, 264 S.A. de C.V., Abener Teyma Mojave General Partnership, Abener Teyma Hugoton General Partnership, Abengoa México, S.A. de C.V., Abengoa Construçao Brasil Ltda., Abengoa Water, S.L., Abentey Gerenciamiento de Proyectos de Engenharia e Construçoes Ltda., Asa Investment Brasil, Ltda., Inabensa Rio, Ltda., Teyma Internacional, S.A., and Teyma Uruguay ZF, S.A.

*Security*

The obligations under the December 2015 Secured Facility are secured by 11,203,719 ordinary shares in Atlantica Yield, plc.

*Amount and Repayment of Borrowings*

The initial date of final maturity was March 17, 2016 but was later extended until September 23, 2016. The interest payable under the December 2015 Secured Facility shall be paid at maturity. As of the present date, the loan has not been repaid.

*Interest Rates and Fees*

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The margin is currently 5%. Any unpaid due amounts drawn down under the December 2015 Secured Facility will accrue default interest equal to the Euro Overnight Index Average ("**EONIA**"), the applicable margin indicated above, and increased by 4%. Due and unpaid interest will be capitalized, the foregoing default interest rate being therefore applicable to such amount once capitalized.

*Covenants*

Subject in each case to certain exceptions, the December 2015 Secured Facility contains negative covenants and restrictions, including among others: restrictions on the granting of a security interest; on the provision of loans and guarantees on the disposal of assets; and on a change of business. The December 2015 Secured Facility also contains covenants and restrictions, including among others: restrictions on the granting of a security interest (pari passu) and negative pledge, among others; the mandatory periodic reporting of financial and other information; and notification upon the occurrence of any event of default.

*Change of Control*

The change of control provision is substantially similar to the provision contained in the 2014 Syndicated Loan Facility Agreement. The lenders have the ability to require early repayment of all outstanding borrowings under the December 2015 Secured Facility, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as either: (i) the ownership of more than 50% of our capital; or (ii) the ability and power to: (a) control 50% or more of our voting rights; (b) appoint or remove 50% or more of the members of our management; or (c) create directives regarding our operating and financial policies.

*Events of Default*

The December 2015 Secured Facility contains provisions governing certain events of default, including mainly: the failure to make payments of the amounts due, not only under the December 2015 Secured Facility but also under other financing agreements, affecting the borrower and the rest of the obligors under the December 2015 Secured Facility; failure to comply with covenants or other obligations; material misrepresentations; events which have a material adverse effect on us; certain insolvency events; certain sanction events; and cessation of business. The occurrence of an event of default could result in the acceleration of payment obligations under the December 2015 Secured Facility.

*September 2015 Credit Agreement*

*Overview*

On September 23, 2015, we entered into a revolving credit agreement for a maximum amount of €165 million (the "**September 2015 Credit Agreement**") with a group of lenders. Initially, the principal amount of the September 2015 Credit Agreement was €125 million. The remaining €40 million were only available upon (i) certification by us to Bankia, S.A. of the completion of a rights offering and (ii) Santander, as agent under a €120 million loan agreement, dated on September 23, 2015, entered into between a syndicate of financing entities, as lenders, and IC and Finarpisa, as borrowers, certifying to Bankia, S.A. that the amounts of such loan agreement had been fully drawn and that such amounts had been transferred to the participating entity of Iberclear in relation to the rights offering.

Repayment of the principal amount under the September 2015 Credit Agreement was due on September 23, 2016. The September 2015 Credit Agreement is governed by Spanish law. As of June 30, 2016, €125 million was outstanding under the September 2015 Credit Agreement.

*Purpose*

All funds drawn down under the September 2015 Credit Agreement must be used to finance our liquidity needs.

*Borrowers*

Abengoa, S.A. is the original borrower under the September 2015 Credit Agreement.

*Guarantees*

The September 2015 Credit Agreement is guaranteed on a senior basis by the following guarantors: Abeima Teyma Zapotillo, SRL de C.V., Abeinsa Asset Management, S.L., Abeinsa Inversiones Latam, S.L., Abeínsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Abengoa Bioenergy Company LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy Trading Europe, BV, Abengoa Bioenergy of Nebraska, LLC, Abengoa Concessions, S.L., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abengoa Solar, S.A., Abentel Telecomunicaciones, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Ecoagrícola, S.A., Europea de Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Siema Technologies, S.L., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Teyma USA & Abener Engineering and Construction Services General Partnership, Nicsamex, S.A. de C.V., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V., Centro Morelos, 264 S.A. de C.V., Abener Teyma Mojave General Partnership, Abener Teyma Hugoton General Partnership and Abengoa México, S.A. de C.V.

In addition to the personal guarantees given by the guarantors mentioned above, certain subsidiaries have assigned certain trade receivables.

*Security*

The obligations under the September 2015 Credit Agreement are secured by second ranking security on 25,530,843 ordinary shares of Atlantica Yield. Of the total shares in the September 2015 Credit Agreement, 11,203,719 shares are second rank to the December 2015 Secured Facility security package and 14,327,124 shares are second rank to the March 2016 Secured Facility security package.

*Amount and Repayment of Borrowings*

The September 2015 Credit Agreement is a revolving credit facility. The date of final maturity is September 23, 2016. The interest payable under the September 2015 Credit Agreement shall be paid monthly.

*Interest Rates and Fees*

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The margin is currently 5%. Any unpaid due amounts drawn down under the September 2015 Credit Agreement will accrue default interest equal to the Euro Overnight Index Average ("**EONIA**"), the applicable margin indicated above, and increased by 4%. Due and unpaid interest will be capitalized, the foregoing default interest rate being therefore applicable to such amount once capitalized.

*Guarantor Coverage Test*

The September 2015 Credit Agreement requires that the total consolidated assets and the aggregate EBITDA of the September 2015 Credit Agreement Guarantors jointly with Abengoa, S.A. represent at least 75% of total consolidated assets and 75% of Consolidated EBITDA, respectively. In calculating consolidated assets and Consolidated EBITDA, the following items are excluded: (i) Group companies created for the sole purpose of undertaking projects under a system of financing without recourse against another Group member; (ii) acquisitions made without recourse financing; and (iii) Group companies in respect to which a legal restriction exists on guarantees.

*Covenants*

Subject in each case to certain exceptions, the September 2015 Credit Agreement contains negative covenants and restrictions, including among others: restrictions on the granting of a security interest; on the provision of loans and guarantees on the disposal of assets; on a change of business; on the incurrence of more than $70 million of additional investments over the budget for 2015 and 2016; on the revocation of the mandate given to the independent financial advisor for monitoring the use of our liquidity; and on the incurrence of certain types of debt by certain subsidiaries such that net financial indebtedness may not exceed €150,000,000. The September 2015 Credit Agreement also contains covenants and restrictions, including among others: restrictions on the granting of a security interest (pari passu) and negative pledge, among others; the mandatory periodic reporting of financial and other information; and notification upon the occurrence of any event of default.

*Change of Control*

The change of control provision is substantially similar to the provision contained in the 2014 Syndicated Loan Facility Agreement. The lenders have the ability to require early repayment of all outstanding borrowings under the September 2015 Credit Agreement, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as either: (i) the ownership of more than 50% of our capital; or (ii) the ability and power to: (a) control 50% or more of our voting rights; (b) appoint or remove 50% or more of the members of our management; or (c) create directives regarding our operating and financial policies. In addition, we have agreed to maintain an ownership interest of at least 50% of the shares of Abengoa Bioenergía, S.A. and Abengoa Solar, S.A., and to notify the agent under the September 2014 Credit Agreement about any decrease in our ownership interest over the abovementioned subsidiaries in excess of 4%.

*Events of Default*

The September 2015 Credit Agreement contains provisions governing certain events of default, including mainly: the failure to make payments of the amounts due, not only under the September 2015 Credit Agreement but also under other financing agreements, affecting the borrower and the rest of the obligors under the September 2015 Credit Agreement; failure to comply with covenants or other obligations; material misrepresentations; events which have a material adverse effect on us; certain insolvency events; certain sanction events; and cessation of business. The occurrence of an event of default could result in the acceleration of payment obligations under the September 2015 Credit Agreement.

*2014 Syndicated Loan Facility Agreement*

*Overview*

On September 30, 2014, we entered into a syndicated loan facility agreement (the "**2014 Syndicated Loan Facility Agreement**") with a group of lenders raising the total aggregate amount to €1,397.9 million. The 2014 Syndicated Loan Facility Agreement provides, among other things, for borrowings comprising of up to €698.95 million by way of a revolving credit facility ("**Tranche A**") designed to amortize the previous syndicated loan and an additional €698.95 million by way of a further revolving credit facility ("**Tranche B**") to finance the promotion, development and construction of concession projects and therefore accounted for under Project Debt, bridge loans. The 2014 Syndicated Loan Facility Agreement is governed by Spanish law. As of June 30, 2016, both Tranche A and Tranche B of the 2014 Syndicated Loan Facility Agreement are fully drawn.

*Purpose*

All funds drawn under Tranche A were used for the full repayment of our 2012 Forward Start Credit Facility, which was paid in October 2014. All funds drawn under Tranche B" are being used exclusively for the promotion, development and construction of our new concessional projects on a revolving basis.

*Borrowers*

Abengoa is the borrower for Tranche A and Abengoa Greenbridge, S.A. is the borrower for Tranche B under the 2014 Syndicated Loan Facility Agreement.

*Guarantees*

The 2014 Syndicated Loan Facility Agreement is guaranteed on a senior basis by the following guarantors: Abeinsa Ingeniería y Construcción Industrial S.A., Abencor Suministros S.A., Abener Energía S.A., Abengoa Bioenergía S.A., Abengoa Bioenergy Company, LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy of Nebraska, LLC, Abengoa Bioenergy Trading Europe, B.V., Abengoa Solar, S.A., Abengoa México S.A. de C.V., Abengoa Solar España, S.A., Abentel Telecomunicaciones S.A., Abentey Gerenciamento de Projectos de Engenharia e Construções, Ltda, ASA Investment Brasil ltda, Abeinsa Infraestructuras de Medio Ambiente, S.A., ASA Desulfuración S.A., Bioetanol Galicia, S.A., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V., Ecoagrícola S.A., Europea de Construcciones Metálicas, S.A., Inabensa Rio ltda, Instalaciones Inabensa S.A., Negocios Industriales y Comerciales S.A., Nicsamex, S.A. de C.V., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Teyma Internacional, S.A., Teyma USA & Abener Engineering and Construction Services General Partnership, Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abengoa Solar New Technologies, S.A., Centro Morelos 264 S.A. de C.V., Teyma Uruguay ZF S.A., Abengoa Construção Brasil LTDA, Abeima Teyma Zapotillo S. de R.L. de C.V. Abengoa Concessions Investments Limited, Siema Technologies, S.L., Abengoa Water, S.L.U., Abeinsa Inversiones Latam, S.L., Abengoa Concessions, S.L., and Abeinsa Asset Management, S.L. The guarantors jointly with the borrowers will represent at least 75% of the total consolidated assets and 75% of the consolidated EBITDA.

*Guarantor Coverage Test*

The 2014 Syndicated Loan Facility Agreement requires that the total consolidated assets and the aggregate EBITDA of the 2014 Syndicated Loan Facility Agreement Guarantors jointly with Abengoa and Abengoa Greenbridge, S.A. represent at least 75% of total consolidated assets and 75% of Consolidated EBITDA, respectively. In calculating consolidated assets and Consolidated EBITDA, the following items are excluded: (i) Group companies created for the sole purpose of undertaking projects under a system of long-term financing without recourse against another Group member; (ii) acquisitions made without recourse financing; and (iii) Group companies in respect of which a legal restriction exists on the guaranteeing thereby of amounts payable by the Borrowers pursuant to the 2014 Syndicated Loan Facility Agreement (but only insofar as the said restrictions affect the whole of the said amounts and they shall consequently be under an obligation to guarantee those amounts in respect of which there are no restrictions).

*Security*

The obligations under the 2014 Syndicated Loan Facility Agreement are not secured.

*Amount and Repayment of Borrowings*

Both Tranche A and Tranche B are revolving credit facilities. The date of final maturity of Tranche A is July 20, 2019. The total availability of funds under Tranche A will be reduced on certain dates in an amount equal to:

| | **Tranche A** |
|---|---|
| 07/20/2018 | 60% |
| 07/20/2019 | 40% |
| **Total** | **100%** |

The date of final maturity of Tranche B is September 30, 2018. Upon request of the Borrowers made during the first year of the term of the 2014 Syndicated Loan Facility Agreement, each of the lenders may agree to individually extend, with respect to their participation at that time in Tranche B, the final maturity date of Tranche B for a further year.

The interest payable under the 2014 Syndicated Loan Facility Agreement shall be paid at each successive interest period, which shall be one, three or six months, as selected by us at the time of drawdown through certain procedures, as defined therein.

*Mandatory Prepayment*

In the event of a sale of assets corresponding to Discontinued Activities (as defined therein), 30% of the net cash proceeds must be put towards mandatory prepayment to each of the Tranches. In the event of sale of a participation in the share capital of certain Group companies, 30% of the net cash proceeds that exceeds the

nominal amount of such share capital and the proportional debt of the relevant sold company will be put towards mandatory prepayment. In the event of sale of other assets exceeding €10 million, 30% of net cash proceeds that exceeds the book value of such assets, once discounted for their replacement value, as applicable, must be put towards mandatory prepayment. In each case, provided however, the amounts put towards mandatory prepayment shall not exceed €90 million per fiscal year and/or transaction related to the same business of the Group within 12 months, or €400 million for the life of the 2014 Syndicated Loan Facility Agreement.

*Interest Rates and Fees*

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. From the date of the first drawdown to the date on which the first anniversary of the date of signature occurs, the margin (on a yearly basis) will come to 3%. Any amounts due and unpaid under Tranche A or Tranche B will accrue default interest equal to the application of the applicable interest rate indicated above (however calculated taking into account the EONIA (instead of the EURIBOR)) plus a 2% margin.

As from the date on which the first anniversary of the date of signature occurs, the margin (on a yearly basis) will be determined depending on our credit rating published by Moody's or S&P, taking as a reference for these effects the higher of the credit ratings published from time to time:

| **Rating (S&P/Moody's)** | **Applicable Margin (on a yearly basis)** |
|---|---|
| Lower than or equal to B/B2 | 3.00% |
| B+/B1 | 2.75% |
| Equal to or higher than BB-/Ba3 | 2.25% |

We are also obligated to pay a commitment fee on undrawn amounts under Tranche A and B. Other fees are also payable, including an agency commission, structuring commission, loyalty commission and certain mandatory costs.

*Covenants*

Availability of amounts under the 2014 Syndicated Loan Facility Agreement is subject to compliance with a financial maintenance covenant. At the end of each annual and semi-annual consolidated financial statement period, the ratio of Net Finance Debt to Consolidated EBITDA (as such terms are defined therein) shall maintain a level equal to or less than (i) 3.00x until December 30, 2014, inclusive, and (ii) 2.50x from December 31, 2014 forward, inclusive. Subject in each case to certain exceptions, the 2014 Syndicated Loan Facility Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. Furthermore, we must retain certain ownership levels of the guarantors (at least 50% of the share capital). The 2014 Syndicated Loan Facility Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

Under the 2014 Syndicated Loan Facility Agreement , we are obligated to not permit the Net Financial Debt (as defined therein) of the subsidiaries who are not 2014 Syndicated Loan Facility Agreement Guarantors (excluding the indebtedness of project companies and certain acquisitions without recourse) at any time to exceed €150 million.

*Change of Control*

The Majority of the Lenders (as defined in the 2014 Syndicated Loan Facility Agreement) have the ability to require early repayment of all outstanding borrowings under the 2014 Forward Start Facility Agreement, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as either: (i) the ownership of more than 50% of our capital; or (ii) the ability and power to: (a) control 50% or more of our voting shares; (b) appoint or remove 50% or more of the members of our management; or (c) create directives regarding our operating and financial policies.

*Events of Default*

The 2014 Syndicated Loan Facility Agreement contains provisions governing certain events of default, including the failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any guarantor or Abengoa Solar except in compliance with the 2014 Syndicated Loan Facility Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the 2014 Syndicated Loan Facility Agreement.

*Abengoa R&D program with European Investment Bank*

*Overview*

On July 6, 2015, we entered into a bilateral loan agreement with the European Investment Bank (the "**Abengoa R&D Loan**") for a total amount to €125 million to finance part of our R&D program between 2015 and 2018.

*Purpose*

The Abengoa R&D Loan is part of a total financing program approved by the European Investment Bank ("**EIB**") which, after reviewing our R&D projects in different technologies, provided a total amount of €312.7 million to fund our Group's biotechnology and chemical process development for advanced bio refineries, water treatment, advance power systems and renewable energy, intended to be financed as follows:

| **Source** | **Amount (EUR)** |
|---|---|
| Credit from EIB (already signed) | 125,000,000.00 |
| Credit from ICO (intermediated by the EIB) (1) | 30,000,000.00 |
| Other funding sources(2) | 157,750,000.00 |
| **Total** | **312,750,000.00** |

(1) Entered into on July 30, 2015 and fully disbursed as of the date hereof
(2) Internal sources partially entered into from Abengoa

*Borrower*

Abengoa S.A.

*Guarantees*

The Abengoa R&D Loan is guaranteed on a senior basis by the same guarantors as the 2014 Syndicated Loan Facility. Such companies have granted a first-demand guarantee and are considered to be primary obligors.

*Guarantor Coverage Test*

The Abengoa R&D Loan requires the ratio of aggregate assets of the Borrower and the Guarantors to the total assets of the Group (excluding assets of Project Companies and Non-Recourse Subsidiaries, as defined therein) to be at least 75%. In addition, the aggregate EBITDA of the Borrower and the Guarantors to the total EBITDA of the Group (excluding assets of Project Companies and Non-Recourse Subsidiaries) needs also to be at least 75%.

*Security*

The obligations under the Abengoa R&D Loan are not secured.

*Amount and Repayment of Borrowings*

The Abengoa R&D Loan is divided into two tranches:

(a) A first tranche amounting to €75 million, already disbursed, to be repaid in five annual installments on a balloon payment structure with a three year grace period.

(b) A second tranche which could be disbursed at a maximum of €55 million, but not to be disbursed prior to February 28, 2016 and after receipt of a compliance certificate. Repayment is structured in five annual installments on a balloon payment structure with a three year grace period. As of the current date, this tranche has not been disbursed.

*Mandatory Prepayment*

If the total financing exceeds 50% of the eligible projects costs, EIB may demand prepayment of the Abengoa R&D Loan up to the amount by which it exceeds 50% of the total costs of the project.

In the event of a sale of assets corresponding to Discontinued Activities (as defined therein), 30% of the net cash proceeds must be used for mandatory prepayment to each of the tranches. In the event of sale of a participation in the share capital of certain Group companies, 30% of the net cash proceeds that exceeds the nominal amount of such share capital and the proportional debt of the relevant sold company must be used for mandatory prepayment of each of the tranches. In the event of sale of other assets exceeding €10 million, 30% of net cash proceeds that exceeds the book value of such assets, once discounted for their replacement value, as applicable, must be used for mandatory prepayment of each of the tranches. In each case, provided that, the amounts used for mandatory prepayment shall not exceed €8 million per fiscal year and/or transaction related to the same business of the Group within 12 months, or €36 million for the life of the Abengoa R&D Loan.

Additionally, in the event that we make voluntary prepayments of non-EIB financing to repay amounts drawn on a revolving facility agreement and, if after such a voluntary prepayment, the amount of outstanding EIB debt is greater than 50% of the total non-EIB financing of the Group, EIB may demand prepayment of the R&D Loan.

If a change-of-law event has occurred, or it becomes unlawful to perform obligations under the loan, EIB may by notice to us, cancel the undisbursed portion of the Abengoa R&D Loan and demand prepayment of the Abengoa R&D Loan, together with accrued interest and all other amounts accrued or outstanding. A change-of-law event will occur, in particular, but not limited to, in the event of a change in the regulations applicable to our activity sector, the Guarantors and/or the Group which would impair or negatively affect EIB as lender or as beneficiary of the guarantee and indemnity provided under the Guarantee Agreement related to the Abengoa R&D Loan.

*Interest Rates and Fees*

The applicable interest rate is Eribor plus a margin. The spread for the first semester after the initial disbursement date shall be 266.6 basis points, which includes a margin of 275 basis points. We must pay interest on the outstanding balance on the first tranche on 13 January and 13 July on each year.

In addition, the margin is subject to reduction as indicated in the table below if certain credit ratings are assigned to us by two rating agencies, assuming that three rating agencies are publishing reports on us:

| | **Applicable Margin** |
|---|---|
| Lower than or equal to B/B2 | 2.75% |
| B+/B1 | 2.50% |
| Equal to or higher than BB-/Ba3 | 2.00% |

*Covenants*

Availability of amounts under the Abengoa R&D Loan is subject to compliance with a financial maintenance covenant. At the end of each annual and semi-annual consolidated financial statement period, the ratio of Net Finance Debt to Consolidated EBITDA (as such terms are defined therein) shall maintain a level equal to or less than 2.50x. Additionally, we have to comply with a net financial debt to consolidated EBITDA (as such terms are defined therein) including non-recourse debt in process (as per the relevant Financial Statements) minus treasury stock (as per the most recent earnings presentation published by us), of equal to or less than 5.00x.

Subject in each case to certain exceptions, the Abengoa R&D Loan also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, hedging, restrictions on the provision of loans and guarantees, restriction on certain subsidiaries to not exceed, collectively, €150,000,000

net financial indebtedness, restrictions on the disposal of assets and restrictions on a change of business. Furthermore, we must retain certain ownership levels of the guarantors (at least 50% of the share capital). The Abengoa R&D Loan also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

*Change of Control*

The EIB has the ability to require early repayment of all outstanding borrowings under the loan, together with accrued interest, upon a change of control event. A change of control occurs if (i) the entities having control of us as at the closing date cease to have control of us; or (ii) a person or group of persons acting in concert (whether by way of ownership of shares, proxy, contract, agency or otherwise) gains control of us. Control is described as either: (i) the ownership of more than 50% of our capital; or (ii) the ability and power to: (a) control 50% or more of our voting shares; (b) appoint or remove all or the majority of the members of our management; or (c) create directives regarding our operating and financial policies which management is obliged to comply with.

*Events of Default*

The Abengoa R&D Loan contains provisions governing certain events of default, including the failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any guarantor except in compliance with the Abengoa R&D Loan agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the Abengoa R&D Loan agreement.

*Swedish Export Buyer Credit Agreement*

*Overview*

On March 2, 2010, Instalaciones Inabensa S.A. entered into a Swedish export buyer credit agreement (the "**Swedish Credit Agreement**") with a group of lenders. The Swedish Credit Agreement provides, among other things, for borrowings of up to €247,730,631. The commitments under the Swedish Credit Agreement mature on October 31, 2020. On December 10, 2010, the Swedish Credit Agreement was increased in the amount of €128,759,382. The Swedish Credit Agreement is governed by Swedish law. As of June 30, 2016, €235 million was outstanding under the Swedish Credit Agreement.

*Purpose*

All amounts borrowed by Instalaciones Inabensa S.A. under the Swedish Credit Facility Agreement shall be applied to finance 100% of the EKN Premium (as defined in the Swedish Credit Facility Agreement) up to a maximum of €13,030,631, 100% of the costs of Eligible Goods and Services, as defined in the Swedish Credit Agreement, consisting primarily of rectifier and inverter stations up to a maximum aggregate amount of €222.7 million and 100% of the interest incurred under the Swedish Credit Agreement up to a maximum of €12 million.

*Borrower*

The original borrower under the Swedish Credit Agreement is Instalaciones Inabensa S.A.

*Guarantee*

The Swedish Credit Agreement is guaranteed on a senior basis by Abengoa.

*Security*

The obligations under the Swedish Credit Agreement are not secured.

*Amount and Repayment of Borrowings*

The borrower shall repay the loans made to it under the Swedish Credit Agreement in seventeen equal semi-annual installments. Any amount outstanding on October 31, 2020 shall be repaid in full on that date.

*Interest Rates and Fees*

The annual interest rate on borrowings is EURIBOR plus a margin. The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The all-in cost is EURIBOR plus 2.85%. Interest payments on each loan made under the Swedish Credit Agreement shall be made on the last day of the six-month period following the utilization date for that loan and every other successive interest period for that loan shall have a six month duration.

*Covenants*

Availability of amounts under the Swedish Credit Agreement is subject to compliance with a financial covenant. As of the end of each financial year, the Debt Ratio (as such term is defined in the Swedish Credit Agreement) should not exceed 3.00. Net Financial Debt and EBITDA (which are components of the Debt Ratio) shall be calculated and interpreted on a consolidated basis in accordance with the GAAP applicable to our audited consolidated financial statements which shall be expressed in euros.

Subject in each case to certain exceptions, the Swedish Credit Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. The Swedish Credit Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

*Change of Control*

The Guarantor may not sell, lease, transfer or otherwise dispose of any shares or capital shares representing the capital or the Borrower unless such disposition does not result in a Change of Control (as defined in the Swedish Credit Agreement). Any disposal by means of granting security, granting an option or similar arrangements which may if realized and/or exercised result in a Change of Control shall not be permitted.

*Events of Default*

The Swedish Credit Agreement contains provisions governing certain events of default, including a failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any Guarantor except in compliance with the Swedish Credit Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the Swedish Credit Agreement.

*Second Swedish Credit Agreement*

*Overview*

On August 11, 2010, our subsidiary Abener Energía S.A. entered into a Second Swedish Credit Agreement (the "**Second Swedish Credit Agreement**") which was amended on October 19, 2010 and October 25, 2012. The Facility Framework Agreement originally provided, among other things, for borrowings of up to €296,372,521. Subsequent amendments have decreased this amount to €254,716,566.96. Sixteen individual loan agreements have been borrowed under the Second Swedish Credit Agreement amounting to €269,365,984 maturing between 2018 and 2022. The Second Swedish Credit Agreement is governed by English law. As of June 30, 2016, €150 million was outstanding under the Second Swedish Credit Agreement.

*Purpose*

All amounts borrowed by Abener Energía S.A. under the Second Swedish Credit Agreement shall be applied to 100% of the EKN Premium (as defined in the Second Swedish Credit Agreement), 100% of the costs of Eligible

Goods and Services (as defined in the Second Swedish Credit Agreement), 100% of the local costs and up to a maximum of 30% of imported costs.

*Guarantee*

We guarantee the Second Swedish Credit Agreement on a senior basis.

*Amount and Repayment of Borrowings*

The borrower shall repay the loans made to it under the Second Swedish Credit Agreement in seventeen equal semi-annual installments. Any amount outstanding on the Final Maturity Date (as defined in the Second Swedish Credit Agreement) shall be repaid in full on that date.

*Interest Rates and Fees*

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The all-in cost is EURIBOR plus 2.85%. Interest payments on each loan made under the Second Swedish Credit Agreement shall be made on the last day of the six-month period following the utilization date for that loan and every other successive interest period for that loan shall have six-month duration.

*Covenants*

Availability of amounts under the Second Swedish Credit Agreement is subject to compliance with a financial covenant. The Debt Ratio (as such term is defined in the Second Swedish Credit Agreement) should be equal to or less than 3.00, as of the end of each annual and semi-annual Consolidated Financial Statement period. Net Financial Debt and Consolidated EBITDA shall be calculated and interpreted on a consolidated basis in accordance with the GAAP applicable to our audited consolidated financial statements which shall be expressed in euros.

Subject in each case to certain exceptions, the Second Swedish Credit Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. The Second Swedish Credit Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

*Change of Control*

The Guarantor may not sell, lease, transfer or otherwise dispose of any shares or capital shares representing the capital or the Borrower unless such disposition does not result in a Change of Control (as defined in the Second Swedish Credit Agreement). Any disposal by means of granting security, granting an option or similar arrangements which may if realized and/or exercised result in a Change of Control shall not be permitted.

*Events of Default*

The Second Swedish Credit Agreement contains provisions governing certain events of default, including a failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any Guarantor or Abengoa Solar except in compliance with the Second Swedish Credit Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the Second Swedish Credit Agreement.

*Convertible Notes due 2017*

*Overview*

On February 3, 2010, the Company issued €250 million aggregate principal amount of 4.5% notes due 2017 (the "**2017 Convertible Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying

agent and Deutsche Bank, S.A.E. acted as commissioner. The 2017 Convertible Notes are governed by English law. The terms and conditions of the 2017 Convertible Notes were amended in December 2012.

On February 3, 2015, holders of the 2017 Convertible Notes exercised their right to require Abengoa to redeem the 2017 Convertible Notes at the principal amount together with accrued and unpaid interest to such date. On October 29, 2015, at a voluntary noteholders' meeting convened by us to adopt resolutions providing the 2017 Convertible Notes with the same level of guarantees as our high yield notes, the legally required quorum was not attained on first call, and therefore we have agreed to hold a second call for a noteholders' meeting to be held on November 30, 2015, for which no minimum quorum is required. As of June 30, 2016, €5.6 million is outstanding under the 2017 Convertible Notes.

*Ranking*

The 2017 Convertible Notes are direct, unconditional, unsubordinated and unsecured obligations of Abengoa, ranking *pari passu* and ratably, without any preference among themselves, and equally with all our other existing and future unsecured and unsubordinated indebtedness, but, in the event of winding up, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Guarantees*

The obligations under the 2017 Convertible Notes are not guaranteed.

*Interest Rates, Payment Dates and Maturity*

The 2017 Convertible Notes bear interest at 4.5% per annum. Interest on the 2017 Convertible Notes is payable semi-annually in arrears in equal installments on February 3 and August 3 of each year, commencing on August 3, 2010. The 2017 Convertible Notes will mature on February 3, 2017.

*Conversion*

The 2017 Convertible Notes are convertible into fully paid ordinary shares of Abengoa credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price and adjusted upon the occurrence of certain events, including, among others, the change in our share capital or the issuance of certain securities by us. The conversion price was initially set at €30.27 per ordinary share of Abengoa and adjusted upon the occurrence of certain events, including, among others, the change in our share capital or the issuance by us of certain securities. In July 2012, the conversion price was adjusted to €29.87 per ordinary share of the Company following a dividend payment (€0.35 per share) in excess of the dividend threshold permitted without adjustment in the conversion price (€0.21 per share). The conversion price was adjusted to €5.97 per share of Abengoa due to the distribution of Class B shares as approved by the Extraordinary General Shareholders' Meeting of Abengoa held on September 30, 2012. Moreover, the conversion price was adjusted to €5.45 per Class B share of Abengoa as a result of a capital increase. The conversion price was further adjusted to €5.35 per Class B share of Abengoa after the dividend payment approved by General Shareholders' meeting of Abengoa held on April 6, 2014. The conversion price was subsequently adjusted to €5.24 per Class B share of Abengoa after the dividend payment approved by General Shareholders' meeting of Abengoa held on March 29, 2015.

The 2017 Convertible Notes are only convertible during the conversion period beginning on and including March 16, 2010 and ending on and including January 23, 2017, subject to certain adjustments. However, should we redeem the 2017 Convertible Notes the conversion period will end on the ninth Trading Day (as defined therein) before the date fixed for redemption.

*Optional Redemption by Abengoa*

We may redeem all the 2017 Convertible Notes in whole, but not in part, at the principal amount, together with accrued and unpaid interest to such date, in the following circumstances:

- if, at any time after February 24, 2013, the value of the principal amount of €50,000 of the 2017 Convertible Notes exceeds €65,000 according to a certain method of valuation described therein; or

- if, at any time, holders of the 2017 Convertible Notes constituting 85% of the nominal amount of the 2017 Convertible Notes originally issued have been exercised and/or purchased and/or redeemed; or

- at any time between 60 and 150 days after the occurrence of either: (i) a tender offer made in accordance with Spanish law and regulations to our shareholders (other than the offeror or persons acting with the offeror) to acquire all or any of our Class A shares or Class B shares where the offeror will obtain control (as defined therein) of Abengoa immediately following the tender offer (the "**2017 Convertible Notes Tender Offer Triggering Event**"); or (ii) the acquisition of 80% of our voting shares by IC and/or any person or persons controlled by IC.

*Optional Redemption by the Noteholders*

The holders of the 2017 Convertible Notes will have the right to require us to redeem the 2017 Convertible Notes upon the occurrence of a 2017 Convertible Notes Tender Offer Triggering Event or if IC acquires 80% of our voting shares.

On February 3, 2015, holders of the 2017 Convertible Notes obtained the right to require Abengoa to redeem the 2017 Convertible Notes at the principal amount together with accrued and unpaid interest to such date.

*Covenants*

We are restricted from taking certain actions while the conversion right attached to the 2017 Convertible Notes remains exercisable, including, among others, the issuance of certain securities, the modification of certain rights attached to our shares, the reduction of our share capital and the creation of certain liens, mortgages, pledges or security interests.

We are also obligated to undertake certain actions while the conversion right attached to the 2017 Convertible Notes remains exercisable, including, among others, to reasonably endeavor to have the 2017 Convertible Notes and the shares issued upon conversion of the 2017 Convertible Notes admitted to listing and to trading on the relevant stock exchanges.

*Events of Default*

The 2017 Convertible Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2017 Convertible Notes, certain failures to perform or to observe any other obligation under the 2017 Convertible Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2017 Convertible Notes would permit the acceleration of all obligations outstanding under the 2017 Convertible Notes.

*Convertible Notes due 2019*

*Overview*

On January 17, 2013, we issued €400 million aggregate principal amount of 6.25% notes due 2019 (the "**2019 Convertible Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2019 Convertible Notes are governed by English law.

At the beginning of 2014, our board of directors expressly and irrevocably resolved, with binding effect, that in relation to the right conferred on the Company to choose the type of payment, the Company shall not exercise the cash settlement option in the event that bondholders decide to exercise their conversion right during the early period granted for that effect.

On April 8, 2015, holders of €238,300,000 in aggregate principal amount of our 2019 Convertible Notes elected to convert their 2019 Convertible Notes into our Class B shares pursuant to the terms of the 2019 Convertible Notes and received a cash payment from us (the "Enhanced Conversion"). We issued 81 million Class B shares

on or about May 6, 2015 in connection with the conversions. On October 29, 2015, a noteholders' meeting convened by us approved resolutions to provide the 2019 Convertible Notes with the same level of guarantees as our high yield notes. As of June 30, 2016, €161.7 million is outstanding under the 2019 Convertible Notes.

*Ranking*

The 2019 Convertible Notes have the same ranking as the 2017 Convertible Notes.

*Guarantees*

The obligations under the 2019 Convertible Notes are guaranteed by the same guarantors, as the 2014 Syndicated Loan Facility Agreement.

*Interest Rates, Payment Dates and Maturity*

The 2019 Convertible Notes bear interest at 6.25% per annum. Interest on the 2019 Convertible Notes is payable semi-annually in arrears in equal installments on January 17 and July 17 in each year, commencing on July 17, 2013. The 2019 Convertible Notes will mature on January 17, 2019.

*Conversion*

The 2019 Convertible Notes are convertible into fully paid Class B shares of the Company credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The conversion price was adjusted to €3.04 per share of Abengoa as a result of the capital increase. The conversion price was further adjusted to €2.98 per Class B share of Abengoa after the dividend payment approved by General Shareholders' Meeting of Abengoa held on April 6, 2014. The conversion price was subsequently adjusted to €2.94 per Class B share of Abengoa after the dividend payment approved by General Shareholders' Meeting of Abengoa held on March 29, 2015.

On April 8, 2015, holders of €238,300,000 in aggregate principal amount (out of a total of €400,000,000 outstanding) of our 6.25% Senior Unsecured Convertible Notes due 2019 elected to convert their 2019 Convertible Notes into our Class B shares pursuant to the terms of the 2019 Convertible Notes and received a cash payment from us (the "**Enhanced Conversion**").

We paid to holders opting to convert a total cash amount of €60,449,108.23. The Enhanced Conversion was not open to holders of the 2019 Convertible Notes who were located in the United States or were U.S. persons within the meaning of Regulation S under the Securities Act, or to holders of the 2019 Convertible Notes in certain other jurisdictions.

*Optional Redemption by the Noteholders*

Following the occurrence of a Tender Offer Triggering Event, the holder of each 2019 Convertible Note will have the right to require us to redeem that 2019 Convertible Note on the Put Date at the Put Price (each as defined in the terms and conditions of the 2019 Convertible Notes), together with accrued interest to (but excluding) the Put Date.

Following the occurrence of a Relevant Person Triggering Event, the holder of each 2019 Convertible Note will have the right to require us to redeem that 2019 Convertible Note on the Put Date at its principal amount together with accrued interest to (but excluding) the Put Date.

*Covenants*

The 2019 Convertible Notes have substantially the same covenants as the 2017 Convertible Notes.

*Events of Default*

The 2019 Convertible Notes have the same events of default provisions as the 2017 Convertible Notes.

*Notes due 2016*

*Overview*

On March 31, 2010, we issued €500 million aggregate principal amount of 8.50% Notes due 2016 (the "**2016 Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2016 Notes are governed by English law.

*Ranking*

The 2016 Notes are our direct, unconditional, unsubordinated and unsecured obligations ranking at least equally, without any preference among themselves, with all our other present and future unconditional unsubordinated and unsecured obligations, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2016 Notes bear interest at 8.50% per annum. Interest on the 2016 Notes is payable semi-annually in arrears on March 31 and September 30 of each year. The 2016 Notes matured on March 31, 2016. As of this date, these notes have not been amortized.

*Guarantees*

The payment of all sums payable by us under the 2016 Notes are unconditionally and irrevocably guaranteed on a joint and several basis by us and certain subsidiaries (collectively, the "**2016 Notes Guarantors** ") which are, the same subsidiaries as in the 2014 Syndicated Loan Facility Agreement. The obligations of each 2016 Notes Guarantor under its guarantee constitute (or will constitute) direct, unconditional, unsubordinated and unsecured obligations of such 2016 Notes Guarantor ranking at least equally with all other present and future unsecured and unsubordinated obligations of such 2016 Notes Guarantor.

If two rating agencies assign the 2016 Notes an Investment Grade Rating, as defined therein (the "**2016 Notes Rating Release Event**"), and no event of default under the 2016 Notes has occurred and is continuing, each of the 2016 Notes Guarantors will be released from its obligations under its guarantee. If certain other events constituting a release event occur with respect to a 2016 Notes Guarantor and no event of default has occurred and is continuing, the relevant 2016 Notes Guarantor will be released from its obligations under its guarantee.

*Optional Redemption by Abengoa*

We may redeem the 2016 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2016 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of such 2016 Notes at March 31, 2016 (excluding accrued but unpaid interest to such redemption date), discounted with the Benchmark Yield (as defined therein) plus 75 basis points, over the principal amount of such 2016 Notes on such redemption date.

In addition, in the event that we become obligated to pay additional amounts (as defined therein) to holders of the 2016 Notes as a result of changes affecting withholding taxes applicable to payments on the 2016 Notes, we may redeem the 2016 Notes in whole but not in part at any time at the principal amount of the 2016 Notes plus accrued interest to the redemption date.

*Optional Redemption by the Noteholders*

Upon the occurrence of certain Change of Control events (as defined therein), each holder of the 2016 Notes may require us to redeem or purchase the Notes, in whole or in part, at 101% of their principal amount, plus accrued and unpaid interest up to the date of such redemption or purchase.

*Covenants*

The 2016 Notes contain covenants that, among other things, limit our ability and the ability of certain of our subsidiaries to:

- incur additional indebtedness;
- make restricted payments, including dividends or other distributions;
- create certain liens; and
- sell assets.

These covenants are subject to important exceptions and qualifications. If a 2016 Notes Rating Release Event occurs (as defined therein), we and our subsidiaries will be released from their respective obligations under certain of these covenants.

*Events of Default*

The 2016 Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2016 Notes, certain failures to perform or to observe any other obligation under the 2016 Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2016 Notes would permit the acceleration of all obligations outstanding under the 2016 Notes.

*Notes due 2017*

*Overview*

On October 28, 2010, our direct wholly owned subsidiary Abengoa Finance, S.A.U. issued $650 million aggregate principal amount of 8.875% Senior Notes due 2017 (the "**2017 Notes**"). Deutsche Trustee Company Limited acted as trustee and Deutsche Bank Trust Company Americas acted as paying agent, transfer agent and registrar. The 2017 Notes are governed by New York law.

*Ranking*

The 2017 Notes are senior obligations of Abengoa Finance, S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance, S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2017 Notes bear interest at 8.875% per annum. Interest on the 2017 Notes is payable semi-annually in arrears on May 1 and November 1 of each year. The 2017 Notes will mature on November 1, 2017.

*Guarantees*

The 2017 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2014 Syndicated Loan Facility Agreement.

*Optional Redemption by Abengoa*

Abengoa Finance, S.A.U. may redeem the 2017 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2017 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the p*r*esent value at such redemption date of the redemption price of such 2017 Notes at

November 1, 2017 (excluding accrued but unpaid interest to such redemption date), discounted with the Treasury Rate (as defined therein) plus 50 basis points, over the principal amount of such 2017 Notes on such redemption date.

In addition, in the event that Abengoa Finance, S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2017 Notes as a result of changes affecting withholding taxes applicable to payments on the 2017 Notes, Abengoa Finance, S.A.U. may redeem the 2017 Notes in whole but not in part at any time at the principal amount of the 2017 Notes plus accrued interest to the redemption date.

*Optional Redemption by the Noteholders*

The 2017 Notes have the same optional redemption by the noteholder provision as the 2016 Notes.

*Covenants*

The 2017 Notes covenants which are similar to the covenants in the 2016 Notes.

*Events of Default*

The 2017 Notes have the same events of default provisions as the 2014 Syndicated Loan Facility Agreement.

*Notes due 2018*

On February 5, 2013, our direct wholly owned subsidiary Abengoa Finance, S.A.U. issued €250 million aggregate principal amount of 8.875% Senior Notes due 2018 (the "**Senior Unsecured Notes due 2018**"). On October 3, 2013 and November 5, 2013, Abengoa Finance, S.A.U. issued €250 million and €50 million, respectively, of additional notes (together with the Senior Unsecured Notes due 2013, the "**2018 Notes**"). Deutsche Trustee Company Limited acted as trustee, Deutsche Bank AG, London Branch, acted as paying agent and Deutsche Bank Luxembourg S.A., acted as transfer agent and registrar. The 2018 Notes are governed by New York law.

*Ranking*

The 2018 Notes are senior obligations of Abengoa Finance, S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance, S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2018 Notes bear interest at 8.875% per annum. Interest on the 2018 Notes is payable semi-annually in arrears on February 5 and August 5 of each year. The 2018 Notes will mature on February 5, 2018.

*Guarantees*

The 2018 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2014 Syndicated Loan Facility Agreement.

*Optional Redemption by Abengoa*

Abengoa Finance, S.A.U. may redeem all or part of the 2018 Notes at any time at a redemption price equal to 100% of the principal amount of the 2018 Notes redeemed, plus the applicable redemption premium, plus accrued and unpaid interest, if any, and additional amounts, if any.

*Optional Redemption by the Noteholders*

The 2018 Notes have the same optional redemption by the noteholder provision as the 2017 Notes.

*Covenants*

The 2018 Notes covenants are similar to the covenants in the 2017 Notes.

*Events of Default*

The 2018 Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2018 Notes, certain failures to perform or to observe any other obligation under the 2018 Notes, certain other indebtedness of the Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2018 Notes would permit the acceleration of all obligations outstanding under the 2018 Notes.

*Dollar Notes due 2020*

*Overview*

On December 13, 2013, our direct wholly owned subsidiary Abengoa Finance, S.A.U. issued $450 million aggregate principal amount of 7.75% Senior Notes due 2020 (the "**2020 Dollar Notes**"). Deutsche Trustee Company Limited acted as trustee and Deutsche Bank Trust Company Americas acted as paying agent, transfer agent and registrar. The 2020 Dollar Notes are governed by New York law.

*Ranking*

The 2020 Dollar Notes are senior obligations of Abengoa Finance, S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance, S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2020 Dollar Notes bear interest at 7.75% per annum. Interest on the 2020 Dollar Notes is payable semi-annually in arrears on August 1 and February 1 of each year. The 2020 Dollar Notes will mature on February 1, 2020.

*Guarantees*

The 2020 Dollar Notes have the same guarantee provisions as the 2014 Syndicated Loan Facility Agreement.

*Optional Redemption by Abengoa*

Abengoa Finance, S.A.U. may redeem the 2020 Dollar Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2020 Dollar Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of such 2020 Dollar Notes at February 1, 2020 (excluding accrued but unpaid interest to such redemption date), discounted with the Bund rate (as defined therein) plus 50 basis points, over the principal amount of such 2020 Dollar Notes on such redemption date.

In addition, in the event that Abengoa Finance, S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2020 Dollar Notes as a result of changes affecting withholding taxes applicable to payments on the 2020 Dollar Notes, Abengoa Finance, S.A.U. may redeem the 2020 Dollar Notes in whole but not in part at any time at the principal amount of the 2020 Dollar Notes plus accrued interest to the redemption date.

*Optional Redemption by the Noteholders*

The 2020 Dollar Notes have the same optional redemption by the noteholder provision as the 2017 Notes.

*Covenants*

The 2020 Dollar Notes contain covenants which are similar to the covenants in the 2016 Notes.

*Events of Default*

The 2020 Dollar Notes have the same events of default provisions as the 2016 Notes.

*Euro Notes due 2020*

*Overview*

On April 21, 2015, Abengoa Finance S.A.U issued €375 million aggregate principal amount of 7% Senior Notes due 2020 (the "**2020 Euro Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2020 Dollar Notes are governed by New York law.

*Ranking*

The 2020 Euro Notes are direct, unconditional, unsubordinated and unsecured obligations ranking at least equally, without any preference among themselves, with all of our other present and future unsecured and unsubordinated obligations, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2020 Euro Notes bear interest at 7.00% per annum. Interest on the 2020 Euro Notes is payable semiannually in arrears in equal installments on October 15 and April 15 of each year commencing October 15, 2015. The 2020 Euro Notes will mature on April 15, 2020.

*Guarantees*

The payment of all sums payable by us under the 2020 Euro Notes are unconditionally and irrevocably guaranteed on a joint and several basis by us and certain subsidiaries (collectively, the "**2020 Euro Notes Guarantors**") which are, the same as the guarantors in the 2014 Syndicated Loan Facility Agreement. The obligations of each 2020 Euro Notes Guarantor under its guarantee constitute (or will constitute) direct, unconditional, unsubordinated and unsecured obligations of such 2020 Euro Notes Guarantor ranking at least equally with all other present and future unsecured and unsubordinated obligations of such 2020 Euro Notes Guarantor.

*Optional Redemption by the Noteholders*

Upon the occurrence of certain Change of Control events (as defined therein), each holder of the 2020 Euro Notes may require us to redeem or purchase the Notes, in whole or in part, at 101% of their principal amount, plus accrued and unpaid interest up to the date of such redemption or purchase.

*Covenants*

The 2020 Euro Notes covenants are similar to the covenants in the 2016 Notes.

*Events of Default*

The 2020 Euro Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2020 Euro Notes, certain failures to perform or to observe any other obligation under the 2020 Euro Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2020 Euro Notes would permit the acceleration of all obligations outstanding under the 2020 Euro Notes.

*Notes due 2021*

*Overview*

On March 27, 2014, our direct wholly owned subsidiary, Abengoa Finance, S.A.U., issued €500 million aggregate principal amount of 6.00% Senior Notes due 2021 (the "**2021 Notes**"). Deutsche Trustee Company Limited acted as trustee, Deutsche Bank AG, London Branch acted as paying agent and Deutsche Bank Luxembourg S.A. acted as listing agent, transfer agent and registrar. The 2021 Notes are governed by New York law.

*Ranking*

The 2021 Notes are senior obligations of Abengoa Finance, S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance, S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2021 Notes bear interest at 6.00% per annum. Interest on the 2021 Notes is payable semi-annually in arrears on March 15 and September 15 of each year. The 2021 Notes will mature on March 31, 2021.

*Guarantees*

The 2021 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2014 Syndicated Loan Facility Agreement.

*Optional Redemption by Abengoa*

Abengoa Finance, S.A.U. may redeem the 2021 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2021 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; and (ii) the present value at such redemption date of: (x) 100% of the aggregate principal amount of such Note to be redeemed; plus (y) all required interest payments that would otherwise be due to be paid on such Note through March 31, 2021 (excluding accrued but unpaid interest to the redemption date), computed using a discount rate equal to the Bund Rate at such redemption date plus 50 basis points; over (ii) the outstanding principal amount of the Note.

In addition, in the event that Abengoa Finance, S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2021 Notes as a result of changes affecting withholding taxes applicable to payments on the 2021 Notes, Abengoa Finance, S.A.U. may redeem the 2021 Notes in whole but not in part at any time at the principal amount of the 2021 Notes plus accrued interest to the redemption date.

*Optional Redemption by the Noteholders*

The 2021 Notes have the same optional redemption by the noteholder provision as the 2016 Notes.

*Covenants*

The 2021 Notes contain covenants which are similar to the covenants in the 2016 Notes.

*Events of Default*

The 2021 Notes have the same events of default provisions as the 2016 Notes.

*Exchangeable Notes*

*Overview*

On March 5, 2015, we issued $279 million aggregate principal amount of the 5.125% senior exchangeable notes due 2017 (the "**Exchangeable Notes**"). Citibank, N.A., London Branch acted as fiscal, paying, transfer and exchange agent, and Bondholders, S.L. acted as commissioner. The Exchangeable Notes are governed by English law. Since the commencement of the exchange period for the Exchangeable Notes on September 1, 2015 through June 30, 2016, we have received exchange notices for a total nominal amount of $278.4 million. On October 29, 2015, a noteholders' meeting convened by us approved resolutions to provide the Exchangeable Notes with the same level of guarantees as our high yield notes. As of June 30, 2016, [•] million was outstanding under the Exchangeable Notes.

*Ranking*

The Exchangeable Notes constitute direct, unconditional, unsubordinated and (subject to the negative pledge provisions of the Exchangeable Notes) unsecured obligations of Abengoa ranking pari passu and ratably, without any preference among themselves, and equally with all other existing and future unsecured and unsubordinated indebtedness of Abengoa. The terms and conditions of the Exchangeable Notes contain certain events of default including a cross acceleration event of default.

*Guarantees*

The obligations under the Exchangeable Notes are guaranteed by the same guarantors as the 2014 Syndicated Loan Facility Agreement.

*Interest Rates, Payment Dates and Maturity*

The Exchangeable Notes bear interest at 5.125% per annum, payable semiannually in arrears on March 5 and September 5 each year, commencing on September 5, 2015. The Exchangeable Notes will mature on March 5, 2017.

*Conversion*

During the Exchange Period (as described below), the Exchangeable Notes are exchangeable into (i) where the date of exchange falls on or after the Physical Settlement Commencement Date (as defined in the terms and conditions of the Exchangeable Notes), a pro rata share of the exchange property (which, as of the issue date of the Exchangeable Notes, comprised 7,482,678.74 ordinary shares of Abengoa Yield after adjustments due to the quarterly dividend payment) (the "**Exchange Property**") and (ii) where the date of exchange falls prior to the Physical Settlement Commencement Date, a cash amount to be determined during the relevant calculation period. The Exchange Period will commence on September 1, 2015 and end at close of business on the seventh Madrid business day prior to the final maturity date, or if the Exchangeable Notes have been called for redemption prior to the final maturity date, the seventh Madrid business day preceding the relevant redemption date. The terms and conditions of the Exchangeable Notes contain standard provisions for the adjustment of the Exchange Property upon certain dilutive events including, inter alia, share sub divisions, consolidations or redenominations, rights issues, bonus issues, dividends and reorganizations. As of the date of this Disclosure Statement, the Exchange Property consists of 16,474 ordinary shares of Abengoa Yield.

*Optional Redemption by Abengoa*

The Exchangeable Notes may be redeemed at the option of Abengoa in whole, but not in part, at their principal amount together with accrued interest at any time if Exchange Rights have been exercised and/or purchases and/or redemptions effected in respect of 85% or more in nominal amount of the Exchangeable Notes originally issued. In addition, the Exchangeable Notes may be redeemed at the option of holders upon the occurrence of certain events including a change of control or delisting of the Abengoa Yield shares.

Abengoa may elect to satisfy its obligation to redeem Exchangeable Notes on the final maturity date or upon any exercise of a put right following a change of control by delivering the relevant portion of the Exchange Property (or a combination of such Exchange Property and cash) in lieu of redeeming the Exchangeable Notes fully in cash.

Abengoa and Abengoa Yield entered into a registration rights agreement with the managers of the Exchangeable Notes pursuant to which Abengoa Yield agreed, among other things, to file a shelf registration statement with the SEC on or prior to the 180th day after the first date of original issuance of the Exchangeable Notes, covering resales, if any, of the Abengoa Yield shares deliverable upon exchange of the Exchangeable Notes.

*Optional Redemption by the Noteholders*

The holders of Exchangeable Notes None, will have the right to require us to redeem the 2017 Exchangeable Notes in the event of (i) a Change of Control in respect of the Company, (ii) a Free Float Event, (iii) a Delisting Event, in each case, at the Principal Amount of each Note plus accrued interest or (iv) the Company ceasing to own or be entitled to, in each case, directly or indirectly, sufficient Exchange Property to satisfy the Exchange Rights in full.

*Covenants*

The obligations under the Exchangeable Notes have not any covenant.

*Events of Default*

The Exchangeable Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the Exchangeable Notes, certain failures to perform or to observe any other obligation under the Exchangeable Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the Exchangeable Notes would permit the acceleration of all obligations outstanding under the Exchangeable Notes.

***Project Debt***

Compared to corporate financing, Project Debt has certain key advantages, including a defined risk profile, lower funding costs, generally longer terms and its ability to enable higher leverage on a project company basis.

We incur Project Debt either through special purpose project companies that are established to finance multiple projects or businesses or in certain instances, special purpose project companies established for a single project. In each case, the project company enters into the financing agreement directly with the relevant lender for a specific project. The basis of the financing agreement between the project company and lender details the allocation of the cash flows generated by the project and the amortization schedule of payments owed under the financing agreement. Under such arrangements, any claims against the assets of the project company are subordinated to those of the lender or lenders, if multiple projects have been financed through the project company, until the financing is repaid in full, but the lender or lenders only have recourse to the project company's assets and not to the shareholder of the project company or the sponsor of the project. Consequently, the cross default provisions of Abengoa's borrowings do not apply to defaults of project companies, thus safeguarding the non-recourse nature of the project financings.

Project Debt refers to non-recourse loans obtained by certain Group entities dedicated to long-term projects for the development of integrated products. Project Debt also includes bridge loans, which relates to certain operations which are financed in a similar manner to non-recourse projects, generally by financial entities, and which are earmarked to be future development projects which typically will be eventually financed through project finance schemes. Such funding typically relates to transitional financing phases of a project (typically periods of less than 2-3 years) during the launch and construction phase of goods/projects, which once completed and ready for operation, become financed under the project finance model. In these situations Abengoa, S.A. and/or its subsidiaries (other than non-recourse subsidiaries) provide, from time to time, guarantees of obligations whereby Abengoa, S.A. and/or its subsidiaries (other than non-recourse subsidiaries) act as sponsors for the period prior to such project companies securing long-term project financing for their projects. However, if during such transitory period we believe there is a risk of non-compliance with the debt repayment schedule necessary in order to obtain project finance (or of construction, which will ultimately require financing), such financing would be reclassified on the consolidated statements of financial position as a type of corporate financing, depending upon the nature of the arrangements, typically being loans with financial

entities. For more detailed information on Project Debt refer to Note 17 to our Consolidated Condensed Interim Financial Statements.

As of June 30, 2016, we had €2,127 million of borrowings classified as bridge loans (see Note 17 to our Consolidated Condensed Interim Financial Statements for details).

Our activities, in particular our Engineering and Construction activity, regularly operate as contractors or service providers to the project company to either construct or maintain the project for third-party owner or sponsor of the project and may also undertake certain obligations for the project company. Although we are usually required to provide credit and other support to the project company in relation to its trading activities (by way of performance bonds, guarantees or other commitments), we do not provide, with certain limited exceptions, any credit support for the repayment of the project company's debt obligations. We have, from time to time, provided guarantees of obligations of certain project companies incurred under working capital facilities of such project companies, other contingent obligations, and letters of credit or guarantees replacing amounts withdrawn by us from debt service reserve accounts held by project companies. These guarantees, letters of credit and other contingent liabilities have been incurred from time to time for reasons relating to the unique circumstances of the relevant project company or the history of its acquisition or development.

The table below shows our Project Debt as of June 30, 2016 and December 31, 2015. Project Debt of projects under construction which were deconsolidated upon the application of IFRS 10 until their entry into operation and Project Debt incurred by projects classified under assets and liabilities held for sale are not included below. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations—Operating Results—Factors Affecting the Comparability of Our Results of Operations—IFRS 10 and 11*".

| **Total** | **2.621** | **3.071** |

Our main bridge financing arrangements consist of the following:

*Secured Term Facility Agreement*

*Overview*

On October 22, 2015, ACI entered into a $130 million secured term facility agreement (the "**2015 Secured Term Loan**") with Talos Capital Limited, in order to finance the promotion, development and construction of concessional projects. The 2015 Secured Term Loan is governed by English law.

*Purpose*

The 2015 Secured Term Loan provides for borrowings designed towards granting "intragroup" financing configured as short-term "bridge"-type project financing granted in favor of project companies devoted exclusively to the promotion, development and construction of concessional projects. The financing is used solely and exclusively for the financing of the promotion, development and construction of project companies.

*Borrower*

[1] Project Debt excludes amounts withdrawn from the project bridge loans, which have been issued by the projects with contractor and sponsor guarantee by Abengoa and/or some of corporate subsidiaries (which are not project companies), amounting to €493 million and which have been transferred to liabilities held for sale and for Atacama I project in Chile specifically, included in the consolidated statement of financial position of Abengoa Project Warehouse (APW-1), joint venture accounted for using the equity method amounted €240 million.

ACI is the borrower of the 2015 Secured Term Loan.

*Amount and Repayment of Borrowings*

The 2015 Secured Term Loan is for a total amount to $130 million has to be repaid 24 months after the utilization date, which occurred on October 23, 2015.

*Share Collateral*

Initially, 14 million ordinary shares of Abengoa Yield have been credited to ACI's share collateral account. The loan contains provisions to post additional collateral as a function of the loan-to-value ratio.

*Mandatory Prepayment*

The 2015 Secured Term Loan will be due and payable upon the occurrence of the following events: a change of control, a continuing default, or a share event. A share event consists of one of the following events in connection with Abengoa Yield: that the ordinary shares cease to be listed, freely traded or publicly quoted; a capital adjustment failure after a share capital change; insolvency; a merger; nationalization; or a tender offer.

*Change of Control*

The lender has the ability to require early repayment of all outstanding borrowings under the 2015 Secured Term Loan, together with accrued interest and all accrued commissions and expenses, upon a change of control. Control of ACI is defined as either: (a) control more than 50% or more of the voting rights; (b) the right to appoint or remove all or the majority of the board of directors or other governing body; or (c) the right to direct the *operating* and financial policies of ACI.

*Events of Default*

The 2015 Secured Term Loan contains provisions governing certain events of default, including the failure to make payment of the amounts due, failure to post additional collateral when due, failure to deposit an amount of dividend on the collateralized shares on the date of receipt sufficient to ensure the next interest payment, material misrepresentations, cross default, insolvency, unlawfulness, and litigation. The occurrence of an event of default could result in the acceleration of payment obligations under the 2015 Secured Term Loan.

*October 2014 Notes Program*

*Overview*

In October 1, 2014, we entered into a five-year senior unsecured notes program with a group of lenders for an initial maximum available amount of €125 million, which may be increased up to €425 million (the "**October 2014 Notes Program**"). As of June 30, 2016, €329 million in notes have been issued.

*Purpose*

Proceeds from the October 2014 Notes Program are to be used for financing the development of our projects until long-term external funds associated with such projects can be secured.

*Ranking*

The October 2014 Notes Program is guaranteed by us on a senior basis. In the event of our insolvency (unless we qualify as a subordinated claim pursuant to article 92 of Law 22/2003 (*Ley Concursal*) of July 9 or equivalent legal provisions which replace it in the future, and subject to any applicable legal and statutory exemptions) the notes issued under the October 2014 Notes Program will rank *pari passu* and ratably without any preference among themselves and at least *pari passu* with all other present and future unsecured and unsubordinated indebtedness of Abengoa, S.A.

*Interest Rates, Payment Dates and Maturity*

The notional weighted average interest rate of the notes issued under the October 2014 Notes Program is 6.92% per annum. Interest on the notes issued under the October 2014 Notes Program is payable quarterly. Notes issued under the October 2014 Notes Program feature a variety of original maturity dates between 33 and 62 months from the date of issuance.

*Guarantees*

Abengoa, S.A. and Abengoa Greenbridge, S.A.U. are the specified issuers under the October 2014 Notes Program. Abengoa, S.A. acts as the guarantor when Abengoa Greenbridge, S.A.U. is the issuer of a series of notes.

*Redemption Events*

In the event of an amendment in Spanish tax law which prevents an issuer from making their next payment of principal or interest without paying additional amounts, noteholders have the right to require the issuer to redeem their October 2014 Notes Program notes at a redemption price equal to 100% of the principal amount of the October 2014 Notes Program notes redeemed, together with any interest accrued to, but excluding the date of, redemption (the "**Early Adoption Amount**"). If in the event of an amendment in Spanish law prevents an issuer from making their next payment of principal or interest altogether, the issuer will be required to redeem a noteholder's October 2014 Notes Program notes for the Early Adoption Amount.

If in the event that a successor to the issuer does not succeed to all of the issuer's obligations under the October 2014 Notes Program or if in the event that the issuer receives notice that a Credit Event (as defined therein) has occurred, the issuer will be required to redeem the October 2014 Notes Program notes at a redemption price equal to the Early Redemption Amount.

If in the event that a change in any applicable law would prevent the parties to the October 2014 Notes Program from performing or complying with their obligations, noteholders have the right to require the issuer to redeem their October 2014 Notes Program notes at a redemption price equal to the Early Redemption Amount.

*Covenants*

We are restricted from taking certain actions during the term of October 2014 Notes Program including, among others, any actions in the event of a liquidation that might place the noteholders in a worse position than they would have been had the issuer not entered into the transaction. We are also required to make any additional tax payments or fees arising from or in connection with the October 2014 Notes Program.

*Events of Default*

The October 2014 Notes Program contains provisions governing certain events of default, including a failure to make payment of the amounts due, certain other indebtedness of ours becoming due and payable prior to its stated maturity otherwise than at our option, failure to pay any amount payable when due under any present or future guarantee over a certain threshold, failure to comply with covenants or other obligations, a cessation of business and certain bankruptcy events. The occurrence of any of the events of default in the October 2014 Notes Program would permit the acceleration of all obligations outstanding under the October 2014 Notes Program.

*Notes due 2019*

*Overview*

On September 30, 2014, our direct wholly owned subsidiary, Abengoa Greenfield, S.A., issued €265 million aggregate principal amount of 5.50% Euro Senior Notes due 2019 and $300 million aggregate principal amount of 6.50% U.S. Dollar Senior Notes due 2019 (the "**2019 Notes**"). Deutsche Trustee Company Limited acted as trustee, Deutsche Bank AG, London Branch acted as paying agent for the Euro Senior Notes, Deutsche Bank Trust Company Americas acted as paying agent for the U.S. Dollar Senior Notes and Deutsche Bank Luxembourg S.A. acted as listing agent, transfer agent and registrar. The 2019 Notes are governed by New York law. We applied the net proceeds of the 2019 Notes to finance, in whole or in part, Eligible Green Projects (as defined therein) until the long-term funds associated with those projects are obtained.

*Ranking*

The 2019 Notes are senior obligations of Abengoa Greenfield, S.A. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Greenfield S.A., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

*Interest Rates, Payment Dates and Maturity*

The 2019 Euro Notes bear interest at 5.50% per annum and the 2019 U.S. Dollar Notes bear interest at 6.50% per annum. Interest on the 2019 Notes is payable semi-annually in arrears on April 1 and October 1 of each year. The 2019 Notes will mature on October 1, 2019.

*Guarantees*

The 2019 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2014 Syndicated Loan Facility.

*Optional Redemption by Abengoa*

Abengoa Greenfield, S.A. may redeem the 2019 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2019 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; and (ii) the present value at such redemption date of: (x) 100% of the aggregate principal amount of such Note to be redeemed; plus (y) all required interest payments that would otherwise be due to be paid on such Note through October 1, 2019 (excluding accrued but unpaid interest to the redemption date), computed using a discount rate equal to the Bund Rate at such redemption date plus 50 basis points; over (ii) the outstanding principal amount of the Note.

In addition, in the event that Abengoa Greenfield, S.A. becomes obligated to pay additional amounts (as defined therein) to holders of the 2019 Notes as a result of changes affecting withholding taxes applicable to payments on the 2019 Notes, Abengoa Greenfield, S.A. may redeem the 2019 Notes in whole but not in part at any time at the principal amount of the 2019 Notes plus accrued interest to the redemption date.

*Optional Redemption by the Noteholders*

The 2019 Notes have the same optional redemption by the noteholder provision as the 2016 Notes.

*Covenants*

The 2019 Notes contain covenants which are similar to the covenants in the 2016 Notes.

*Events of Default*

The 2019 Notes have the same events of default provisions as the 2016 Notes.

As of June 2016 our main bridge financing arrangements classified as liabilities held for sale or accounted for using equity method. consist of the following:

*Brazilian T&D Lines - Bridges*

*Overview*

As of June 30, 2016 several Brazilian subsidiaries of Abengoa held bridge loans with several local and international banks for the development of transmission and distribution projects in Brazil (the "**Brazilian T&D Bridge Loans**"). Particularly, these projects were the ATE XVI, ATE XVII, ATE XVIII and ATE XXII transmission projects. The total outstanding amount of these four bridge loans as of June 30, 2016 is the equivalent of €289 million.

*Purpose*

The Brazilian T&D Bridge Loans provide funds to cover costs, including primarily payment of EPC-related costs to commence the purchase of transmission services related to construction of a total of 2,852 kilometers of transmission lines. These projects were awarded through bidding process with ANEEL, the Brazilian regulatory agency.

*Interest Rates and Fees*

The annual interest rate on borrowings are calculated, on average between the four bridge loans, based on CDI, plus a margin between 3.1% and 5% per annum, depending on the bridge loan.

*Guarantees*

The obligations under the Brazilian T&D Bridge Loans are each guaranteed by Abengoa S.A. and in some cases by other Brazilian entities such as Abengoa Consessoes Brasil Holding, S.A.

*Repayment of Borrowings*

The Brazilian T&D Bridge Loans amount to $289 million. Each of the individual project companies, as borrowers, are obligated to prepay the Brazilian T&D Bridge Loans after obtaining permanent financing or at maturity on different dates starting in January 2016 until November 2016. In case of individual defaults by the borrowers, the lenders are entitled to demand prepayment of principal, interest and fees. As of the current date, the equivalent of €169 million have not been repaid at maturity.

*Covenants*

The individual project companies are restricted from taking certain actions during the term of the Brazilian T&D Bridge Loans, including amending their bylaws, restrictions relating to additional indebtedness and hedging transactions, merging with another company, granting security over any of their assets, providing credit or investments in the capital of subsidiaries or affiliates or entering into any agreements with affiliates except for expressly permitted agreements, disposing of its assets, assigning their rights and obligations under the Brazilian T&D Bridge Loans, and subordinating the Brazilian T&D Bridge Loans to any other obligation.

*Events of Default*

The Brazilian T&D Bridge Loans contain provisions governing certain events of default, including that the guarantee agreement becomes void, a change of control of Abengoa S.A., failure to pay amounts due at maturity, any default of any subsidiary of Abengoa S.A. whose amount exceeds $25 million, non-compliance with contractual obligations and certain cases of insolvency. The occurrence of an event of default could result in the acceleration of payment obligations under the Brazilian T&D Bridge Loans.

*Abeinsa Juárez N-III, S.A. de C.V. (Norte III) Bridge Loan*

*Overview*

On March 5, 2015, Abeinsa Juarez N-III, S.A. de C.V., a subsidiary of the Company, entered into $200 million a bridge loan (the "**Norte III Loan**") with Bancomext, Sumitomo Mitsui Banking Corporation, Kreditanstalt fur Wiederaufbau, Crédit Agricole Corporate and Investment Bank, and Banco Santander. The Norte III Loan is governed by New York law.

*Purpose*

The Norte III Loan provides financing of the development costs of the initial works, design and procurement of certain equipment in connection with the Norte III combined cycle plant in Ciudad Juárez, Chihuahua, Mexico.

*Interest Rates and Fees*

The annual interest rate of the Norte III Loan is the three-month LIBOR rate plus 3.00%. Interest is payable quarterly. The Norte III Loan will be canceled at the earlier of March 5, 2016 (the termination date) or upon entering into long term non-recourse financing. As of this date, the Norte III Loan has not been amortized.

*Guarantees*

The Norte III Loan is guaranteed by Abengoa S.A.

*Repayment of Borrowings*

Abeinsa Juarez N-III, S.A. de CV, as the borrower, is obligated to prepay the Norte III Loans, in whole or in part, in an amount equal to: (i) insurance funds collected in relation to the project that have not been used to remedy an event giving rise to an insurance claim; (ii) proceeds received that are attributable to certain sales; (iii) proceeds obtained by incurring additional debt except for debt expressly permitted by the agreement; and (iv) proceeds from early termination of the principal project agreements.

*Covenants*

Abeinsa Juarez N-III, S.A. de CV, as the borrower, may not incur additional indebtedness, except as expressly permitted (subordinated loans, VAT line of credit, derivatives, and credit payment line for suppliers for maximum amount of $10 million). In addition, Abeinsa Juarez N-III, S.A. de CV may not perform certain actions including providing guarantees on certain assets or rights, issuing guarantees to third-parties, making restricted payments, modifying the schedule or budget of the construction contract without consent, pursuing non-permitted investments and selling, and transferring or leasing certain assets related to the financed project.

*Events of Default*

The Norte III Loan contains provisions governing certain events of default including the failure to make payments when due, breach of contractual obligations, breach of representations and warranties, breach of the material project documents, cross-default, certain cases of insolvency, invalidity of the loan guarantee, invalidity of the loan documents, change of control or transfer of participation to a prohibited person, expropriation or condemnation, abandonment and bribery.

*Bridge Loan Planta Solar Cerro Dominador*

*Overview*

On August 27, 2014, CSP Atacama Uno, S.A., a subsidiary of the Company, entered into a $205 million bridge loan (the "**Atacama I Loan**") with a syndicate of lenders. The Atacama I Loan is governed by New York law.

*Purpose*

The Atacama I Loan provides financing for the design, development and construction of the "**Planta Solar Cerro Dominador**" solar project located in Antofagasta, Chile with an installed capacity of 110 MW.

*Interest Rates and Fees*

The Atacama I Loan bears interest at LIBOR plus 3.8%. Interest is payable quarterly or semiannually. The Atacama I Loan will be canceled at the earlier of its maturity date or upon entering into long term non-recourse financing. The original maturity date was August 27, 2015 and was subsequently extended to February 27, 2016. As of this date, the Atacama I Loan has not been amortized.

*Guarantees*

The Atacama I Loan is guaranteed by Abengoa S.A., APW 1 Spain, S.L., Abengoa PW I Investments, S.L.U., and APW I Investments, S.L.

*Repayment of Borrowings*

CSP Atacama Uno, S.A., as the borrower, is obligated to make mandatory prepayments on the Atacama I Loan in an amount equal to: (i) certain insurance funds collected in relation to the project; (ii) proceeds received that are attributable to certain sales; and (iii) funds arising from alternative financing.

*Covenants*

CSP Atacama Uno, S.A., as the borrower, may not incur an additional senior debt if its debt-to-equity ratio exceeds 75% as a result of incurring such additional senior debt. In addition, it may not perform certain actions, including providing guarantees on certain assets or rights, issuing guarantees to third-parties, incurring additional non-permitted debt, making non-permitted investments, selling, disposing of or leasing certain assets related to the financed project, and making certain restricted payments.

*Events of Default*

The Atacama I Loan contains provisions governing certain events of default including failure make payments when due, breach of contractual obligations, the non-renewal of insurance, change of control, in case of use of proceeds different from what agreed upon, non-fulfillment of other obligations and restrictive covenants, termination of the activities, certain cross defaults and cases of insolvency. The occurrence of an event of default could result in the acceleration of payment obligations under the Atacama I Loan.

*ATN3 Bridge Loans*

*Overview*

On June 21 and 24, 2013, ATN3 S.A., a subsidiary of the Company, entered into two financing agreements in the amounts of $43 and $30 million, respectively (the "**ATN 3 Bridge Loans**"), with Corporación Andina de Fomento ("**CAF**") and Bancolombia Puerto Rico International Inc. ("**Bancolombia**") in order to finance the cost of transmission lines in Peru. The ATN 3 Bridge Loans are governed by Peruvian law.

*Purpose*

The ATN 3 Bridge Loans provide financing for costs related to the 220 Kv Machupichu - Quencoro - Onocora - Tintaya y Subestaciones Asociadas transmission line, located in Peru, including the purchase of rights of way, development costs, working capital, advance payments, payment of commissions and other costs necessary for the development project.

*Interest Rates and Fees*

With respect to CAF component of the ATN 3 Bridge Loans, the interest rate is LIBOR plus an annual margin of 3.5%, payable semiannually. With respect to the Bancolombia component of the ATN 3 Bridge Loans, the interest rate is LIBOR plus an annual margin of 4.39% payable semiannualy until September 29, 2015 and 6.40% thereafter. The ATN 3 Bridge Loans had an initial term of 24 months. Their term was subsequently extended by six months for the CAF loan (until December 21, 2015) and 5 months for the Bancolombia loan (until November 24, 2015). As of this date, the ATN3 Bridge Loans have not been amortized.

*Guarantees*

The obligations under the ATN 3 Bridge Loans are guaranteed by Abengoa S.A.

*Repayment of Borrowings*

ATN3 S.A., as the borrower, is obligated to prepay the ATN 3 Bridge Loans, in whole or in part, in an amount equal to: (i) insurance funds collected in relation to the project that have not been used to remedy an event giving rise to an insurance claim; (ii) proceeds obtained by incurring additional debt except for debt expressly permitted by the agreement; and (iii) proceeds arising from the sale of fixed assets above a certain amount and with certain exceptions.

*Covenants*

ATN3 S.A. is restricted from taking certain actions during the term of the ATN 3 Bridge Loans, including changing its bylaws, merging with another company, granting a security interest over any of its assets, issuing credit or pursuing investments in the capital of any affiliate, entering into any contract with any affiliate or subsidiary (except as expressly permitted in the agreement), assigning its rights and obligations under the ATN 3 Bridge Loans, subordinating the ATN 3 Bridge Loans to any other obligation, and modifying the execution schedule of the project or its budget.

*Events of Default*

The ATN 3 Bridge Loans contain provisions governing certain events of default including the guarantee becoming void, change of control of Abengoa S.A., revocation of the ATN 3 Bridge Loans preemption rights, the existence of any rule preventing or restricting the issuance of the ATN 3 Bridge Loans under the terms of the agreement, the failure to pay any amounts due, the failure to fulfill any contractual obligations and certain cases of insolvency.

**Capital Expenditures**

The table below sets forth our historic capital expenditures by our three activities for the six month period ended June 30, 2016, and the years ended December 31, 2015, 2014 and 2013.

| | **Six months ended June 30, 2016** | **2015** | **2014** | **2013** |
|---|---|---|---|---|
| | *(unaudited)* | | *(€ in millions)* | |
| Engineering and Construction | 18 | 103 | 134 | 132 |
| Concession-Type Infrastructure | 146 | 1,972 | 2,469 | 1,931 |
| Industrial Production | 16 | 134 | 280 | 194 |
| **Total** | **180** | **2,209** | **2,883** | **2,257** |

In the six months ended June 30, 2016, due primarily to our Brazilian T&D Lines, our Atacama projects, Norte III and A3T and A4T in Mexico, we have invested €180 million. In the last three years, due to the increase in capital expenditures incurred to develop our portfolio of projects in power transmission, solar plants, biofuels and water desalination plants, we have invested €2,209 million, €2,883 million and €2,257 million in the full years 2015, 2014 and 2013, respectively, which has resulted in negative cash flow from investing activity. These projects are developed over long periods of time, many of which are over 12-month periods. Our total equity capital expenditure investments for 2015 were expected to be higher than initially budgeted due mainly to new financing conditions for transmission lines in Brazil that have reduced the leverage permitted to be incurred and increased equity requirements as well as to accelerate.

In accordance with the viability plan presented on August 16, 2016 and its new corporate strategy, Abengoa has decided to minimize cash contribution into existing projects, taking the decision to sell or hibernate the most cash-consuming projects. Abengoa also intends not to contribute cash in new concessional (Integrated Product) projects until the first quarter for 2018. From 2018 through 2020, Abengoa has plans to limit its equity investment in future projects at a total of €535 million approximately. This limit includes the assumption of limiting the equity participation to 33% of the total equity needs of the individual projects, and a total leverage of 70%. The €535 million are expected to be allocated in the "Management's Discussion and Analysis – Liquidity and Capital Resources").

Additionally, we plan to finalize projects under construction under the approach of minimizing our equity contribution, selling or hibernating certain projects. The expected operating cash-flows of these projects, are described in section Management's Discussion and analysis-Liquidity and Capital Resources. The expected start-up dates of the most significant assets under construction as of June 30, 2016 are as follows:

| **Description of assets** | **Location** | **Capacity** | **Abengoa (Equity Ownership %)** | **Expected start up** |
|---|---|---|---|---|
| **Solar** | | | | |
| Atacama I(PV, CSP) | Chile | 210 MW | 45% | Q1-17 , Q4-18 |

| Description of assets | Location | Capacity | Abengoa (Equity Ownership %) | Expected start up |
|---|---|---|---|---|
| Atacama Solar Platforms (PV, CSP)* | Chile | 280 MW | 100% | n/a |

* Projects hibernated. They will be reactivated once PPA and financing are obtained

Brazilian transmission lines are excluded in this section as they have been earmarked for sale as part of our restructuring plan without requiring further equity contribution by us.

**Quantitative and Qualitative Disclosure About Market Risk**

Our activities are undertaken through our segments and are exposed to market risk, credit risk, liquidity risk and capital risk. Risk management is the responsibility of our corporate finance department in accordance with mandatory internal management rules. The internal management rules provide written policies for the management of overall risk, as well as for specific areas, such as exchange rate risk, credit risk, interest rate risk, liquidity risk, use of hedging instruments and derivatives, and the investment of excess cash.

***Foreign Exchange Rate Risk***

Foreign exchange risks arise (i) from commercial transactions to be settled in the future, for which assets and liabilities are not denominated in the functional currency of the entity and (ii) from financial liabilities denominated in a different currency from the functional currency of the subsidiary.

Risks from commercial transactions: To manage foreign exchange risks arising from commercial transactions, we purchase forward purchase/sale contracts. Such contracts provide protection related to the fair value of future cash flow. Most projected transactions which are not denominated in our functional currency qualify as highly probable forecast transactions for hedge accounting purposes. The main exchange rate exposures relate to the U.S. Dollar and the euro. Our foreign exchange risks mainly relate to our operations in connection with purchases and sales in a currency other than the functional currency, mostly affecting the U.S. Dollar against the euro. These purchases and sales, other than in the functional currency, are hedged through our purchase of future currency sale/purchase contracts. Specifically, an appreciation of the U.S. Dollar against the euro would result in a decrease/increase of our purchase costs/sale price in the profit and loss account, which would be compensated by the derivatives purchased, to the extent that the transactions have been hedged. We would recognize a net gain or loss in the income statement from the net assets or liabilities that remain unhedged.

The total notional amount of the financial instruments relating to amounts receivable and payable outstanding in foreign currencies for each of the years ended December 31, 2015, 2014 and 2013 was as follows:

| | Collections Hedging | | | Payments Hedging | | |

| Zloty (Poland) | (9,235) | (7,176) | (8,555) | 2,475 | 1,125 | 2,896 |
| **Total** | **(22,214)** | **(11,699)** | **4,378** | **7,274** | **4,553** | **(11,869)** |

In the event that the exchange rate of the U.S. Dollar had risen (/decreased) by 10% against the euro on December 31, 2015, with the rest of the variables remaining constant, the effect in the profit and loss accounts would have been a decrease in profit (/loss) of €27.2 million, mainly due to our U.S. Dollar unhedged net liability position in companies with euro functional currency and a decrease in other reserves of €1.6 million, respectively, as a result of the cash flow hedging effects on highly probable future transactions.

***Interest Rate Risk***

Interest rate risks arise mainly from our financial liabilities at variable interest rate. To mitigate interest rate risk, we use interest rate swaps and interest rate options (caps and collars).

As a result, the notional amounts hedged, strikes contracted and maturities, depending on the characteristics of the debt on which the interest rate risk is being hedged, are very diverse, including the following:

a) Corporate financing: between 78% and 100% of the notional amount, with maturities up to 2022 and average guaranteed interest rates of between 0.5% and 4.75% for loans referenced to the 1-month, 3-month and 6-month EURIBOR rates; and

b) Project Debt:

1) Project Debt in euro: between 80% and 100% of the notional amount, maturities until 2032 and average guaranteed interest rates of between 0.55% and 4.88%; and

2) Project Debt in U.S. Dollars: between 75% and 100% of the notional amount, maturities until 2032 average guaranteed interest rates of between 0.59% and 3.54%.

In connection with our interest rate derivative positions, the most significant impact on our Consolidated Financial Statements are derived from the changes in EURIBOR, which represents the reference interest rate for the majority of our corporate and Project Debt.

In relation to our interest rate swaps positions, an increase in EURIBOR above the contracted fixed interest rate would create an increase in our financial expense which would be positively mitigated by our hedges, reducing our financial expenses to our contracted fixed interest rate. However, an increase in EURIBOR that does not exceed the contracted fixed interest rate would not be offset by our derivative position and would result in a net financial loss recognized in our consolidated income statement. Conversely, a decrease in EURIBOR below the contracted fixed interest rate would result in lower interest expense on our variable rate debt, which would be offset by a negative impact from the mark-to-market of our hedges, increasing our financial expenses up to our contracted fixed interest rate, thus resulting in a likely neutral effect.

In relation to our interest rate options positions, an increase in EURIBOR above the strike price would result in higher interest expenses which would be positively mitigated by our hedges, reducing our financial expenses to our capped interest rate, whereas a decrease of EURIBOR below the strike price would result in lower interest expenses.

In addition to the above, our results of operations can be affected by changes in interest rates with respect to the unhedged portion of our indebtedness that bears interest at floating rates.

In the event that EURIBOR interest rates had risen by 25 basis points on December 31, 2015, with the rest of the variables remaining constant, the effect in the income statement would have been a profit of €7.32 million, mainly due to the fair value increase due to the time value of the interest rate options (caps and collars) designated as hedges and an increase of €28.37 million in other reserves as a result of the fair value increase of interest rate swaps, caps and collars designated as hedges.

***Commodity Risk***

The risk of commodity price changes through both the sale of products and services as well as the purchase of commodities for production processes. In general, we use forward purchase contracts and options that are listed on organized markets, as well as over-the-counter ("**OTC**") contracts with financial institutions, to mitigate the risk of market price fluctuations.

The most significant impacts on our Consolidated Financial Statements derived from commodity risks are related to the price and supply of grains such as wheat, barley, corn and sorghum, sugar, ethanol, gas and aluminum. Prior to the Befesa Sale, our commodity risks also included the prices of zinc and steel.

In relation to our bioethanol production, prices of inputs (grain, sugarcane, natural gas and others) and prices of outputs (ethanol, sugar, DGS and others) are affected by market forces that are independent from each other. Consequently, an increase in the cost of grains or other inputs would increase our production costs for ethanol, sugar, DGS and other products. These increases may be compensated by hedges in place to cover highly probable future purchases that have been contracted to fix the purchase price of inputs, which could neutralize some input price volatility on a transaction-by-transaction basis.

In addition, an increase in ethanol, sugar, DGS and other production costs cannot be directly converted into higher selling prices, since the prices of these outputs are referenced to market trading prices. We seek to mitigate the volatility in the output prices by purchasing OTC derivatives.

These hedging strategies are implemented in order to manage the spread between the prices of inputs and outputs by securing the production costs of each transaction where the output prices are fixed by contract. As a result of the combination of these two strategies, increases or decreases in market prices of ethanol and/or grains affect the spread that can be secured for each transaction, but do not eliminate volatility in net income, since the spread fluctuates in each transaction.

Gas hedging strategies are carried out together with other commodities, as described above, in order to manage our exposure to changes in energy prices. Therefore, depending on forward production sales and on the types of contracts, we may hedge the cost of our natural gas consumption. These hedging transactions are usually OTC natural gas swaps that are only traded with investment-grade counterparties and are recorded as financial derivatives for cash flow hedging. As of December 31, 2015, we have only traded natural gas hedging swaps in the United States, and have no hedging in place in Europe, although our ethanol sale contracts with Repsol YPF, S.A. ("**Repsol**") enable us to pass on this cost. We do not have any energy contracts that could generate material losses if the corresponding energy prices were to decrease.

In addition, certain of our subsidiaries have engaged in purchase and sale transactions in the grain and ethanol markets, in accordance with management trading policy. These operations reflect the implementation of management- approved strategies for the purchase and sale of forward and swap contracts, mainly for grain and ethanol, which are controlled and reported on daily following the procedures established under our trading policy. As a risk- mitigation element, we set daily limits or "stop losses" for each strategy and, depending on the market in which we are operating, the financial instruments purchased and the risks defined in the transaction.

In relation to the cost of aluminum, which is purchased and then sold, an increase in the price of aluminum would result in an increase in both our cost (from the purchase transactions) and our revenue (from sale transactions) resulting in a natural hedge.

The table below shows a breakdown of the maturities of notional amounts for the commodity price derivatives designated as cash flow hedges for each of the years ended December 31, 2015, 2014 and 2013, including zinc and aluminum derivatives obtained prior to the completion of the Befesa Sale:

| **2015** | **Fuel** | **Ethanol** | **Gas** | **Grain** | **Zinc** | **Aluminum** |

There were no commodity price derivatives not designated as hedges as of December 31, 2015, 2014 and 2013.

At December 31, 2015, if the price of grain had increased by 10%, with all other variables remaining constant, the effect in the consolidated income statement would have been [null and a decrease in other reserves of €1,349 thousand due to open derivative contracts primarily grain purchases held by the Group].

At December 31, 2014, if the price of ethanol had increased by 10%, with all other variables remaining constant, the effect in the consolidated income statement would have been [null and an increase in other reserves of €49,086 thousand due to open derivative contracts primarily ethanol purchases held by the Group].

For additional information about our financial instrument and hedging activity refer to Note 4, Note 12and Note 14 of our Consolidated Annual Financial Statements included elsewhere in this Disclosure Statement.

***Credit Risk***

Trade and other receivables, short-term financial investments and cash are the main financial assets of the Company and present the greatest exposure to credit risk in the event that a third-party does not comply with its obligations.

Most of our receivables relate to our customers who operate in a range of industries and countries with contracts that require ongoing payments as the project advances, the service is rendered or upon delivery of the product. It is common practice for us to reserve the right to cancel the work in the event of a material breach, especially non-payment. In addition, we rely on written confirmation for the non-recourse purchase of accounts receivable (factoring). In these arrangements, we pay a bank fee to assume the credit risk as well as interest charges for the financing component.

In this regard, derecognizing of factored accounts receivable is taken only when all the requirements of IAS 39, *Financial instruments; Recognition and Measurement* are met. Therefore, we consider whether or not the risks and rewards inherent in the ownership of the asset have been transferred, including a comparison of our risk before and after the transfer, considering the amounts and timing of net cash payments to be received. Once the risk to the grantor company has been eliminated or is considered to be substantially reduced, it is considered that the financial asset in fact has been transferred.

In general, our greatest risk is the risk of not collecting a trade account receivable. This is our greatest risk because it may be of significant value in the development of a project or in the provision of a service and it is not within our control. However, for those contracts in which there is a possibility of customer payment delay, with no commercial justification, which could theoretically be identified as a risk associated to the financial asset, and so we establish that, not only should the risk of legal insolvency (bankruptcy, etc.) be covered, but

also that of *de facto* or evident insolvency (arising from the client's management of its own cash, even though there is no "general moratorium").

As indicated, it is our policy to transfer the credit risk associated with our customers and other accounts receivable through the use of non-recourse factoring. As such, with regard to considering risks inherent with debtors and other accounts receivable on the statements of financial position, generally amounts can be excluded that relate to works completed and awaiting certification for which factoring contracts are in place, as well as amounts which could be factored which are outstanding to be submitted to the financial entity providing the factoring, and also those debtors included which are covered by an insurance policy.

The following table shows the maturity detail of trade receivables for each of the years ended December 31, 2015, 2014 and 2013:

| | Balance as of December 31, | | |
|---|---|---|---|
| | **2015** | **2014** | **2013** |
| | **(€ in thousands)** | | |
| **Maturity** | | | |
| Up to 3 months | 344,132 | 405,137 | 409,744 |
| Between 3 and 6 months | 26,045 | 50,928 | 43,305 |
| Over 6 months | 144,911 | 136,563 | 113,881 |
| **Total** | **515,088** | **592,628** | **566,930** |

***Capital risk***

We manage capital risk to ensure the continuity of the activities of our subsidiaries from an equity standpoint by seeking to maximize the return for the shareholders and optimize the structure of equity and debt in the respective companies or projects.

The leverage objective of the activities of the Company is not measured based on the level of debt on own resources, but on the nature of the activities:

- For activities financed through Project Debt, each project is assigned a leverage objective based on the cash and cash flow generating capacity, generally, of contracts that provide these projects with highly recurrent and predictable levels of cash flow generation.

- For activities financed with Corporate Financing, the objective is to maintain reasonable leverage, defined as 2.0 times corporate EBITDA over Net Corporate Debt (excluding the EBITDA and Project Debt) in 2014.

Due to the facts and circumstances occurred during the second half of the year 2015, Abengoa had at the end of November 2015 substantial liquidity needs mainly to attend capital expenditure in assets, short and medium term debt maturities related to operations and negative working capital.

On November 25, 2015, the Company, due to the circumstances explained above, decided to initiate a refinancing process to try to reach an agreement with its main financial creditors that would ensure a suitable framework in which to undertake the said negotiations and the financial stability of the Group in the short and medium term.

In relation to the process, after carefully evaluating the situation described above and in order to ensure the stability necessary to conduct these negotiations with the creditors, the Board of Directors of the Company deemed that the most appropriate approach was to submit the communication provided under Article 5 bis of Ley Concursal. In this regard, on December 15, 2015, Commercial Court No. 2 of Seville issued a Decree agreeing that the communication provided for under Article 5 bis of Ley Concursal had been filed.

Relating to the aforementioned refinancing process, on January 25, 2016, the independent and specialized advisors firm in restructuring processes Alvarez&Marsal presented to the Board of Directors of Abengoa the Industrial Viability Plan that defined the structure of the future activity of Abengoa on an operating basis focusing on the Activity of Engineering and Construction either developing its own technology or using technology developed by others.

Based on this Viability Plan, the Company has begun negotiations with its creditors to restructure the debt. In the context of these negotiations and the circumstances that have been affecting our projects since the Initial Viability Plan was prepared by Alvarez&Marsal, an Updated Viability Plan was prepared during the second half of May.

- Pursuant to the preparation of the Updated Viability Plan and the ongoing negotiations until June 30, 2016, date in which Abengoa announced that had reached grounds for an agreement with the Bank Coordination Committee and a group of bondholders and investors on the main terms of the proposed financial restructuring to be signed.

- Afterwards, on September 23, 2016, Abengoa, S.A. entered into the Restructuring Agreement with a group of entities comprised of main financial creditors and potential investors. The agreement is subject to certain documentation and a number of the usual conditions in this kind of transactions.

- On September 26, 2016, Abengoa, S.A. announced the commencement of an accession process (which expires on October 26, 2016), during which financial creditors of the Abengoa group may accede to the Restructuring Agreement. Once the support of 75% of the creditors has been obtained, an application for judicial approval (*homologación judicial*) of the Restructuring Agreement will be filed with the the Mercantile Court of Seville

**Off-Balance Sheet Arrangements**

The total value of off-balance sheet arrangements and third-party guarantees decreased by approximately €1,506 million, from €8,683 million as of December 31, 2015 to €7,177 million as of June 30, 2016. Such figure comprises (i) guarantees provided by financial institutions (bank bonds and surety insurance) for the benefit of third parties and (ii) the overall value of guarantees undertaken by the Group for the benefit of third parties.

With respect to guarantees provided by financial institutions for the benefit of third parties, this subset comprises bank bonds and surety insurance directly deposited by such Group companies with financial institutions and those deposited by us to any company in the Group as guarantee to third parties (clients, financial entities, public entities and other third parties). Such commitments totaled €1,611 million as of June 30, 2016 compared to €1,630 million in December 31, 2015.

With respect to guarantees provided by Group companies for the benefit of third parties, this subset comprises a range of declarations of intent and commitments undertaken by Group companies and us regarding group companies in support of their operations with third parties. Such guarantees totaled €5,566 million as of June 30, 2016 compared to €7,053 million as of December 31, 2015.

For further discussion, see Note 23.1 to our Consolidated Annual Financial Statements.

**EXHIBIT I-3**

**Abengoa, S.A. Board of Directors and Management**

**ABENGOA, S.A. MANAGEMENT AND BOARD OF DIRECTORS**

**Board of Directors**

Spanish corporate law provides that a company's board of directors is responsible for its representation, administration and management in all matters concerning the business of a company, subject to the provisions envisaged in the bylaws (*estatutos sociales*) of that company and resolutions adopted at general shareholders' meetings by a majority vote of the shareholders. The board of directors (the "**Board**" or "**Board of Directors**") is responsible for the Group's management and establishes the Group's strategic, accounting, organizational and financing policies. Under Spanish law, the Board may delegate permanently certain of its powers (with certain exceptions) to an executive committee or other delegated committee or to one or more executive officers, unless the shareholders, through a meeting, have specifically delegated certain powers to the Board and have not approved the Board's delegation to others.

The bylaws provide that the Board will be composed of a minimum of 3 and a maximum of 16 members, most of whom shall qualify as independent directors. As of the date of this Disclosure Statement, the Board is composed of 10 members (also referred to as "**directors**" or "**Directors**"): 2 executive directors, 5 independent directors and 3 proprietary directors representing the Group's shareholders.

The general shareholders' meeting or, where appropriate, the Board of Directors exercising the power legally conferred on it to fill vacancies arising from time to time caused by the resignation or removal of a director during his or her term, shall appoint the members of the Board of Directors in accordance with the applicable laws. The Company's directors are elected for terms of four years. They may be subsequently re-elected for further four-year terms.

Vacancies occurring prior to the termination of the term to which the relevant director was appointed may be filled by a person appointed by the Board of Directors until the following general shareholders' meeting is held (*cooptación*). In the event that the vacancy occurs once the general shareholders' meeting has been convened and before it has been held, the Board may appoint a director until the next general shareholders' meeting.

A Director may be removed from office by the shareholders at a general shareholders' meeting.

Directors shall vacate their office on expiration of their appointment, death or resignation and by resolution of the general shareholders' meeting in the case of incapacity, disqualification or removal.

Furthermore, in accordance with the Company's Regulations of the Board of Directors, Directors are required to offer their resignation to the Board of Directors when, among other circumstances (i) they are involved in any of the cases of incompatibility or prohibition established by law; (ii) they are severely sanctioned by any public authority for having contravened their obligations as directors; (iii) so requested by the Board for having contravened their obligations as directors; (iv) in relation to proprietary directors, the shareholder that is represented thereby fully transfers its shareholding or reduces its shareholding to a level that requires a reduction in the number of proprietary directors, in this latter case, in the corresponding proportion; and (v) the actions thereof may prejudice the prestige or reputation of the Company.

In addition to compliance with all legal and statutory requirements as to eligibility, directors appointed to the Board shall also be solvent and possess the knowledge, standing, expertise and professional experience required to fulfill the duties of a director.

Under Spanish corporate law, shareholders who voluntarily pool their shares so that the capital stock so pooled is equal to or greater than the result of dividing the total capital stock by the number of directors have the right (*derecho de representación proporcional*) to appoint a corresponding proportion of the members of the Board of Directors (disregarding fractions). Shareholders who exercise this right may not vote on the appointment of other directors.

The Board and its Committees are governed by the bylaws and the regulations adopted by the Board of Directors on 23 February 2015, as amended on 23 September 2015 and on 30 March 2016 (*Reglamento del Consejo de Administración*) ("**Board of Directors Regulations**"). The Board of Directors Regulations develop the Company's bylaws and establish the principles for the functioning of the Board, including the basic rules for its organization and functions and the standards of conduct for and rights and duties of the Board members. The

Chairman of the Board and the Vice Chairman, who acts as Chairman in the event of the Chairman's absence or incapacity, shall be elected from among the members of the Board. The Secretary and, where appropriate, the Vice Secretary of the Board of Directors need not be directors. The Vice Secretary will act as Secretary upon the Secretary's absence.

The Board of Directors Regulations provide that the Board shall meet at least once every two months and when it is in the best interest of the Company to do so at the registered office of the Company or elsewhere deemed appropriate by the Chairman, as indicated in the notice of meeting.

Meetings shall be summoned by the Chairman or, in his or her absence or incapacity, by the Vice-Chairmain. The notice, which shall state the agenda, place, day and hour of the meeting, shall be delivered to the members of the Board in writing no less than four days prior to the meeting, provided that such notice period may be reduced exceptionally in the event of urgency if the Company's best interest so requires and the urgent grounds for the meeting are unanimously agreed by all attendees at the start of the meeting. Notice requirements may be dispensed with if all the members of the Board are present or give their written consent to such a meeting. Decisions can be taken by voting in writing provided that all Board members so agree.

The Chairman of the Board may call a meeting whenever he or she considers such a meeting necessary or suitable, and the Chairman of the Board is also required to call a meeting at the request of the Independent Coordinator Director or at the request of the Directors that represent one third of the members of the Board. If fifteen calendar days have passed from receipt of the request by those Directors that represent one third of the members of the Board, and/or the independent coordinator director (*consejero independiente coordinardor*) and the Chairman has not yet convened the Board, the meeting must be called by the Vice-Chairman. Furthermore, the meeting may also be convened by one-third of the Directors, indicating the agenda, if following a request submitted to the Chairman the meeting is not convened within a period of a one month, with our justification.

Directors may appoint another director as their proxy. Non-executive directors can only appoint another non-executive director as their proxy. There is no restriction on the number of instruments of proxy that any one director may hold for a specific meeting. Proxies may be granted in any written form, including telegram, telex or telefax, and shall be addressed to the Chairman of the Board.

The Company´s bylaws provide that half plus one of the members of the Board (represented in person or by proxy by another member of the Board) constitutes a quorum. No business may be transacted at a meeting of the Board of Directors unless such quorum is present, except in the event that a meeting is held without notice, in which case all the members of the Board of Directors must be present and agree.

Except as otherwise provided by Spanish corporate law or specified in the Company's bylaws or the Board of Directors Regulations, all of the decisions of the Board must be adopted by an absolute majority of the directors present or represented at a Board meeting. In the event of an equality of votes, the Chairman of the Board of Directors shall have the casting vote.

***Current Directors***

The following table sets forth, as of the date of this Disclosure Statement, the name, position, date of first appointment, date of last appointment, date of expiry of the appointment and category of each member of the Board. The business address of all of Abengoa's directors is the registered office: Campus Palmas Altas, Calle Energía Solar, No. 1, 41014 Seville, Spain.

[(1)] Ms. Ana Abaurrea Aya is nominated by Inayaba, S.L. as its representative.

The Secretary non-director of the Board is Mr. Daniel Alaminos Echarri.

According to article 529 *septies* 2 of the Spanish Companies Act and article 41 of the Company's bylaws and article 21 of the Board of Directors Regulations, where the Chairman of the Board is an executive director, the Board of Directors shall appoint an independent director as an independent lead director (*consejero independiente coordinador*) with, among others, the following powers: (i) request the Chairman to call a meeting whenever he or she considers such a meeting necessary or suitable; (ii) request the inclusion of new points on the agenda of a Board of Directors meeting; (iii) coordinate and express the opinions of non-executive directors; (iv) lead the periodic evaluation of the Chairman of the Board of Directors and coordinate the plan for his replacement; and (v) maintain contacts with investors and shareholders to understand their concerns in relation to, in particular, corporate governance aspects.

According to article 41 of the Company's bylaws the Chairman of the Board shall not hold simultaneously the role of Chief Executive Officer of the Company.

As the Chairman is an executive director, on 7 March 2016 the Board of Directors appointed Ms. Alicia Velarde Valiente, independent director, as the Lead Independent Director.

Below is biographical information for the current members of the Company's Board.

***Antonio Fornieles Melero***

Mr. Fornieles is currently the Executive Chairman of Abengoa. He was appointed to the Board on 19 January 2015. He joined Abengoa having spent almost his entire career in the audit sector. He joined the Spanish Institute of Chartered Accountants in 1987 and was made a partner in KPMG in 1994. He was subsequently appointed to the board of the firm, responsible for the audit function of KPMG Spain and COO of the audit function globally. Prior to joining Abengoa, Mr. Fornieles was responsible for the middle market program for all KPMG offices in Spain. He graduated with a degree in economics and business studies from *Universidad Complutense de Madrid* and completed a senior management diploma in business management from the *Instituto Internacional San Telmo* business school. He has been a lecturer in the faculty of economics and business studies at the *Universidad de Cádiz*, and a regular speaker and lecturer in various universities and corporations about issues related to financial reporting, business management and corporate governance and ethics.

***Joaquín Fernández de Piérola Marín***

Joaquín Fernández de Piérola Marín is currently the First Vice-Chairman and Chief Executive Officer of the Company since 27 November 2015. BA in Economics and Business from the Univ. Of Zaragoza, with a major in Commercial Research from Bristol U.W.E. (England) and General Management Programme (PDG) from IESE. He has worked in the Spanish Economic and Commercial Offices in Riyadh (Saudi Arabia) and Baghdad (Iraq). After this stage in the public sector, he has been the International Director of GHT infrastructure group, joining in mid-2003 Befesa Agua (Abengoa's environmental infrastructure company), in which he worked in different positions in the commercial and concessions field. Afterwards, he was the Business Development Vice President for Middle East and Asia of Abeinsa (head of Abengoa's E & C). He is also a member of the Investment Committee.

***Alicia Velarde Valiente***

Ms. Velarde graduated magna cum laude from the *Instituto Católico de Enseñanza*, Colegio Pablo VI. She also holds a degree in Law from the Universidad San Pablo. In 1990, Ms. Velarde passed the notary examination and became a notary public. During the 1994-1995 academic year she taught civil law at the *Universidad Francisco de Vitoria* in Madrid, where she remained until 1999. She is still affiliated with this university, where, from 1999, she teaches canon law. Ms. Velarde is currently the Second Vice-Chairman, the independent lead director, the Chairman of the Audit Committee, the Chairman of the Investment Committee and member of the Appointments and Remuneration Committee.

***Ignacio Solís Guardiola***

Mr. Solís graduated from the *Universidad de Sevilla* with a specialty in private law. He currently serves as a Regional Director for private banking of Lloyds Bank, which he joined in 1989. He has been a member of the board of directors of Abengoa since 2007.

***José Borrell Fontellés***

Mr. Borrell is Professor of Introduction to Economic Analysis at Madrid's Universidad Complutense and Chairman of the European University Institute in Florence. He studied aeronautic engineering at the Universidad Politécnica in Madrid, and also holds a doctorate in Economic Sciences, a master's degree in Operations Research from Stanford University and a master's degree from Paris' *Institut Français du Pétrole*. He worked as an engineer at *Compañía Española de Petróleos* from 1972 to 1981, and, between 1982 and 1996, he served successively as Spanish Secretary General for Budget, Secretary of State for Finance and Minister for Public Works, Telecommunications, Transport and the Environment. He was President of the European Parliament for the first half of the 2004 to 2009 legislative term and President of the Development Assistance Committee for the second half. Mr. Borrell is a member of the Audit Committee, member of the Appointments and Remuneration Committee, and appointed chairman of the Strategy and Technology Committee since 19 January 2015.

***José Joaquín Abaurre Llorente***

Mr. Abaurre serves as a member of the board of directors of Abengoa. He has held this position since 25 June 1988. He is also a member of the Strategy and Technology Committee. Mr. Abaurre is an expert in audiovisual activities.

***Mercedes Gracia Díez***

Ms. Gracia holds a doctorate in econometrics and studied at *Universidad Autónoma*. She works as a Professor of Econometrics at Madrid's *Universidad Complutense* and at *Centro Universitario de Estudios Financieros*. She serves as an Independent Director of the board of directors of Abengoa. Her academic papers have been published in the *Journal of Business and Economic Statistics, Review of Labor Economics and Industrial Relations, Applied Economics and the Journal of Systems and Information Technology*. She also served as Director of Balance Sheet Management at Caja Madrid (1996-1999). Additionally, she served as Head of the Economics and Law Division of the Agencia Nacional de Evaluación y Prospectiva. She is a member of the Audit Committee, the chairman of the Appointments and Remuneration Committee and a member of the Investment Committee.

***Ricardo Hausmann***

Professor Hausmann, a Venezuelan economist and academic, is the current director of the Centre for International Development and a Professor at Harvard University. He was formerly Chief Economist at the Inter-American Development Bank, where he created the Research Department. He has also held positions such as the Minister of Planning for Venezuela, and member of the board of the Central Bank of Venezuela. He was a lecturer of economics at the *Instituto de Estudios Superiores de Administración* in Caracas, where he founded the Centre for Public Policies.

***Ricardo Martínez Rico***

Mr. Martínez studied at the Universidad de Zaragoza, obtaining a first class bachelor's degree in Business Administration. He joined Abengoa on October 24, 2011 as a director and is a member of the Strategy and Technology Committee. He is the founding partner and current president and chief executive officer of Equipo Económico, a Madrid based consulting firm. In addition, Mr. Martínez is a member of the advisory board to the President of the U.S. Chamber of Commerce of the United States. Previously he was head of Spain's Economic and Commercial Office in Washington, D.C. (2006) and in 2003 he was appointed Deputy Finance Minister of the Spanish government (2003-2004). Mr. Martínez was also Spain's spokesman on the European Budgetary Council and European Council for Regional Policy. He is a member of the Strategy and Technology Committee.

***Ana Abaurrea Aya***

Ms. Ana Abaurrea Aya has a Degree in Law by the Universidad de Navarra and a post graduate degree on tax advisory by El Monte. She works as a tax lawyer since 1994.

The table below sets out all entities (other than Group companies) in which the members of the Board of Directors have been appointed as members of their administrative, management or supervisory bodies at any time during the five-year period preceding the date of this Disclosure Statement, indicating whether or not each person is still a member of such bodies:

**Post-Restructuring Directors**

In accordance with the terms of the Restructuring Agreement, at the Extraordinary General Meeting of shareholders convened for November 21, 2016 (the "**Restructuring EGM**"), the shareholders will vote on resolutions accepting the resignation of all the existing members of the Board of Directors, reducing the number of directors to seven (7) directors, and appointing as new directors the following individuals nominated by the Nomination and Remuneration Committee on the basis of the proposal by the executive search consulting firm "Spencer Stuart":

| Name | Category |
|---|---|
| Gonzalo Urquijo Fernández de Araoz | Executive |
| Manuel Castro Aladro | Independent |
| José Luis del Valle Doblado | Independent |
| José Wahnon Levy | Independent |
| Ramón Sotomayor Jáuregui | Independent |
| Javier Targhetta Roza | Independent |
| Pilar Cavero Mestre | Independent |

**Senior Management Team**

The following table sets forth the name and position of each member of the Company's current senior management team. The business address of each member of the Company's senior management team is located at Campus Palmas Altas, Calle Energía Solar, No. 1, 41014 Seville, Spain.

| Name | Position |
|---|---|
| Jesús Ángel García-Quilez Gómez | Chief Financial Officer |
| Antonio Vallespir de Gregorio | Biofuels Executive VP |
| Alfonso González Domínguez | Engineering and Construction and South America Executive VP |
| Armando Zuluaga Zilbermann | Solar Executive VP |
| Álvaro Polo Guerrero | Human Resources Director |
| Juan Carlos Jiménez Lora | Director of Planning and Control |
| Germán Bejarano García | Assistant CEO, International Institutional Relations Director |
| Daniel Alaminos Echarri | General Secretary |
| Luis Enrique Pizarro Maqueda | Chief Audit Officer |
| Enrique Borrajo Lovera | Consolidation and Reporting Officer |
| Miguel Ángel Jiménez-Velasco Mazarío | Compliance Officer |
| Enrique Aroca Moreno | Chief Information Officer |

There are no potential conflicts of interest between the private interests or other duties of the members of the senior management of Abengoa listed above and their duties to Abengoa. There is no family relationship between any of the Company's directors and members of our senior management.

Below is biographical information for each of the members of the Company's senior management team, who are not members or representatives of members of the Board of Directors.

***Jesús Ángel García-Quilez Gómez***

Mr. García-Quílez has been the Chief Financial Officer of Abengoa since May 2013. He previously served in the Control, Treasury and Financial Departments, and as Head of Corporate Finance since 2002. He holds a degree in Business Administration from *Universidad de Sevilla*, an Executive MBA from San Telmo Business School and a diploma in Corporate Performance from the Harvard Business School.

***Antonio Vallespir de Gregorio***

Mr. Vallespir de Gregorio has been the Chief Executive Officer of Abengoa Bioenergy since 2015. He previously served as the Chief Operations Officer of Abengoa Bioenergy for Europe from 2005 to 2013, and as Procurement, IT and Quality Manager of Abengoa Bioenergy in Saint Louis from 2002 to 2004. He joined Abengoa in 2000 having previously worked at Telefónica Móviles and Gadisa. Mr. Vallespir is a qualified telecommunications engineer from the *Universidad Politécnica de Cataluña* in Barcelona, Spain. He also holds an MBA from the Instituto de Empresa business school and has taken the general management program at the IESE business school. He is a member of the management board of ASEBIO, the Spanish Bio-industry Association.

***Alfonso González Domínguez***

Mr. González has been Engineering and Construction (Transmission and Co-generation) Executive Vice President and South America VP since 2006. He joined Abengoa in 1990. Since then, he has held several management positions, including Managing Director of Sainsel and Divisional Manager of Water within our environmental services sector. He was also the Managing Director of Inabensa and the director of our engineering activities. Previously, he worked for five years as Project Engineer in different Spanish nuclear plants and for five years as Program CN234 Director for Construcciones Aeronáuticas S.A., a company subsequently acquired by Airbus Military Company S.A.S.

***Armando Zuluaga Zilbermann***

Mr. Zuluaga is currently the Solar Executive Vice President of Abengoa. He has also been the Chief Executive Officer of Abengoa Solar since January 2014. He was the general manager of Abengoa Solar in the United States from 2012 to 2014, and was previously Assistant General Secretary of Abengoa and General Secretary of Abengoa Solar from 2009 to 2013, and General Counsel of Abengoa from 2007 to 2009. He holds a law degree from the *Universidad de Granada*, a master's degree in EU law from the Universidad Carlos III in Madrid and an Executive MBA from the San Telmo business school.

***Álvaro Polo Guerrero***

Mr. Polo has been the Human Resources Director of Abengoa since 2000. He holds a degree in Law from the *Universidad de Sevilla*, a master's degree in general management from the IESE Business School at the *Universidad de Navarra*, and a certificate in Executive Human Resources Education from the University of Michigan Ross School of Business.

***Luis Fernández Mateo***

Mr. Mateo has been Director of Organization, Quality and Budgets since 2007. He holds a degree in Economic Sciences and Business from Universidad Pontificia Comillas and also obtained a degree in Business Administration from the Instituto de Estudios Superiores de la Empresa.

***Juan Carlos Jiménez Lora***

Mr. Jiménez has been the Planning and Control Director of Abengoa since 2011. From 1996 to 2010 he was Head of Investor Relations. Previously, he served as the Group Financial Controller for five years. He holds a degree in Business Administration and a master's in tax studies and has passed the Management Development Program of the IESE business school.

***Germán Bejarano García***

Mr. Bejarano has been Assistant CEO and Chairman's Adviser and International Institutional Relations Director since 2008. He holds a degree in Economics and Business Administration from the Universidad Autónoma de Madrid, a *Diplôme d'Études Approfondies* from *Université de Nancy II* and a *Diplôme d'Études Supérieures Européennes, Centre Universitaire Européen de Nancy*. He held various positions in the Spanish Civil Service since 1988 when he joined the Ministry of Economy and Finance as a Senior Economist and Trade Specialist working at the General Technical Secretariat and the Treasury. He was also the representative of the Spanish government at the Inter-American Development Bank, where he was appointed as Executive Director and Alternate Executive Director (1992-1998). In addition, he served as Vice-Secretary General for Economic and Budgetary Matters at the Ministry of Economy and Finance of the Spanish government in 1999 and Director

General for Economic International Relations at the Ministry of Foreign Affairs (2000-2004). He also served as Spain's ambassador to Malaysia (2004-2007) and Brunei Darussalam (2005- 2007).

***Daniel Alaminos Echarri***

Mr. Alaminos is currently the General Secretary of Abengoa and Secretary of its board of directors. He has been a state attorney since 1996 and he has held various previous positions, including General Counsel of SEPI, the Spanish holding group for state-owned companies. Prior to joining Abengoa in 2014, Daniel was a partner in the capital markets group of the law firm Ramón y Cajal Abogados. He also has experience of restructuring savings banks, capital increases and restructuring major real estate and industrial groups, as well as advising on a wide range of issues, especially financial, technological and industrial matters. He holds a law degree specializing in business law from *Universidad San Pablo CEU*.

***Luis Enrique Pizarro Maqueda***

Mr. Pizarro has been the Chief Audit Officer of Abengoa since 2005. Previously, he worked as an Internal Audit manager for the savings bank Caja San Fernando and at Arthur Andersen as a financial auditor. He holds a degree in Business Administration from *Universidad de Sevilla*, a degree in Law magna cum laude from the *Universidad Pablo de Olavide*, and an Executive MBA from the IESE Business School at *Universidad de Navarra*, and is licensed as a certified public accountant in Spain.

***Enrique Borrajo Lovera***

Mr. Borrajo has been the Consolidation and Reporting Officer of Abengoa since 2007. He joined Abengoa in 2000 in its internal audit department. He holds a degree in Business Administration from the *Universidad de Córdoba* and an Executive MBA from the *Foundation San Telmo*.

***Miguel Ángel Jiménez-Velasco Mazarío***

Mr. Jiménez Velasco is currently the Compliance Officer of Abengoa. He was the General Secretary of Abengoa between 2003 and June 2014. He holds a degree in Law from the *Universidad Autónoma de Barcelona* and a master's degree in Senior Business Management and Finance from the Instituto Internacional de Empresas at the Universidad de Deusto. Since 2003, he served as General Counsel of Abengoa and was appointed Secretary and Advisory Lawyer of the board of directors of Abengoa.

***Enrique Aroca Moreno***

Mr. Aroca has been the Chief Information Officer since 2005. Prior to 2005, he held other managerial positions in Telvent and Abengoa. Mr. Aroca is a qualified Telecommunications Engineer from the *Universidad Politécnica de Madrid* and has completed an Executive Master in Business Administration at the IE Business School in Madrid. He holds the CISA and CISM security certifications from Isaca.

**Independent Directors**

As indicated elsewhere in this section, the Company's Board of Directors is currently comprised of ten directors, five of whom are independent directors.

**Board Committees**

In compliance with our bylaws and Board of Directors Regulations, our Board of Directors has an audit committee (the "**Audit Committee**") and a nomination and remuneration committee (the "**Nomination and Remuneration Committee**") which are governed by the "**Audit Committee Regulations**" and the "**Nomination and Remuneration Committee Regulations**", respectively. Additionally, the Company has a strategy and technology committee (the "**Strategy and Technology Committee**") and an investment committee (the "**Investment Committee**").

***Audit Committee***

Companies with shares listed on the Spanish Stock Exchanges must have an audit committee regulated by their respective bylaws and board of directors regulations in terms appropriate to foster such committee's independence.

The Audit Committee comprises a minimum of three directors, appointed by the Board. Members of the Audit Committee will serve as members of the Committee for a period of four years unless the Board resolves otherwise. The Audit Committee of the Board must be made up exclusively of non-executive directors, the majority of whom, at least, must be independent directors and must be knowledgeable and have experience in accounting or audit matters, especially the Chairman. The Board appoints likewise the Chairman of the Audit Committee. Taken as a whole, the members of the Audit Committee have the relevant expertise in relation to the business sectors to which the Company belongs. The Chairman of the Audit Committee must be an independent director and he or she (as well as all of the members of the Board) may serve as Chairman of the Committee for a period of up to four years. Upon the expiry of such term, he or she may not be re-appointed for a further term as Chairman of the Committee unless a period of at least one year has elapsed since he or she ceased to be Chairman of the Committee. However, he or she may continue to serve his or her appointment as a member of the Committee.

As of the date of this Disclosure Statement, the members of the Audit Committee are:

| Name | Position | Category |
|---|---|---|
| Alicia Velarde Valiente | Chairman | Independent |
| José Borrell Fontelles | Member | Independent |
| Mercedes Gracia Díez | Member | Independent |
| Daniel Alaminos Echarri | Secretary, Non-Member | N/A |

Following the Restructuring EGM, the Audit Committee will be reconstituted with three of the new members of the Board of Directors. The Committee is expected to meet, at least, every quarter, in order to review the Company's interim and annual financial results and certain other public disclosures. In addition, the Committee will meet at the request of any of its members or the Chairman. Committee meetings are deemed quorate by the attendance of a majority of its members and the Committee may pass resolutions by a majority vote. In the event of a tied vote, the Chairman of the Committee has a casting vote.

The Audit Committee is empowered, among other things, to:

(i) Report the annual financial statements, as well as the interim financial statements and ensure that the Board of Directors presents the annual accounts to the General Shareholders' Meeting without limitations or qualifications in the external audit report, supervising the process of preparing and presenting the obligatory financial information.

(ii) Make proposals to the board of directors to select, appoint, re-elect and replace the external auditor, as well as the conditions for engaging the auditor, including regularly reviewing information relating to the audit plan and its execution with the auditor, as well as ensuring its independence in the performance of its duties.

(iii) Monitor the effectiveness of Abengoa's internal audit function and its risk management system, including the tax systems, as well as discussing with the accounts auditor any significant weakness in the internal control system detected during the course of the audit.

(iv) Monitor and opine upon the independence of the auditors once a year before the issuance of their audit report, opining on whether the independence of the auditors has been compromised.

(v) Establish appropriate relations with the external auditor in order to receive information about any issues that may threaten its independence, so that these may be examined by the Audit Committee, and any other matters related to the process of auditing the accounts, as well as any other communications required under accounts auditing legislation and audit regulations. The Committee must always receive the external auditor's annual declaration of independence in relation to the entity(s) directly or indirectly associated with it, as well as information about any type of additional services provided by it and the corresponding fees received by the external auditor from these

entities or by the persons or entities associated with it, in accordance with accounts auditing legislation.

(vi) Inform the General Shareholders' Meeting about issues that arise in relation to matters in the Committee's area of competence

(vii) Report to the Board of Directors in respect of all matters stipulated in law, the Company's bylaws or Board of Directors Regulations, including (i) financial results that the Company shall disclose publicly, (ii) incorporation or acquisition of special purpose entities resident in jurisdictions considered as tax havens, and (iii) related party transactions

***Nomination and Remuneration Committee***

Companies with shares listed on the Spanish Stock Exchanges must have a nomination and remuneration committee (although they are permitted to split each function into a separate committee) regulated by their respective bylaws and the board of directors regulations in terms appropriate to foster such committee's independence.

The Nomination and Remuneration Committee comprises a minimum of three directors, appointed by the Board. Members of the Nomination and Remuneration Committee will serve as members of the Committee for a period of four years unless the Board resolves otherwise. The Nomination and Remuneration Committee of the Board must be made up exclusively of non-executive directors, the majority of whom, at least, must be independent directors. The Board appoints likewise the Chairman of the Nomination and Remuneration Committee, which must be an independent director.

As of the date of this Disclosure Statement, the members of the Nomination and Remuneration Committee are:

| Name | Position | Category |
|---|---|---|
| Mercedes Gracia Díez | Chairman | Independent |
| José Borrell Fontelles | Member | Independent |
| Alicia Velarde Valiente | Member | Independent |
| Juan Carlos Jiménez Lora | Secretary, Non-Member | N/A |

Following the Restructuring EGM, the Nomination and Remuneration Committee will be reconstituted with three of the new members of the Board of Directors. The Committee is expected to meet, at least, once every six months. In addition, the Committee will meet at any time when summoned by the Chairman at the request of any of its members. Committee meetings are deemed quorate by the attendance of a majority of its members and it may pass resolutions by a majority vote. In the event of a tied vote, the Chairman of the Committee has a casting vote.

The Committee has, among others, the following responsibilities:

(i) formulating and reviewing the criteria governing the composition of the Board of Directors and the senior management team, together with the selection of candidates for any vacancies;

(ii) establishing a target of representation for the gender less represented in the Board of Directors and elaborating guidelines on how to achieve it;

(iii) reporting to the Board of Directors in relation to any changes to the senior management team;

(iv) making proposals to the Board of Directors in respect of the appointment, re-election or dismissal of independent directors;

(v) reporting to the Board of Directors in respect of the proposals of appointment, re-election or dismissal of the rest of directors;

(vi) reporting to the Board of Directors in respect of the proposals of appointment or dismissal of members of the senior management and the basic conditions of their contracts;

(vii) examining and organizing the succession of the Company's Chairman and the Chief Executive Officer;

(viii) making proposals to the Board of Directors in respect of the remuneration policy of the members of the Board of Directors and the senior management and the individual remuneration of the executive directors and the rest of their contractual conditions;

(ix) conducting a periodic review of the remuneration of the members of the Board of Directors and the senior management; and

(x) monitoring the adherence to the remuneration policies adopted from time to time.

***Strategy and Technology Committee***

The Strategy and Technology Committee of Abengoa comprises the following four members plus the Secretary to the Strategy and Technology Committee:

| Name | Position |
|---|---|
| José Borrell Fontellés[(1)] | Chairman |
| José Joaquín Abaurre Llorente | Member |
| Ricardo Martinez Rico[(1)] | Member |
| Ana Abaurrea Aya[(2)] | Member |
| Juan Carlos Jiménez Lora | Secretary, Non-Member |

(1) Independent director.

(2) Ms. Ana Abaurrea Aya is nominated by Inayaba, S.L. as its representative.

Following the Restructuring EGM, the Strategy and Technology Committee will be reconstituted with new members of the Board of Directors. The duties and functions of our Strategy and Technology Committee include, among others, analyzing basic matters relating to technology and strategy that can affect Abengoa, including the preparation or assignment of studies on products and services that constitute Abengoa's portfolio. The Committee also informs the board of directors, or its Chairman, about any of these matters that may relate to our strategic and technological development. The Strategy and Technology Committee meets as often as necessary in order to perform its functions.

***Investment Committee***

The Investment Committee of Abengoa was formed in September 2015 and currently comprises the following three members plus the Secretary to the Investment Committee:

| Name | Position |
|---|---|
| Alicia Velarde Valiente[(1)] | Chairman |
| Mercedes Gracia Díez[(1)] | Member |
| Joaquin Fernandez de Piérola Marin | Member |
| Juan Carlos Jiménez Lora | Secretary, Non-Member |

(1) Independent director.

Following the Restructuring EGM, the Investment Committee will be reconstituted with new members of the Board of Directors. The Investment Committee must be composed of at least three directors, a majority of which must be external. The duties and functions of the Investment Committee include controlling and monitoring compliance of our investment projects with suitable guidelines to ensure that we will meet our target financial ratios and making any changes to our dividend policy. The Investment Committee meets as often as necessary in order to perform its functions.

**Family and Other Relationships**

The following directors are the only ones that have been appointed to its position by a Company's major shareholders:

- Mr. José Joaquín Abaurre Llorente, member of the Board of Directors of the Company, has been appointed by Inversion Corporativa, I.C., S.A.

- Mr. Ignacio Solis Guardiola, member of the Board of Directors of the Company, has been appointed by Inversión Corporativa, I.C., S.A.

- Ms. Ana Abaurrea Aya, member of the Board of Directors of the Company, has been appointed by Inversión Corporativa, I.C., S.A.

None of the members of the senior management team has been appointed to its position pursuant to an arrangement or understanding between Abengoa and any of the Company's major shareholders, customers, suppliers or other parties.

**Shareholdings of Directors and Senior Management Team**

None of our directors or members of our senior management is the owner of more than one percent of our Class A Shares or Class B Shares, and no director or member of our senior management has voting rights with respect to our Class A Shares or Class B Shares that are different from any other holder of our Class A Shares or Class B Shares.

**Remuneration and Benefits of Directors and Senior Management**

***Remuneration of Directors***

The salary (both fixed and variable) and allowances paid to the members of the Board of Abengoa in 2015 were €15,757 thousand (€15,833 thousand in 2014 and €15,421 thousand in 2013).

| Joaquín Fernández de Piérola Marín[13] | 23 | | | | | | 23 |
| **Total** | **3,298** | **1,782** | **10,719** | **355** | **8,968** | **7,000** | **15,757** |

(1) Felipe Benjumea Llorente submitted his resignation from his position as director of Abengoa in writing to the Board of Directors on 23 September 2015 as a result of having been removed as Executive Chaiman and as part of certain commitments undertaken by the Company with certain financial entities. The removal of Mr. Felipe Benjumea came about due to a non-negotiable requirement by the underwriting and financial banks within the framework of a capital increase that the Company needed to address. Subsequently, during the third quarter of 2015 until 1 March 2016, he worked as consultant to the Board of Directors, pursuant to the consultancy agreement signed with Abengoa and which was terminated on that same date. Mr. Benjumea Llorente has renounced any sum that he may have been entitled to pursuant to this agreement.

(2) Represented by Mr. José B. Terceiro Lomba. Aplidig, S.L. submitted its resignation as director of Abengoa on 19 January 2015.

(3) Mr. Manuel Sánchez Ortega submitted his resignation from his position as Chief Executive Officer of Abengoa on 18 May 2015, being replaced by Mr. Santiago Seage Medela, and subsequently, on 27 July 2015, also from his position as Company director. Until resigning frok his position as Abengoa director on 27 July 2015, Mr. Sánchez Ortega performed certain duties aimed as facilitating the transition and integration of the new Chief Executive Officer of the Company in terms of the service provision business contract.

(4) Mr. Javier Benjumea Llorente was resigned by the General Shareholders's Meeting held on 30 June 2016.

(5) Mr. José Luis Aya Abaurre passed away on 12 February 2016.

(6) Ms. María Teresa Benjumea Llorente submitted her resignation as Abengoa director on 18 May 2015, subsequently returning to the Board of Directors on 27 July 2015. Finally, on 10 Octoebr 2015, within the framework of the Company's Extraordinary General Shareholders' Meeting held on that same date, she again submitted her resignation as director of Abengoa.

(7) Mr. Claudi Santiago Ponsa submitted his as Abengoa director on 25 May 2016 to the Board of Directors' meeting held on that same date.

(8) Mr. Fernando Solís Guardiola submitted his resignation as Abengoa director on 10 October 2015, within the framework of the Company' Extraordinary General Shareholders' Meeting held on that same date.

(9) Mr. Carlos Sundheim Losada submitted his resignation as Abengoa director on 10 October 2015, within the framework of the Company' Extraordinary General Shareholders' Meeting held on that same date.

(10) Mr. Fornieles Melero was appointed independent director of Abengoa on 19 January 2015, replacing Aplidig, S.L. Subsequently, on 1 March 2016, Mr. Fornieles Melero was appointed Executive Chairman of Abengoa's Board of Directors, replacing Mr. José Domínguez Abascal.

(11) Mr. Seage Medela was appointed director of the Board and Chief Executive of Abengoa on 18 May 2015, replacing Mr. Sánchez Ortega. He subsequently submitted his resignation as Chief Executive of Abengoa and director of the Board on 27 November 2015.

(12) Mr. Domínguez Abascal was appointed proprietary director and non-executive Chairman of Abengoa's Board of Directors on 23 September 2015, replacing Mr. Felipe Benjumea Llorente. Subsequently, on 27 November 2015, Abengoa's Board of Directors approved that Mr. Domínguez Abascal was to be delegated all powers that may be delegated legally and pursuant to the bylaws. Subsequently, on 1 March 2016, Mr. Dominguez Abascal was removed as Executive Chairman of Abengoa's Board of Directors, being replaced by Mr. Fornieles Melero, and from that date on held the position of other external director until 18 April 2016, date on which Mr. Domínguez Abascal submitted his resignation as director of the Company to the Board of Directors' meeting held on that same date.

(13) Mr. Fernández de Piérola Marín was appointed Managing Director of Abengoa, replacing Mr. Seage Medela, on 27 November 2015. Until being appointed Managing Director, Mr. Fernández de Piérola Marín carried out the role of Chairman of the Board of Directors of Abengoa México, S.A. de C.V. Subsequently, on 1 March 2016, Mr. Fernández de Piérola Marín was appointed Chief Executive of Abengoa.

(14) As severance pay due to early termination/post-contractual non-competition agreement.

(15) As a length of service bonus.

(16) This corresponds to fulfillment of the objectives set for the 2014 financial year.

The table above details the remunerations paid to those who were directors at any time in 2015.

For the year 2016, the remuneration policy of the Company is the one approved by the General Shareholders' Meeting on 29 March 2015 in item 7.1. of its agenda, which was approved to apply for the years 2015, 2016 and 2017.

***Remuneration of Senior Management***

The Company expects the remuneration of the senior management team for the year 2016 to be in line with their remuneration of prior years, subject to any proposals of the Remuneration and Nomination Committee as referred to below.

***Agreements Providing for Benefits upon Termination***

Except for agreements entered into with certain of our executive directors, there are no agreements with members of the administrative staff, management or supervisory bodies of Abengoa or any of its subsidiaries, which provide for severance, bonuses or staying bonuses due to individuals upon their termination.

In accordance with Article 249 of the Spanish Companies Act, agreements entered into during 2015 with certain of our directors provided for severance payments equivalent to 100% of the remuneration received by each director during the year preceding termination, both in cases of early termination of such director’s contractual

relationship, which is not justified by a breach of their respective obligations nor is solely voluntarily, and as consideration for the directors' agreement not to compete with us for a period of twelve months (twenty four months in case of voluntary resignation by such director), subject to each director's effective compliance with such director's obligations under their respective agreements. If a director breaches the non-competition agreement, such director shall pay us a penalty equal to 100% of the compensation individually received during the preceding year.

However, a director receiving compensation for early retirement will not be entitled to receive additional compensation for the non-competition agreement.

In addition, the agreements entered into in 2015, following the favourable report of the Appointments and Remuneration Committee and the approval of the Company's Board of Directors, with the former Executive Chairman of the Company's Board of Directors, Mr. Felipe Benjumea Llorente, and with the former Chief Executive Officer of the Company, Mr. Manuel Sánchez Ortega, provided for an additional €7 million and €3 million in compensation, respectively, which were conditional upon their tenure in these roles until they reach the age of sixty-five. Those payments would also fully accrue in the event of such directors' early termination for reasons beyond their control or otherwise not attributable to such directors' breach, including in the event of permanent disability or death of the director.

Those additional payments were made effective during 2015 following the early termination of both the Executive Chairman of the Company's Board of Directors and the Chief Executive Officer of the Company.

**Other Remuneration for Directors and Senior Management**

***Extraordinary Variable Compensation Plans***

There are currently two extraordinary long-term variable remuneration plans for executive directors and officers.

*Extraordinary Variable Remuneration Plan for Executive Directors and Officers—January 2014*

January 2014, the board of directors, at the proposal of the Appointments and Remuneration Committee, unanimously approved a four-year variable remuneration plan (the "**January 2014 Plan**"), which replaces and cancels the extraordinary plan previously approved in February 2011.

The January 2014 Plan, which includes Mr. Joaquín Fernández de Piérola, among other senior managers, expires on December 31, 2017 and is designed to help achieve the objectives set forth in our strategic plans at an individual level. The January 2014 Plan requires beneficiaries to remain with the Company for the corresponding period and for the average price of Abengoa's Class B shares during the last three months of 2017 to be higher than a specific value.

*Extraordinary Variable Remuneration Plan for Managers—July 2014*

In July 2014, the board of directors, at the proposal of the Appointments and Remuneration Committee, unanimously approved a five-year variable remuneration plan (the "**July 2014 Plan**").

The July 2014 Plan, which includes Mr. Joaquín Fernández de Piérola, among other senior managers, expires on December 31, 2018 and accrues 20% annually. Its purpose is to incentivize certain executive directors and officers to stay with the Company or to achieve specific personal objectives. The plan requires the beneficiary to be employed by the Company for the corresponding period and for the average price of Abengoa's Class B shares during the last three months of 2018 to be higher than a specific value.

At the end of the 2015 financial year, the recognized accumulated expenses regarding both plans were reversed due to considering compliance with all of the requirements established unlikely as a result of the situation the Company was facing.

**Conflicts of Interests and Other Information**

As far as the Company is aware:

- according to the information to be disclosed in compliance with articles 229 to 231 of Spanish Companies Act, there are no potential conflicts of interests between any duties of the members of the Board or of the senior management team and their respective private interests; and

- none of the directors or members of the senior management have, in the five years preceding the date hereof, (i) been sentenced for the commission of any fraudulent offences, (ii) have served as directors or senior managers of any entity declared insolvent or having filed for bankruptcy, receivership or any other form of involuntary liquidation or (iii) been disqualified by a court from acting as a member of the administrative, management or supervisory bodies of an issuer or from acting in the management or conduct of the affairs of any issuer.

Save as for the information set forth in section "*Business—Legal Proceedings*", none of the Directors or Senior Managers have been publicly incriminated or sanctioned by any statutory or regulatory authorities (including designated professional bodies).

**Corporate Governance**

The Spanish Companies Act sets out certain legal provisions related to corporate governance mandatorily applicable to Spanish listed companies on the Spanish Stock Exchanges. We believe that we comply with the requirements of the Spanish Companies Act.

Additionally, the Spanish Corporate Governance Code for Listed Companies (*Código de buen gobierno de las sociedades cotizadas*) approved by the CNMV in February 2015 (the "**Corporate Governance Code**") sets out certain recommendations on corporate governance to be considered ("comply or explain") by companies listed on the Spanish Stock Exchanges. The Company believes that it substantially complies with the recommendations of the Corporate Governance Code. The Company is committed to follow strict corporate governance policies.

However, the Company's internal corporate governance rules established in its bylaws, Board of Directors Regulations, General Shareholders' Meeting Regulations, Regulations of the Audit Committee and Regulations of the Appointments and Remunerations Committee, as well as its corporate practices vary from these recommendations in the following ways:

- Recommendation 5 sets forth that the board of directors shall not raise to the general meeting a delegation of faculties proposal (*propuesta de delegación de facultades*) in order to issue new shares excluding pre-emption rights in favor the shareholders, for the amount of 20% of the share capital. In case the general meeting accepts such proposal, it shall be published in the Company's web page. The delegation of faculties proposal presented in 2015, a report on which was published in the Company's website, did not comply with this recommendation. However, there was no such proposal in 2016 General Shareholders' Meeting held on 30 June 2016.

- Recommendation 7 sets forth that the Company should broad cast its general meetings live on the corporate website. The Company does not comply with this recommendation although it considers it gives sufficient publicity to the General Shareholders Meetings and facilitates the participation of all shareholders in such meetings.

- Recommendation 48 sets forth that large cap companies should have separate Appointments and Remunerations Committees. The Company does not comply with this recommendation since the issues to be dealt with in each committee would be closely linked.

- Recommendation 52 sets forth that the board of directors regulation contains the rules of composition and functioning of the supervision and control commissions. The Company comply with all of this recommendations except from all directors shall be non-executive. In this regard, one director of the Investment Committee is an executive one.

- Recommendation 59 sets forth that the variable component of the remuneration shall be paid in a specific time frame. The Company does not comply with this requirement due to its current financial status.

- Recommendation 61 sets forth a relevant stake of the variable remuneration is paid in shares or finance instrument of the Company. The remuneration of the executive directors does not consists on the payment through shares or finance instruments of the Company.

The Board of Directors will prepare an annual corporate governance report. The report will be announced through the publication by the Company of a relevant fact notice (*hecho relevante*).

**Code of Conduct**

Article 225 of the Spanish Securities Markets Act provides that a listed company must draw up, file with the CNMV and adhere to an internal code of conduct (*Reglamento Interno de Conducta*) which must include the provisions of articles 228 and 230 of the aforementioned Act and of their secondary legislation. A written commitment must also be filed to update those internal codes of conduct and a statement that their content is known, understood and accepted by all persons to whom they apply within the organization. In those cases where the content of a code fails to comply with the aforementioned provisions or is inappropriate to the nature of the relevant company or to the combination of activities undertaken by the company or group, the CNMV may demand that such amendments or additions as it deems necessary be incorporated into such code.

The Board, in its meeting held on 18 May 2015 approved Abengoa's internal code of conduct regarding matters relating to the securities market (the "**Code of Conduct**"). The Code of Conduct will apply to the directors, senior management and those employees having access regularly or on a case-by-case basis to inside information.

The Code of Conduct provides rules concerning, among other things:

- The confidential treatment, use and disclosure of inside information by persons subject to the Code of Conduct.

- The restrictions and reporting obligations applicable to trading activities undertaken by persons subject to the Code of Conduct on the securities or on financial instruments whose underlying asset are the securities.

- The restrictions applicable to trading activities undertaken by us on the securities in the open market.

- The prohibition of transactions resulting in market manipulation on the Company's securities.
