Management Policies and Business Results

1. Management Policy

(1) Basic Management Policy and Managerial Tasks

On the basis of the ‘*@ction21 “A” PLAN*’ unveiled in November 2001, Marubeni has pursued ever-higher profits in core business areas, reduced expenses, and restored profitability to profits in unprofitable business areas. These efforts have allowed the Company to obtain consolidated net income of 30 billion yen and less than 2.5 trillion yen in consolidated interest-bearing debt, both of which numbered among the numerical targets set under the above plan.

Now, the Company plans to take its profitability and vitality, which were successfully regenerated under the ‘*@ction21 “A” PLAN*’, to the next level. To this end, the Company will embark upon a new three-year medium-term management plan: the “V” PLAN.’

Under the “V” PLAN, the Company will take as its basic management policy the creation of a robust corporate group composed of portfolio units at the very forefront of their respective industries. Under the auspices of the new plan, risk assets will be reduced and replaced to superior assets, a move expected to make a positive contribution to profit margins. Numerical targets have been set as follows: consolidated net income of 50 billion yen, net interest-bearing debt down to less than 2 trillion yen, and net debt-to-equity ratio down to four to five times or less. Alongside, during the period of implementing the “V” PLAN, the Company plans its capital enhancement. A partial modification of articles of incorporation to enable the Company to issue preferred stocks will be brought up at the regular general shareholders’ meeting held in June 2003, allowing the Company to have additional options to make flexible and swift decisions on its capital structure.

Moreover, the Company will implement business strategies tailored to the demands of individual business models, simultaneously ensuring that the utmost emphasis is placed upon risk-return considerations and cash flows. These measures will introduce a new level of robustness to management practices. The positioning of PATRAC (Profit After Tax Less Risk Asset Cost) as the most important performance indicator will continue to be instrumental in this respect, ensuring as it does the pursuit of returns commensurate with the risks involved in a given business. At the same time, selection and concentration will be based upon a system in which portfolio units act as compact consolidated management entities. This business model will give rise to further progress in improving financial structures and reinforcing the Company’s profit base.

Marubeni considers compliance with pertinent laws and regulations to be its most important responsibility to society. Hence the establishment of a Compliance Committee and the production of a Compliance Manual during FY2002, steps taken to bolster compliance structures throughout the entire Marubeni Group.

(2) Marubeni's Policy for Corporate Governance

In order to realize open management to society and shareholders, Marubeni will strengthen Corporate Governance and undertake effective and transparent management by:

- Shortening Board Members' term of office from 2 years to 1 year
- Introducing an "Advisory Committee", including external advisors
- Including an external Corporate Auditor to the current Management Remuneration Committee
- Establishing an Auditors' Office in order to strengthen auditors' function

(3) Dividend for FY2002

Providing shareholders with steady dividend payments ranks alongside improving shareholders' equity as one of the important corporate responsibilities. For the last three fiscal years, from FY1999 to FY2001, however, the Company had forgone the payment of cash dividends, in order to prioritize improvement of shareholders' equity.

As for FY2002, the Company plans to pay year-end cash dividends of 3.00 yen per share, as the financial targets set in '*@ction21 "A" PLAN*' have been achieved.

The Company also plans to pay year-end cash dividends of 3.00 yen per share for FY2003.

Financial Results and Conditions

1. Financial Results

Business Environment

During the year under review, the U.S. economy witnessed a slowdown in the recovery in capital investment, but consumer spending made moderate gains in the first half of 2002 thanks to an environment of low interest rates and continued high prices in the housing market, which supported a wealth effect. However, the second half of the year was adversely influenced by falling stock prices and a drop off in improved employment rates, both brought on by a series of highly publicized accounting irregularities at major corporations and stagnation in corporate profits. As a result, business and consumers sentiment worsened and the pace of economic recovery slowed. This situation was exacerbated in the early months of 2003 by increasing international tension related to the situation in Iraq. Concerns among enterprises and households regarding further slowing of the economy heightened as a result.

In Europe, mandatory fiscal constraints by countries having already adopted the euro prevented the adoption of proactive economic policies. This resulted in Germany and other European countries suffering from stock market slumps and layoffs. Predictably, consumer spending fell and as a consequence domestic demand within Europe itself stagnated. Overall growth rates failed to improve significantly from the low figures of the previous year.

In Asia, exports and domestic demand made significant gains in South Korea, Thailand and Malaysia as part of vigorous economic expansion. The Indonesian economy benefited from a consumer-led recovery, with Taiwan and Singapore making similar progress on the back of strong exports. Exports to the U.S. by NIEs and ASEAN countries slowed somewhat from the summer onwards, but exports to China and other Asian countries were steady. Chinese exports continued their strong performance, with internal Chinese demand also benefiting from direct capital influxes. As a consequence, total growth for China in FY2002 came to 8%.

The Russian economy made a strong showing during the year under review due to rising crude oil prices. In contrast, the financial market disruptions and stagnation troubling the economies of Argentina and Brazil showed no signs of abating.

The Japanese economy finally started to show signs of turning the corner on the road to recovery thanks to strong exports. However, consumer spending continued its flat trajectory and the dynamism previously shown by capital investments disappeared due to the troubling employment situation and lower income levels that currently prevail in Japan. A full-scale economic recovery was delayed yet again as a result. From the autumn of 2002 onwards, exports and production levels peaked and the economy headed lower. The Bank of Japan continued its quantitative easing policy in the face of ongoing deflation, but this failed to result in an increased level of lending on the part of financial institutions. The Nikkei 225 Stock Average at the end of March 2003 actually constituted a 21-year low, and was representative of the continuing difficulties and instability faced by financial markets.

Consolidated Financial Results

The summary of consolidated financial results for this term is as follows:

	FY2002	FY2001	(billions of yen)	
			Variance	
			Amount	%

Overseas Corporate Subsidiaries and Branches	1,065.4	1,100.1	-34.7	72.8	74.7	-1.9
Corporate and Elimination etc.	-451.3	-251.9	-199.4	-4.6	7.3	-11.9
Consolidated	8,793.3	8,972.2	-178.9	424.6	436.8	-12.2

IT Business transactions fell 17.3%, or 81.0 billion yen over the previous year as a result of weakness in submarine cable-related business in Asia and a general decline in the PC market. Gross trading profit in this area fell 1.9%, or 0.6 billion yen.

Utility and Infrastructure sales increased 27.9%, or 92.1 billion yen as a result of orders in Southeast Asian power generation and Near and Middle East water pipe projects. Resultantly, gross trading profit increased 12.0%, or 1.3 billion yen in line with the increased sales.

Plant & Ship transactions rose 22.6%, or 135.8 billion yen, over the previous year. These strong results were due to an increase in energy and chemical plant contracts secured mainly in Africa and the Near and Middle East. Complementing this strong performance was a withdrawal from unprofitable businesses in the U.S., which helped to take gross trading profit up 35.3%, or 3.6 billion yen.

Transportation and Industrial Machinery transactions benefited mainly from an upsurge in aircraft-related business, rising 0.3%, or 2.4 billion yen, over the previous year. Due both to this and favourable progress in the industrial machinery business, gross trading profit rose 3.6%, or 1.9 billion yen.

Energy transactions grew due to a rise in oil-related transactions, forcing total sales in the area up 5.1%, or 112.8 billion yen. However, a fall in profits from oil-related businesses brought gross trading profit down 2.2%, or 0.7 billion yen.

Metals and Mineral Resources transactions suffered from falling prices in the non-ferrous light metals market, dropping 7.1% or 33.8 billion yen over the previous year. This took gross trading profit down 4.1%, or 0.6 billion yen.

Chemicals transactions were buoyed up by the rise in the price of crude oil and naphtha, with sales of organic and synthetic fibre materials growing to push total sales up 5.8%, or 31.1 billion yen. Gross trading profit also benefited from growth in polyvinyl chloride alkali sales, improving on last year's figure by 2.0%, or 0.6 billion yen.

Forest Products and General Merchandise transactions rose 2.4%, or 17.3 billion yen. Factors here were growth in natural rubber sales and a return to form in the plywood market, which more than offset declines in wood-chip and domestic paper transactions. Gross trading profit rose 1.0%, or 0.4 billion yen as a consequence of cost reduction initiatives in the paper business and attendant gains in profitability.

Agri-marine Products transactions fell 2.0% over the previous year, or 21.3 billion yen as seafood business volume fell. This unfavourable trend combined with the removal from the scope of consolidation of an oil-expressing subsidiary to bring gross trading profit down 2.8% over the previous year, or 1.7 billion yen.

Textile transactions fell 15.5%, or 68.1 billion yen, due to stagnation in the domestic market and a review of low-profit transactions. These factors resulted in gross trading profit declining 12.9%, or 3.6 billion yen.

Development and Construction transactions rose 0.5%, or 0.9 billion yen, over the previous year, as growth in domestic housing projects outweighed a contraction in installation contracts. Improved profit margins were an additional factor in taking gross trading profit up 5.7%, or 1.8 billion yen.

Finance and Logistics Business transactions dropped 18.6%, or 8.6 billion yen, as a result of the removal from the scope of consolidation of certain subsidiaries operating in lease-related businesses. Gross trading profit fell 3.7%, or 0.3 billion yen.

Domestic Branches and Offices transactions fell 41.8%, or 124.4 billion yen, due to the transfer of iron & steel businesses to Marubeni-Itochu Steel Inc. Gross trading profit declined 7.7%, or 0.5 billion yen.

Overseas Corporate Subsidiaries and Branches transactions dropped 3.2%, or 34.7 billion yen, due to the abovementioned transfer of iron & steel businesses to Marubeni-Itochu Steel Inc. Gross trading profit dropped 2.5%, or 1.9 billion yen.

As a result of the above factors, gross trading profit fell 2.8%, or 12.2 billion yen to 424.6 billion yen. However, operating profit climbed 72.6 billion yen to 73.4 billion yen as a consequence of vigilant cost-reduction initiatives reduced selling, general and administrative expenses and a provision for doubtful accounts made in the previous fiscal year to prevent against possible future losses.

Income before income taxes and equity in earnings rose 33.2 billion yen to 198.3 billion yen. The abovementioned increase in operating profit was one factor here, with another being the recording in the previous fiscal year of significant evaluation losses on investment securities and fixed assets.

Income after income taxes and equity in earnings (adopting income tax effects) rose 114.4 billion yen, over the previous year to come to 16.9 billion yen.

Net income rose 146.7 billion yen, to 30.3 billion yen due to the previous year's negative equity in earnings of affiliated companies improving by 32.4 billion yen.

2. Financial Condition

Consolidated Financial Conditions

A summary of consolidated balance sheets at year-end were as follows:

(billions of yen)

	March 31,2003	March 31,2002	Change
Total assets	4,321.5	4,805.7	- 484.2
Shareholders' equity	260.1	263.9	- 3.8
Interest-bearing debt	2,745.0	3,184.9	- 439.9
Net interest-bearing debt (Net debt-equity ratio)	2,264.1 8.71 times	2,712.9 10.28 times	- 448.8 - 1.57 points

	March 31,2003	March 31,2002	Change
Net interest-bearing debt after factoring out impact of FAS No.133 (Net debt-to-equity ratio)	2,223.1 8.55 times	2,673.2 10.13 times	- 450.1 - 1.58 points

Consolidated total assets fell 484.2 billion yen to 4,321.5 billion yen, over the end of the previous fiscal year due to a review of low-profit transactions, business reorganization, and sale of various assets. **Consolidated interest-bearing debt** fell in accordance with the decrease in total assets, dropping 439.9 billion yen, to 2,745.0 billion yen. Net interest-bearing debt after deducting cash and cash equivalents was down 448.8 billion yen to 2,264.1 billion yen. In spite of the net income that was recorded for the year, **shareholders' equity** fell 3.8 billion yen, to 260.1 billion yen due to a decrease in accumulated other comprehensive income (loss). As a consequence, the **net debt-to-equity ratio** improved 1.57 points over the previous year-end of 10.28 times to 8.71 times.

Net cash provided by operating activities came to 194.8 billion yen as a result of the greater efficiency brought on by streamlining receivables and inventories. **Net cash provided by investing activities** rose 38.7 billion yen over the previous year to 113.2 billion yen due to sales and redemption of marketable and investment securities and the collection of loans receivable. Accordingly, **free cash inflow** for the year came to 308.0 billion yen (increase).

Net cash used in financing activities was 294.0 billion yen (decrease), after the abovementioned free cash inflow was applied to reduce interest-bearing debts. **Cash and cash equivalents** at year-end fell 0.1 billion yen over the previous year to 466.5 billion yen.

Employees' Retirement Benefits

The company and certain of its subsidiaries have unfunded lump-sum retirement plans which, in general, cover all employees other than directors. In addition, the Company and certain of its subsidiaries have contributory and non-contributory funded pension plans with independent trustee for covering eligible employees. Under the terms of the lump-sum retirement plans, eligible employees are entitled under most circumstances, upon mandatory retirement or earlier voluntary severance, to indemnities based on their compensation as of the date of severance and years of service.

Effective April 1, 1991, the Company amended its contributory funded pension plan to combine the plan with the pension benefits normally provided under the Welfare Pension Insurance Law of Japan. The combined welfare pension plan, in general, covers all employees and provides for pension payments commencing at age 60 or lump-sum payments upon severance.

The Company and certain of its subsidiaries apply Statement of Financial Accounting Standards No.87, "Employers' Accounting for Pensions", for their unfunded lump-sum retirement plans and contributory funded pension plans.

The net amount recognized in the consolidated balance sheets of the Company and certain subsidiaries at March 31, 2003 and 2002 were as follows:

	(millions of yen)	
	March 31, 2003	March 31, 2002
Net amount recognized	109,183	84,173
Prepaid benefit cost (current)	1,642	859
Prepaid benefit cost (non-current)	113,005	93,829
Accrued benefit liability	-9,571	-12,893
Intangible assets	3,032	1,999
Accumulated other comprehensive income, gross of tax	1,075	379

The components of net pension expense of the Company and certain subsidiaries' plans for the years ended March 31, 2003 and 2002 were as follows:

	(millions of yen)	
	FY2002	FY2001
Net pension expense	11,880	14,406

The discount rates and weighted average rates of increases in future salary levels used in determining the actuarial present value of the projected benefit obligation and the expected long-term rates of return on plan assets for the years ended March 31, 2003 and 2002 were as follows:

	FY2002	FY2001
Discount rates	2.5%	3.0%
Weighted average rates of increases in future salary levels	3.3%	3.3%
Expected long-term rates of return on plan assets	3.0%	3.0%

For this period, the Company decided to submit a request for an approval to Japan's Ministry of Health, Labour and Welfare, for return of so-called "substitutional portion" (the portion that the Company operates on behalf of the Japanese Government) of Marubeni Pension Fund, introduction to the participants of cash balance pension plan and reduction of pension payment to certain beneficiaries from April 2003.

The Company obtained approval from Japan's Minister of Health, Labour and Welfare for exemption from the future benefit obligation with respect to the substitutional portion of the Marubeni Pension Fund on April 15, 2003.

The relevant one-time profit may be recognized only on the settlement of substitutional portion when the Company returns the past benefit obligation to the Government, according to Emerging Issues Task Force 03-2 "Accounting for the Transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities"
